(11) Provide satisfactory assurance that fiscal control and fund accounting procedures will be adopted as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid under this part to the tribal organization, including any funds paid by the tribal organization to a recipient of a grant or contract.

45 CFR 1326.19 * * * The application shall provide that:

(d) Assurances as prescribed by the Assistant Secretary that:

(1) A tribal organization represents at least 50 individuals who have attained 60 years of age or older;

(2) A tribal organization shall comply with all applicable State and local license and safety requirements for the provision of those services;

(3) If a substantial number of the older Indians residing in the service area are of limited English-speaking ability, the tribal organization shall utilize the services of workers who are fluent in the language spoken by a predominant number of older Indians;

(4) Procedures to ensure that all services under this part are provided without use of any means tests;

(5) A tribal organization shall comply with all requirements set forth in § 1326.7 through § 1326.17; and

(6) The services provided under this part will be coordinated, where applicable, with services provided under title III of the Act.

Consortium Agreement

It is agreed by all participating Principal Officials that coordination of services, without duplication within a specified geographic area, has been developed between the two or more Tribal Organizations applying for this grant. The application and map of service area reflect this understanding.

U.S. Department of Health and Human Services Certification Regarding Drug-Free Workplace Requirements—Grantees Other Than Individuals

By signing and/or submitting this application or grant agreement, the grantee is providing the certification set out below.

This certification is required by regulations implementing the Drug-Free Workplace Act Of 1988, 45 CFR Part 76, Subpart F. The regulations, published in the May 25, 1990 Federal Register, require certification by grantees that they will maintain a drug-free workplace. The certification set out below is a material representation of fact upon which reliance will be placed when the Department of Health and Human Services (HHS) determines to award the grant. If it is later determined that the grantee knowingly rendered a false certification, or otherwise violates the requirements of the Drug-Free Workplace Act, HHS, in addition to any other remedies available to the Federal Government, may take action authorized under the Drug-Free Workplace Act. False certification or violation of the certification shall be grounds for suspension of payments, suspension or termination of grants, or government wide suspension or debarment.

Workplaces under grants, for grantees other than individuals, need not be identified on the certification. If known, they may be identified in the grant application. If the grantee does not identify the workplaces at the time of application, or upon award, if there is no application, the grantee must keep the identity of the workplace(s) on file in its office and make the information available for Federal inspection. Failure to identify all known workplaces constitutes a violation of the grantee's drug-free workplace requirements.

Workplace identifications must include the actual address of buildings (or parts of buildings) or other sites where work under the grant takes place. Categorical descriptions may be used (e.g., all vehicles of a mass transit authority or State highway department while in operation, State employees in each local unemployment office, performers in concert halls or radio studies.)

If the workplace identified to HHS changes during the performance of the grant, the grantee shall inform the agency of the change(s), if it previously identified the workplaces in question (see above).

Definitions of terms in the Nonprocurement Suspension and Debarment common rule and Drug-Free Workplace common rule apply to this certification. Grantees' attention is called, in particular, to the following definitions from these rules:

"Controlled substance" means a controlled substance in Schedules I through V of the Controlled Substances Act (21 U.S.C. 812) and as further defined by regulation (21 CFR 1308.11 through 1308.15).

"Conviction" means a finding of guilt (including a plea of nolo contendere) or imposition of sentence, or both, by any judicial body charged with the responsibility to determine violations of the Federal or State criminal drug statutes;

"Criminal drug statute" means a Federal or non-Federal criminal statute involving the manufacture, distribution, dispensing, use, or possession of any controlled substance;

"Employee" means the employee of a grantee directly engaged in the performance of work under a grant, including (i) All "direct charge" employees; (ii) all "indirect charge" employees unless their impact or involvement is insignificant to the performance of the grant; and, (iii) temporary personnel and consultants who are directly engaged in the performance of work under the grant and who are on the grantee's payroll. This definition does not include workers not on the payroll of the grantee (e.g., volunteers, even if used to meet a matching requirement; consultants or independent contractors not on the grantee's payroll or employees of subrecipients or subcontractors in covered workplaces).

The grantee certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an ongoing drug-free awareness program to inform employees about:

(1) The dangers of drug abuse in the workplace; (2) The grantee's policy of maintaining a drug-free workplace; (3) Any available drug counseling, rehabilitation, and employee assistance programs, and, (4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will:

(1) Abide by the terms of the statement; and, (2) Notify the employer in writing of his or her conviction for a violation or a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency in writing, within ten calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, of every grant officer or other designee on whose grant activity the convicted employee was working unless the Federal agency has designated a central point for the receipt of such notices. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted:

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or, (2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e) and (f).

The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant (Use attachments, if needed):

Place of Performance (Street address, City, County, State, ZIP Code) ______________
Check ______ if there are workplaces on file that are not identified here.

Sections 76.630 (c) and (d)(2) and 76.635 (a)(1) and (b) provide that a Federal agency may designate a central receipt point for STATE-WIDE AND STATE AGENCY-WIDE certifications, and for notification of criminal drug convictions. For the Department of Health and Human Services, the, central receipt point is: Division of Grants Management and Oversight, Office of Management and Acquisition, Department of Health and Human Services, Room 517-D, 200 Independence Avenue, SW., Washington, DC 20201.

DGMO Form #2 Revised May 1990

Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions

By signing and submitting this proposal, the applicant, defined as the primary participant in accordance with 45 CFR Part 76, certifies to the best of its knowledge and belief that its principals involved:

(a) are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department of agency;

(b) have not within a 3-year period preceding this proposal been convicted of or had a civil judgement rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery falsification or destruction of records, making false statements, or receiving stolen property;

(c) are not presently indicted or otherwise criminally or civilly charged by a government entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (1) (b) of this certification; and

(d) have not within a 3-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

The inability of a person to provide the certification required above will not necessarily result in denial of participation for this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the Department of Health and Human Services" (HHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

The prospective primary participant agrees that by submitting this proposal, it will include the clause entitled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion—Lower Tier Covered Transactions", provided below, without modification in all lower tier covered transactions and in all solicitations for lower tier covered actions.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusions—Lower Tier Covered Transactions (To Be Supplied to lower Tier Participants)

By signing and submitting this lower tier proposal, the prospective lower tier participant, as defined in 45 CFR Part 76, certifies to the best of its knowledge and belief that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(b) Where the prospective lower tier participant is unable to certify to any of the above, such prospective participants shall attach an explanation to this proposal.

The prospective lower tier participant further agrees by submitting this proposal that it will include this clause entitled "Certification Regarding Debarment, suspension, Ineligibility and Voluntary Exclusions—Lower Tier Covered Transactions" without modification in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

Certification Regarding Lobbying

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan or cooperative agreement, the undersigned shall complete and submit Standard Form–LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

BILLING CODE 4130–01–M

Food and Drug Administration

[Docket No. 95M-0240]

Wesley-Jessen; Premarket Approval of Wesley-Jessen® COE–405 Disinfection Tablet

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Wesley-Jessen, Des Plaines, IL, for premarket approval, under the Federal Food, Drug, and Cosmetic Act (the act), of the Wesley-Jessen® COE–405 Disinfection Tablet. FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter on June 7, 1995, of the approval of the application.

DATES: Petitions for administrative review by October 6, 1995.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David M. Whipple, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–594–1744.

SUPPLEMENTARY INFORMATION: On February 13, 1991, Wesley-Jessen, Des Plaines, IL 60018, submitted to CDRH an application for premarket approval of Wesley-Jessen® COE–405 Disinfection Tablet. When the Wesley-Jessen® COE–405 Disinfection Tablet is dissolved in a sterile contact lens saline solution, the solution is indicated for use in the chemical (not heat) disinfection of soft (hydrophilic) contact lenses.

In accordance with the provisions of section 515(c)(2) of the act (21 U.S.C. 360e(c)(2)) as amended by the Safe Medical Devices Act of 1990, this premarket approval application (PMA) was not referred to the Ophthalmic Devices Panel of the Medical Devices Advisory Committee, an FDA advisory committee, for review and recommendation because the information in the PMA substantially duplicates information previously reviewed by this panel.

On June 7, 1995, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act, for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before October 6, 1995, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: August 24, 1995.

Joseph A. Levitt,

Deputy Director for Regulations Policy, Center for Devices and Radiological Health.

[FR Doc. 95–21973 Filed 9–5–95; 8:45 am]

BILLING CODE 4160–01–F

Health Care Financing Administration

[BPO–133–PN]

Medicare Program; Data, Standards, and Methodology Used to Establish Fiscal Year 1996 Budgets for Fiscal Intermediaries and Carriers

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed notice.

SUMMARY: This notice describes the data, standards, and methodology that would be used to establish fiscal intermediary and carrier budgets for the Federal fiscal year (FY) 1996, that begins October 1, 1995. Fiscal intermediaries and carriers are public or private entities that participate in the administration of the Medicare program by performing claims processing and benefit payment functions. This notice is published in accordance with sections 1816(c)(1) and 1842(c)(1) of the Social Security Act, which require us to publish for public comment the data, standards, and methodology we intend to use to establish budgets for Medicare fiscal intermediaries and carriers.

In addition, we respond to the single public comment we received in response to our proposed notice of October 21, 1994, and we announce the data, standards, and methodology we proposed to use to establish the Medicare fiscal intermediary and carrier budgets for FY 1995, beginning October 1, 1994, as final.

DATES: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on November 6, 1995.

ADDRESSES: Mail written comments (1 original and 3 copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPO–133–PN, P.O. Box 26676, Baltimore, MD 21207.

If you prefer, you may deliver your comments (1 original and 3 copies) to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, or
Room C5–09–26, 7500 Security Boulevard, Baltimore, MD 21244–1850.

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code BPO–133–PN. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in Room 309–G of the Department's offices at 200 Independence Avenue, SW, Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 690–7890).

FOR FURTHER INFORMATION CONTACT: Leslie Trazzi, (410) 786–7544

SUPPLEMENTAL INFORMATION:

I. Background

Preparation of Contractor Budgets—Under sections 1816(a) and 1842(a) of the Social Security Act (the Act), public or private organizations and agencies may participate in the administration of the Medicare program under agreements or contracts entered into with the Secretary. These Medicare contractors are known as fiscal intermediaries (section 1816(a) of the Act) and carriers (section 1842(a) of the Act). Fiscal intermediaries perform bill processing and benefit payment functions for Part A of the program (Hospital Insurance), and carriers perform claim processing and benefit payment functions for Part B of the program (Supplementary Medical Insurance). When bills are submitted by providers, and claims by beneficiaries, physicians, and suppliers of services, fiscal intermediaries and carriers are responsible for—

- Determining the eligibility status of a beneficiary;
- Determining whether the services on the submitted claims or bills are covered under Medicare and, if so, the correct payment amounts; and
- Making appropriate payments to the provider, beneficiary, physician, and/or other supplier of services.

Fiscal intermediary and carrier performance is monitored by us at the central office staff and regional office levels. In general, the central office staff address issues that affect policies on a national level, and the regional office staff address issues dealing with regional and local policies, as well as those of an operational nature. Continuous communication between us and the fiscal intermediaries and carriers is maintained through consultation workgroups that meet on a regular basis and are comprised of representatives from the central office, regional offices, and Medicare contractors.

HCFA's central office is responsible for developing a national contractor budget for Part A and Part B of the Medicare program. The budget is formulated over an 18-month period, beginning in March of the calendar year preceding the fiscal year to which it applies. The central office receives input from the contractor community, our regional offices, the Department of Health and Human Services, and the Office of Management and Budget (OMB) before the budget is submitted to the President for approval and forwarding to the Congress. Once the national contractor budget has been approved, we issue Budget and Performance Requirements (BPRs). BPRs specify the level of effort required for contractor functions and serve as the statement of work for contractor use in preparing their individual budgets for submission to us.

The regional offices review the budgets submitted by contractors during a budget level determination process that is based on current claims processing trends, legislative mandates, administrative initiatives, current year performance standards and criteria, and the availability of funds appropriated by the Congress. Subsequently, we allocate funding within these constraints.

Requirements to Publish Contractor Budget Information—Sections 1816(c)(1) and 1842(c)(1)(A) of the Act require us to publish for public comment the data, standards, and methodology we intend to use to establish budgets for Medicare fiscal intermediaries and carriers at least 90 days before September 1. The statute further requires that we publish the final data, standards, and methodology no later than September 1. In the past, when preparing the Medicare contractor budget for each fiscal year, every attempt was made to publish the proposed and final notices as timely as possible. However, because of the time involved in developing the budget and the lengthy review and clearance process, we have been unable to publish both proposed and final notices before the beginning of the fiscal year. (See, for example, the notices for FYs 1993 and 1994 published in the **Federal Register** at 59 FR 13491 and 35933.) However, because of our continuous communications with contractors, we do not believe that the publication date of the **Federal Register** document has any negative effect on the fiscal intermediaries or carriers. The BPRs issued to all intermediaries and carriers discuss in detail the work, level of effort, and activities we expect them to perform in the coming fiscal year. Further, we provide a discussion and explanation of the bottom-line unit cost target established for each intermediary and carrier at the time the BPRs are issued.

Sections II and III of this notice contain proposed data, standards, and methodology we intend to use to establish budgets for Medicare fiscal intermediaries and carriers for FY 1996. If comments are received during the comment period, we will address those comments in a final notice and, if necessary, make revisions to the FY 1996 data, standards, and methodology. If no comments are received, the data, standards, and methodology proposed for FY 1996 will become final, effective October 1, 1995.

FY 1995 Budget Information—A proposed notice describing the data, standards, and methodology we proposed to use to establish contractor budgets for FY 1995 was published in the **Federal Register** (59 53187) on October 21, 1994. In response to our request for public comment in the proposed notice, we received one timely item of correspondence. Based on our review of the comment submitted, we are making no changes to the data, standards, and methodology we proposed to use. As noted earlier, it has been our practice to issue separate notices dealing with proposed and final budget data. Because no changes are being made to the proposed budget data included in the October 21 notice, we believe it appropriate to combine in this document the final notice announcing the contractor budget for FY 1995, and the proposed contractor budget elements for FY 1996. Therefore, through this notice, we announce that the data, standards, and methodology we proposed to use to establish the contractor budget for FY 1995 are final.

A discussion of the October 21, 1994, proposed notice and our response to the public comment received appears in section IV. of this document.

II. Overview of FY 1996 National Medicare Contractor Budget

A. Data, Standards, and Methodology

We submitted the FY 1996 national Medicare contractor budget proposal to the Congress in February 1995. The workload for the FY 1996 request is expressed in terms of work processed. For Part A, the FY 1996 estimated workload (140.6 million bills) is 8.8 percent more than the FY 1995 estimate. For Part B, the FY 1996 estimated workload (681.4 million claims) is a 3.9 percent increase over the FY 1995 estimate.

Our estimates involved the use of a regression model that uses the last 36 months of actual contractor workload data. For the FY 1996 projections, we used November 1994 data, which were the latest available to us at the time. We will continue to update the resulting projections monthly to ensure that the most timely data are available for budgeting purposes.

The FY 1996 unit costs for processing bills and claims were calculated based on the FY 1995 level adjusted for savings achieved due to productivity, electronic media claims, and reduced funding for incremental workload. This calculation resulted in a new unit cost, which, when multiplied by the Part A or Part B workloads, determines the total amount required for bill or claim processing in FY 1996.

Feedback received from contractors and regional offices during the past several years has led us to believe that contractors can make major improvements in performance if given the authority to manage their budgets. The FY 1994 BPRs gave the regional offices the authority to set a budget and the contractors the authority to manage their budgets on a bottom-line basis. Once funding was issued, each contractor had the flexibility to optimally manage the budget consistent with the statement of work contained in the BPRs. Before FY 1993, contractors were not allowed to "shift" more than 5 percent of funds from one line item to another in their budget, as determined by the lesser of the two line items. That restriction was intended to allow us to maintain control over the national budget, but still give contractors some latitude with regard to reporting their costs. With the exception of the "Payment Safeguards," "Productivity Investments," and "Other" line items, contractors now have total flexibility in the use of funds. There is a 5 percent limitation on the amount of funds that may be shifted out of individual "Payment Safeguards," with unlimited shifting into "Payment Safeguards." Shifting into or out of "Productivity Investments" and "Other" line item funding, not governed by contract modifications, may not exceed 5 percent. Each "Other" line item is treated separately. The "Productivity Investment" line item is treated as a whole and not as separate projects. Funding that is governed by contract modifications may not be shifted to other functions or line items.

B. Medicare Contractor Functional Areas

The Medicare contractor budget consists of functional areas of responsibility that are performed by the fiscal intermediaries for Part A and the carriers for Part B. The eight functional areas of responsibility for fiscal intermediaries under Part A are—

- Bill Payment;
- Reconsideration and Hearing;
- Medicare Secondary Payer;
- Medical Review and Utilization Review;
- Provider Audit (Desk Review, Field Audit, and Provider Settlement);
- Provider Payment;
- Productivity Investments; and
- Benefits Integrity.

The nine functional areas of responsibility for carriers under Part B are—

- Claim Payment;
- Review and Hearing;
- Beneficiary or Physician Inquiry;
- Provider (physician/supplier) Education and Training;
- Medicare Review and Utilization Review;
- Medicare Secondary Payer;
- Participating Physicians;
- Productivity Investments; and
- Benefits Integrity.

The Hospital Insurance and Supplementary Medical Insurance Trust Funds and appropriations provide funding for these functions. Discussions concerning the data, standards, and methodology for these functional areas are in section III of this notice. In the following national budget summary, we combine the discussion of functional areas that are common to fiscal intermediaries and carriers. However, we list specific data for Part A or Part B under each heading. In developing the budget, we provide workload estimates for all functional areas that are predominantly workload driven. We do not provide workload estimates for those functional areas that are not predominantly workload driven or for an uncertain workload until final negotiations with the Medicare contractors are complete.

1. Bill and Claim Payment (Parts A and B)

We currently estimate the Part A processed workload to be 140.6 million bills in FY 1996. The Part B processed workload is currently projected at 681.4 million claims.

2. Reconsideration (Part A), Review (Part B), and Hearing (Parts A and B)

Beneficiaries, providers, physicians, and other suppliers are entitled by law to appeal, through reconsiderations, formal reviews, or hearings, as appropriate, the various payment determinations made by Medicare contractors. We project that Part B reviews and hearings workloads for FY 1996 will not exceed FY 1995 levels, while workload for Part A reconsiderations and hearings will have a moderate increase. We expect contractors to control and respond to requests for appeal and to control receipt of Administrative Law Judge hearing requests.

We continue to maintain efficiencies achieved in prior years through the use of shorter decision letters and the experimental use of the telephone to conduct reviews and reconsiderations.

3. Medicare Secondary Payer (Parts A and B)

The Medicare secondary payer function is the first of four initiatives (Medicare secondary payer, medical review and utilization review, benefits integrity, and provider audit) we developed as "payment safeguards" for the Medicare program. Our continuing Medicare secondary payer program is designed to identify situations in which other insurers are the primary payers, to pay all claims correctly the first time, and to recover Medicare dollars in instances in which mistaken conditional payments have occurred.

We aggressively pursue the identification of secondary payer situations through the collection and matching of beneficiary-specific health care data through the Internal Revenue Service/Social Security Administration/HCFA (IRS/SSA/HCFA) data match authorized by section 1862(b)(5) of the Act. The FY 1996 budget includes funding to process the workloads based on the IRS/SSA/HCFA data match project. We allocate the funds based on the number of report identification numbers we expect a contractor to process.

In addition to the IRS/SSA/HCFA data match, we continue to pursue other data matches with State Motor Vehicle Administrations, Workers' Compensation, Medicaid Agencies, and the Departments of Defense, Labor, and Veterans Affairs. Further, our use of the initial enrollment questionnaire is an important part of our commitment to capturing vital health care coverage data on beneficiaries and their spouses at the time of Medicare enrollment and before any claims are filed.

4. Medical Review and Utilization Review (Parts A and B)

In addition to processing and paying claims from providers of services and Medicare beneficiaries, contractors perform medical and utilization reviews of claims to determine whether services are covered under the program and are medically necessary. The distribution of Medicare contractor funding is based on each contractor's proportion of the workload and individual contractor medical review/utilization review projects.

Specifically, our contractors are required to work with the medical community to develop clear medical review policies and communicate those policies to the providers of services. Moreover, we also emphasize the need for systematic and ongoing analysis of

claims data to focus prepayment and postpayment medical review. To meet this requirement, intermediaries and carriers currently analyze local and national data to identify practice patterns, trends, and aberrancies that may reflect areas of potential abuse, inappropriate care, and overutilization. This data-driven approach allows us to target and direct our efforts to our greatest risk of inappropriate program payment.

Part A medical reviews by fiscal intermediaries focus on preventing inappropriate billing through provider education and on targeting reviews of providers who fail to change inappropriate behavior. Through analysis of national and local data, areas of abuse and overutilization are identified and payment is denied for services that are not covered under the Medicare program. Reviews are targeted where they will be most effective in protecting the program.

Part B medical reviews by carriers identify areas of abuse and overutilization and focus on preventing Medicare payment for medically unnecessary or noncovered services. Carriers use computerized methods of analyzing utilization, epidemiologic, and demographic data to detect trends in physician and other supplier activities and the delivery of health care. This is accomplished through prepayment and postpayment analysis of Medicare Part B claims.

In FY 1996, we will continue to support the medical review activities of the four Durable Medical Equipment Regional Carriers (DMERCs). The DMERCs will conduct prepayment and postpayment review of durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) claims to identify areas of potential abuse and overutilization and prevent payment for noncovered items and services.

The DMERCs will identify aberrancies from an analysis of national and local databases. The DMERCs will initiate corrective action for overpayment recoupment, target supplier claims for services most frequently billed, and continue to revise regional medical review policies and screens for referral to the Office of the Inspector General (OIG). This targeting principle will assist in developing regional medical review policies to address identified problem areas or trends in new technologies. In addition to educating suppliers, DMERCs need to educate the referring/ordering physicians responsible for prescribing DMEPOS items and include them in the medical policy development process.

5. Provider Audit (Part A only)

The audit of provider cost reports is our primary instrument to help ensure the integrity of Part A Medicare payments. Funding priorities are directed toward the use of limited desk reviews where low cost/low utilization providers are involved and toward the use of onsite focused reviews to expand the overall examination of high cost/high payment issues. Program savings remain relatively flat, while the FY 1996 funding level remains constant.

In FY 1996, budget estimates allow for a relatively consistent level of reviews and audits for all types of providers, although an increasing number of providers require both desk review and settlement. Full desk reviews and field audits are directed toward high cost/high utilization providers and past poor performers. Contractors will retain a knowledgeable audit staff and provide training in accordance with government auditing standards.

Contractors will also respond to provider appeals by conducting intermediary hearings and by filing position papers and attending hearings at the Provider Reimbursement Review Board (PRRB). Contractors will also reopen and revise prior period settlements based on provider requests, as well as PRRB and HCFA directives and resolve problems identified on provider cost reports.

6. Provider Payment (Part A only)

In FY 1996, Medicare contractors will provide payment services to approximately 31,500 health care providers. These payment services include establishing and adjusting interim rates, recouping provider overpayments, and providing consultative services to providers for maintaining and adjusting their accounting systems to ensure accurate data for preparing Part A bills and cost reports.

We will distribute funds in proportion to workload by provider type.

7. Productivity Investments (Parts A and B)

We refer to the costs of implementing legislation and new initiatives that are designed to improve the effectiveness of Medicare program administration as productivity investments. Productivity investments generally provide start-up funds for new or revised contractor activities. Once these projects are operational, their funding becomes part of the contractor's ongoing costs. The criteria for selecting productivity investments vary. For example, the statute or regulations require some productivity investments. We also fund projects that will improve administrative cost efficiency, such as administrative simplification.

There is no single distribution methodology for the allocation of productivity investment funds. After we determine the national cost of a productivity investment, we distribute funds among the contractors. These funds are based on the contractors' cost estimates or through formulas that we derive based on project specifications. Other productivity investment initiatives require equal effort by all contractors regardless of size and, therefore, funds are distributed equally among contractors. Finally, some productivity investments, such as administrative simplification and the Medicare Transaction System, are given only to contractors that are involved in the specific projects.

8. Beneficiary or Physician Inquiry (Part B only)

The Medicare contractors are the direct link between beneficiaries, providers, physicians and other suppliers, and the Medicare program. It is the responsibility of HCFA and the contractors to provide the most effective and efficient service to beneficiaries, providers, physicians, and other suppliers, and to continue to expand their awareness and understanding of the Medicare program.

We are currently revising all benefit notices into a single, easy to read summary format. Carriers will begin using the new notice format in FY 1996. Beneficiary and provider feedback is used to modify the format, as necessary, to ensure maximum beneficiary comprehension. We and our contractors will conduct extensive outreach to ensure a smooth transition to the new format.

Our Carrier Customer Service Plan initiative is expanded to include—

- Tone/clarity self-assessment;
- Initiatives to improve service to blind, deaf, and disabled beneficiaries;
- An automated inquiries analysis program;
- Improvements to the internal review process;
- Partnerships with local beneficiary counseling and assistance organizations;
- The expansion of beneficiary advisory committees; and
- Initiatives designed to improve service to Spanish speaking individuals.

Also, carriers use Audio Response Units as the initial contact for providers, and a beneficiary Audio Response Unit script is offered to all carriers. In FY 1996, carriers will expand the use of Audio Response Units. The Audio

Response Units will provide improved service, accuracy, and consistency through the use of expanded standardized scripts and equipment enhancements.

In FY 1996, carriers will receive an estimated 40.1 million inquiries by telephone, in writing, or through direct contact, an increase of 1 percent over the current FY 1995 projection of 39.6 million inquiries.

9. Participating Physicians/Suppliers (Part B only)

Participating physicians and suppliers are those who agree to accept assignment on all Medicare claims in return for certain incentives or benefits. All physicians are given an opportunity to enroll or disenroll in the program annually.

Carriers must perform several activities including: (1) Conducting annual participation enrollment; (2) Distributing the Medicare Participating Physician/Supplier Directories; (3) Upgrading and maintaining direct electronic media claim lines for participants; and (4) Monitoring and enforcing the program requirements for participants and nonparticipants, which includes the comprehensive limiting charge compliance program.

10. Physician/Supplier Education and Training (Part B only)

Increasing numbers of physicians, nonphysician practitioners, and other suppliers who furnish health care services rely on information gained through communications with carriers about Medicare program provisions. To respond to this need, we have fostered interaction between suppliers of health care services and carriers to promote efficient, economic claims activities. For example, these activities include: (1) Communicating with suppliers of health care services; (2) Educating suppliers to eliminate the submission of erroneous or underdocumented claims; (3) Distributing newsletters to all suppliers of services detailing changes in coverage, payment, or billing policy; and (4) Educating carrier staff members, on a regularly scheduled basis, to ensure compliance with legislative and policy changes affecting the coding and submission of claims.

11. Benefits Integrity (Parts A and B)

We will continue to deter and detect Medicare fraud and abuse activities through concerted efforts with the OIG, the Federal Bureau of Investigation, Medicaid Fraud Control Units, the Department of Justice, and other HCFA partners. As in FY 1995, we will continue to improve the quality of referrals to the OIG by increasing our fraud detection capabilities through expanded data analysis and improvements in fraud detection by the carriers and intermediaries.

In addition, the National Claims History Database continues to be available to focus postpayment review on practitioners and suppliers that appear to be billing fraudulently or that are misrepresenting to Medicare the services or items they are furnishing.

In FY 1996, Medicare carriers will focus their detection activities on medical laboratory, radiology, anesthesia, physician services, and ambulance claims. Also, in FY 1996, Medicare carriers will upgrade their fraud detection capabilities by making better use of available databases and expanded relationships with other fraud detection organizations.

12. Printing Claim Forms (Parts A and B)

Although this activity is not among the nine Part A and eight Part B contractor functional areas, it is a part of the national Medicare contractor budget. In the interest of maintaining standard formats and quality of Medicare entitlement and report forms, we supply beneficiary enrollment and provider cost reporting forms. The use of these forms is essential for beneficiary notification and for effective and efficient contractor operations. We will print 50 million copies of these forms for FY 1996.

C. Contractor Unit Cost Calculations

A key step in the contractor budget process is the development of contractor unit costs for processing Part A bills and Part B claims. These bottom-line unit costs encompass all budget line items except "Provider Audit," "Provider Reimbursement," "Productivity Investments," and, "Other."

As first implemented in FY 1992, the complexity index was designed to improve efficiency and reduce contractor-by-contractor cost inequities and was based on the application of the Industrial Engineering study commissioned by us. The Industrial Engineering study provided us with an actual weighted unit cost for each claim type; that is, inpatient or outpatient, and method of submission of a bill or a claim. After adjustment for changes in program emphasis, these unit costs were applied to each contractor's individual workload mix to develop a weighted unit cost that reflects the complexity of its workload mix. We published an explanation of the complexity index in a **Federal Register** notice published on January 2, 1992 (57 FR 57). After adjusting for various savings and increases associated with initiatives, we then arrayed the contractors' unit costs and identified the high cost contractors.

We believe that the use of the complexity index has enabled us to successfully achieve the goals of improving efficiency in contractor operations and reducing contractor-by-contractor cost inequities. Since we have achieved these goals, and believe that costs can be controlled, we will base each contractor's FY 1996 unit cost on the FY 1995 level, adjusted for inflation and for savings achieved as a result of increased productivity, and on reduced funding for incremental workload.

D. Overall Budget Considerations

We note that limitations on the FY 1996 budget could require across-the-board cost cutting measures. In that case, each regional office will determine the amount of budget reduction for its contractors.

III. FY 1996 National Medicare Contractor Budget: Data, Standards, and Methodology

Since the submission of the President's FY 1996 Medicare contractor budget request to the Congress in February 1995, we have developed and issued BPRs to the contractors. These requirements outline the statement of work and level of effort that fiscal intermediaries and carriers are expected to perform during the upcoming fiscal year in each of the functional areas for which they are responsible.

Our schedule is that draft BPRs are released to the regional offices in April, and the final BPRs are released in June 1995. At the time of release, each fiscal intermediary and carrier is given the individual requirements to be used in preparing their FY 1996 budget request. The regional offices will send any additional information that is pertinent to the fiscal intermediaries and carriers within their region. Fiscal intermediaries and carriers must submit their budget requests to us no later than 6 weeks after the issuance of the BPRs.

After the fiscal intermediaries and carriers review the BPRs, they prepare their budget requests. The central office and regional office staff review the fiscal intermediary and carrier budget requests as they are submitted. The regional office staff negotiates a final and mutually-acceptable budget, within the limits of the funding available to us, with each fiscal intermediary and carrier. The central office prepares a financial operating plan for each regional office that provides total regional funding authority for each functional area. The regional offices, in turn, prepare a Notice of Budget Approval for each fiscal intermediary and carrier that provides a full year budget plan subject to quarterly cash draw limitations.

A. Standards

The basic statement of work, along with new and special activities that fiscal intermediaries and carriers are expected to perform, is described in the BPR package. Fiscal intermediaries and carriers are expected to perform the work as described in the BPR package and in accordance with the standards included in the Contractor Performance Evaluation for FY 1996. For consideration in developing their initial budget requests, a copy of the draft Contractor Performance Evaluation standards will be sent to contractors. Final FY 1996 Contractor Performance Evaluation standards will be published in the **Federal Register**.

B. Data

The following data contain various workload volumes, functional costs, and manpower information that are used in developing the individual fiscal intermediary and carrier budgets for FY 1996:

- Forms HCFA–1523/1524 (a multipurpose form that serves as the Budget Request, Notice of Budget Approval, and Interim Expenditure Report).
- Forms HCFA–1523A/1524A (Schedule of Productivity Investments and Other).
- Forms HCFA–1523B/1524B (Schedule of Credits, Electronic Data Processing, and Overhead).
- Forms HCFA–1523C/1524C (Schedule of Appeals).
- Forms HCFA–1523D/1524D (Schedule of Medicare Secondary Payer Costs).
- Forms HCFA–1523E/1524E (Schedule of Medical Review Costs).
- Forms HCFA–1523G/1524G (Schedule of Fraud and Abuse).
- Form HCFA–1525A/1525A (Contractor Audit Settlement Report).
- Schedules A, B, & C.
- Provider Payment Profile.
- Schedule of Providers Serviced.
- Medicare Secondary Payer Savings Report.
- Medical Review/Utilization Review Savings Report.
- Form HCFA–2580 (Cost Classification Report).
- Forms HCFA–1565/1566 (Carrier Performance Report/Intermediary Monthly Workload Report).
- OMB's economic assumptions of 3.2 Percent.
- Savings from prior productivity investments.
- New legislation costs.
- Regional Office recommendations.
- Contract provisions.

C. Methodology

The Medicare contractor budget is organized around the previously listed functional areas that are performed by the fiscal intermediaries for Part A and the carriers for Part B. In 1992, we developed a bottom-line unit cost for each individual contractor. The following narrative describes the methodology used to calculate individual line-item costs. This methodology will be considered as general reference for contractors as they develop their FY 1996 budgets and also provides additional explanation in determining how certain costs and savings were determined. The regional offices will negotiate with the fiscal intermediaries and carriers to resolve any differences within the limits of the funding available to us.

1. Bill and Claim Payment

A statistical forecasting model determines the individual fiscal intermediary and carrier workload levels for FY 1996. Using the same data, we are also projecting the number of bills or claims a fiscal intermediary and carrier may expect to have pending at the end of FY 1995. We will then combine the FY 1996 receipt estimate with the anticipated end of FY 1995 pending level, and subtract the estimated FY 1996 pending for each fiscal intermediary and carrier to establish a processed workload; that is, Estimated FY 1996 receipts + Estimated end of FY 1995 pending − Estimated end of FY 1996 pending = Estimated FY 1996 Processed Workload.

In order to price individual contractor bill and claim workload, we develop a unit cost that is the cost of processing a single bill or claim. The individual fiscal intermediary and carrier unit costs for FY 1996 are calculated from the unit costs in the FY 1995 Notice of Budget Approvals. Savings achieved from operating efficiencies also are part of the formula employed in computing FY 1996 target unit costs.

2. Reconsiderations (Part A), Reviews (Part B), and Hearings (Parts A and B)

We will allocate funding based on the dollar amount spent (line 2 of Forms HCFA–1523/1524) in the prior years, adjusted for inflation and changes in volume. Specifically, we will adjust the previous year's costs for reconsiderations and hearings by the estimated percentage change in workload.

We estimate the individual fiscal intermediary and carrier budget allocations for reconsiderations, reviews, and hearings by multiplying forecast workloads by the adjusted unit costs.

3. Beneficiary and Provider Inquiries (Part B only)

To establish a budgeted amount for beneficiary and provider inquiries, we increase the prior year's cost by the projected workload change. We also consider special conditions unique to specific carriers in negotiating the budget. We will use the data to develop a budgeted cost for beneficiary and provider inquiries by multiplying forecasted processed volume by the unit cost.

4. Provider Payment (Part A only)

In determining individual fiscal intermediary budgets for reimbursement activities, we took into consideration the FY 1995 budgeted figures, the projected funding for FY 1996, and the projected workload based on the workload reported on the Schedule of Providers Serviced. The Schedule of Providers Serviced is a listing of all the facilities serviced by the fiscal intermediary. The Schedule of Providers Serviced is submitted with each initial budget request so that a part of the analysis is the comparison of the composition of the provider community serviced by the fiscal intermediary and any change reported between fiscal years.

5. Provider Audit (Part A only)

For FY 1996, the provider audit function is divided into three major activities: field audits, desk reviews, and settlements. The Contractor Auditing and Settlement Report (Form HCFA–1525/1525A) provides a breakout of audit activities and costs by type of provider and documents the savings incurred as a result of audit activity. Using this as a base, we develop the desk review costs by projecting the number of providers serviced by the unit cost per desk review (developed for the latest Contractor Auditing and Settlement Report for FY 1994) to determine the cost of handling the FY 1996 workload at the FY 1994 unit cost. We base the settlement costs on the workload projected in the fiscal intermediary's budget request, multiplied by the unit cost for settlements found in the most recent Contractor Auditing and Settlement Report for FY 1994.

The first priority of all audit efforts is the completion of any special activities required by legislation. The second priority is that all cost reports be reviewed and, to the extent possible, settled.

6. Medicare Secondary Payer

We will review the estimated workload data, reported backlog data, and any other items, for example, proposed Medicare secondary payer systems enhancements, to determine Medicare secondary payer funding allocations. Each contractor's case mix will be analyzed to adjust for specialized workloads such as home health claims or durable medical equipment (DME). In FY 1996, we will allocate the budget based on the above considerations, adjustments created by shifts in the DME workload from all carriers to the four specialty carriers, and other shifts in workload that may require adjustments.

7. Medical Review/Utilization Review

The individual fiscal intermediary and carrier medical review/utilization review budgets for FY 1996 will be calculated in three segments: (1) Prepayment medical review; (2) Postpayment medical review activities; and (3) Data analysis and screen development. The BPR describes the activities and workload requirements that the fiscal intermediaries and carriers are expected to meet. As part of the BPRs, we will ask the fiscal intermediaries and carriers to estimate the level of funding that will be necessary to meet such requirements. We will allocate prepayment and postpayment medical review funding to contractors based upon the workload that a fiscal intermediary or carrier projects for FY 1996.

8. Participating Physicians/Suppliers (Part B only)

In determining the individual carrier funding levels for the participating physician/supplier program for FY 1996, we considered the following factors:

- The number of physicians/suppliers in the carrier's service area.
- The carrier's current participation rate.
- The carrier's recent performance in increasing its participation rate.
- The statement of work to be performed as outlined in the BPRs.
- FY 1995 cost experience.

Since participating physicians/suppliers are eligible for toll-free telephone lines for electronic billing, allowance will be made for these expenses. Carriers with lower participation rates will receive greater funding for the limiting charge violation monitoring. We have discontinued carrier monitoring of the elective surgery disclosure requirement. We now require carriers to investigate beneficiary complaints on a case-by-case basis.

We allocate carrier monitoring funds based on the national percentage of nonparticipating physicians/suppliers. All carriers will receive the same funding amount for reporting participation statistics.

9. Productivity Investments

We refer to the costs of implementing legislation and new initiatives that are designed to improve the effectiveness of Medicare program administration as productivity investments. Several allocation methodologies will be employed in calculating the productivity investment budgets for individual fiscal intermediaries and carriers. For those projects involving only single contractors or small groups of contractors, we will allocate funds based upon the specifications of the particular project. For those projects involving all fiscal intermediaries or carriers, if the costs are driven by bill or claim volume, we will distribute the funding based upon our workload projections for each contractor. Finally, for those projects involving all fiscal intermediaries or carriers that require equal effort, regardless of the contractor's size, we derive a standard allocation to be given to all contractors.

10. Physician/Supplier Education and Training (Part B only)

Distribution of funds made available to HCFA for physician/supplier education and training is based upon the ratio of physicians and suppliers in each carrier's service area to the national total of physicians and suppliers.

11. Benefits Integrity

In allocating the FY 1996 benefits integrity budget to individual fiscal intermediaries and carriers, we will consider the following:

- The prior year's effectiveness in initiating fraud referrals to the OIG.
- Initiating overpayment recoveries when appropriate.
- Prioritizing workload to concentrate on high dollar and multi-state fraud.
- The extracted workload and cost data from the Schedule of Fraud and Abuse (Forms HCFA–1523G/1524G).
- The Medicare Fraud Unit Workload Report.
- The fraud unit's level of sophistication to determine benefits integrity funding allocations.
- The completion of any special activity required by legislation which will be an overriding priority.
- The networking costs, which will be determined by the personnel cost to support the Medicare Fraud and Abuse Information Coordinator, travel costs, and the other expenses needed to conduct networking for the area assigned.

IV. Data, Standards, and Methodology Used to Establish the Medicare Contractor Budgets for FY 1995

The October 21, 1994, notice described the budget development process in general and gave an overview of how we intended to use the contractor budget data, standards, and methodology to establish the FY 1995 budgets.

Based on our review of the comments submitted, we are making no changes to the proposed data, standards, and methodology as published on October 21, 1994. Therefore, we announce provisions of the proposed notice as final.

Provisions of the Proposed Notice

We indicated in the proposed notice that the contractor budget would be structured to coincide with the eight functional areas of responsibilities performed by fiscal intermediaries for Part A and nine functional areas of responsibilities performed by carriers for Part B of the Medicare program. We proposed that final funding for the contractor functions would be allocated in accordance with the current claims processing trends, legislative mandates, administrative initiatives, current year performance standards and criteria, and the availability of funds appropriated by the Congress. While the contractors were preparing their budget requests, we developed preliminary budget allocations for the 17 functional areas that were based on historical patterns, workload growth, inflation assumptions, statistical forecasting reports, and any other available information.

A key step in the contractor's budget process is the development of contractor unit costs for processing Part A bills and Part A claims. As in FY 1994, the FY 1995 budget process used a bottom line unit cost approach. All budget line items except Provider Audit, Productivity Investments, Other, and in FY 1995, Provider Payment, are part of the bottom line unit cost calculation. In FY 1995, the complexity index was not used as it was in prior years. We believe that the use of the complexity index over the last 3 fiscal years has enabled us to successfully achieve the goals of improving efficiency in contractor operations and reducing contractor-by-contractor cost inequities. Since we have achieved these goals, and believe that costs can be controlled, we based each contractor's unit cost on their FY 1994 level, adjusted for savings achieved due to increased productivity, electronic media claims, and reduced funding for incremental workload. Because of reduced funding in FY 1995 inflation was not given.

The Medicare secondary payer function is the first of four initiatives we developed as "Payment Safeguards" for the Medicare program. The focus of the Medicare secondary payer initiative is to ensure that the Medicare program pays for covered care only to the extent required after payment by the primary insurer. We proposed that the standard for determining the amount of Medicare secondary payer funding a contractor would receive in FY 1995 would be based on workload volumes, required systems changes, and any special projects that may be assigned to contractors.

Based on actuarial analysis, we developed specific savings goals for each contractor. The goals were developed on estimates of savings to be achieved by contractors for the Medicare secondary payer categories of working aged, disabled, workers' compensation, end-stage renal disease, and liability or no-fault insurance. After assigning goals to contractors, funds were allocated based on the various Medicare secondary payer activities a contractor must perform such as processing prepayment claims, postpayment claims, inquiries, outreach, and hospital reviews.

We proposed that in FY 1995, the Initial Enrollment Questionnaire would be operational. The Initial Enrollment Questionnaire eliminates the need for first claim development on approximately 85 percent of new enrollees. This initiative improves service to beneficiaries on a national basis by providing detailed information on the Medicare secondary payer program at the time a beneficiary enrolls in Medicare.

We proposed to include funding to process the workloads based on the IRS/SSA/HCFA data match project. The funds would be allocated on the basis of the number of report identification numbers a contractor will process. We would review the estimated workload data, reported backlog data, and proposed Medicare secondary payer systems enhancements to determine Medicare secondary payer funding allocations. Each contractor's case mix would be analyzed to adjust for specialized workloads such as home health claims or DME.

In FY 1995, we proposed the budget be allocated based on adjustments created by shifts in the DME workload from all carriers to the four specialty carriers and by other shifts in workload that may require adjustments. The regional offices would negotiate with the fiscal intermediaries and carriers to resolve any differences between our allocations and their requests within the limits of the funding available to us.

Analysis of and Response to Public Comment

In response to our request for public comment in the October 21, 1994 notice, we received one timely item of correspondence from a health insurance company. Several issues that were raised by the commenter are outside the scope of the proposed notice and are not addressed in this notice. The proposed notices are intended to address only the data, standards, and methodology to be used to establish budgets for fiscal intermediaries and carriers for a particular fiscal year. Specific instructions on how to implement and monitor certain initiatives (for example, beneficiary inquiries, participating physician and benefits integrity) are presented through program memoranda, manual instructions, BPR, and other means.

Comment: The commenter was concerned that the proposed notice was published after the beginning of FY 1995. The commenter believed that untimely publication of the proposed notice denied interested parties the opportunity to comment before implementation of the budget.

Response: In the preparation of the Medicare contractor budget each fiscal year, we attempt to publish the proposed and final notices timely. However, because of the time involved in reviewing data and developing the budget and the lengthy review and clearance process, we were not able to publish the proposed and final notices before the beginning of the 1995 fiscal year. We regret that we were unable to publish the proposed notice timely, but we do not believe that our actions substantively penalized or prejudiced the fiscal intermediaries or carriers. The BPRs issued to all intermediaries and carriers discuss in detail the work, level of effort, and activities we expect them to perform in the coming fiscal year. Further, we provide a discussion and explanation of the bottom-line unit cost target established for each intermediary and carrier at the time the BPRs are issued. The intermediaries and carriers have ample time to identify and resolve any problems before they finalize their budget requests for the fiscal year.

Comment: The commenter indicated that the use of the complexity index in prior years provided a methodologically flawed basis for calculating the contractor unit costs in FY 1995.

Response: We do not agree. As stated in the proposed notice, we believe that the complexity index is useful in helping to control contractor costs by providing funding on the basis of workload complexity. The use of the complexity index over the last 3 fiscal years has enabled us to successfully achieve the goals of improving efficiency in contractor operations and reducing contractor-by-contractor cost inequities. Since we have achieved the above goals, we believe it is reasonable for FY 1995 contractor unit costs to be based on each contractor's FY 1994 level.

Comment: The commenter expressed concern about the process used to develop specific Medicare secondary payer savings goals for each contractor for FY 1995 as well as how funding was determined for each contractor for Medicare secondary payer activities. The commenter believed that Medicare secondary payer funds are allocated after assigning Medicare secondary payer savings goals.

Response: The President's budget estimate that was published in February 1994 covers the entire Medicare contractor budget. Although the budget estimate mentions Medicare secondary payer savings, it does not define specific savings per contractor. Further, we have not assigned savings goals to intermediaries and carriers since FY 1993. Therefore, Medicare secondary payer funds are not allocated after assigning Medicare secondary payer savings goals to contractors.

The factors that affect Medicare secondary payer funding for individual contractors are: the national Medicare secondary payer budget; the priority of the Medicare secondary payer activities; individual contractor Medicare secondary payer budget requests and workload estimates (a contractor's estimated Medicare secondary payer workload and budget request is compared to its previous workload and expenditures for Medicare secondary payer activities); an analysis of a contractor's Medicare secondary payer budget request and that of similar contractors with similar workloads (intermediaries and carriers are compared separately); the ability of a contractor to justify and document its request for additional funding, or for funding we believe is out of its peer grouping; and negotiations between the regional offices and the individual contractors.

V. Response to Comments

Because of the large number of items of correspondence we normally receive on documents published for comment, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date specified in the DATES section of this notice, and we will respond to the comments in a subsequent published notice. To the extent that we receive comments during the comment period, we will address those comments in a final notice and, if necessary, make revisions to the proposed data, standards, and methodology for FY 1996. If no comments are received, we will simply adopt the proposed data, standards, and methodology for FY 1996 as final, effective October 1, 1995.

In accordance with the provisions of Executive Order 12866, this proposed rule was not reviewed by the Office of Management and Budget.

Authority: Sections 1816(c)(1) and 1842(c)(1) of the Social Security Act (42 U.S.C. 1395h(c)(1) and 1395u(c)(1)).

(Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program.)

Dated: August 16, 1995.

Bruce C. Vladeck,

Administrator, Health Care Financing Administration.

[FR Doc. 95–22029 Filed 9–5–95; 8:45 am]

BILLING CODE 4120–01–P

Office of Inspector General

Program Exclusions: July 1995

AGENCY: Office of Inspector General, HHS.

ACTION: Notice of program exclusions.

During the month of July 1995, the HHS Office of Inspector General imposed exclusions in the cases set forth below. When an exclusion is imposed, no program payment is made to anyone for any items or services (other than an emergency item or service not provided in a hospital emergency room) furnished, ordered or prescribed by an excluded party under the Medicare, Medicaid, Maternal and Child Health Services Block Grant and Block Grants to States for Social Services programs. In addition, no program payment is made to any business or facility, e.g., a hospital, that submits bills for payment for items or services provided by an excluded party. Program beneficiaries remain free to decide for themselves whether they will continue to use the services of an excluded party even though no program payments will be made for items and services provided by that excluded party. The exclusions have national effect and also apply to all other Federal non-procurement programs.

BILLING CODE 4150–04–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. FR–3831–N–02]

Announcement of Funding Awards for the HUD-Administered Small Cities Community Development Block Grant Program Fiscal Year 1995

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Announcement of funding awards.

SUMMARY: In accordance with section 102(a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989, this announcement notifies the public of funding decisions made by the Department under the HUD-Administered Small Cities Community Development Block Grant (CDBG) Program for Fiscal Year 1995. The announcement contains the names and addresses of the award winners and the amount of the awards.

FOR FURTHER INFORMATION CONTACT: Stephen Rhodeside, State and Small Cities Division, Office of Community Planning and Development, Department of Housing and Urban Development, Room 7184, 451 Seventh Street, SW., Washington, DC 20410, Telephone (202) 708–1322 (voice) or (202) 708–2565 (TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: Title I of the Housing and Community Development Act of 1974, as amended (the HCD Act), authorizes the Community Development Block Grant (CDBG) Program. Section 106 provides that HUD will administer the CDBG Program for nonentitled units of local government within a State which does not elect to assume the administrative responsibility for the program. As such HUD, continues to operate the nonentitlement CDBG Program in Hawaii and New York in accordance with 24 CFR part 570, subpart F. In Hawaii, HUD distributes funds in Hawaii on a formula basis since there are only three nonentitlement entities. In New York State, HUD conducts an annual competition in which nonentitled units of general local government may apply for nonentitled CDBG funds allocated to New York State.

The Fiscal Year 1995 competition in New York State was announced in a notice of funding availability (NOFA) published in the **Federal Register** on December 5, 1994 (59 FR 62474). The NOFA announced the availability of allocation of $50,616,000 for nonentitled communities in New York State. The NOFA also announced the allocation of this funding amount between the New York Office and the Buffalo Office.

In accordance with section 102 (a)(4)(C) of the Department of Housing and Urban Development Reform Act of 1989, the Department is publishing the names and addresses of the grantees, and the amount of the award made to each grantee. This information is provided in Appendix A to this document.

Dated: August 30, 1995.

Andrew Cuomo,

Assistant Secretary for Community Planning and Development.

APPENDIX A—1995 SMALL CITIES GRANTEES

Grantee	Grant No.	Amount
New York Office		
Town of Bethel, Box 300, White Lake, New York 12786	B–95–DH–36–0109	$250,000

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY985–01–0777–64]

Change of Address/Relocation and Office Closure: Wyoming

SUMMARY: Effective on or about September 25, 1995, the Wyoming State Office will be relocating to 5353 Yellowstone, Cheyenne, Wyoming 82009–4137. The mailing address will remain: Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82003. Please address all correspondence to this address.

Because of the relocation of the BLM Wyoming State Office, records will be unavailable for inspection, and the Public Room will be closed on the following dates: September 25 through September 27, 1995. We plan to have the Public Room open for business and records review on September 28, 1995 from 9:00 a.m. to 4:00 p.m., normal Public Room hours.

EFFECTIVE DATE: September 25, 1995.

FOR FURTHER INFORMATION CONTACT: Susan Bennett, Supervisory Contact Representative, BLM, Wyoming State Office, 307–775–6131.

Alan R. Pierson,

State Director.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32689]
[Finance Docket No. 32689 (Sub-No. 1); Finance Docket No. 32690]

Patrick D. Broe, OmniTRAX, Inc., and Chicago Rail Link, L.L.C.—Control—Calumet Western Railway Company in Cook County, IL; Calumet Western Railway Company Restructuring in Cook County, IL; Indiana Harbor Belt Railroad Company—Acquisition Exemption—Calumet Western Railway Company in Cook County, IL

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: In Finance Docket No. 32689, the Commission exempts from the prior approval requirements of 49 U.S.C. 11343–45 the acquisition of control by Patrick D. Broe, OmniTRAX,Inc., and Chicago Rail Link, L.L.C. (CRL), of Calumet Western Railway Company (Cal West) through purchase of its outstanding stock. In Finance Docket No. 32689 (Sub-No. 1), the Commission exempts from the prior approval requirements of 49 U.S.C. 11343–45 the acquisition by Cal West of certain track and the acquisition by CRL of certain operating and trackage rights. In Finance Docket No. 32690, the Commission exempts from the prior approval requirements of 49 U.S.C. 11343–45 the acquisition by Indiana Harbor Belt Railroad Company of a segment of track and certain operating and trackage rights. The exemptions are subject to standard employee protective conditions.

DATES: The exemptions will be effective on September 21, 1995. Petitions for stay must be filed by September 18, 1995, and petitions to reopen must be filed by September 26, 1995.

ADDRESSES: Send pleadings referring to Finance Docket No. 32689, Finance Docket No. 32689 (Sub-No. 1), and Finance Docket No. 32690, to: (1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, 1201 Constitution Avenue, NW., Washington, DC 20423; and (2) Louis E. Gitomer, Ball, Janik & Novack, Suite 1035, 1101 Pennsylvania Avenue, NW., Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Beryl Gordon, (202) 927–5610. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Interstate Commerce Commission Building, 1201 Constitution Avenue, NW., Room 2229, Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

Decided: August 22, 1995.

By the Commission, Chairman Morgan, Vice Chairman Owen, and Commissioners Simmons and McDonald.

Vernon A. Williams,

Secretary.

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) the title of the form/collection;

(2) the agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) who will be asked or required to respond, as well as a brief abstract;

(4) an estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(5) an estimate of the total public burden (in hours) associated with the collection; and

(6) an indication as to whether Section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jeff Hill on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Robert B. Briggs, on (202) 514–4319. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the Department of Justice Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Robert B. Briggs, Department of Justice Clearance Officer, Systems Policy Staff/Information Resources Management/Justice Management Division Suite 850, WCTR, Washington, DC 20530.

Extension of a Currently Approved Collection

(1) Records and Reports of Registrants: Changes in Record Requirements for Individual Practitioners.

(2) Form: None. Drug Enforcement Administration, United States Department of Justice.

(3) Primary: Individuals or households. Other: Individuals or households. Required information is needed to maintain a closed system of records by requiring the individual practitioner to keep records of (1) complimentary samples of controlled substances dispensed to patients and (2) controlled substances which are both administered and dispensed to patients.

(4) 100,500 respondents/recordkeepers with .5 hours per response.

(5) 50,250 annual burden hours.

(6) Not applicable under section 3504(h) of Public Law 96–511. Public comment on this item is encouraged.

Dated: August 29, 1995.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

Extension of a Currently Approved Collection

(1) Application for Registration under Domestic Chemical Diversion Control Act of 1993 and Renewal Application for Registration under Domestic Chemical Diversion Control Act.

(2) Form: DEA Form 510, DEA Form 510a. Drug Enforcement Administration, United States Department of Justice.

(3) Primary: Business or other for-profit. Other: Individuals or households. The Domestic Chemical Diversion Control Act requires that distributors, importers, and exporters of listed chemicals which are being diverted in the United States for the production of illicit drugs must register with the DEA. Registration provides a system to aid in the tracking of the distribution of list I chemicals.

(4) 11,500 responses per year at .5 hours per response.

(5) 5,750 annual burden hours.

(6) Not applicable under section 3504(h) of Public Law 96–511. Public comment on this item is encouraged.

Dated: August 29, 1995.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

BILLING CODE 4410-09-M

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) the title of the form/collection;

(2) the agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) who will be asked or required to respond, as well as a brief abstract;

(4) an estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(5) an estimate of the total public burden (in hours) associated with the collection; and

(6) an indication as to whether Section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jeff Hill on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Robert B. Briggs, on (202) 514–4319. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the Department of Justice Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Robert B. Briggs, Department of Justice Clearance Officer, Systems Policy Staff/Information Resources Management/Justice Management Division Suite 850, WCTR, Washington, DC 20530.

Extension of a Currently Approved Collection

(1) Removal of Restrictions on Employing Certain Individuals.

(2) Form: None. Drug Enforcement Administration, United States Department of Justice.

(3) Primary: Business or other for-profit. Other: Individuals or households, Not-for-profit institutions, Federal Government, State, Local or Tribal Government. The information is necessary to maintain a closed system of distribution by requiring notification from DEA registrants of their intent to employ persons convicted of a felony offense.

(4) 100 responses per year at .5 hours per response.

(5) 50 annual burden hours.

(6) Not applicable under section 3504(h) of Public Law 96–511. Public comment on this item is encouraged.

Dated: August 29, 1995.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

Extension of a Currently Approved Collection

(1) Report of Theft or Loss of Controlled Substances.

(2) DEA Form 106. Drug Enforcement Administration, United States Department of Justice.

(3) Primary: Business or other for-profit. Other: Individuals or households. DEA Form 106 was designed to provide a standardized format with which DEA registrants could use to report a discovery of a theft or loss of a controlled substance. The purpose is to maintain an accurate accounting of all controlled substances, monitor substances diverted into illicit markets and develop leads for criminal investigations.

(4) 8398 annual respondents at .5 hours per response.

(5) 4199 annual burden hours.

(6) Not applicable under section 3504 (h) of Public Law 96–511. Public comment on this item is encouraged.

Dated: August 29, 1995.

Robert B. Briggs,

Department Clearance Officer, United States Department of Justice.

DEPARTMENT OF LABOR

Office of the Secretary

President's Committee on the International Labor Organization; Notice of Postponement of Closed Meeting

This document postpones the September 8, 1995 closed meeting of the President's Committee on the ILO until September 14, 1995. Notice of this closed meeting was previously published in the **Federal Register** on August 16, 1995, 60 FR 42588. The meeting is being postponed because of the scheduling difficulties of certain participants.

The closed meeting will now take place on Thursday, September 14, 1995 at 10:00 am at the U.S. Department of Labor, Third & Constitution Avenue, N.W., Room S–2508, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Mr. Joaquin F. Otero, President's Committee on the International Labor Organization, U.S. Department of Labor, 200 Constitution Avenue, NW., Room S–2235, Washington, DC 20210, Telephone (202) 219–6043.

Signed at Washington, D.C. this 31st day of August, 1995.

Andrew J. Samet,

Associate Deputy Under Secretary International Affairs.

[FR Doc. 95–22080 Filed 9–5–95; 8:45 am]

BILLING CODE 4510-28-M

Employment and Training Administration

National Skill Standards Board; Notice of Open Meeting

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of open meeting.

SUMMARY: The National Skill Standards Board was established by an Act of Congress, the Goals 2000: Educate America Act of 1994, Title V, Pub. L. 103–227. The 28-member National Skill Standards Board will serve as a catalyst and be responsible for the development and implementation of a national system of voluntary skill standards and certification through voluntary partnerships which have the full and balanced participation of business, industry, labor, education and other key groups.

Time and Place: The meeting will be held from 2 p.m. to approximately 5:30 p.m. on Wednesday, September 20, 1995, in the Auditorium of the Francis Perkins Building, Department of Labor, 200 Constitution Avenue, NW., Washington, DC.

Agenda: The agenda for the Board Meeting will include presentations on a variety of methods for occupational clusters.

Public Participation: The meeting from 2 p.m. to approximately 5:30 p.m., is open to the public. Seating is limited and will be available on a first-come, first-served basis. Seats will be reserved for the media. Disabled individuals should contact Ed Rugenstein at (301) 495–1591, if special accommodations are needed.

FOR FURTHER INFORMATION CONTACT: Ed Rugenstein at (301) 495–1591.

Signed at Washington, DC., this 30th day of August, 1995.

Judy Gray,

Executive Director, National Skill Standards Board.

[FR Doc. 95–22047 Filed 9–5–95; 8:45 am]

BILLING CODE 4510-30-M

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 95–76; Exemption Application No. D–09819, et al.]

Grant of Individual Exemptions; John B. Toomey Rollover IRA (the IRA), et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of proposed exemption were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990) and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

John B. Toomey Rollover IRA (the IRA), Located in Lorton, Virginia

[Prohibited Transaction Exemption 95–76; Exemption Application No. D–09819]

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the installment sale of 36.2 shares of common stock (the Stock) in JBT Holding Corporation (JBT) by the IRA [1] to JBT, a disqualified person with respect to the IRA; provided that: (a) The purchase price JBT pays for the Stock is the greater of $410,146 or the fair market value of the Stock on the date of the sale; (b) the fair market value of the Stock is determined by a qualified independent appraiser, as of the date of the sale; (c) the terms of the transaction are no less favorable to the IRA than those negotiated at arm's length with unrelated third parties in similar circumstances; (d) the trustee of the IRA monitors compliance with the terms of the transaction throughout the duration of the installment sale; (e) the IRA receives a cash downpayment of no less than $210,146 on the date of the sale and thereafter receives three (3) equal annual installment payments of $66,667, the first of which is due and payable December 31, 1995, plus interest at the fair market rate of interest, as determined by an independent, qualified third party, as of the date of the transaction, on the outstanding balance of the installment payments, payable annually until all the installment payments have been made by JBT on or before December 31, 1997; (f) the outstanding balance of the installment payments at no time exceeds 25 percent (25%) of the value of the assets of the IRA; (g) the outstanding balance on the installment payments is secured by a recorded first mortgage interest in real property pledged by JBT in favor of the IRA; (h) the collateral which secures the installment payments has a value, as determined by an independent, qualified appraiser, which at all times is no less than 150 percent (150%) of the outstanding balance of the installment payments; and (i) the IRA pays no commissions, fees, or other expenses in connection with the transaction.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on July 21, 1995, at 58 FR 37682.

Phillips Petroleum Company (Phillips) Located in Bartlesville, OK

[Prohibited Transaction Exemption 95–77; Exemption Application No. D–09907]

Exemption

The restrictions of sections 406(a), 406(b) (1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to (1) the making of interest-free loans to the Thrift Plan of Phillips Petroleum Company (the Plan) by Phillips, the Plan sponsor pursuant to the terms of a credit facility arrangement; and (2) the repayment of such loans by the Plan to Phillips.

This exemption is conditioned on the following requirements:

(a) Each loan executed under the proposed credit facility arrangement provides short-term funds to the Plan in connection with inter-fund transfers, withdrawals and participant loans and permits the orderly disposal of Phillips common stock.

(b) Each loan made under the proposed credit facility arrangement is unsecured and no interest, commissions or expenses are paid by the Plan.

(c) In the event of a loan default or delinquency, Phillips has no recourse against the Plan.

(d) Each loan is initiated, accounted for and administered by an independent fiduciary who monitors the terms and conditions of the exemption.

Written Comments

The Department received six written comments with respect to the notice of proposed exemption and no requests for a public hearing. Of the written comments received, five commenters recommended that the Department grant the proposed exemption. The sixth commenter questioned whether the proposed credit facility arrangement would be in the best interest of the Plan since it would allow no recourse against Plan assets. The commenter also raised several questions about the Plan's participant loan program.

In response to the sixth commenter, Bankers Trust Company (BTC), the Plan trustee and independent fiduciary with respect to the proposed transactions, notes that the purpose of the credit facility arrangement is to facilitate participant directions regarding their account balances on a more timely basis. According to BTC, receiving the loans on an interest-free basis from Phillips meets this purpose and it allows the Plan to avoid the expense of its current credit facility arrangement with NationsBank of Dallas, Texas. BTC further represents that by requiring that the loans be on a non-recourse basis provides an additional safeguard to the Plan and ensures that participant account balances will not be impacted adversely.

With respect to the Plan's participant loan program, the commenter has inquired about the (a) number of participants in the Plan having outstanding participant loans, (b) the frequency of loan repayments, (c) the percentage of such loans that are in arrears or default, and (d) what safeguards can and should be implemented to prevent depreciation in the value of Phillips common stock.

Phillips has responded to each of the commenter's concerns on these matters. In this regard, Phillips represents that as of July 17, 1995, approximately 2,000 participants had outstanding participant loans with the Plan. Phillips notes that for these loans, repayment schedules range from three months to 180 months in duration depending upon the election of the participant. Phillips further explains that virtually none of the loans are in arrears or default since the Plan requires that loan repayments be made by payroll deduction or repaid in full. However, should a participant loan be in default, Phillips states that there will be no impact on Plan participants since the participant's account will serve as security for the loan and the event of default will become a taxable distribution to the participant. Finally, Phillips notes that neither the Plan nor BTC can control the value of Phillips common stock that is held by the Plan and that the intent of the exemption is to allow participants the flexibility of moving into or out of stock funds with the value of the stock established as of the transaction valuation date.

Technical Correction

The Department notes that the correct application number for the subject request is "D–09907" and not "D–09909" as it appeared in the proposed exemption. Therefore, the Department has incorporated this revision into the grant notice.

After giving full consideration to the entire record, including the written comment that was submitted and the responses made by BTC and Phillips, the Department has decided to grant the exemption as described and revised above. The comment letter and responses have been included as part of the public record of the exemption application. The complete application file, including all supplemental submissions received by the Department, is made available for public inspection in the Public Documents Room of the Pension and Welfare Benefits Administration, Room N–5638, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on June 7, 1995 at 60 FR 30106.

The Bank of New York (the Bank) Located in New York, New York

[Prohibited Transaction Exemption 95–79; Application No. D–10030]

Exemption

Section I—Exemption for the Acquisition, Holding and Disposition of BNY Stock

The restrictions of sections 406(a)(1)(D), 406(b)(1) and (b)(2) of the Act, and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(D) and (E) of the Code, shall not apply to the acquisition, holding or disposition of the common stock of the Bank's parent corporation, The Bank of New York Company, Inc. (BNY Stock), by Index or Model-Driven Funds, if the following conditions and the General Conditions of Section II are met:

(a) The Index or Model-Driven Fund is based on an index which represents the investment performance of a specific segment of the public market for equity securities in the United States and/or foreign countries. The organization creating and maintaining the index must be (1) engaged in the business of providing financial information, evaluation, advice or securities brokerage services to institutional clients, (2) a publisher of financial news or information, or (3) a public stock exchange or association of securities dealers. The index must be created and maintained by an organization independent of the Bank and its affiliates. The index must be a generally accepted standardized index of securities which is not specifically tailored for the use of the Bank or its affiliates.

(b) The acquisition or disposition of the BNY Stock is for the sole purpose of maintaining strict quantitative conformity with the relevant index upon which the Index or Model-Driven Fund is based.

(c) All acquisitions comply with Rule 10b–18 of the Securities and Exchange Commission, including the limitations regarding the price paid or received for such stock.

(d) Aggregate daily purchases of BNY Stock constitute no more than the greater of: (1) 10 percent of the stock's average daily trading volume for the previous five days; or (2) 10 percent of the stock's trading volume on the date of the transaction.

(e) If the necessary number of shares of BNY Stock cannot be acquired within 10 business days from the date of the event which causes the particular Index or Model-Driven Funds to require BNY Stock, the Bank appoints a fiduciary which is independent of the Bank and its affiliates to design acquisition procedures and monitor the Bank's compliance with such procedures.

(f) All purchases and sales of BNY Stock are executed on the national exchange on which BNY Stock is primarily traded.

(g) No transactions involve purchases from, or sales to, the Bank or any affiliate (including officers, directors and employees of the Bank, as defined in Section III(c) below), or any party in interest with respect to a plan which has invested in an Index or Model-Driven Fund.

(h) No more than five (5) percent of the total amount of BNY Stock issued and outstanding at any time is held in the aggregate by the Index and Model-Driven Funds.

(i) BNY Stock constitutes no more than two (2) percent of the value of any independent third-party index on which the investments of an Index or Model-Driven Fund are based.

(j) A plan fiduciary independent of the Bank and its affiliates authorizes the investment of such plan's assets in an Index or Model-Driven Fund which purchases and/or holds BNY Stock.

(k) A fiduciary independent of the Bank and its affiliates directs the voting of the BNY Stock held by an Index or Model-Driven Fund on any matter in which shareholders of BNY Stock are required or permitted to vote.

Section II—General Conditions

(a) The Bank maintains or causes to be maintained for a period of six years from the date of the transaction the records necessary to enable the persons described in paragraph (b) of this Section to determine whether the conditions of the exemption have been met, except that (1) a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of the Bank, the records are lost or destroyed prior to the end of the six-year period, and (2) no party in interest other than the Bank shall be subject to the civil penalty that may be assessed under section 502(i) of the Act or to the taxes imposed by section 4975(a) and (b) of the Code if the records are not maintained or are not available for examination as required by paragraph (b) below.

(b)(1) Except as provided in paragraph (b)(2) and notwithstanding any provisions of section 504 (a)(2) and (b) of the Act, the records referred to in paragraph (a) of this Section are available at their customary location for examination during normal business hours by—

(A) Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service,

(B) Any fiduciary of a plan participating in an Index or Model-Driven Fund who has authority to acquire or dispose of the interests of the plan, or any duly authorized employee or representative of such fiduciary,

(C) Any contributing employer with respect to any plan participating in an Index or Model-Driven Fund or any duly authorized employee or representative of such employer, and

(D) Any participant or beneficiary of any plan participating in an Index or Model-Driven Fund, or any duly authorized employee or representative of such participant or beneficiary.

(2) None of the persons described in paragraph (b)(1)(B) through (D) shall be authorized to examine trade secrets of the Bank, any of its affiliates, or commercial or financial information which is privileged or confidential.

Section III—Definitions

(a) Index Fund—Any investment fund, account or portfolio sponsored, maintained and/or trusteed by the Bank, or an affiliate of the Bank, in which one or more investors invest which is designed to replicate the capitalization-weighted composition of a stock index which satisfies the conditions of Section I(a) and (i).

(b) Model-Driven Fund—Any investment fund, account or portfolio sponsored, maintained and/or trusteed by the Bank, or an affiliate of the Bank, in which one or more investors invest which is based on computer models using prescribed objective criteria to transform an independent third-party stock index which satisfies the conditions of Section I (a) and (i).

(c) Affiliate—Any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with such person; any officer, director, partner, employee, relative (as defined in section 3(15) of the Act), a brother, a sister, or a spouse of a brother or a sister of such person; and any corporation or partnership of which such person is an officer, director, or partner.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on July 12, 1995, at 60 FR 35944.

Rollover Individual Retirement Accounts for Joseph Shepard, Located in Jacksonville, Florida; William Haspel, Located in Bethesda, Maryland; and Richard Geisendaffer, Paul Petryszak, William Kroh and Rolf Graage, Located in Baltimore, Maryland (Collectively, the IRAs)

[Prohibited Transaction Exemption 95–80; Exemption Application Nos. D–10054–10059]

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the past sale by the IRAs of all the common stock (the Stock) of Purchase Port Services, Inc. (PPS) held by the IRAs to PPS, provided that the following conditions were satisfied: (1) The sale of Stock by each IRA was a one-time transaction for cash; (2) no commissions or other expenses were paid by the IRAs in connection with the sale; and (3) the IRAs received the greater of: (a) the fair market value of the Stock as determined by a qualified independent appraiser as of May 31, 1995, or (b) the fair market value of the Stock as of the time of the sale.[2]

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on July 21, 1995 at 60 FR 37688.

EFFECTIVE DATE: This exemption is effective July 28, 1995.

WRITTEN COMMENT: The Department received one written comment with respect to the proposed exemption, which was submitted by the applicants. The applicants had represented (see notice of proposed exemption, rep. 4) when they filed their exemption application that "Business and income tax considerations have compelled PPS to consider making an election to be treated as a 'Subchapter S' Corporation under section 1362(a) of the Code." The applicants noted in their comment letter that subsequent to the filing of the exemption request, PPS determined that, rather than electing Subchapter S Corporation status itself, PPS would merge into its subsidiary, Hobelmann Port Services, Inc. (HPS), and that HPS would elect Subchapter S Corporation status. That merger was concluded effective July 31, 1995, and HPS elected Subchapter S Corporation status effective August 1, 1995. The applicants represent that the decision to make HPS rather than PPS the entity to elect Subchapter S status was made for business purposes unrelated to the redemption of the IRAs' shares, and is not material to the requested exemption.

The applicants also requested that the exemption be made effective July 28, 1995, instead of July 31, 1995, as had been proposed. The sale of shares from the IRAs to PPS occurred on July 28, 1995 to allow sufficient time before July 31, 1995 to complete other steps relating to the Subchapter S Corporation election. The applicants represent that the sale was made in accordance with all of the conditions set forth in the proposed exemption.

The Department has considered the entire record, including the comment submitted by the applicants, and has determined to grant the exemption effective July 28, 1995.

FOR FURTHER INFORMATION CONTACT: Gary H. Lefkowitz of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application are true and complete and accurately describe all material terms of the transaction which is the subject of the exemption. In the case of continuing exemption transactions, if any of the material facts or representations described in the application change after the exemption is granted, the exemption will cease to apply as of the date of such change. In the event of any such change, application for a new exemption may be made to the Department.

Signed at Washington, D.C., this 31st day of August, 1995.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 95–22042 Filed 9–5–95; 8:45 am]

BILLING CODE 4510–29–P

---

[2] Pursuant to 29 CFR 2510.3–2(d), the IRAs are not within the jurisdiction of Title I of the Act. However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

[Application No. D–09958, et al.]

Proposed Exemptions; TSC International Ltd., Custom Marketing and Import Profit Sharing Plan (the Plan)

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restriction of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

Unless otherwise stated in the Notice of Proposed Exemption, all interested persons are invited to submit written comments, and with respect to exemptions involving the fiduciary prohibitions of section 406(b) of the Act, requests for hearing within 45 days from the date of publication of this **Federal Register** Notice. Comments and request for a hearing should state: (1) The name, address, and telephone number of the person making the comment or request; and (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and request for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Exemption Determinations, Room N–5649, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210. Attention: Application No. stated in each Notice of Proposed Exemption. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–5507, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of proposed exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

TSC International Ltd., Custom Marketing and Import Profit Sharing Plan (the Plan) Located in Kansas City, MO

[Application No. D–09956]

Proposed Exemption

The Department of Labor is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990). If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) shall not apply to the proposed (1) redemption by TSC International Merchandising Ltd., Custom Marketing and Import Company (TSC) of 19,000 shares of common stock issued by TSC and held by the Plan; and (2) the extension of credit by the Plan to TSC in connection with the redemption of the stock.[1]

The proposed exemption is conditioned on the following requirements:

(1) The redemption price for the stock is determined by a qualified, independent appraiser.

(2) The note which evidences the redemption price for the stock represents not more than 25 percent of the Plan's assets.

(3) The terms of the note are based upon terms that are comparable to those that would be extended by a third party lender.

(4) The stock, which secures TSC's obligations under the note, at all times represents 200 percent of the outstanding balance of the note; however, if the value of the stock ever falls below the 200 percent level, TSC will pledge additional collateral.

(5) The Plan is not required to pay any fees or commissions in connection with the redemption of the stock or the administration of the note.

(6) Boatmen's First National Bank of Kansas City (Boatmen's) holds certificates representing the stock in an escrow account until TSC pays the redemption price in full.

(7) The Plan increases its liquidity and investment yield by disposing of an asset and receives cash to promote asset diversification.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with Mr. Jack Hardgree as its only participant. As of December 12, 1994, the Plan had net assets of $565,500. The trustee of the Plan and the decisionmaker with respect to the Plan's investments is Mr. Hardgree.

2. TSC is a "C" corporation that maintains its principal place of business in Prairie Village, Kansas. It is engaged in the import business and primarily deals in metal products for U.S. manufacturers. Mr. Hardgree is the sole director, officer and employee of TSC.

3. The Plan currently holds 19,000 shares of common stock of TSC. The stock has a stated par value of $10 per share and it is not publicly-traded. The shares of stock that are held by the Plan represent 97 percent of the issued and outstanding stock of TSC. The 3 percent remaining shares of stock are owned by Mr. Hardgree.

4. Prior to the incorporation of TSC in January 1984, Mr. Hardgree was a manufacturer's representative with an unrelated company, Merchandise International, Inc. (MII). That company had a money purchase pension plan (the MII Plan) with individually-directed accounts. In late 1983, Mr. Hardgree resigned from his employment with MII, having been bought out by the two remaining principals of MII. Although Mr. Hardgree had no further connections with MII as an employee or owner after his resignation, he continued to participate in the MII Plan.

5. In January 1984, Mr. Hardgree formed TSC. At the time of incorporation of TSC, Mr. Hardgree, in his personal capacity, acquired 500 shares of TSC common stock directly from TSC for $10 per share. This amount represented the par value of such stock. In May 1985, Mr. Hardgree directed the trustee of the MII Plan to acquire, from TSC, 9,500 shares of TSC common stock for his individually-directed account in such Plan. The acquisition price for the stock was $10 per share. Although the stock had been authorized in TSC's corporate charter, it had not been been issued.

In 1986, Mr. Hardgree again directed the trustee of the MII Plan to acquire, from TSC, an additional 9,500 shares of TSC's authorized but unissued common stock, for his individually-directed account in the MII Plan. The acquisition price for the stock was also established at $10 per share. It is represented that at the time of both stock acquisitions, Mr. Hardgree had no interest in MII other than as a participant in the MII Plan. It is also represented that following the stock acquisitions, TSC common stock constituted the majority of the assets of Mr. Hardgree' account in the MII Plan.[2]

6. In January 1991, TSC established the Plan by adopting the Mid American Bank & Trust Company Defined Contribution Master Plan. Soon after the establishment of the Plan, the trustee of the MII Plan transferred all 19,000 shares of TSC common stock to Mid American Bank & Trust Company, the former trustee of the Plan, in a "trustee-to-trustee transfer." It is represented that Mr. Hardgree was advised that the stock transfer which was made on behalf of the Plan did not constitute a prohibited transaction.[3]

7. Mid American Bank & Trust Company later became part of Johnson County Bank which was thereafter acquired by Mercantile Bank. In December 1994, Mercantile Bank became the custodian for the Plan and Mr. Hardgree, the trustee.

8. TSC paid an unrelated third-party investment banking firm, Stern Brothers & Co. of Kansas City, Missouri for a valuation report of the 19,000 shares of TSC common stock that are held by the Plan. According to the appraisal report dated December 14, 1994, which was prepared by Messrs. John C. Korschot, CFA, ASA, CBA and David K. Jones, CBA of the firm, as of December 2, 1994, the 19,000 shares of TSC common stock held by the Plan had a fair market value of $535,500 or $27.46 per share. The appraisers stated that they used the adjusted book value approach and the market comparison approach in rendering their opinion as to the fair market value of the Plan's controlling interest in the stock. In addition, the appraisers explained that they applied a discount factor of 15 percent to the initial value of $640,000 they had determined for the stock due to its lack of marketability. The appraisers further noted that a control premium was implied in the $640,000 initial value.

9. Although the value of TSC common stock and Plan assets have increased significantly, it is represented that by holding only TSC stock, the Plan is in an illiquid position should assets be needed for distributions. Moreover, it is represented that TSC cannot promise that its stock will hold or increase in value. Therefore, TSC requests an administrative exemption from the Department in order to redeem the shares of TSC common stock that are held by the Plan in return for cash and a promissory note.

10. TSC proposes to redeem the stock held by the Plan by giving the Plan a cash downpayment of $394,125 and a promissory note in the principal amount of $141,375. The note will bear a fixed rate of interest of 11 percent per annum. The note will also provide for monthly installments of principal and interest over a period of two years after the date of the redemption. The note may be prepayable without penalty at any time by TSC. In addition, the Plan will not be required to pay any fees or commissions in connection with the redemption of the TSC common stock or with respect to the administration of the proposed loan.

11. The note will be secured by the shares of the TSC common stock that are redeemed from the Plan. The security interest in such shares will be a first security interest and it will be governed by an escrow agreement (the Escrow Agreement) between TSC and Boatmen's, with whom TSC currently has a revolving loan arrangement, as escrow agent. At all times, the fair market value of the stock will represent 200 percent of the outstanding principal balance of the note. If, however, the fair market value of the stock should ever fall below this level, TSC will pledge additional collateral to cover the loan payments made under the note. As further security, Mr. Hardgree will assign a portion of his life insurance policy in the amount of the note.

12. By letter dated June 23, 1995, TSC received a loan commitment in the amount of $141,375 from an unrelated lender, Missouri Bank & Trust Company of Kansas City (Missouri Bank & Trust). The terms offered by Missouri Bank & Trust are comparable to the terms of the note.

13. Under the Escrow Agreement, TSC will pledge all 19,000 shares of the stock that are redeemed from the Plan by the delivery of certificates evidencing such pledged shares to Boatman's. Boatmen's will hold the certificates until the loan is repaid. If at any time TSC defaults in the payment of principal or interest on the note, and the default remains uncured for two months after written notice, the entire unpaid principal amount of the note and accrued interest thereon will become immediately due and payable. Then, the Plan will have all of the certificates on deposit delivered to it. At the end of 20 days after receipt of a written demand from the Plan, together with evidence that the notice of the demand has been given to TSC, Boatmen's will deliver to the Plan the certificates held by Boatmen's. If, however, satisfactory proof is presented to Boatmen's that all installments of the note have been paid, Boatmen's will deliver to TSC, the shares remaining in its possession. Afterwards, all obligations between the Plan, TSC and Boatmen's will cease.

The Plan will not be required to pay any fees or expenses in connection with the administration of the Escrow Agreement. Further, no parties to the Escrow Agreement will grant a security interest in any of the securities deposited with Boatmen's or create a lien, encumbrance, or other claim against monies or borrow from such stock.

14. In summary, it is represented that the proposed transactions will satisfy the statutory criteria for an exemption under section 4975(c)(2) of the Code because:

(a) The redemption price for the stock has been determined by a qualified, independent appraiser.

(b) The note which evidences the redemption price for the stock will represent 25 percent of the Plan's assets.

(c) The terms of the note are based upon terms that are comparable to those that would be extended by a third party lender.

(d) The stock, which secures TSC's obligations under the note, at all times will represent 200 percent of the outstanding balance of the note.

---

[1] Because Mr. Jack Hardgree is the sole participant in the Plan, there is no jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (the Act). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

[2] The Department expresses no opinion herein on whether the acquisition of TSC common stock by Mr. Hardgree's individually-directed account in the MII Plan violated any of the provisions of Part 4 of Title I of the Act.

[3] The Department expresses no opinion herein on whether the transfer of the TSC common stock from the MII Plan to the Plan violated the exclusive benefit rule of section 401(a) of the Code.

(e) The Plan will not be required to pay any fees or commissions in connection with the redemption of the stock or the administration of the note.

(f) Boatmen's will hold certificates representing the stock in an escrow account until TSC pays the redemption price for the stock in full.

(g) The Plan will increase its liquidity and investment yield by disposing of an asset and receive cash to promote greater asset diversification.

Notice to Interested Persons

Because Mr. Hardgree is the only participant in the Plan who will be affected by the proposed transactions, it has been determined that there is no need to distribute the notice of pendency to interested persons. Therefore, comments and requests for a public hearing are due 30 days from the date of publication of this notice of proposed exemption in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete and accurately describe all material terms of the transaction which is the subject of the exemption. In the case of continuing exemption transactions, if any of the material facts or representations described in the application change after the exemption is granted, the exemption will cease to apply as of the date of such change. In the event of any such change, application for a new exemption may be made to the Department.

Signed at Washington, DC, this 31st day of August, 1995.

Ivan Strasfeld,

Director of Exemption Determinations Pension and Welfare Benefits Administration, U.S. Department of Labor.

BILLING CODE 4510-29-P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 95–094]

NASA Advisory Council, Aeronautics Advisory Committee, Subcommittee on Human Factors; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a NASA Advisory Council, Aeronautics Advisory Committee, Subcommittee on Human Factors meeting.

DATES: October 17, 1995, 8:30 a.m. to 4:30 p.m.; October 18, 1995, 8:30 a.m. to 4:30 p.m.; and October 19, 1995, 8:30 a.m. to 11:30 a.m.

ADDRESSES: National Aeronautics and Space Administration, Langley Research Center, Building 1268A, Room 2120, Hampton, VA 23681–0001.

FOR FURTHER INFORMATION CONTACT: Mr. Gregory W. Condon, National Aeronautics and Space Administration, Ames Research Center, Moffett Field, CA 94035, 415/604–5567.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. Agenda topics for the meeting are as follows:

—NASA Actions on Committee's Previous Recommendations
—NASA Human Factors Overview and Updates on Ames Research Center and Langley Research Center Programs
—Crew-Centered Design Philosophy
—Aviation Safety and Automation Program
—Human Engineering Methods
—Air Traffic Management Human Factors

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants. Visitors will be requested to sign a visitors register.

Dated: August 31, 1995.

Danalee Green,

Management Controls Office.

BILLING CODE 7510-01-M

NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

National Endowment for the Arts; President's Committee on the Arts and the Humanities

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), as amended, notice is hereby given that the President's Committee on the Arts and the Humanities will hold five Regional Planning Meetings in the month of September 1995.

The date, times, and locations are as follows:

Dates/times	Locations
September 13 from 2:30 p.m. to 4:30 p.m.	Lyndon Baines Johnson Library, 2313 Red River Street, Austin, TX 78705.
September 15 from 1:30 p.m. to 3:30 p.m.	J. Paul Getty Trust, 401 Wilshire Boulevard, Santa Monica, CA 90401.
September 18 from 2:30 p.m. to 4:30 p.m.	Room 527, Nancy Hanks Center, 1100 Pennsylvania Avenue, Washington, DC 20506.
September 19 from 2:00 p.m. to 4:00 p.m.	American Express Company, 200 Vesey Street, New York, NY 10285.
September 22 from 2:00 p.m. to 4:00 p.m.	Sara Lee Corporation, Three First National Plaza, Chicago, IL 60602.

These meetings will be open to the public on a space available basis for the purpose of planning for the future.

If, in the course of discussion, it becomes necessary for the Committee to discuss nonpublic commercial or financial information of intrinsic value, the committee will go into closed session pursuant to subsection (c)(4) of the Government in the Sunshine Act, 5 U.S.C. 552b.

Additionally, discussion concerning purely personal information about individuals, such as personal biographical and salary data or medical information, may be conducted by the committee in closed session, in accordance with subsection (c)(6) of U.S.C. 552b.

Any interested persons may attend as observers, on a space available basis, but seating is limited in meeting rooms and it is suggested that individuals wishing to attend notify the staff of the President's Committee in advance at (202) 682–5409 or write to the Committee at 1100 Pennsylvania Avenue, NW, Suite 526, Washington, DC 20506.

Dated: August 30, 1995.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 070-925]

Consideration of Amendment Request for Decommissioning the Cimarron Corporation Facility in Crescent, Okla., and Opportunity for Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Consideration of Amendment Request for Decommissioning the Cimarron Corporation Facility in Crescent, Oklahoma, and Opportunity for Hearing.

The U.S. Nuclear Regulatory Commission is considering issuance of an amendment to Special Nuclear Material License No. SNM–928, issued to the Cimarron Corporation (the Licensee), for the decommissioning of its former nuclear fuel fabrication facility in Crescent, Oklahoma.

The Licensee requested the amendment in a letter dated May 4, 1995, requesting that License No. SNM–928 be amended to incorporate the decommissioning plan (DP) for the Cimarron facility submitted to NRC in April 1995. Radioactive contamination at the Cimarron facility resulted from operations to produce enriched uranium reactor fuels conducted from 1965 through 1977. The Licensee also submitted a site characterization report in support of the DP. The license amendment would authorize the Licensee to decommission the Cimarron facility in accordance with the DP.

The NRC will require the Licensee to remediate the Cimarron facility to meet NRC's criteria, and, during the decommissioning activities, to maintain effluents and doses as low as reasonably achievable.

Prior to the issuance of the proposed amendment, NRC will have made findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report and an Environmental Assessment.

The NRC hereby provides notice that this is a proceeding on an application for a license amendment falling within the scope of Subpart L, Informal Hearing Procedures for Adjudications in Materials Licensing Proceedings, of NRC's rules and practice for domestic licensing proceedings in 10 CFR part 2. Pursuant to § 2.1205(a), any person whose interest may be affected by this proceeding may file a request for a hearing in accordance with § 2.1205(c). A request for a hearing must be filed within thirty (30) days of the date of publication of this **Federal Register** notice.

The request for a hearing must be filed with the Office of the Secretary either:

1. By delivery to the Docketing and Service Branch of the Office of the Secretary at One White Flint North, 11555 Rockville Pike, Rockville, MD 20852–2738; or

2. By mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Attention: Docketing and Service Branch.

In addition to meeting other applicable requirements of 10 CFR part 2 of the NRC's regulations, a request for a hearing filed by a person other than an applicant must describe in detail:

1. The interest of the requestor in the proceeding;

2. How that interest may be affected by the results of the proceeding, including the reasons why the requestor should be permitted a hearing, with particular reference to the factors set out in § 2.1205(g);

3. The requestor's areas of concern about the licensing activity that is the subject matter of the proceeding; and

4. The circumstances establishing that the request for a hearing is timely in accordance with § 2.1205(c).

In accordance with 10 CFR 2.1205(e), each request for a hearing must also be served, by delivering it personally or by mail, to:

1. The applicant, Cimarron Corporation, Kerr-McGee Center, P.O. Box 25861, Oklahoma City, OK, 73125, Attention: Mr. Jess Larsen, and

2. The NRC staff, by delivery to the Executive Director for Operations, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852, or by mail, addressed to the Executive Director for Operations, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

For further details with respect to this action, the application for amendment request is available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555.

Dated at Rockville, MD, this 23rd day of August 1995.

For the Nuclear Regulatory Commission.

Michael F. Weber,

Chief, Low-Level Waste and Decommissioning Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.

[FR Doc. 95–22039 Filed 9–5–95; 8:45 am]

BILLING CODE 7590-01-P

[Docket No. 50–344]

Portland General Electric Co.; Trojan Nuclear Power Station; Federal Court Decision and Opportunity for Public Comments

On July 20, 1995, the United States Court of Appeals for the First Circuit issued a decision granting a petition by the Citizens Awareness Network ("CAN") for review of a decision by the Nuclear Regulatory Commission. *See Citizens Awareness Network, Inc. v. NRC*, No. 94–1562, _____ F.3d _____, 1995 WL 419188 (1st Cir., July 20, 1995). The First Circuit found that the Commission erred when it rejected CAN's request for a hearing on the component removal project ("CRP") that Yankee Atomic Electric Power Company ("YAEC") is carrying out as part of decommissioning the Yankee Nuclear Power Station, located in Rowe, Massachusetts. The Court held that "CAN was entitled to a hearing under section 189a [of the Atomic Energy Act of 1954] in connection with the NRC decision to permit YAEC's early CRP." Slip op. at 26. The Court also held that the Commission had violated the National Environmental Policy Act by permitting YAEC to initiate the CRP before the agency had prepared an environmental assessment or impact statement. The Court remanded the case to the Commission for further action in accordance with these holdings.

In reaching these results the Court criticized the Commission's change in interpretation of its 1988 decommissioning regulations [1] that it announced in a staff requirements memorandum dated January 14, 1993. In that memorandum, the Commission decided to allow its licensees to conduct "any decommissioning activity" prior to NRC approval of a decommissioning plan, so long as the activity did not "violate the terms of the licensee's existing license * * * or 10 CFR 50.59 as applied to the existing license." Previously, the Commission had required that "major dismantling and other activities * * * must await NRC approval of a decommissioning plan." *See Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI–91–2, 33 NRC 61, 73 n.5 (1991). *Accord, Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI–92–2, 35 NRC 47, 61 n.7 (1992). Relying on the Commission's new interpretation, YAEC began removing major components from its Yankee reactor before obtaining approval of a decommissioning plan.[2] In its decision, the First Circuit held (among other things) that the Commission had failed to give an adequate explanation for its shift in policy.

The Commission will not seek either rehearing of this decision by the First Circuit or review in the United States Supreme Court. When the First Circuit's mandate issues, the Commission will comply with the decision.[3] The Commission currently believes that, pending completion of its ongoing rulemaking on decommissioning, further decommissioning activities must be conducted under existing NRC regulations as the Commission interpreted and applied them prior to the 1993 change in interpretation that the court rejected.[4] Prior to January, 1993, NRC licensees could not initiate major dismantling activities prior to Commission approval of a decommissioning plan. Furthermore, prior to 1993 the Commission consistently offered opportunities for hearings on proposed decommissioning plans.[5]

By a separate notice published today the Commission is soliciting public comments on how to proceed on remand in the Yankee proceeding itself. But other nuclear power plants contemplating or engaged in decommissioning may also be affected by the First Circuit decision. The most notable of these is the Trojan Nuclear Power Station, located near Portland, Oregon, and operated by Portland General Electric ("PGE"). Currently, PGE is engaged in a program of dismantlement and removal of large components in advance of receiving NRC approval of the Trojan decommissioning plan. The Trojan decommissioning plan was submitted to the NRC in January, 1995, and review by the NRC staff is currently in progress.

In view of the First Circuit decision the Commission intends to issue a **Federal Register** notice offering an opportunity for a hearing on whether to approve the Trojan plan. In addition, the Commission is considering whether it is necessary to halt any decommissioning activity at Trojan, pending a hearing. The First Circuit decision does not require the Commission to take affirmative action halting dismantling activities currently being conducted in reliance on the interpretation rejected by the court. Nonetheless, the Commission's prior interpretation of its rules precludes major dismantling activities prior to approval of a decommissioning plan.

Comments submitted at this time by interested persons should address the Commission's legal authority to allow or forbid further decommissioning activity at Trojan and should address the current balance of equities, including (1) any consequences for public health and safety and the environment, (2) the costs to PGE and others from interrupting decommissioning activities, and (3) the public interest. The Commission also requests comments on the Commission's proposed response to the First Circuit decision as a general matter. Alternative suggestions on how the Commission should oversee decommissioning in the wake of the First Circuit decision are welcome.

The NRC requests PGE to submit its comments no later than 10 calendar days after publication of this notice. The NRC requests other interested members of the public to submit comments as soon thereafter as possible, but no later than 17 calendar days after publication of this notice. The NRC promptly will place copies of all comments in its Public Document Room and in the Local Public Document Room at the Trojan site.

In addition, PGE and the parties to the Oregon state proceeding reviewing the Trojan CRP should serve their comments directly on each other and on the NRC staff. All comments should be addressed to: Emile Julian, Chief, Docketing and Service Branch, Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Service of comments on the NRC Staff may be accomplished by addressing them to: Seymour H. Weiss, Chief, Non-Power Reactors and Decommissioning Project Directorate, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and Lawrence J. Chandler, Esq., Assistant General Counsel for Hearings and Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Comments may be hand-delivered to the NRC's Offices at 11555 Rockville Pike, Rockville, Maryland between 7:45 a.m. and 4:15 p.m. on Federal Workdays.

FOR FURTHER INFORMATION CONTACT: Charles Mullins, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington DC 20555, telephone (301) 415–1606.

Dated at Rockville, MD, this 30th day of August, 1995.

For the Nuclear Regulatory Commission.

Andrew L. Bates,

Acting Secretary of the Commission.

[FR Doc. 95–22034 Filed 9–5–95; 8:45 am]

BILLING CODE 7590–01–P

---

[1] *See* 53 FR 24018 (June 27, 1988).

[2] Subsequently, on February 14, 1995, the NRC approved a decommissioning plan for Yankee Rowe. *See* 60 FR 9870 (February 22, 1995). During the approval process, the NRC staff held an informal public meeting to receive comments about the plan.

[3] Pursuant to Rule 41 of the Federal Rules of Appellate Procedure, the Court's mandate will issue no later than September 12, 1995, unless the intervenor YAEC petitions for rehearing or obtains a stay of mandate pending a petition for Certiorari.

[4] The Commission has published for comment a proposed decommissioning rule that would introduce significant changes in the present regulations. *See* 60 FR 37374 (July 20, 1995). Because this new rulemaking is underway, the Commission does not intend to undertake procedures to reinstate the 1993 policy change.

[5] The NRC staff offered an opportunity for hearings on proposed orders approving the Shoreham, Fort St. Vrain, and Rancho Seco decommissioning plans, which were the only plans approved under the Commission's 1988 decommissioning regulations. *See, e.g.*, 56 FR 66459 (December 23, 1991); 57 FR 8940 (Mar. 13, 1992); and 57 FR 9577 (Mar. 19, 1992). A hearing was requested on the Rancho Seco plan and was being conducted when the case was settled. A hearing was requested on the Shoreham plan, but the case was settled before the hearing opened.

[Docket No. 50–29]

Yankee Atomic Electric Co.; Yankee Nuclear Power Station; Federal Court Decision and Opportunity for Public Comments

On July 20, 1995, the United States Court of Appeals for the First Circuit issued a decision granting a petition by the Citizens Awareness Network ("CAN") for review of a decision by the Nuclear Regulatory Commission. *See Citizens Awareness Network, Inc. v. NRC,* No. 94–1562, ———F.3d———, 1995 WL 419188 (1st Cir., July 20, 1995). The First Circuit found that the Commission erred when it rejected CAN's request for a hearing on the component removal project ("CRP") that Yankee Atomic Electric Power Company ("YAEC") is carrying out as part of decommissioning the Yankee Nuclear Power Station, located in Rowe, Massachusetts. The Court held that "CAN was entitled to a hearing under section 189a (of the Atomic Energy Act of 1954) in connection with the NRC decision to permit YAEC's early CRP." Slip op. at 26. The Court also held that the Commission had violated the National Environmental Policy Act by permitting YAEC to initiate the CRP before the agency had prepared an environmental assessment or impact statement. The Court remanded the case to the Commission for further action in accordance with these holdings.

In reaching these results the Court criticized the Commission's change in interpretation of its 1988 decommissioning regulations [1] that it announced in a staff requirements memorandum dated January 14, 1993. In that memorandum, the Commission decided to allow its licensees to conduct "any decommissioning activity" prior to NRC approval of a decommissioning plan, so long as the activity did not "violate the terms of the licensee's existing license * * * or 10 CFR 50.59 as applied to the existing license." Previously, the Commission had required that "major dismantling and other activities * * * must await NRC approval of a decommissioning plan." *See Long Island Lighting Co.* (Shoreham Nuclear Power Station, Unit 1), CLI–91–2, 33 NRC 61, 73 n.5 (1991). *Accord, Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI–92–2, 35 NRC 47, 61 n.7 (1992). Relying on the Commission's new interpretation, YAEC began removing major components from its Yankee reactor before obtaining approval of a decommissioning plan.[2] In its decision, the First Circuit held (among other things) that the Commission had failed to give an adequate explanation for its shift in policy.

The Commission will not seek either rehearing of this decision by the First Circuit or review in the United States Supreme Court. When the First Circuit's mandate issues, the Commission will comply with the decision.[3] By this notice the Commission intends (1) to inform persons with an interest in decommissioning activities at Yankee about the Commission's present views on what compliance likely will entail and (2) to solicit those persons' views on the compliance issue.

The Commission currently believes that, pending completion of its ongoing rulemaking on decommissioning, further decommissioning activities must be conducted under NRC decommissioning regulations as the Commission interpreted and applied them prior to the 1993 change in interpretation that the court rejected.[4] Prior to January, 1993, NRC licensees could not initiate major dismantling activities prior to Commission approval of a decommissioning plan. Furthermore, prior to 1993 the Commission consistently offered opportunities for hearings on proposed decommissioning plans.[5]

Thus, after the mandate issues, the Commission intends to issue a **Federal Register** notice that will offer an opportunity for a hearing on the Yankee decommissioning plan and on whatever remains to be done under the CRP. In addition, the Commission is considering whether it is necessary to halt any decommissioning activity at Yankee, pending a hearing. The First Circuit's decision does not require the Commission to take affirmative action halting dismantling activities YAEC currently is conducting in reliance on the interpretation rejected by the court. Nevertheless, the Commission's prior interpretation of its rules precludes major dismantling activities prior to approval of a decommissioning plan.

Comments submitted at this time by interested persons should address the Commission's legal authority to allow or forbid further decommissioning activity at Yankee and should address the current balance of equities, including (1) any consequences for public health and safety and the environment, (2) the costs to YAEC and others from interrupting decommissioning activities, and (3) the public interest. The Commission also requests comments on the Commission's proposed response to the First Circuit decision as a general matter. Alternative suggestions on how the Commission should oversee decommissioning in the wake of the First Circuit decision are welcome.

The NRC requests YAEC to submit its comments no later than 10 calendar days after publication of this notice. The NRC requests other interested members of the public, including CAN, to submit comments as soon thereafter as possible, but no later than 17 calendar days after publication of this notice. The NRC promptly will place copies of all comments in its Public Document Room and in the Local Public Document Room at the Yankee site.

In addition, CAN and YAEC should serve their comments on each other and on the NRC staff. All comments should be addressed to: Emile Julian, Chief, Docketing and Service Branch, Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Service of comments on the NRC Staff may be accomplished by addressing them to: Seymour H. Weiss, Chief, Non-Power Reactors and Decommissioning Project Directorate, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and Lawrence J. Chandler, Esq., Assistant General Counsel for Hearings and Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Comments may be hand-delivered to the NRC's Offices at 11555 Rockville Pike, Rockville, Maryland 20852.

BILLING CODE 7590–01–P

[Docket No.: 070–3073]

Consideration of Amendment Request for Decommissioning the Kerr-McGee Corp. Cushing Facility in Cushing, Okla., and Opportunity for Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Consideration of Amendment Request for Decommissioning the Kerr-McGee Corporation Cushing Facility in Cushing, Oklahoma, and Opportunity for Hearing.

The U.S. Nuclear Regulatory Commission is considering issuance of an amendment to Special Nuclear Material License No. SNM–1999, issued to the Kerr-McGee Corporation (the Licensee), for the decommissioning of its former enriched uranium and thorium processing facility in Cushing, Oklahoma.

The Licensee requested the amendment in a letter dated May 9, 1995, requesting that License No. SNM–1999 be amended to incorporate the decommissioning plan (DP) for the Cushing facility submitted to NRC in April 1994. Radioactive contamination at the Cushing facility resulted from operations to convert uranium hexafluoride or other compounds and/or scrap to nuclear fuel materials, and operations to process thorium to produce thorium pellets. These operations were conducted from 1962 through mid-1966. The license amendment would authorize the Licensee to decommission the Cushing facility in accordance with the DP.

The NRC will require the Licensee to remediate the Cushing facility to meet NRC's criteria, and, during the decommissioning activities, to maintain effluents and doses as low as reasonably achievable.

Prior to the issuance of the proposed amendment, NRC will have made findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report and an Environmental Assessment.

The NRC hereby provides notice that this is a proceeding on an application for a license amendment falling within the scope of Subpart L, Informal Hearing Procedures for Adjudications in Materials Licensing Proceedings, of NRC's rules and practice for domestic licensing proceedings in 10 CFR part 2. Pursuant to § 2.1205(a), any person whose interest may be affected by this proceeding may file a request for a hearing in accordance with § 2.1205(c). A request for a hearing must be filed within thirty (30) days of the date of publication of this **Federal Register** notice.

The request for a hearing must be filed with the Office of the Secretary either:

1. By delivery to the Docketing and Service Branch of the Office of the Secretary at One White Flint North, 11555 Rockville Pike, Rockville, MD 20852–2738; or
2. By mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Attention: Docketing and Service Branch.

In addition to meeting other applicable requirements of 10 CFR Part 2 of the NRC's regulations, a request for a hearing filed by a person other than an applicant must describe in detail:

1. The interest of the requestor in the proceeding;
2. How that interest may be affected by the results of the proceeding, including the reasons why the requestor should be permitted a hearing, with particular reference to the factors set out in § 2.1205(g);
3. The requestor's areas of concern about the licensing activity that is the subject matter of the proceeding; and
4. The circumstances establishing that the request for a hearing is timely in accordance with § 2.1205(c).

In accordance with 10 CFR 2.1205(e), each request for a hearing must also be served, by delivering it personally or by mail, to:

1. The applicant, Kerr-McGee Corporation, Kerr-McGee Center, Oklahoma City, OK, 73125, Attention: Mr. Jess Larsen, and
2. The NRC staff, by delivery to the Executive Director for Operations, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852, or by mail, addressed to the Executive Director for Operations, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

For further details with respect to this action, the application for amendment request is available for inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555.

Dated at Rockville, Md., this 23rd day of August, 1995.

For the Nuclear Regulatory Commission,

Michael F. Weber,

Chief, Low-Level Waste and Decommissioning Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.

[FR Doc. 95–22038 Filed 9–5–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 50–271]

In the Matter of: Vermont Yankee Nuclear Power Corporation (Vermont Yankee Nuclear Power Station); Exemption

I

The Vermont Yankee Nuclear Power Corporation (VYNPC, the licensee) is the holder of Facility Operating License No. DPR–28 which authorizes operation of the Vermont Yankee Nuclear Power Station (the facility) at power levels no greater than 1593 megawatts thermal. The facility is a single-unit boiling water reactor (BWR) located at the licensee's site in Windham County, Vermont.

The License provides, among other things, that the Vermont Yankee Nuclear Power Station is subject to all rules, regulations, and orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

II

On November 19, 1980, the Commission published a revised 10 CFR 50.48 and a new Appendix R to 10 CFR part 50 regarding fire protection features of nuclear power plants. The revised Section 50.48 and Appendix R became effective on February 17, 1981. Section III of Appendix R contains 15 subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. Subsection III.J is the subject of the licensee's exemption request.

Section III.J of Appendix R requires that emergency lighting units with at least an 8-hour battery power supply shall be provided in all areas needed for operation of safe shutdown equipment and in access and egress routes thereto.

III

By letter dated June 29, 1995, the licensee requested an exemption from Section III.J of Appendix R. In particular, the licensee stated that it cannot meet the requirements for emergency lighting units with at least an 8- hour battery power supply in the following areas:

(1) A portion of general yard areas for access and egress to the Intake

Structure, the Northwest Cooling Tower valve pit, and the fuel oil transfer pump building, and

(2) In those areas needed for manual hookup of a portable fuel oil transfer pump.

The licensee proposes to utilize the security perimeter lighting for outdoor egress routes and one outdoor task. Based on the staff's review of the information provided by the licensee, the staff has concluded that, given that the security lighting is powered from a separate power source, the security lighting is not vulnerable to fire loss. The security lighting is inspected and maintained as part of the plant security requirements. The licensee has confirmed that the illumination levels in the affected areas of the plant are adequate to enable operators to implement the actions required for safe shutdown.

Therefore, the staff considers the licensee's alternative lighting configuration to be equivalent to that achieved by literal conformance with Appendix R to 10 CFR part 50 and, therefore, meets the underlying purpose of Section III.J of Appendix R. Therefore, the licensee's request for exemption from the requirements of Section III.J in the subject locations should be granted.

IV

Pursuant to 10 CFR 50.12(a)(2), the Commission will not consider granting an exemption unless special circumstances are present. Item (ii) of the subject regulation includes special circumstances where application of the subject regulation would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule.

The underlying purpose of Section III.J of Appendix R is to provide adequate illumination to assure the capability of performing all necessary safe shutdown functions as well as provide illumination for required movements into and out of the plant. In lieu of the 8-hour battery powered units specified by Appendix R, the licensee has proposed using existing security lighting. The staff has reviewed the proposed alternative and has concluded, as described above, that the security lighting system would be a reliable alternative and would provide an adequate level of illumination to assure that all required safe shutdown functions and required personnel movements can be performed. Therefore, the staff concludes that special circumstances exist for the licensee's requested exemption in that imposition of the literal requirements of the regulation in these particular circumstances is not necessary to achieve the underlying purpose of Appendix R to 10 CFR part 50.

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a)(2)(ii), special circumstances exist in that existing levels of emergency lighting satisfy the underlying purpose of Appendix R to 10 CFR part 50. Further, the staff has concluded that the requested exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Therefore, the Commission hereby grants the exemption request from the requirements of Section III.J of Appendix R to 10 CFR part 50 described in Section III above.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of this exemption will have no significant impact on the quality of the human environment (60 FR 44086).

This Exemption is effective upon issuance.

Dated at Rockville, Md., this 30th day of August 1995.

For the Nuclear Regulatory Commission,

Steven A. Varga,

Director, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 95–22036 Filed 9–5–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 50–271]

In the Matter of: Vermont Yankee Nuclear Power Corporation (Vermont Yankee Nuclear Power Station); Revocation of Exemption

I

The Vermont Yankee Nuclear Power Corporation (VYNPC, the licensee) is the holder of Facility Operating License No. DPR–28 which authorizes operation of the Vermont Yankee Nuclear Power Station (the facility) at power levels no greater than 1593 megawatts thermal. The facility is a single-unit boiling water reactor (BWR) located at the licensee's site in Windham County, Vermont.

The License provides, among other things, that the Vermont Yankee Nuclear Power Station is subject to all rules, regulations, and orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

II

On November 19, 1980, the Commission published a revised 10 CFR 50.48 and a new Appendix R to 10 CFR part 50 regarding fire protection features of nuclear power plants. The revised § 50.48 and Appendix R became effective on February 17, 1981. Section III of Appendix R contains 15 subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. Subsection III.J is the subject of the licensee's request.

Section III.J of Appendix R requires that emergency lighting units with at least an 8-hour battery power supply shall be provided in all areas needed for operation of safe shutdown equipment and in access and egress routes thereto. On June 26, 1989, the NRC granted an exemption from these requirements for specified areas of the Reactor Building.

By letter dated June 29, 1995, the licensee requested revocation of that exemption.

III

Since the issuance of the exemption from the emergency lighting requirements of Appendix R, the licensee has installed conforming 8-hour battery powered lighting in the affected areas. As a result, these areas conform to the lighting requirements of the regulation and the exemption is no longer needed by the licensee. The licensee has therefore requested revocation of the exemption.

The NRC staff has reviewed the information submitted by the licensee and concludes that the conditions for which the exemption for emergency lighting was granted no longer exist because the licensee has installed 8-hour battery powered lighting which conform to Section III.J of Appendix R to 10 CFR part 50.

IV

Accordingly, the Commission has determined that the specific exemption from 10 CFR part 50, Appendix R, granted on June 26, 1989, for emergency lighting is hereby revoked in that it is no longer needed.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of this Revocation of Exemption will have no significant impact on the quality of the human environment (60 FR 44088).

This Revocation of Exemption is effective upon issuance.

Dated at Rockville, MD., this 30th day of August 1995.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Director, Division of Reactor Projects—I/II,Office of Nuclear Reactor Regulation.

[FR Doc. 95–22037 Filed 9–5–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 50–302]

Florida Power Co.; Environmental Assessment and Finding of No Significant Impact

The U. S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from certain requirements of its regulations to Facility Operating License No. DPR–72, issued to Florida Power Corporation, (the licensee), for operation of the Crystal River Unit 3 Nuclear Generating Plant (CR3), located in Citrus County, Florida.

Environmental Assessment

Identification of Proposed Action

The proposed action is in accordance with the licensee's application dated May 19, 1995, as supplemented August 8, 1995, for exemption from certain requirements of Title 10 Code of Federal Regulations, part 50 (10 CFR part 50), Appendix J, "Primary Reactor Containment Leakage Testing for Water Cooled Power Reactors," Paragraph III.D.1.(a), relating to Integrated Leak Rate Test (ILRT) frequency. The proposed exemption would allow CR3 a one-time interval extension for the Type A test (containment integrated leak rate test) by approximately 24 months from the spring 1996 refueling outage to the spring 1998 refueling outage.

The Need for the Proposed Action

Pursuant to 10 CFR part 50, Appendix A, "General Design Criteria for Nuclear Power Plants," criterion 16, "Containment design," the "[r]eactor containment and associated systems shall be provided to establish an essentially leak-tight barrier against the uncontrolled release of radioactivity to the environment and to assure that the containment design conditions important to safety are not exceeded for as long as postulated accident conditions require." 10 CFR 50.54, "Conditions of License," paragraph O, states that "[p]rimary reactor containments for water cooled power reactors shall be subject to the requirements set forth in Appendix J to this part." 10 CFR part 50, Appendix J, requires periodic verification by tests of the leak-tight integrity of the primary reactor containment and establishes the acceptance criteria for such tests. The purposes of the tests are to assure that periodic surveillance of reactor containment penetrations is performed so that proper maintenance and repairs are made during the service life of the containment and leakage through the primary reactor containment shall not exceed allowable leakage rate values as specified in the technical specifications or associated bases. Paragraph III.D.1 specifies that a set of three Type A tests is to be performed at approximately equal intervals during each 10-year service period. Such tests are to be limited to periods when the plant is non-operational and secured in the shutdown condition under the administrative controls and in accordance with the safety procedures defined in the license.

For CR3, the next available opportunity for performing the ILRT would be in Spring 1996. The licensee requested a one-time interval extension for the ILRT by approximately 24 months from the Spring 1996 refueling outage to the Spring 1998 refueling outage. The licensee indicated that approval of its request would save over two million dollars and would reduce personnel radiation exposure. The proposed action is needed to permit the licensee to defer the ILRT.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed action and concludes that the proposed one-time exemption would not increase the probability or consequences of accidents previously analyzed and the proposed one-time exemption would not affect facility radiation levels or facility radiological effluents.

In support of its exemption request, the licensee submitted information pertaining to Types A, B and C testing history, structural capability, and risk assessment.

Two ILRTs have been performed during the last seven years with successful results. There have been no permanent or temporary modifications to the containment structure, liner or penetrations since the last Type A test, and no future modifications are planned prior to the 1998 refueling outage which could adversely affect the Type A test results.

The licensee will continue to be required to conduct the Type B and C local leak rate tests which are, in general, the principal means of detecting containment leakage paths with the Type A tests confirming the Type B and C test results. Types B and C testing history at CR3 shows that the overall combined as-found leakage has been less than the allowed combined leakage rate of 0.6 La (266,431 SCCM) at the calculated maximum peak containment pressure as specified in Appendix J. The NRC staff considers that these inspections provide the necessary level of confidence in the continued integrity of the containment boundary. It is also noted that the licensee, as a condition of the proposed exemption, will perform the visual containment inspection although it is required by Appendix J to be performed only in conjunction with Type A tests. The NRC staff considers that these inspections, though limited in scope, provide an important added level of confidence in the continued integrity of the containment boundary. The change will not increase the probability or consequences of accidents, no changes are being made in the types or amounts of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does involve features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Accordingly, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

Alternatives to the Proposed Action

Since the Commission has concluded there is no significant environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the NRC staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts.

Alternative Use of Resources

This action did not involve the use of any resources not previously considered in the Final Environmental Statements related to operation of Crystal River Unit 3, dated May 1973.

Agencies and Persons Consulted

In accordance with its stated policy, on August 28, 1995, the NRC staff consulted with the State of Florida official, Dr. Lyle Jerretti, Office of Radiation Control, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption. Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for exemption dated May 19, 1995, as supplemented August 8, 1995, which are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC and at the local public document room located at Coastal Region Library, 8619 W. Crystal Street, Crystal River, Florida 32629.

Dated at Rockville, MD, this 28th day of August 1995.

For the Nuclear Regulatory Commission,

David B. Matthews,

Director, Project Directorate II–1, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 95–22041 Filed 9–5–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 040–8801]

Organization, Functions, and Authority Delegations; West Lake Landfill

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Deferral of Regulatory Oversight to the U.S. Environmental Protection Agency for the West Lake Landfill, Bridgeton, Missouri, and Removal of West Lake Landfill From SDMP List.

This notice is to inform the public that, on June 16, 1995, the U.S. Nuclear Regulatory Commission (the Commission) deferred regulatory oversight to the U.S. Environmental Protection Agency (EPA) for the remedial actions at the West Lake Landfill site in Bridgeton, Missouri. The site contains both hazardous and radioactive waste, is currently being remediated by EPA, and does not hold a current NRC license.

NRC and EPA conduct regulatory programs for site remediation under the Atomic Energy Act and the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), respectively. Based on the reviews to date, NRC concluded that the remedial program being administered by EPA at the West Lake Landfill site under CERCLA is adequate to protect the public and the environment from the risks associated with the radioactive contamination at the site. Therefore, NRC oversight of remediation at the site would be burdensome and duplicative. Consequently, NRC is deferring to EPA regulatory oversight of the remedial actions at West Lake Landfill. In addition, the West Lake Landfill site will be removed from NRC's Site Decommissioning Management Plan list. NRC staff does not plan to take any further action on the West Lake Landfill site unless specifically requested by EPA. Any questions regarding NRC's deferral decision should be forwarded to Ron Uleck by mail at Mail Stop T8F37, U.S. Nuclear Regulatory Commission, Washington, DC 20555 or by phone at (301) 415–6722.

Dated at Rockville, Maryland, this 28th day of August 1995.

For the U.S. Nuclear Regulatory Commission.

Michael F. Weber,

Chief, Low-Level Waste and Decommissioning Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.

[FR Doc. 95–22040 Filed 9–5–95; 8:45 am]

BILLING CODE 7590–01–P

PROSPECTIVE PAYMENT ASSESSMENT COMMISSION

Notice of Meeting

Notice is hereby given of the meetings of the Prospective Payment Assessment Commission on Tuesday and Wednesday, September 12 and 13, 1995 at the Madison Hotel, 15th & M Streets, NW., Washington, DC.

The Full Commission will convene at 9:00 a.m. on September 12, 1995, and adjourn at approximately 5 p.m. On Wednesday, September 13, 1995, the meeting will convene at 8 a.m. and adjourn at noon. The meetings will be held in Executive Chambers 1, 2, and 3 each day.

All meetings are open to the public.

Molly Ryan,

Executive Officer.

BILLING CODE 6820–BW–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–21324; 811–6021]

American Adjustable Rate Term Trust Inc.—1995; Notice of Application

August 29, 1995.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: American Adjustable Rate Term Trust Inc.—1995.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on July 25, 1995 and amended on August 17, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on September 25, 1995 and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 222 South Ninth Street, Piper Jaffray Tower, Minneapolis, Minnesota 55402.

FOR FURTHER INFORMATION CONTACT: Deepak T. Pai, Staff Attorney, at (202) 942–0574, or Alison E. Baur, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is a closed-end diversified investment company organized as a Minnesota corporation. On January 5, 1990, applicant filed a notification of registration pursuant to section 8(a) of the Act and a registration statement pursuant to the Securities Act of 1933. The registration statement became effective and applicant's initial public offering commenced on February 15, 1990.

2. Applicant is a "term trust" established and managed by Piper Capital Management Incorporated (the "Adviser") with a scheduled termination date of April 15, 1995. No action was needed by shareholders, the Board of Directors, or under state law, to effect the liquidation.

3. Applicant's investment objective was to provide a high level of current income and to return $10 per Trust share (the initial offering price per Trust share) to investors. The planned and

orderly liquidation of securities began in October 1994 and such securities were sold in the ordinary course of business at their then current market values. The proceeds of such liquidations then were invested in short-term securities which matured on or before April 17, 1995.

4. In connection with its scheduled liquidation, on April 17, 1995 applicant distributed approximately $105,800,000, which represented approximately 10,828,926 shares at $9.76922 net asset value, to its security holders. There are 15 security holders to whom payment has not been made because they have not yet submitted their stock certificates. This represents approximately 7,274 shares with a value of $68,314.52 which is being held in a non-interest bearing bank account at the transfer agent. Letters requesting the certificates have been mailed to each such security holder and payment will be made as soon as practicable after the submission of the certificates. The distribution to shareholders was based on net asset value.

5. Applicant has retained $126,575 in cash to pay estimated expenses for transfer agent fees, tax reporting, auditing, accounting and legal expenses. If expenses are greater than the amount retained, the Adviser will pay the excess amount.

6. Applicant is not a party to any litigation or administrative proceeding.

7. Applicant is neither engaged in, nor does it propose to engage in, any business activities other than those necessary for the winding-up of its affairs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–22066 Filed 9–5–95; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. IC–21325; No. 812–9506]

IDS Life Insurance Company, et al.

August 29, 1995.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for an Order under the Investment Company Act of 1940 ("1940 Act").

APPLICANTS: IDS Life Insurance Company ("IDS") and IDS Life Variable Life Separate Account ("Separate Account").

RELEVANT 1940 ACT SECTIONS: Order requested under Section 6(c) granting exemptions from Section 27(c)(2) of the 1940 Act and Rule 6e–3(T)(c)(4) thereunder.

SUMMARY OF APPLICATION: Applicants request an order that will permit the Separate Account, and any future separate accounts established by IDS ("Future Accounts"), to deduct from premium payments of certain flexible premium variable life insurance policies, an amount that is reasonably related to the IDS's increased Federal tax burden resulting from the receipt of those premium payments pursuant to the application of Section 848 of the Internal Revenue Code of 1986, as amended.

FILING DATE: The application was filed on March 1, 1995, and was amended on July 24, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on September 25, 1995, and should be lawyers, a certificate of service. Hearing requests should state the nature of the requestor's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Applicants: Mary Ellyn Minenko, Counsel, IDS Life Insurance Company, IDS Tower 10, Minneapolis, Minnesota 55440.

FOR FURTHER INFORMATION CONTACT: Pamela K. Ellis, Senior Counsel, or Wendy Finck Friedlander, Deputy chief, at (202) 942–0670, Office of Insurance Products (Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from the Commission's Public Reference Branch.

Applicants' Representations

1. IDS is a stock life insurance company, organized in Minnesota, and is an indirect subsidiary of American Express Company.

2. The Separate Account is a separate account established by IDS and registered under the 1940 Act as a unit investment trust. Currently, the Separate Account has 6 subaccounts each of which invests in a corresponding portfolio of IDS Life Series Fund, Inc., a registered open-end management investment company. The Separate Account is used to fund: (1) Certain individual flexible premium variable life insurance contracts ("Existing Policies"); (2) certain flexible survivorship variable life insurance policies ("Current Policies") for which a registration statement has been filed recently with the Commission to register interests in the Current Policies under the Securities Act of 1933; and (3) certain flexible variable life insurance policies developed by IDS Life in the future ("Future Policies") (Current Policies, together with Future Policies, "Policies").

3. IDS is the principal underwriter for the Policies. IDS is a registered broker-dealer under the Securities Exchange Act of 1934, and is a member of the National Association of Securities Dealers, Inc.

4. Applicants propose to deduct a charge to reimburse IDS for the increase in its Federal income taxes resulting from the application of Section 848 of the Internal Revenue Code of 1986 ("Code"), as amended. The charge will be reasonably related to IDS's increased Federal tax burden, and will be deducted from premiums received.

5. The Omnibus Budget Reconciliation Act of 1990 ("OBRA 1990"), amending Section 848 of the Code, requires life insurance companies to capitalize and amortize over ten years certain general expenses for the current year. Prior law allowed these expenses to be deducted in full from the current year's gross income. Section 848, as amended, effectively accelerates the realization of income from specified contracts and, consequently, the payment of taxes on that income. Taking into account the time value of money, Section 848 increases the insurance company's tax burden because the amount of general deductions that must be capitalized and amortized is measured by the premiums received under the Policies.

6. The amount of deductions subject to Section 848 equals a percentage of the current year's net premiums received (*i.e.,* gross premiums minus return premiums and reinsurance premiums) under life insurance or other contracts categorized under this Section. The Policies will be categorized under Section 848 as life insurance contracts requiring 7.7% of the net premiums received to be capitalized and amortized under the schedule set forth in Section 848(c)(1).

7. The increased tax burden on every $10,000 of net premiums received under the Policies is quantified by Applicants as follows. For each $10,000 of net premiums received in a given year, IDS

must capitalize $770 (i.e., 7.7% of $10,000), and $38.50 of this amount may be deducted in the current year. The remaining $731.50 ($770 less $38.50) is subject to taxation at the corporate tax rate of 35% and results in $256.02 (.35% × $731.50) more in taxes for the current year than IDS otherwise would have owed prior to OBRA 1990. However, the current tax increase will be offset partially by deductions allowed during the next ten years, which result from amortizing the remainder of the $770 ($77 in each of the following nine years and $38.50 in year ten).

8. It is IDS's business judgment that it is appropriate to use a discount rate of at least 10% in evaluating the present value of its future tax deductions for the following reasons. Capital that IDS must use to pay its increased federal tax burden under Section 848 will be unavailable for investment. The cost of capital used to satisfy this increased tax burden essentially will be IDS's after-tax rate of return (i.e., the return sought on invested capital), which is in excess of 10%. Accordingly, Applicants submit that the targeted rate of return is appropriate for use in this present value calculation.

9. In determining the rate of return used in arriving at the discount rate, IDS considered a number of factors. These factors include current market rates, inflation, and expected future interest rate trends.

10. Using a federal corporate tax rate of 35%, and assuming a discount rate of 10%, the present value of the increased tax burden resulting from Section 848 on each $10,000 of net premium is $95.62.

11. IDS does not incur incremental federal income tax when it passes on state premium taxes to Policy owners because state premium taxes are deductible in computing federal income taxes. Conversely, federal income taxes are not deductible in computing IDS's federal income taxes. To compensate IDS fully for the impact of Section 848, IDS must impose an additional charge to make it whole for the $95.62 additional tax burden attributable to Section 848, as well as the tax on the additional $95.62 itself, which can be determined by dividing $95.62 by the complement of 35% federal corporate income tax rate (i.e., 65%), resulting in an additional charge of $147.11 for each $10,000 of net premiums, or 1.47%.

12. Based on its prior experience, IDS reasonably expects to fully take almost all future deductions. It is IDS's judgment that a 1.25% charge would reimburse it for the increased federal income tax liabilities under Section 848. Applicants represent that the 1.25% charge will be reasonably related to IDS's increased federal income tax burden under Section 848. This representation takes into account the benefit to IDS of the amortization permitted by Section 848 and the use of a 10% discount rate (which is equivalent to IDS's targeted rate of return) in computing the future deductions resulting from such amortization. IDS also may add this 1.25% charge to the Existing Policies, but only with respect to sales of new policies, not on additional premiums paid to currently-held policies. (SEC File Nos. 811–4298/33–11165).[1]

Applicants' Legal Analysis

1. Applicants request an order under Section 6(c) of the 1940 Act granting exemptions from Sections 27(c)(2) of the 1940 Act and Rule 6e–3(T)(c)(4)(v) to allow the deduction of a charge from premiums to compensate IDS for its increased federal tax burden based on receipt of these premiums under the Policies, and under the Existing Policies. The charge will be in an amount that is reasonably related to IDS's increased federal tax burden. Applicants assert that it is appropriate to deduct a charge for an insurer's increased tax burden attributable to premiums received, and to exclude the deduction of this charge from sales load, because it is a legitimate expense of the company and not for sales and distribution expenses.

2. Section 6(c) authorizes the Commission, by order and upon application, to exempt any person, security, or transaction, or class of persons, securities, or transactions, from any provisions of the 1940 Act. The Commission grants relief under Section 6(c) to the extent an exemption is "necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of [the 1940 Act]."

3. The Separate Account is, and the Future Accounts will be, regulated under the 1940 Act as issuers of periodic payment plan certificates. Accordingly, the Separate Account, the Future Accounts, and IDS (as depositor and principal underwriter) are deemed to be subject to Section 27 of the 1940 Act.

4. Section 27(c)(2) prohibits the sale of periodic payment plan certificates unless the following conditions are met. The proceeds of all payments (except amounts deducted for "sales load") must be held by a trustee or custodian having the qualifications established under Section 26(a)(1) for the trustees of unit investment trusts. These proceeds also must be held under an indenture or agreement that conforms with the provisions of Section 26(a)(2) and Section 26(a)(3) of the 1940 Act.

5. "Sales load" is defined under Section 2(a)(35), in relevant part, as:

> The difference between the price of a security to the public and that portion of the proceeds from its sale which is received and invested or held for investment by the issuer (or in the case of a unit investment trust, by the depositor or trustee), less any portion of such difference deducted for trustee's or custodian's fees, insurance premiums, issue taxes, or administrative expenses or fees which are not properly chargeable to sales or promotional activities.

Sales loads on periodic payment plan certificates are limited by Sections 27(a)(1) and 27(h)(1) to a maximum of 9% of total payments.

6. Certain provisions of Rule 6e–3(T) provide a range of exemptive relief. Rule 6e–3(T) provides exemptive relief if the separate account issues flexible premium variable life insurance contracts, as defined in subparagraph (c)(1) of that Rule.

7. Applicants state that paragraph (b)(13)(iii)(E) of Rule 6e–3(T) provides exemptive relief from Section 27(c)(2) to permit an insurer to make certain deductions, other than sales load, including the insurer's tax liabilities from receipt of premium payments imposed by states or by other governmental entities. Applicants assert that the proposed deduction with respect to Section 848 of the Code arguably is covered by subparagraph (b)(13)(iii) of Rule 6e–3(T). Applicants note, however, that the language of paragraph (c)(4) of the Rule appears to require that deductions for federal tax obligations from receipt of premium payments be treated as "sales load."

8. Applicants state that paragraph (b)(1), together with paragraph (c)(4), of Rule 6e–3(T) provides an exemption from the Section 2(a)(35) definition of "sales load" by substituting a new definition to be used for the purposes of the Rule. Rule 6e–3(T)(c)(4) defines "sales load" during a period as the excess of any payments made during that period over certain specified charges and adjustments, including a deduction for state premium taxes. Under a literal reading of paragraph (c)(4) of the Rule, a deduction for an insurer's increased federal tax burden does not fall squarely into those itemized charges or deductions,

---

[1] Applicants represent that, during the Notice Period, the application will be amended to reflect this representation.

arguably causing the deduction to be treated as part of "sales load."

9. Applicants state that the public policy that underlies paragraph (b)(13) of Rule 6e–3(T), and particularly subparagraph (b)(13)(i), like that which underlies paragraphs (a)(1) and (h)(1) of Section 27, is to prevent excessive sales loads from being charged for the sale of periodic payment plan certificates. Applicants submit that this legislative purpose is not furthered by treating a federal income tax charge based on premium payments as a sales load because the deduction is not related to the payment of sales commissions or other distribution expenses.

10. Applicants assert that the standards of Section 6(c) are satisfied because the requested relief is appropriate in the public interest and consistent with the purposes of the 1940 Act and the protection of investors. The exemptive relief would eliminate the need for IDS to file additional exemptive applications for each Policy or Future Policy to be issued through a Future Account with respect to the same issues under the 1940 Act that have been addressed in this application, and thus would promote competitiveness in the variable life insurance market by avoiding delay, reducing administrative expenses, and maximizing efficient use of resources. Applicants further assert that the exemptive relief would enhance IDS's ability to effectively take advantage of business opportunities as they arise. If IDS were required to repeatedly seek exemptive relief with respect to the same issues addressed in the application, investors would not receive any benefit or additional protection thereby and might be disadvantaged as a result of increased overhead expenses.

Conditions for Relief

1. IDS will monitor the reasonableness of the 1.25% charge.

2. The registration statement for each Policy under which the 1.25% charge is deducted will: (a) disclose the charge; (b) explain the purpose of the charge; and (c) state that the charge is reasonable in relation to IDS's increased federal tax burden under Section 848 of the Code.

3. The registration statement for each Policy providing for the 1.25% deduction will contain as an exhibit an actuarial opinion as to: (a) The reasonableness of the charge in relation to IDS's increased federal tax burden under Section 848 of the Code resulting from the receipt of premiums; (b) the reasonableness of the targeted rate of return that is used in calculating such charge; and (c) the appropriateness of the factors taken into account by IDS in determining such targeted rate of return.

Conclusion

For the reasons and upon the facts set forth above, Applicants submit that the requested exemptions to permit IDS to deduct 1.25% of premium payments under the Policies are appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

BILLING CODE 8010-01-M

[Investment Company Act Release No. 21323; International Series Release No. 846; 812–9640]

Societe Generale; Notice of Application

August 29, 1995.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "Act").

APPLICANT: Societe Generale.

RELEVANT ACT SECTIONS: Order under section 6(c) of the Act for an exemption from section 17(f) of the Act.

SUMMARY OF APPLICATION: Societe Generale requests an order that would permit United States registered investment companies other than investment companies registered under section 7(d) (a "U.S. Investment Company"), for which Societe Generales serve as custodian or subcustodian, to maintain foreign securities and other assets in the Ivory Coast with Societe General de Banques en Cote d'Ivoire ("SGBCI"), in Morocco with Societe Generale Marocaine de Banques ("SGMB"), and in South Africa with Societe Generale South Africa Limited ("SGSA"), subsidiaries of Societe Generale (collectively, the "Foreign Subsidiaries").

FILING DATES: The application was filed on June 23, 1995 and amended on August 28, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on September 25, 1995, and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicant: Societe Generale, Securities Operations, 32, rue du Champ de Tir, 44300 Nantes, France; cc: Bruce E. Clubb, Esq., Baker & McKenzie, 815 Connecticut Avenue, N.W., Washington, D.C., 20006–4078.

FOR FURTHER INFORMATION CONTACT: Marianne H. Khawly, Staff Attorney, at (202) 942–0562, or Robert A. Robertson, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

Applicant's Representations

1. Societe Generale requests an order to permit Societe Generale, the Foreign Subsidiaries, any U.S. Investment Company, and any custodian for a U.S. Investment Company to maintain foreign securities, cash, and cash equivalents (collectively, "Assets") in the custody of the Foreign Subsidiaries. For the purposes of this application, "foreign securities" includes: (a) Securities issued and sold primarily outside the United States by a foreign government, a national of any foreign country, or a corporation or other organization incorporated or organized under the laws of any foreign country; and (b) securities issued or guaranteed by the Government of the United States or by any state or any political subdivision thereof or by any agency thereof or by any entity organized under the laws of the United States or of any state thereof which have been issued and sold primarily outside the United States.

2. Societe Generale is a bank organized and existing under the laws of France. Societe Generale is regulated in France by the Ministere de l'Economie at des Finances and is subject to law No. 8846 of June 24, 1984 Relating to the Activities and Regulation of Credit Institutions. Societe Generale is one of the leading financial services institutions in France and currently

provides worldwide custody services that include holding Assets of U.S. Investment Companies or their custodians. In the United States, Societe Generale has branch banking operations, representative offices, and as a result, is subject to the Bank Holding Company Act of 1956 and the International Banking Act of 1978. As of December 31, 1994, Societe Generale had consolidated shareholders' equity in excess of the equivalent of $10,000,000,000.

3. SGBCI was incorporated in Abidjan in 1962. It is a 37% owned direct subsidiary of Societe Generale. Other major shareholders include the Ivory Coast government and Credit Suisse. SGBCI is regulated by the Ministry of the Economy, Finance and Planning of the Ivory Coast under law No. 90–589 of July 25, 1990 Regarding Bank Regulation. The Ivory Coast is a member of the West African Monetary Union ("WAMU") and, as a result, SGBCI is supervised by the WAMU central bank.

4. Societe Generale commenced banking operations in Morocco in 1913, which operations it incorporated into a subsidiary in 1962. After acquiring another bank in 1965, the merged entity was renamed SGMB. SGMB is a 35% owned direct subsidiary of Societe Generale. Other major shareholders include Societe Marseillaise de Credit and Credit Suisse. SGMB is regulated by the Ministry of Finance of Morocco and Bank al-Maghrib, the Moroccan central bank, under Law No. 93–147 of June 7, 1993 Relating to the Activities and Regulation of Credit Institutions.

5. SGSA is a bank incorporated in South Africa in 1981. SGSA was acquired by Societe Generale in 1991. It is a wholly owned subsidiary of Societe Generale. SGSA is regulated by the Registrar of Banks of South Africa and the Reserve Bank of South Africa under Banks Act No. 94 of 1990.

6. Societe Generale requests relief to permit Societe Generale, as custodian or subcustodian for a U.S. Investment Company, when custody services are required in the Ivory Coast, Morocco, or South Africa, to deposit, or cause or permit the U.S. Investment Company to deposit, its Assets with the appropriate Foreign Subsidiary as delegate for Societe Generale.

Applicant's Legal Analysis

1. Section 17(f) of the Act requires every registered management investment company to place and maintain its securities and similar investments in the custody of certain enumerated entities, including a bank having at all times aggregate capital, surplus, and undivided profits of at least $500,000. A "bank", as that term is defined in section 2(a)(5) of the Act, includes: (a) a banking institution organized under the laws of the United States; (b) a member bank of the Federal Reserve System; and (c) any other banking institution or trust company, whether incorporated or not, doing business under the laws of any state or of the United States, a substantial portion of which consists of receiving deposits or exercising fiduciary powers similar to those permitted to national banks, which is supervised or examined by state or federal authority having supervision over banks, and which is not operated for the purposes of evading the Act.

2. The only entities located outside the United States that section 17(f) authorizes to serve as custodians for registered management investment companies are the overseas branches of qualified U.S. banks. Rule 17f–5 expands the group of entities that are permitted to serve as foreign custodians. Rule 17f–5(c)(2)(i) defines the term "Eligible Foreign Custodian" to include a banking institution or trust company, incorporated or organized under the laws of a country other than the United States, that is regulated by that country's government or an agency thereof and that has shareholders' equity in excess of $200,000,000 or its equivalent. Societe Generale is an Eligible Foreign Custodian under the rule.

3. The Foreign Subsidiaries satisfy the requirements of rule 17f–5, with the exception of meeting the minimum shareholders' equity requirement. Accordingly, they are not Eligible Foreign Custodians and, absent exemptive relief, could not serve as a custodian for U.S. Investment Company Assets.

4. Section 6(c) provides, in relevant part, that the SEC may, conditionally or unconditionally, by order, exempt any person or class of persons from any provision of the Act or from any rule thereunder, if such exemption is necessary or appropriate in the public interest, consistent with the protection of investors, and consistent with the purposes fairly intended by the policy and provisions of the Act. Societe Generale submits that its request satisfies this standard.

Applicant's Conditions

Applicant agrees that any order of the SEC granting the requested relief shall be subject to the following conditions:

1. The foreign custody arrangements proposed regarding each Foreign Subsidiary satisfy the requirements of rule 17f–5 in all respects other than the Foreign Subsidiary's level of shareholder equity.

2. Societe Generale, any U.S. Investment Company, and any custodian for a U.S. Investment Company, will deposit Assets with a Foreign Subsidiary only in accordance with one of the two contractual arrangements described below, which arrangement will remain in effect at all times (during which the Foreign Subsidiary fails to satisfy the requirements of rule 17f–5 and during which such Assets remain deposited with the Foreign Subsidiary).

a. *The Three-Party Agreement Arrangement.* Under this arrangement, the agreement will be a three-party agreement (the "Three-Party Agreement") among (i) Societe Generale, (ii) the Foreign Subsidiary and (iii) the U.S. Investment Company, or the custodian for a U.S. Investment Company pursuant to which Societe Generale will undertake to provide specified custody services, and will delegate to the Foreign Subsidiary such of the duties and obligations of Societe Generale as will be necessary to permit the Foreign Subsidiary to hold in custody the U.S. Investment Company's Assets. The Three-Party Agreement further will provide that Societe Generale will be liable for any loss, damage, cost, expense, liability, or claim arising out of or in connection with the performance by the Foreign Subsidiary of its responsibilities under the Three-Party Agreement to the same extent as if Societe Generale had itself been required to provide custody services under the Three-Party Agreement.

b. *The Custody Agreement/Subcustody Agreement Arrangement.* Societe Generale will deposit Assets with a Foreign Subsidiary in accordance with the Custody Agreement and Subcustody Agreement described below.

i. The Custody Agreement will be between Societe Generale and the U.S. Investment Company or any custodian for a U.S. Investment Company. In that agreement, Societe Generale will undertake to provide specified custody or subcustody services, and the U.S. Investment Company (or its custodian) will authorize Societe Generale to delegate to the Foreign Subsidiary such of Societe Generale's duties and obligations as will be necessary to permit the Foreign Subsidiary to hold in custody the assets of U.S. Investment Companies. The Custody Agreement further will provide that Societe Generale will be liable for any loss, damage, cost, expense, liability, or claim arising out of or in connection with the performance by the Foreign Subsidiary

OL

SS
172
SE
6
995
UMI

of its responsibilities to the same extent as if Societe Generale had itself been required to provide custody services under the Custody Agreement.

ii. A Subcustody Agreement will be executed by Societe Generale and the Foreign Subsidiary. Pursuant to this agreement, Societe Generale will delegate to the Foreign Subsidiary such of Societe Generale's duties and obligations as will be necessary to permit the Foreign Subsidiary to hold Assets in custody in the country in which it operates. The Subcustody Agreement will explicitly provide that (i) the Foreign Subsidiary is acting as a foreign custodian for Assets that belong to a U.S. Investment Company pursuant to the terms of an exemptive order issued by the SEC and (ii) the U.S. Investment Company or its custodian (as the case may be) that has entered into a Custody Agreement will be entitled to enforce the terms of the Subcustody Agreement and can seek relief directly against the Foreign Subsidiary. Further, the Subcustody Agreement will be governed either by New York law or French law, or by Ivory Coast law for SGBCI, Moroccan law for SGMB, or South African law for SGSA. If it is governed by French, Ivory Coast, Moroccan, or South African law, Societe Generale shall obtain an opinion of counsel in France, the Ivory Coast, Morocco, or South Africa, as the case may be, opining as to the enforceability of the rights of a third party beneficiary under the laws of such country.

3. Societe Generale currently satisfies and will continue to satisfy the minimum shareholders' equity requirement set forth in rule 17f–5(c)(2)(i).

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2807]

Texas; Declaration of Disaster Loan Area

Gray County and the contiguous counties of Armstrong, Carson, Collingsworth, Donley, Hemphill, Hutchinson, Roberts, and Wheeler in the State of Texas constitute a disaster area as a result of damages caused by severe thunderstorms and tornadoes which occurred on June 8, 1995. Applications for loans for physical damage as a result of this disaster may be filed until the close of business on October 30, 1995, and for economic injury until the close of business on May 30, 1996, at the address listed below: U.S. Small Business Administration, Disaster Area 3 Office, 4400 Amon Carter Blvd., Suite 102, Ft. Worth, TX 76155 or other locally announced locations.

The interest rates are:

For Physical Damage:	Percent
HOMEOWNERS WITH CREDIT AVAILABLE ELSEWHERE	8.000
HOMEOWNERS WITHOUT CREDIT AVAILABLE ELSEWHERE	4.000
BUSINESSES WITH CREDIT AVAILABLE ELSEWHERE	8.000
BUSINESSES AND NON-PROFIT ORGANIZATIONS WITHOUT CREDIT AVAILABLE ELSEWHERE	4.000
OTHERS (INCLUDING NON-PROFIT ORGANIZATIONS) WITH CREDIT AVAILABLE ELSEWHERE	7.125
For Economic Injury	
BUSINESSES AND SMALL AGRICULTURAL COOPERATIVES WITHOUT CREDIT AVAILABLE ELSEWHERE	4.000

The number assigned to this disaster for physical damage is 280712 and for economic injury the number is 863200.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008).

Dated: August 30, 1995.

BILLING CODE 8025-01-P

DEPARTMENT OF TRANSPORTATION

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended August 25, 1995

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: OST–95–418.

Date filed: August 21, 1995.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 15, 1995.

Description: Application of Florida West International Airways, Inc., pursuant to 49 U.S.C. Section 41105, and Subpart Q of the Regulations, requests the transfer to FWIA of Florida West Gateway, Inc.'s existing certificate and exemption authority as well as the scheduled and charter all-cargo service allocations relating to U.S. South American markets.

Docket Number: OST–95–423.

Date filed: August 21, 1995.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 18, 1995

Description: Application of USAir, Inc., pursuant to 49 U.S.C. Sections 41101 and 41108, and Subpart Q of the Regulations, applies for a certificate of public convenience and necessity authorizing it to engage in scheduled foreign air transportation of persons, property and mail between the terminal point Philadelphia, Pennsylvania and the coterminal points Rome and Milan, Italy.

Docket Number: OST–95–427.

Date filed: August 21, 1995.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 18, 1995.

Description: Application of Skyjet, Inc. dba Skyjet Antigua & Barbuda, pursuant to U.S.C. and Subpart Q of the Regulations, requests a foreign air carrier permit authorizing Skyjet Antigua to perform passenger, property and mail charter service between Antigua and Barbuda and the United States.

Docket Number: OST–95–431.

Date filed: August 21, 1995.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 18, 1995.

Description: Application of United Air Lines, Inc., pursuant to 49 U.S.C. Section 41101 and Subpart Q of the Regulations, applies for a Certificate of Public Convenience and Necessity authorizing scheduled service of persons, property and mail between Los Angeles, California, and Guadalajara, Mexico.

Docket Number: OST–95–449.

Date filed: August 22, 1995.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: September 19, 1995.

Description: Amendment to the Application of Balkan Bulgarian Airlines, pursuant to Subpart Q of the Regulations, request that it be allowed

to provide foreign scheduled air transportation of persons property and mail between a point or points in Bulgaria and the coterminal points New York, New York, and Detroit, Michigan, United States of America, via Malta, with local traffic rights between Malta, on the one hand, and Detroit and New York, on the other hand.

BILLING CODE 4910-62-P

Coast Guard

[CGD 95–064]

National Environmental Policy Act: Agency Procedures for Categorical Exclusions

AGENCY: Coast Guard, DOT.

ACTION: Notice of agency policy.

SUMMARY: The Coast Guard is announcing a change to its policy concerning agency actions that are categorically excluded from additional environmental analysis under the National Environmental Policy Act (NEPA). The change concerns operations to carry out maritime safety, maritime law enforcement, search and rescue, domestic ice breaking, and oil or hazardous substance removal programs.

FOR FURTHER INFORMATION CONTACT: Mr. David Reese, Environmental Compliance and Restoration Branch, (202) 267–1942.

SUPPLEMENTARY INFORMATION:

Background

Under regulations implementing the National Environmental Policy Act (NEPA) (40 CFR parts 1500 through 1508), each Federal agency is required to adopt procedures to supplement those regulations (40 CFR 1507.3). The Coast Guard's procedures and policies are published as a Commandant instruction entitled, "National Environmental Policy Act Implementing Procedures and Policy for Considering Environmental Impacts" (COMDTINST M16475.1B). On July 29, 1994, the Coast Guard published a notice in the **Federal Register** (59 FR 38654) announcing the revision of section 2.B.2 of the instruction. Section 2.B.2 lists the proposed agency actions that are categorically excluded from the requirement that the actions undergo the analysis that accompanies preparation of an Environmental Assessment (EA) or Environmental Impact Statement (EIS).

Discussion of Change

The Coast Guard is amending section 2.B.2.e.(22) (the section) of COMDTINST M16475.1B, which categorically excludes operations to carry out maritime safety, maritime law enforcement, search and rescue, domestic ice breaking, and oil or hazardous substance removal programs that have been the subject of a programmatic NEPA analysis and documentation. It is being amended to remove the phase "that have been the subject of a programmatic NEPA analysis and documentation."

A review of the implementation of the section disclosed that the phrase "that have been the subject of a programmatic NEPA analysis and documentation" imposes a requirement for a specific level of NEPA analysis and documentation (i.e., a programmatic level) that may not be necessary or appropriate for the actions included in the section. By removing the phrase, the Coast Guard can eliminate unnecessary documentation and provide itself flexibility in determining the appropriate means of complying with NEPA for the listed activities. By removing the phrase, the Coast Guard will have the flexibility to use the section, a programmatic EA or EIS, or an EA or EIS for the specific activity, depending on the nature of the activity being planned. This change also brings the section more in line with the stated purpose and intent of NEPA and the Council on Environmental Quality regulations, which include the requirement in 40 CFR part 1500.4(p) to reduce excessive paperwork by using categorical exclusions to define categories of actions which do not individually or cumulatively have a significant effect on the human environment. This change does not effect the Coast Guard's responsibility to comply fully with NEPA before engaging in an activity listed in the section. It can be applied only if there are no extraordinary circumstances, as described in section 2.B.2.b., that would limit its use.

For the reasons set out in the preamble, the Coast Guard announces the following amendment to section 2.B.2.e.(22) of COMDTINST M16475.1B:

2.B.2.e. Categorical Exclusion List

* * * * *

(22) Operations to carry out maritime safety, maritime law enforcement, search and rescue, domestic ice breaking, and oil or hazardous substance removal programs.

* * * * *

Dated: August 30, 1995.

RADM Edward J. Barrett,

Chief, Office of Engineering Logistics and Development.

BILLING CODE 4910-14-M

Federal Aviation Administration

Notice of Intent To Rule on Application To Use the Revenues From a Passenger Facility Charge (PFC) at Baltimore Washington International Airport, Baltimore, MD

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Intent To Rule on Application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to use the revenues from a PFC at Baltimore Washington International Airport under the

provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before October 6, 1995.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Washington Airports District Office, 101 West Broad Street, Suite 300, Falls Church, Virginia 22046.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Theodore E. Mathison, Administrator of the Maryland Aviation Administration at the following address: P.O. Box 8766, BWI Airport, Baltimore, Maryland 21240–0766.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Maryland Aviation Administration under Section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Robert Mendez, Manager, Washington Airports District Office, 101 West Broad Street, Suite 300, Falls Church, Virginia 22046. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to use the revenue from a PFC at Baltimore Washington International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On August 10, 1995, the FAA determined that the application to use the revenue from a PFC submitted by Maryland Aviation Administration was substantially complete within the requirements of Section 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than November 11, 1995.

The following is a brief overview of the application.

Level of the proposed PFC: $3.00.

Proposed charge effective date: October 1, 1992.

Proposed charge expiration date: April 31, 2009.

Total estimated PFC revenue: $286,057,383.

Brief description of proposed project(s): This application requests the authority to use the PFC revenues previously authorized to impose for the design and construction of a new ARFF facility to be located southwest of the intersection of Runways 10–28 and 15R–33L.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: Air Taxi/commercial operators filing FAA Form 1800–31.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT** and at the FAA regional Airports office located at: Fitzgerald Federal Building, John F. Kennedy International Airport, Jamaica, New York 11430.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Maryland Aviation Administration.

Issued in Jamaica, New York on August 28, 1995.

Anthony P. Spera,

Acting Manager, Airports Division, Eastern Region.

BILLING CODE 4910–13–M

FAA Approval of Noise Compatibility Program; Fort Worth Spinks Airport; Fort Worth, TX

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the city of Fort Worth under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96–193) and 14 CFR Part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96–52 (1980). On February 13, 1995, the FAA determined that the noise exposure maps submitted by the city of Fort Worth under Part 150 were in compliance with applicable requirements. On August 11, 1995, the Administrator approved the Fort Worth Spinks Airport noise compatibility program. All of the recommendations of the program were approved. No program elements relating to mandatory new or revised flight procedures for noise abatement were proposed by the city of Fort Worth.

EFFECTIVE DATE: The effective date of the FAA's approval of the Fort Worth Spinks Airport noise compatibility program is August 11, 1995.

FOR FURTHER INFORMATION CONTACT: Mike Nicely, DOT/FAA, Texas Airport Development Office, 2601 Meacham Boulevard, Fort Worth, Texas 76193–0653, (817) 222–5606. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for Fort Worth Spinks Airport, effective August 11, 1995

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing non-compatible land uses and prevention of additional non-compatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing non-compatible land uses around the airport and preventing the introduction of additional non-compatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable

airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the Federal Aviation Administration, Texas Airport Development Office, 2601 Meacham Boulevard, Fort Worth, Texas 76193–0650.

The city of Fort Worth submitted to the FAA on February 3, 1994, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from November 1991 through January 1995. The Fort Worth Spinks Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on February 13, 1995. Notice of this determination was published in the **Federal Register** on March 6, 1995.

The Fort Worth Spinks Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion beyond the year 1998. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on February 13, 1995, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained seven proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The overall program, therefore, was approved by the Administrator effective August 11, 1995.

Outright approval was granted for all of the specific program elements. The following is a listing of the approved actions on and off the airport:

a. Modify arrival and departure flight tracks (approved as voluntary);

b. Voluntary use of noise abatement departure and arrival procedures for aircraft weighing over 12,500 Pounds (approved as voluntary);

c. Maintain current zoning ordinance;

d. Amend and expand the land use plan for noise compatibility;

e. Assign a noise abatement officer for noise program management for all three city of Fort Worth airports;

f. Continue public involvement program;

g. Conduct noise review and update as required.

These determinations are set forth in detail in a Record of Approval endorsed by the Administrator on August 11, 1995. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the Fort Worth Department of Aviation Offices.

Issued in Fort Worth, Texas on August 22, 1995.

Otis T. Welch,

Manager, Texas Airport Development Office.

BILLING CODE 4910–13–M

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. (95–67)]

Crystallinity of Ceramic Tile

AGENCY: Customs Service, Department of the Treasury.

ACTION: Request for comments on the percent of crystallinity necessary to satisfy the Harmonized Tariff Schedules of the United States criteria that a "*ceramic article*" be a shaped product "of crystalline or substantially crystalline structure."

SUMMARY: Customs is attempting to identify the amount of crystallinity necessary to satisfy the aforementioned phrase "substantially crystalline" as it applies to ceramic floor and wall tile. Ceramic articles of this nature are normally imported under Subheading numbers covered by U.S. Note 1 to Chapter 69 of the Harmonized Tariff Schedule of the United States (HTSUS).

DATES: Comments must be received on or before October 1, 1995.

COMMENTS: Written comments (preferably in triplicate) may be addressed to and inspected at the offices of Laboratories and Scientific Services, room 7113, 1301 Constitution Ave., NW, Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Mr. Robert L. Zimmerman, Jr., Office of Laboratories & Scientific Services, (202) 927–1060.

SUPPLEMENTARY INFORMATION:

Background

U.S. Note 1 to Chapter 69 reads in pertinent part "For the purposes of this chapter, a "*ceramic article*" is a shaped article having a glazed or unglazed body of crystalline or substantially crystalline structure * * *". The U.S. Customs Service wishes to define the concept of "substantially crystalline" in scientific terms based on state-of-the-art ceramic technology. In this request for comments, Customs is limiting the scope in defining the phrase to floor and wall tile. For this purpose Customs is soliciting comments from any interested party.

In a recent study of nearly 300 floor and wall tiles, Customs has found that the percent crystallinity for this group of tiles was never less than 30 percent as determined by x-ray diffraction. Furthermore, over 90 percent of the tiles studied demonstrated a crystallinity in the range of 50 to 90 percent.

The scientific literature indicates that the degree of crystallinity a ceramic attains is critically dependent on the raw materials used to make the tile and the heat treatment to which these materials are subjected. Often ceramic materials are engineered to meet the physical requirements for an intended use. Again in the case at hand, Customs is interested in ceramic floor and wall tiles. Two issues that Customs would consider in making the final determination of the degree of crystallinity include: the percent crystallinity necessary to impart resiliency to the tile for its intended use; the percent crystallinity at which a ceramic becomes a glass or a glass-ceramic. Customs does not wish to limit discussions to these two issues. All information provided will be given full consideration.

A.W. Tennant,

Director, Laboratories and Scientific Services.

BILLING CODE 4820–02–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

1995–96 Allocation of the Tariff-rate Quota for Raw Cane Sugar

AGENCY: Office of the United States Trade Representative; 600 17th Street, N.W., Washington, D.C. 20508.

ACTION: Notice.

SUMMARY: The Office of the United States Trade Representative (USTR) is providing notice of the country-by-country allocation of the in-quota quantity of the tariff-rate quota for imported raw cane sugar for the period that begins October 1, 1995, and ends September 30, 1996.

EFFECTIVE DATE: October 1, 1995.

ADDRESSES: Inquiries may be mailed or delivered to Tom Perkins, Senior Economist, Office of Agricultural Affairs (Room 421), Office of the United States Trade Representative, 600 17th Street, NW., Washington, DC 20508.

FOR FURTHER INFORMATION CONTACT: Tom Perkins, Office of Agricultural Affairs, 202–395–6127.

SUPPLEMENTARY INFORMATION: Pursuant to Additional U.S. Note 5 to chapter 17 of the Harmonized Tariff Schedule of the United States (HTS), the United States maintains a tariff-rate quota for imports of raw sugar. The in-quota quantity of the tariff-rate quota for the period October 1, 1995-September 30, 1996, has been established by the Secretary of Agriculture at 1,117,195 metric tons, raw value (1,231,496 short tons).

Section 404(d)(3) of the Uruguay Round Agreements Act (19 U.S.C. 3601(d)(3)) authorizes the President to allocate the in-quota quantity of a tariff-rate quota for any agricultural product among supplying countries or customs areas. The President delegated this authority to the United States Trade Representative under paragraph (3) of Presidential Proclamation No. 6763 (60 FR 1007).

Accordingly, the 1,117,195 metric tons for raw cane sugar are being allocated to the following countries in metric tons, raw value:

Country	FY 1996 allocation
Argentina	45,281
Australia	87,402
Barbados	7,371
Belize	11,583
Bolivia	8,424
Brazil	152,691
Colombia	25,273
Congo	7,258
Cote d'Ivoire	7,258
Costa Rica	15,796
Dominican Republic	185,335
Eucador	11,583
El Salvador	27,379
Fiji	9,477
Gabon	7,258
Guatemala	50,546
Guyana	12,636
Haiti	7,258
Honduras	10,530
India	8,424
Jamaica	11,583
Madagascar	7,258
Malawi	10,530
Mauritius	12,636
Mexico	7,258
Mozambique	13,690
Nicaragua	22,114
Panama	30,538
Papua New Guinea	7,258
Paraguay	7,258
Peru	43,175
Philippines	142,160
South Africa	24,220
St. Kitts & Nevis	7,258
Swaziland	16,849
Taiwan	12,636
Thailand	14,743
Trinidad-Tobago	7,371
Uruguay	7,258
Zimbabwe	12,636
Total	1,117,195

The allocation includes the following minimum quota-holding countries: Congo, Cote d'Ivoire, Gabon, Haiti, Madagascar, Mexico, Papua New Guinea, Paraguay, St. Kitts & Nevis, and Uruguay.

Michael Kantor,

United States Trade Representative.

BILLING CODE 3190–01–M

Sunshine Act Meetings

Federal Register

Vol. 60, No. 172

Wednesday, September 6, 1995

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 11:00 a.m., Monday, September 11, 1995.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: September 1, 1995.

William W. Wiles,

Secretary of the Board.

[FR Doc. 95–2225 Filed 9–1–95; 3:47 pm]

BILLING CODE 6210–01–P

BLACKSTONE RIVER VALLEY NATIONAL HERITAGE CORRIDOR

Notice of Meeting

Notice is hereby given in accordance with Section 552b of Title 5, United States Code, that a meeting of the Blackstone River Valley National Heritage Corridor Commission will be held on Thursday, September 28, 1995.

The Commission was established pursuant to Public Law 99–647. The purpose of the Commission is to assist federal, state and local authorities in the development and implementation of an integrated resource management plan for those lands and waters within the Corridor.

The meeting will convene at 7 p.m. at the North Smithfield Municipal Annex, 575 Smithfield Road, North Smithfield, Rhode Island, for the following reasons:

1. Presentation from Town of North Smithfield, Rhode Island.
2. Annual Report.
3. Commission Business.
4. Other.

It is anticipated that about twenty people will be able to attend the session in addition to the Commission members.

Interested persons may make oral or written presentations to the Commission or file written statements. Such requests should be made prior to the meeting to:

James R. Pepper, Executive Director,
Blackstone River Valley National
Heritage Corridor Commission, One/
Depot Square, Woonsocket, RI 02895,
Tel.: (401) 762–0250.

Further information concerning this meeting may be obtained from James R. Pepper, Executive Director of the Commission at the aforementioned address.

James R. Pepper,

Executive Director, BRVNHCC.

[FR Doc. 95–22224 Filed 9–1–95; 3:56 pm]

BILLING CODE 4310–70–P

NUCLEAR REGULATORY COMMISSION

DATE: Week of September 4, 11, 18, and 25, 1995.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Public.

MATTERS TO BE CONSIDERED:

Week of September 4

There are no meetings scheduled for the Week of September 4.

Week of September 11—Tentative

Monday, September 11

1:30 p.m.
Briefing on Status of Watts Bar Licensing (Public Meeting)
(Contact: Steve Varga, 301–415–1403)

3:30 p.m.
Affirmation Session (Public Meeting)
(Please Note: These items will be affirmed immediately following the conclusion of the preceding meeting.)
- a. Revisions to Regulatory Requirements for Reactor Pressure Vessel Integrity in 10 CFR Part 50 (Tentative)
- b. Final Amendment to 10 CFR Part 50, Appendix J. "Containment Leakage Testing," to Adopt Performance-Oriented and Risk-Based Approaches (Tentative)

(Contact: Andrew Bates, 301–415–1963)

Tuesday, September 12

10:30 a.m. and 1:30 p.m.
All Employees Meetings (Public Meetings) on "The Green" Plaza Area between buildings at White Flint
(Contact: Beth Hayden, 301–415–8200)

Week of September 18—Tentative

There are no meetings scheduled for the Week of September 18.

Week of September 25—Tentative

There are no meetings scheduled for the Week of September 25.

Note: The Nuclear Regulatory Commission is operating under a delegation of authority to Chairman Shirley Ann Jackson, because with three vacancies on the Commission, it is temporarily without a quorum. As a legal matter, therefore, the Sunshine Act does not apply; but in the interests of openness and public accountability, the Commission will conduct business as though the Sunshine Act were applicable.

The schedule for Commission meetings is subject to change on short notice. To verify the status of meetings call (Recording)—(301) 415–1292.

CONTACT PERSON FOR MORE INFORMATION: Bill Hill (301) 415–1661.

This notice is distributed by mail to several hundred subscribers; if you no longer wish to receive it, or would like to be added to it, please contact the Office of the Secretary, Attn: Operations Branch, Washington, D.C. 20555 (301–415–1963).

In addition, distribution of this meeting notice over the internet system is available. If you are interested in receiving this Commission meeting schedule electronically, please send an electronic message to alb@nrc.gov or gkt@nrc.gov.

Dated: August 31, 1995.

William M. Hill, Jr.,

SECY Tracking Officer, Office of the Secretary.

RIN 1515–AB33

North American Free Trade Agreement

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document adopts as a final rule, with some changes, interim amendments to the Customs Regulations which were published in the **Federal Register** on December 30, 1993, as T.D. 94–1 to implement the preferential tariff treatment and other Customs-related provisions of the North American Free Trade Agreement entered into by the United States, Canada and Mexico.

EFFECTIVE DATE: October 1, 1995.

FOR FURTHER INFORMATION CONTACT: Operational Aspects: Joyce Metzger, Office of Field Operations (202–927–0792).

Audit Aspects: William Inch, Office of Strategic Trade (202–927–1100).

Legal Aspects: Myles Harmon, Office of Regulations and Rulings (202–482–7000).

SUPPLEMENTARY INFORMATION:

Background

On December 17, 1992, the United States, Canada and Mexico (the "Parties") entered into an agreement, the North American Free Trade Agreement (NAFTA). The stated objectives of the NAFTA are to: Eliminate barriers to trade in, and facilitate the cross-border movement of, goods and services between the territories of the Parties; promote conditions of fair competition in the free trade area; increase substantially investment opportunities in the territories of the Parties; provide adequate and effective protection and enforcement of intellectual property rights in each Party's territory; create effective procedures for the implementation and application of the NAFTA, for its joint administration and for the resolution of disputes; and establish a framework for further trilateral, regional and multilateral cooperation to expand and enhance the benefits of the NAFTA.

The provisions of the NAFTA were adopted by the United States with the enactment of the North American Free Trade Agreement Implementation Act (the "Act"], Pub. L. 103–182, 107 Stat, 2057.

The principal role of the U.S. Customs Service is to administer the provisions of the NAFTA and the Act which relate to the importation of goods into the United States from Canada and Mexico. Those Customs-related NAFTA provisions which require implementation through regulation include certain tariff and non-tariff provisions within Chapter Three (National Treatment and Market Access for Goods) and the provisions of Chapter Four (Rules of Origin) and Chapter Five (Customs Procedures).

The tariff-related provisions within NAFTA Chapter Three which require regulatory action by Customs are Article 303 (Restriction on Drawback and Duty Deferral Programs), Article 305 (Temporary Admission of Goods), Article 306 (Duty-Free Entry of Certain Commercial Samples and Printed Advertising Materials) and Article 307 (Goods Re-Entered after Repair or Alteration). The non-tariff provisions of Chapter Three requiring Customs regulatory action are Article 310 (Customs User Fees), Article 311 (Country of Origin Marking) and Annex 300–B (Textile and Apparel Goods).

Chapter Four of the NAFTA sets forth the rules for determining whether an imported good qualifies as an originating good of the United States, Canada or Mexico (NAFTA country) and, as such, is therefore eligible for preferential tariff (duty-free or reduced duty) treatment as provided for under Article 302(2) and Annex 302.2 of the NAFTA. Under Article 401 within that Chapter, originating goods may be grouped in two broad categories: (1) Goods which are wholly obtained or produced entirely in one or more NAFTA countries; and (2) goods which are produced entirely in one or more NAFTA countries exclusively from materials that originate in those countries, or goods which are produced entirely in those countries and which satisfy the specific rules of origin in NAFTA Annex 401 (change in tariff classification requirement and/or regional value-content requirement). Article 402 sets forth the methods for calculating the regional value content of a good and the rules for determining the value of materials used in the production of a good. Article 403 sets forth special rules for calculating the regional value content in the case of automotive goods. Article 404 provides for accumulation of production by two or more producers. Article 405 provides a de minimis criterion. The remaining Articles within Chapter Four consist of additional sub-rules, applicable to the originating good concept, involving fungible materials, packaging materials, packing materials, transshipment, and non-qualifying operations.

Chapter Five sets forth the procedural and other customs requirements which apply under the NAFTA, in particular with regard to claims for preferential tariff treatment. Articles 501–506 of this Chapter provide for use of a Certificate of Origin for purposes of certifying that an exported good qualifies as an originating good under the Chapter Four origin rules, set forth the rights and obligations of importers regarding imported goods and of exporters and producers regarding exported goods, and set forth the rights and obligations of the customs administration of the importing country when conducting a verification of the origin of a good and when denying a claim for preferential tariff treatment. Article 507 sets forth confidentiality principles regarding business information collected pursuant to Chapter Five. Article 508 requires each Party to maintain penalties for violations of its laws and regulations relating to Chapter Five. Article 509 sets forth the obligations for the issuance and application of advance rulings by the customs administration of the importing country regarding whether a good meets the country of origin marking requirements of Article 311 or the origin rules of Chapter Four or other NAFTA requirements that apply to certain goods at the time of importation. Article 510 extends to exporters and producers of goods substantially the same rights of review and appeal accorded to importers regarding advance rulings or marking determinations of origin or country of origin determinations for purposes of preferential tariff treatment. Article 511 requires the Parties to establish, and implement through their respective laws or regulations, Uniform Regulations regarding the interpretation, application and administration of Chapter Four, Chapter Five and any other matter as agreed by the Parties. Finally, Articles 512 and 513 set forth procedures for cooperation between the Parties regarding the implementation and administration of the customs-related aspects of the NAFTA.

Pursuant to Article 511 of the NAFTA, representatives of the Parties engaged in a series of trilateral discussions for the purpose of formulating uniform regulatory texts or principles in respect of Chapters Four and Five and in respect of certain provisions within Chapter Three. As regards Chapter Three, agreement was reached on certain principles to be applied for purposes of implementing

the drawback provisions of Article 303. With regard to the remaining Chapter Three provisions, including the country of origin marking provisions of Article 311 and its companion Annex 311 (which provide for the establishment of "Marking Rules" for purposes of determining whether a good constitutes, and thus may be marked as, a good of a Party and which set forth disciplines on the methods and procedures for the country of origin marking of goods), those provisions were to be implemented by each Party independently and as appropriate within each Party's statutory and regulatory structure; the U.S. Marking Rules, contained in Part 102 of the Customs Regulations, were adopted on an interim basis in T.D. 94–4 which was published in the **Federal Register** on January 3, 1994 (59 FR 110). As concerns Chapter Four, the Parties agreed, by an exchange of letters dated December 30, 1993, to implement substantively verbatim texts of interim regulations covering all of the provisions of that Chapter. Finally, in recognition of the different existing customs legal and procedural requirements in the three countries, in the case of Chapter Five and some provisions of Chapter Three the Parties agreed, by an exchange of letters dated December 30, 1993, to use a standards approach whereby agreement was reached on certain minimum principles to be reflected in each Party's regulations, with each Party being left free to implement those principles, and any other requirements not inconsistent therewith, in accordance with the needs of the Party's particular statutory and regulatory framework. The trilaterally-agreed standards are set forth in a document entitled "Uniform Regulations for the Interpretation, Application, and Administration of Chapters Three (National Treatment and Market Access for Goods) and Five (Customs Procedures) of the North American Free Trade Agreement"; the text of that standards document is reproduced for the information of the public in a general notice also appearing in this issue of the **Federal Register**.

On December 30, 1993, Customs published T.D. 94–1 in the **Federal Register** (58 FR 69460) setting forth interim amendments to the Customs Regulations to implement the preferential tariff treatment and other Customs-related provisions of the NAFTA in accordance with the implementation principles agreed to by the Parties as discussed above. In order to provide transparency and facilitate their use, the majority of the NAFTA implementing regulations set forth in T.D. 94–1 were included within one new Part 181. However, in those cases in which NAFTA implementation was more appropriate in the context of an existing regulatory provision, the NAFTA regulatory text was incorporated in an existing Part within the Customs Regulations. T.D. 94–1 also set forth a number of cross-references and other consequential changes to existing regulatory provisions to clarify the relationship between those existing provisions and the NAFTA implementing regulations. Although the interim regulatory amendments were promulgated pursuant to the foreign affairs function exception to the general notice, public comment, and delayed effective date requirements of 5 U.S.C. 553 and took effect on January 1, 1994, in order to coincide with the entry into force of the NAFTA, T.D. 94–1 nevertheless provided for the submission of public comments thereon which would be considered before adoption of the interim regulations as a final rule, and the prescribed public comment period closed on March 30, 1994. In addition, two correction documents pertaining to T.D. 94–1 were published in the **Federal Register**, one on February 24, 1994 (59 FR 8852) and the other on March 31, 1994 (59 FR 15047).

Discussion of Comments

A total of 15 commenters responded to the solicitation of comments on the interim regulations set forth in T.D. 94–1. The comments submitted, and the Customs responses thereto, are set forth below.

Part 12, § 12.132 (Textile and Apparel Goods Under the NAFTA)

Comment: One commenter noted that whereas paragraph (b) of this section provides only for preparation of the country of origin declaration by the manufacturer or producer of the textile or apparel goods, in the case of non-NAFTA goods the declaration may also be prepared by the exporter or importer under § 12.130(f). Since the NAFTA provision imposes a more strict requirement, this commenter suggested that the NAFTA text be aligned on § 12.130(f) so as to provide for preparation by the manufacturer, producer, exporter or importer.

Customs response: The U.S. importer should not be allowed to prepare the declaration in this context because the importer often lacks sufficient knowledge of the actual production and origin of the goods. However, when the importer cannot obtain a declaration from the manufacturer or producer, Customs would be willing to accept a declaration prepared by the exporter, and paragraph (b) (redesignated in this document as paragraph (a)(2) as explained below) has been modified accordingly.

Part 134, § 134.22 (General Rules for Marking of Containers or Holders)

Comment: One commenter expressed approval of the approach taken in new § 134.22(d) regarding the country of origin marking of usual containers, in particular with reference to paragraph (d)(2) which, in the case of a good of a NAFTA country, removes from consideration the additional issue of whether a particular container is capable of reuse in determining whether a container must be marked. Notwithstanding the fact that this NAFTA rule was specifically intended to implement Annex 311(7) of the NAFTA, this commenter stated that this approach should not be limited to NAFTA goods but rather should be applied universally. In support of this suggestion the commenter argued that: (1) The standards applicable to usual containers are regulatory rather than specifically required by the marking statute (19 U.S.C. 1304) and thus can be changed; (2) the NAFTA does not require that its provisions be limited to NAFTA trade; and (3) no public policy purpose is served by having different usual container marking rules because they create confusion for importers and may mislead the consumer regarding the origin of the product packaged in the container when it has a different marking than that of the container.

Customs response: The definition of "usual container" provided in § 134.22(d)(1) applies to all containers, whether they are goods of a non-NAFTA country or goods of a NAFTA country. However, different regulatory requirements are provided in Part 134 of the Customs Regulations for determining whether a usual container is excepted from country of origin marking.

Section 304(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1304(b)), states in part that:

> . . . Usual containers in use as such at the time of importation shall in no case be required to be marked to show the country of their own origin.

Thus, although a container may not be a good of a NAFTA country, if it is a "usual container" as defined in § 134.22(d)(1) of the Customs Regulations it may be excepted from marking pursuant to 19 U.S.C. 1304(b) provided that the conditions of that statutory provision are satisfied, as

Customs has ruled in HQ 735548 dated February 14, 1995.

The Part 134 regulations relating to marking of containers from non-NAFTA countries (§§ 134.23 and 134.24) generally draw a distinction between reusable and disposable containers in determining whether they must be marked to indicate their own country of origin. If the containers are determined to be reusable, they are treated as separate articles of commerce and are required to be individually marked with their country of origin. However, if the containers are determined to be disposable, they are not treated as separate articles of commerce and are excepted from country of origin marking.

However, for containers which are determined to be "goods of a NAFTA country", the distinction between reusable and disposable is not applicable in determining the marking requirements for the containers. The country of origin marking requirements for containers which are "goods of a NAFTA country" are based primarily on whether the container is considered to be a "usual container". If it is determined to be a "usual container", as defined in § 134.22(d)(1) of the regulations, the container is not required to be marked with its own origin. The fact that a container is capable of repeated use does not preclude it from being considered a "usual container".

Section 134.22(d) was included in the interim regulations solely to implement Annex 311(7) of the NAFTA, which applies to containers which are goods of NAFTA countries. Customs does not believe that the NAFTA implementing regulations are the proper vehicle for effecting a change in the marking requirements for containers which are goods of non-NAFTA countries. Such a change (applying to imports from non-NAFTA countries the § 134.22(d)(2) NAFTA "usual container" marking exception) should be the subject of a separate notice of proposed rulemaking to amend §§ 134.23 and 134.24, so as to give affected parties an opportunity to submit any comments they may have.

Part 181, Subpart B (Export Requirements)

Section 181.11

Comment: With regard to the preparation and use of Certificates of Origin in general, one commenter noted that the instructions for field 6 (Harmonized System tariff classification number) specify use of the 8-digit number of the country into which the good is imported if the good is subject to a specific rule of origin that requires eight digits. This commenter suggested that this creates an unnecessary burden on exporters because it requires them to cross-reference and cross-document the seventh and eighth digits of tariff numbers for each NAFTA country and may mean in some cases that three separate Certificates would have to be prepared for one part number. Since the tariff numbers in field 6 simply identify the rule of origin that the exporter used to certify the goods and because the seventh and eighth digits in all three countries identify the same goods and the same rule of origin, this commenter suggested the following alternative solutions: (1) The three governments could publish a single conversion list of the tariff numbers for each country for distribution to customs officials and the public; or (2) the exporter could be allowed to indicate with a "U", "C" or "M" prefix the country of the tariff number used in field 6.

Customs response: Customs does not agree with the proposal of allowing classification to be reported at the 6-digit level. Many of the specific rules of origin were written at the 7th and 8th digit level to capture a desired processing condition. Where this is the case, a NAFTA claimant must indicate that the processing it performed accomplished the required tariff shift. Reporting a classification number at a lesser level would not satisfy this requirement.

The proposal for publishing a list of all of the rules together with references to the 8-digit item numbers may have some merit. It should be noted that the tariff items in these rules are reflected either in the rules themselves or in the Appendix to Annex 401 of the NAFTA. Currently, the NAFTA Parties are exploring within the trilateral working groups created under the NAFTA the most appropriate means to keep the trading public aware of the changes to the rules, including those that involve changes at the 8-digit level. The commenter's suggestion will be kept in mind in that context.

Finally, Customs is of the opinion that the suggestion of utilizing a letter prefix to a 6-digit classification number to designate which country's tariff schedule is being applied would not be workable. An enterprise wishing to take advantage of NAFTA in any one of the NAFTA countries must classify according to the actual tariff schedule of the importing country at the 7th or 8th digit level as shown in that tariff in any case in which the specific origin rule requires a change at that level.

Comment: One commenter raised two issues regarding paragraph (d) which provides that if a U.S. exporter or producer has reason to believe that a Certificate of Origin completed and signed by him contains incorrect information affecting its validity or accuracy, he shall within 30 calendar days so notify in writing all persons to whom the Certificate was given. First, this commenter suggested a problem with the "within 30 calendar days" language in that significant controversy could arise in trying to pin down exactly on which day the exporter or producer had the requisite "reason to believe". Second, the commenter expressed some confusion as to whether a Certificate could be deemed to be incorrect if the information provided thereon was accurate when the Certificate was signed, and in this regard the commenter questioned whether the notice had to be provided in the following circumstances: (1) Whenever there is a change in the product, even if a recipient of the Certificate no longer receives the product; and (2) where the exporter or producer is uncertain as to which of its products the recipient intends to apply the Certificate. Stating that the duty to ascertain inaccuracies and search for all Certificate recipients is unrealistic and fraught with pitfalls for well-intentioned exporters or producers, this commenter suggested that paragraph (d) be redrafted to more specifically define the obligations of Certificate creators.

Customs response: The comment with regard to the commencement of the 30-day period appears to have merit. Accordingly, paragraph (d) of § 181.11, as set forth below, has been modified by inserting the phrase "after the date of discovery of the error" immediately after the phrase "30 calendar days". This additional language would encompass the discovery of an error by any involved party: the exporter, producer or verifying customs administration. The condition that no formal investigation be begun should be unaffected by the addition of this phrase. For purposes of consistency and based on the same considerations, a similar modification has been made to the text of § 181.21(b) regarding the correction of a declaration.

With regard to the issue of the specific circumstances in which notice of an incorrect Certificate of Origin must be provided, Customs would first point out that where information believed by the preparer of the Certificate to be accurate is found to be incorrect by a verifying customs administration, such information constitutes incorrect information which might affect the granting of preferential tariff treatment. Accordingly, all recipients of the

Certificate must be notified of the incorrect information so that a NAFTA claim is not made based on erroneous information.

Where there is a change to a product and the recipient of the Certificate covering that product no longer receives the product, it is the position of Customs that if the product change affects the eligibility of the product retroactively and if the recipient based its claim of NAFTA treatment for that product on an incorrect Certificate, the recipient must be sent a corrected Certificate so that it might correct its entry. Prospective shipments of the product should be covered by a new Certificate given to current importers of the product.

Finally, as regards a case in which the exporter or producer is uncertain as to the specific products to which the recipient intends to apply the Certificate, it is the position of Customs that an exporter or producer must assume that each recipient of its Certificate intends to utilize it for all products listed thereon and thus must be notified of any incorrect information appearing on the Certificate.

Section 181.12

A commenter stated that this section imposes overly broad and burdensome recordkeeping requirements on U.S. exporters and producers whose goods qualify as originating goods under an origin criterion that does not involve a regional value-content requirement. Since in such a case data as to cost, value and payment are irrelevant in qualifying as an originating good, this commenter states that § 181.12 should be written so as to require only that recordkeeping which is necessary to demonstrate the correctness of the basis upon which originating status is claimed.

Customs response: The recordkeeping requirements contained in paragraph (a) of this section, including the specific types of records to be maintained, reflect the provisions of Article 505 of the Agreement which was implemented by an amendment to 19 U.S.C. 1508 effected by section 205 of the Act. Moreover, this comment fails to recognize a basic problem that could arise from use of the suggested minimalist approach: a customs administration may have no choice but to deny a claim for preferential tariff treatment if the claimed basis for originating status is not valid and no records have been maintained to support an applicable alternative basis involving a regional value-content requirement.

Part 181, Subpart C (Import Requirements)

Section 181.21

Comment: With regard to the requirement under paragraph (a) that the claim for preferential tariff treatment be based on a Certificate of Origin in the possession of the importer, one commenter stated that the regulatory provision is unclear as to whether possession of a copy of the Certificate would satisfy this requirement. This commenter stated that permitting use of copies of a Certificate is necessary where there are multiple importer customers, where goods are exported to two NAFTA countries, and where a supplier provides a Certificate to a central location of a producer which has subsidiaries operating in more than one NAFTA country.

Customs response: Customs believes that this commenter makes a valid point. Accordingly, paragraph (a) of § 181.21, as set forth below, has been modified to provide for possession of a copy of a Certificate of Origin.

Comment: With regard to the written declaration under paragraph (a) and the written correction of a declaration under paragraph (b), a commenter suggested that additional provision should be made for effecting both actions by electronic means in order to reflect the Customs Modernization provisions of the Act.

Customs response: Although the suggestion has some merit in principle, Customs believes that it would be premature at this time to revise these paragraphs to provide for electronic means for complying with their provisions. As Customs implements the Customs Modernization provisions of the Act, it will identify which regulatory activities may be performed electronically and will amend the regulations accordingly. At that time, these NAFTA provisions will be reviewed and, if necessary, brought into line with whatever changes are made elsewhere in the Customs Regulations with respect to the electronic filing of entry information.

Comment: One commenter stated that paragraph (b) should require that Customs send to the importer's surety a copy of the importer's corrected declaration because, if the importer fails to pay the required duties, the surety will not be aware of this circumstance until the entry is liquidated and demand is made upon the surety.

Customs response: Customs does not now notify sureties during the entry process, and that policy should continue to be applied in the context mentioned by this commenter.

It should also be noted that the failure to deposit estimated duties when due is a bond breach, and Customs may make an immediate demand in the event of a breach. There is no basis for a different procedure when the bond principal breaches that provision at the time of entry or when the bond principal breaches that provision at the time of filing a corrected declaration.

Section 181.22

Comment: For purposes of submitting a Certificate of Origin to Customs under paragraph (b), one commenter stated that, by referring to a Certificate "signed by the exporter or producer", the regulation appears to permit the exporter to simply provide the producer's Certificate to the importer. This commenter suggested that, if this is so and if the producer were allowed to execute a single Certificate and provide copies thereof to its customer exporters who then could provide copies to their customer importers, the following benefits could be realized: (1) A producer Certificate would not have to be re-executed by exporters; (2) a possessor of a Certificate would always know who the producer of the goods was; and (3) administrative effort would be reduced by requiring creation of only a single Certificate.

Customs response: While the commenter's suggestion has some logic and merit under the regulatory text as written, Article 501(3) of the Agreement (and § 181.11(b) in a U.S. export context) are quite clear that an importer's claim for preferential NAFTA tariff treatment can only be based on a Certificate of Origin prepared by the exporter of the good. Moreover, any Certificate completed by a producer is done voluntarily whereas that prepared by the exporter is a requirement for claiming NAFTA treatment. In order to remove any ambiguity and ensure consistency with the terms of the Agreement, paragraph (b)(2) of § 181.22, as set forth below, has been modified by removing the two references to "or producer".

Comment: One commenter stated that this section should be modified to require that Customs provide notification to the importer's surety whenever the importer fails to comply with a request for submission of a Certificate of Origin. This would enable a surety to minimize its risk in cases involving a series of related importations which result in denial of preferential tariff treatment and issuance of a claim for increased duty under the surety's bond.

Customs response: The comment response under § 181.21 above regarding notice to a surety applies equally to this comment. Moreover, the principal may pay the duty so that no bond breach would occur. In any event, the requested change would inject Customs into the contractual relationship between the surety and its bond principal. The submission of document copies is a matter that is best resolved between the principal and its surety.

Part 181, Subpart D (Post-Importation Duty Refund Claims)

Section 181.31

Comment: One commenter stated that this section should be amended to expressly permit sureties to submit post-importation NAFTA claims so that sureties may protect their interests, for example in a case where the importer is out of business and the surety has a liability on the transaction. This commenter argued that this would be a logical and much needed extension of surety rights under the administrative process, noting in this regard that sureties presently can file protests, petitions for relief from liquidated damage claims and petitions under 19 U.S.C. 1520(c).

Customs response: Both Article 502(3) of the Agreement and the U.S. implementing statute specifically provide for the filing of a post-importation claim by the importer. While 19 U.S.C. 1514(c) expressly provides for the filing of a protest by a surety in its own right, no corresponding surety right is reflected in 19 U.S.C. 1520(d) which was added by section 206 of the Act. Of course, a surety or any other party acting as a duly authorized agent may file a post-importation claim on behalf of its importer principal.

Section 181.32

Comment: One commenter complained of the post-importation refund claim documentary requirements in paragraphs (b)(3)–(5) of this section, pointing out that the written statements specified therein constitute added and burdensome requirements that are not applied either in the case of a NAFTA claim made at the time of entry or in the case of any other post-importation claim procedure under Part 173 or 174 of the Customs Regulations. This commenter therefore suggested removal of these requirements.

Customs response: The written statement requirements for post-importation claims are designed to prevent an overpayment of a duty refund such as drawback. Customs notes that there are parallel NAFTA requirements for drawback and duty deferral program participants under Part 181 (see §§ 181.47 (b) and (c) and § 181.53(a)(3)). Accordingly, Customs believes that these requirements must be retained.

Section 181.33

Comment: Two commenters referred to paragraph (d)(3) which provides that where the entry covering the good has been liquidated, whether or not the liquidation has become final, a post-importation refund claim may be denied without reliquidating the entry. One of these commenters stated that this section and Part 174 of the Customs Regulations should include the right to file a protest within 90 days of the denial of the claim whether or not the liquidation has become final. The other commenter stated that the regulations do not, but should, provide for an administrative appeal process in the case of a denial issued more than 90 days after liquidation of the entry.

Customs response: Customs agrees that a claimant has a right to file a protest based on a denial of a NAFTA post-importation claim, including in cases in which the claim is denied more than 90 days after liquidation of the entry and without reliquidation of the entry, and Customs also agrees that the regulations should explicitly reflect this right. Accordingly, § 174.12(e)(2), which specifies when the 90-day time period for filing a protest begins in the case of a protest against a decision not involving a liquidation or reliquidation, has been modified as set forth below by the inclusion of a specific reference to a claim filed under 19 U.S.C. 1520(d).

Customs notes that in the case of a denial of a post-importation claim on the merits (that is, where the denial is based on a negative origin determination rather than on procedural grounds), a person who signed a Certificate of Origin relating to the good at issue has a right to file a protest against the denial (see 19 U.S.C. 1514(c)(2)(E) and interim § 174.12(a)(5) as republished below). In order to reflect current Customs practice, §§ 181.33 (d)(2) and (d)(3), as set forth below, have been modified to provide that the notice of denial of the claim in such cases shall include a statement regarding the right to file a protest against the denial under Part 174 of the regulations.

Part 181, Subpart E (Restrictions on Drawback And Duty-Deferral Programs)

Section 181.41

Comment: Two commenters stated that this section implies that the effective dates of 1996 and 2001 apply only where preferential tariff treatment under NAFTA is claimed. This is not correct and therefore it should be made clear that these effective dates apply to all merchandise whether or not NAFTA preferential treatment is involved.

Customs response: Customs agrees that the subpart covers all exports to Canada or Mexico, whether a claim for preferential tariff treatment is made or not. Accordingly, the second sentence of § 181.41, as set forth below, has been modified by inserting a period after "January 1, 2001" and removing the rest of the sentence.

Section 181.44(a)

Comment: A commenter pointed out that it is too difficult for the drawback claimant to "discover" the duty paid on the merchandise when it is imported into the United States and when it is imported into Canada and Mexico. As an alternative, this commenter suggested that a NAFTA control number be placed on the commercial invoice when a drawback claim is expected to be filed. Each U.S. exporter could use its tax identification number (from the Certificate of Origin) followed by a date code and a sequential number. This control number should become part of the import records associated with NAFTA claims in Canada or Mexico.

This commenter went on to state that whenever this sequential NAFTA drawback control number appears, Canadian or Mexican Customs should enter the amount of duty from the import entry, together with the control number, into a database which could be downloaded into the U.S. Customs computer system. The data could then be accessed by U.S. Customs through ABI to determine duties paid upon importation into Canada or Mexico. Upon liquidation of the import transaction in Canada or Mexico, the computer record would be updated. The drawback claimant should be allowed to waive the right to claim a refund of the amount equal to the additional duties that would be owed to Canadian or Mexican Customs. This would set the date of entry when duties have been paid in Canada or Mexico for drawback purposes. The commenter suggested that without a link between the three Customs administrations, drawback claims will be delayed.

Customs response: This commenter recognizes that the Agreement and the statute require the amount of duty paid in Canada or Mexico to be reported. The commenter's proposal to require a drawback control number to be placed on the commercial invoice and for the Customs Services of the three countries to monitor that number would be extremely burdensome. In addition, Customs is aware that many U.S. importers have alleged an inability to obtain the foreign invoice. Such inability can only result from a failure of the commercial participants to address the issues in a timely manner. Drawback claims require that the commercial participants resolve these information issues in the terms of the sale before the export so that the required information on the completed transaction can be presented to Customs to establish any drawback eligibility. Paragraph (c) of § 181.47 lists the required evidence.

Comment: A commenter stated that any claim based on estimates (that is, the NAFTA duty rate multiplied by the invoice value) would not take into account duty exemptions that may be available to Canadian and Mexican importers and that may not be apparent on the face of the commercial documents (for example, articles assembled abroad and returned). If there are no such exemptions and value can be determined on the face of the commercial documents, then the claimant should be allowed to base the duty amount on the appropriate NAFTA duty rate in Canada or Mexico multiplied by the FOB value.

Customs response: Drawback claimants cannot base their claims on estimates; rather, each claim must be based on the liquidated amount of duty paid on the import entry for goods entered into Canada or Mexico.

Section 181.44(b)

Comment: Two commenters stated that this section is unclear as to the calculation of drawback when two or more components are used in the process of manufacture. One of these commenters raised the question of whether the comparison of duty paid must be between the duty paid on each component part and the duty paid on the finished article exported to Canada or Mexico or between the total duty paid on all component parts and the duty paid on the finished article exported to Canada or Mexico. This commenter provided the following example:

> Two parts, X and Z, are imported duty-paid into the United States at $2.00 and $4.00, respectively. Assume article Y is manufactured and exported to Canada or Mexico and duty of $5.00 is due. Does the lesser of the two duties apply to X and Z individually (resulting in $6.00 in drawback) or collectively (resulting in $5.00 in drawback)?

Customs response: With respect to the duty comparisons, the comparison should be made on an individual basis regardless of whether two components are used to make one export article or one component, such as a chemical, is split into two export articles. Section 181.44, as set forth below, has been modified by redesignating paragraphs (b)–(e) as (c)–(f) and adding a new paragraph (b) which sets forth the relative value calculation and individual comparison principle and includes the following example:

> Upon importation of Chemical X into the United States, Company A entered Chemical X and paid $2.00 in duties. Company A processed Chemical X into Products Y and Z, each having the same relative value; that is, $1.00 in duty is attributable to Product Y and $1.00 in duty is attributable to Product Z. Company A exported Product Y to Canada and Canada assessed a free rate of duty. Company A exported Product Z to Mexico and Mexico assessed the equivalent of US$2.00 in duty. There is no entitlement to drawback on the export of Product Y to Canada because zero is the lesser amount when compared to the $1.00 in duty attributable to Product Y as a result of the separation of Chemical X into Products Y and Z. There would be entitlement to drawback on the export to Mexico, consisting of the $1.00 duty attributable to Product Z, because that amount is the lesser amount when comparing the duty paid to the United States and the US$ equivalent duty paid to Mexico.

Section 181.44(c)

Comment: Three commenters expressed concern about the statement in § 181.44(c) (redesignated in this document as § 181.44(d) as discussed above) that "same kind and quality" is synonymous with "identical or similar good". They stated that this terminology should not restrict or eliminate rulings and court cases related to same kind and quality. Another commenter stated that making the term "same kind and quality" synonymous with the terms "identical" or "similar" seems to eliminate substitution drawback since identical or similar goods are defined in part as "goods that were produced in the same country as that good". If this is true, then the example in this section is incorrect because it allows for the substitution of foreign and domestic goods. On a related subject, a commenter raised the point that the statement that the two terms are synonymous leaves the door open for narrowing the scope of the "same kind and quality" provision to that of "identical or similar." This commenter was of the view that it should be stated that all rulings, court cases or other determinations pertaining to same kind and quality will be the guiding force in understanding the meaning of "identical and similar good."

Customs response: Although it is true that the term "same kind and quality" is considered to have the same meaning as the term "identical or similar", Customs does not intend to require that the substituted merchandise come from the same country to qualify for manufacturing drawback under the NAFTA. Section 181.44(d), as set forth below, has been modified to clarify these points.

Section 181.45

Comment: With regard to the reference in this section to "same condition" instead of "unused merchandise", three commenters questioned whether a third unique type of drawback is contemplated by this regulation, that is, same condition drawback for NAFTA countries and unused drawback or manufacturing drawback for all other countries. Otherwise, they stated that the terminology used in [illegible] NAFTA and in 19 U.S.C. 131[illegible] [illegible] amended by section 632 of the Act, [illegible] harmonized. Also on this subject, another commenter stated that, for consistency, the term "same condition drawback" should be replaced with "unused merchandise drawback."

Customs response: The Agreement was signed by the United States on December 17, 1992. The United States could not, without reopening negotiations with the two other Governments, incorporate changes made to its national laws subsequent to December 17, 1992, in its obligation to implement the Agreement. Consequently, with respect to trade between the three NAFTA parties there will be unavoidable inconsistencies when compared with trade between the United States and countries outside the Agreement. It is simply impossible to eliminate all differences between the provisions of sections 203 and 632 of the Act by regulation. In trade between NAFTA countries the provisions of section 203 of the Act control. Subpart E can do no more than to implement section 203 of the Act.

Section 181.45(b)

Comment: Two commenters stated that the second sentence of the example should be amended to simply read "X immediately exports the desk to Z in Mexico" because, whether or not duties are owed in Mexico, the mere fact of exportation will allow X to obtain a refund of 99% of the $25.00 in duty paid upon importation of the desk into the United States. These commenters went on to state that the fact that Z pays duty of $10.00 in Mexico is moot: 19 U.S.C. 1313(j)(1) contains no limitation based upon payment of duties in the NAFTA country of import. Thus, including the $10.00 Mexican duty in the example rather than a "whether or not" phrase regarding payment of duty in Mexico, will be confusing to industry and to Customs personnel. Since the amount of duty is only germane in calculating the "lesser of two duties" under a manufacturing scenario, these commenters stated that the suggested modifications of the example would more accurately reflect the law.

Customs response: The sentence which precedes the example, together with the example, illustrates precisely the point made by the comment.

Comment: A commenter stated that the term "commercially interchangeable" should be substituted for "completely fungible" in subparagraph (2) of this section.

Customs response: In order to avail oneself of full drawback under direct identification, the Agreement and implementing legislation permit identification of the exported good as the imported good by means of a recordkeeping system only if the goods are fungible and commingled. Section 181.45(b)(2)(i), as set forth below, has been modified as explained below in the response to the comments submitted regarding Schedule X of the Appendix to Part 181, and the modified text does not include the superfluous word "completely" before "fungible".

Section 181.45(c)

Comment: One commenter stated that the statement "X exports it within 90 days" in the example under this section should be changed to refer to "within 3 years".

Customs response: The period for exportation is clearly stated in § 181.45(c). An example cannot impose a further qualification on either the statute or implementing regulation. So long as the period is less than 3 years the example correctly illustrates the provision.

Section 181.46(b)

Comment: Two commenters stated that the existing exporter's summary procedure and waiver of prior notice provisions and the new provisions for "unused merchandise drawback" eliminate the need to inspect the goods prior to export because it would be too difficult for Customs to determine "unused" status by visual inspection. These two commenters, after stating that the Office of Trade Operations has indicated that the required 5 days of prior notice may be shortened to 48 hours, suggested that any change to this time period in Part 191 of the Customs Regulations should be reflected in the corresponding provision in Part 181. In addition, one of these commenters pointed out that there never existed a requirement for filing at the port of exportation.

Customs response: Although the exporter's summary procedure and waiver of prior notice provisions are not specifically provided for in the NAFTA, they are not new to the Drawback Program. Therefore, the existence of these two privileges would not be a basis for eliminating the physical inspection of the goods. With respect to shortening the prior notice period from 5 days to 48 hours, this principle already has been considered by Customs in connection with a pending proposed revision of Part 191 of the Customs Regulations. Section 181.46(b), as set forth below, has been modified to specify a prior notice period of 2 working days rather than 5 days.

Comment: One commenter pointed out that the statement in this section that "[g]enerally, for same condition drawback, the claim would be filed with the Customs port where the examination would take place" is not practical and not required by law.

Customs response: Because there are currently no requirements that claimants file same condition claims at the port where the examination will take place, Customs agrees that this statement should be replaced by the following: "To facilitate expedited processing of claims, claimants should file same condition drawback claims in the port where the examination would take place". Section 181.46(b) as set forth below has been modified accordingly.

Comment: A commenter requested that the text of this section be replaced by the appropriate sections from Part 191 of the regulations. The commenter did not explain the basis for this comment.

Customs response: Customs believes that the new language set forth in the preceding response will at least in part address this comment.

Section 181.47(a)

Comment: Two commenters stated that this section places an undue burden on the claimant because it requires the claimant to monitor the enforcement of the Canadian or Mexican Customs regulations. These commenters also argued that the section is also unfair in that it requires the claimant to have access to duty payment information to which it is not privileged, when sometimes the claimant does not even know who the ultimate importer is in Canada or Mexico.

Customs response: The Agreement provides that the amount of the duties paid in the destination NAFTA country must be presented by the person seeking a refund of that duty from the exporting NAFTA country. In order to obtain the refund, the claimant must obtain the cooperation of its customer in Canada or Mexico.

Section 181.47(b)(1)

Comment: Two commenters complained that the Canadian or Mexican Customs entry and the document referred to as the "certification", which are required to be submitted under this section, are too difficult for the U.S. exporter to obtain. Two other commenters stated that requiring both documents is redundant and contradictory to the paperless entry concept. Another commenter suggested that the entry documents should not be required but rather should be used only if available and that certification should only be provided in the event of an audit.

Customs response: The provision reflects a basic and necessary component of a proper NAFTA drawback claim and is not redundant since alternative methods may be used to establish that amount as set forth in paragraph (c) of § 181.47. As regards the alleged burden imposed by this provision, and as noted elsewhere, a drawback claimant will need the cooperation of its Mexican or Canadian customer in order to benefit under the agreement.

Section 181.47(b)(2)(i)

Comment: Two commenters believed that the documents required in Part 191 of the regulations satisfy the NAFTA requirements. They stated that commercial invoices, proof of payment of duties and import documents relating to an exportation to a foreign country have never been required with drawback claims under Part 191 and should only be required in the event of an audit. These two commenters also stated that these documents would not be required at the time of filing the claim under the exporter's summary procedure.

Customs response: Paragraph (c) of § 181.47 does not require filing of the Canadian or Mexican Customs entry because, under subparagraph (4), the drawback claimant may file an affidavit in lieu of the Canadian or Mexican entry document provided that certain specified information is also submitted. The requirement for these new documents is a result of the new "lesser of the two" system which is part of the NAFTA Agreement. The documents required in Part 191 of the regulations would not enable either the claimant or Customs to have knowledge of the

amount of duties paid upon importation into Canada or Mexico.

Section 181.47(b)(2)(ii)(G) provides an alternative means for a drawback claimant under 19 U.S.C. 1313(j)(1) to show exportation.

Section 181.47(b)(2)(i)(A)

Comment: Four commenters stated that it is unclear why the tariff classification number of the imported merchandise is needed when the drawback is based upon the duty paid (regardless of the tariff number). These commenters further stated that tariff numbers have never played a significant role in drawback before.

Customs response: The tariff classification number will facilitate processing drawback claims by Customs. The use of a number rather than a textual description is better adapted to automated processing procedures. In the near future, tariff numbers will be required for all drawback claims, not just for NAFTA claims. These numbers are needed for compiling profiles as part of the planned selectivity system for drawback.

Because drawback claims under the Agreement require a comparison on an individual basis, as noted by these same commenters, with respect to § 181.45, the line item information is needed in order to process a claim under the Agreement.

Section 181.47(b)(2)(i)(B)

Comment: An objection was raised by three commenters regarding the requirement of submission of the commercial invoice because many importers do not have a hard copy of this document. These commenters argued that submission of the commercial invoice is contrary to the Customs modernization provisions of the Act and to the principles of automation, and they further stated that the commercial invoice is difficult to obtain because it contains proprietary information. Two of these commenters also pointed out that Customs will not have sufficient staff to review all of this documentation.

Customs response: Customs agrees that claimants should not be required to submit Customs Form 7501 and copies of commercial invoices with their claims unless they are requested by Customs. Accordingly, § 181.47(b)(2)(i)(B), as set forth below, has been modified to specify only "Customs Form 7501 or the import entry number". It should be noted, however, that claimants (and other parties who provide information on which a claim is based) must continue to maintain records to support the claim and make them available upon request. This includes records of importation and invoice-level information.

Section 181.47(b)(2)(i)(C)

Comment: Three commenters objected to the inclusion of the Canadian and Mexican entry numbers on the exporter's summary procedure because: (1) These numbers are not available to the exporter; (2) the exporter's summary procedure was not intended for this purpose; and (3) the courts have ruled that when information such as this is impossible to obtain the "best evidence available" must be accepted.

Customs response: These numbers are needed in order for the NAFTA countries to implement a data exchange system which will be used to verify the requested amount of drawback based on the "lesser of the two" system. The NAFTA parties will provide each with a tape of entry numbers and corresponding duty payments so that claimed amounts may be verified on a spot-check basis. Entry numbers are needed for this system to work.

Section 181.47(b)(2)(i)(D)

Comment: Three commenters stated that the NAFTA regulations should require only "evidence of exportation", as is required in Part 191 of the regulations, rather than the "proof of exportation" provided for in this section and in other sections of these NAFTA regulations.

Customs response: Customs agrees that the term "evidence" should be substituted for the term "proof" in each such context in order to be consistent with Part 191 of the regulations, and the Subpart E texts, as set forth below, have been appropriately modified throughout.

Section 181.47(b)(2)(i)(E)

Comment: Three commenters stated that waivers of rights to drawback are already available in the form of certificates of delivery and certificates of manufacture, and therefore any additional waiver requirement is redundant.

Customs response: The certificate of delivery does not waive any right to drawback particularly in light of the right to transfer substitute merchandise. This certificate makes it absolutely clear to the certifier that it may not claim any drawback with respect to the merchandise covered by the waiver.

Comment: A commenter questioned the validity of the waiver of the right to drawback by the importer in favor of the exporter when § 181.48(a) clearly states that the exporter is entitled to drawback.

Customs response: A waiver is needed from the importer who transfers any merchandise to a manufacturer and issues a certificate of delivery. A manufacturer who transfers merchandise to an exporter and issues a certificate of manufacture and delivery also needs to issue a waiver.

Section 181.47(b)(2)(i)(F)

Comment: Three commenters stated that the requirement that the drawback claimant provide a certification that he has not issued a Certificate of Origin for the goods to another party, or that he will notify Customs if he does so, is not valid because there is no NAFTA provision that precludes drawback when NAFTA preference is taken. One commenter stated that the separate certification or affidavit is not needed because it is well known that double dipping is illegal.

Customs response: The requirement is necessary since it is far from obvious that providing a Certificate of Origin which enables a Mexican or Canadian importer to obtain a duty reduction or refund from Mexico or Canada would be considered illegal double-dipping by a United States drawback claimant since that claimant would not necessarily benefit directly from the actions of its customers.

Comment: Another commenter took issue with the requirement for an affidavit by a manufacturing claimant certifying that no other claim has been filed on the goods. This commenter stated that once the claimant receives either a certificate of delivery or a certificate of manufacture and delivery, he can only certify that he has not made any other claim on the goods. The manufacturing claimant will not know whether the importer or any other party makes a claim on the goods.

Customs response: The commenter appears to compare the requirements of § 181.47(b)(2)(i)(F) and § 181.51(b). The Customs recordkeeping statute, 19 U.S.C. 1508, as amended by section 205 of the Act, does not prohibit a drawback claimant from providing an affidavit on the preparation of a Certificate of Origin with the drawback claim. It does require a drawback claimant to report such facts within 30 days of filing a drawback claim if that claimant has not already done so.

Informed compliance means that the Government is under an obligation to inform persons who deal with it which acts are proscribed. The regulation which requires a certification that the same import entry for the same designation of goods has not been used in more than one claim fulfills that obligation.

Section 181.47(b)(2)(ii)(A)

Comment: Two commenters stated that the requirement for the tariff classification at entry is superfluous.

Customs response: As already pointed out, in the near future tariff numbers will be required for all drawback claims, not just for NAFTA claims. These numbers are needed for compiling profiles as part of the planned selectivity system for drawback.

Section 181.47(b)(2)(ii)(B)

Comment: Four commenters stated that the requirement regarding submission of commercial invoices is in conflict with the requirements of the Customs modernization provisions of the Act and is a step backwards in the automation process. These commenters further argued that these documents are impossible to obtain when the claimant is not the importer. One of these commenters suggested requiring a pro forma invoice instead for same condition claims in order to resolve the latter problem. Another of these commenters stated that the detail required in this section may not be available due to automation and paperless entries and that it should be changed to refer to Customs Form 7501 and any appropriate documentation which identifies the subject goods. Another commenter stated that the entry documents (such as Customs Form 7501) may not be available because of confidentiality considerations.

Customs response: Again, Customs agrees that claimants should not be required to submit commercial invoices with their claims. Accordingly, § 181.47(b)(2)(ii)(B), as set forth below, has been modified by removing the two references to commercial invoices, and § 181.47(b)(2)(iii)(B), as set forth below, has been similarly modified for purposes of consistency. However, Customs would again point out that claimants (and other parties who provide information on which a claim is based) must possess and maintain records to support the claim and make them available upon request. This includes records of importation and invoice-level information.

Section 181.47(b)(2)(ii)(G)

Comment: Two commenters stated that this section should begin with the words "If exporter summary procedures are not in force". In addition, two commenters stated that the words "* * * and signed in ink" should be deleted because obtaining an original ink signature on a nonnegotiable copy of a document is an unnecessary burden. Finally, one commenter stated that this section does not take into account claimants using procedures under § 191.51 of the regulations and that it should be amended to reflect that fact.

Customs response: Customs agrees that where the exporter's summary procedure is approved for the claimant, the requirement in § 181.47(b)(2)(ii)(G) is not applicable; accordingly, this section as set forth below has been modified by adding at the beginning of the first sentence the words "If a claimant is not approved for the exporter's summary procedure,". In addition, while the evidence of export document must be signed, Customs agrees that the signature need not be in ink; accordingly, the section as set forth below has been modified by removing the words "and signed in ink" from the first sentence. Finally, Customs agrees that this section should reflect that evidence of exportation may also be established in accordance with the provisions of § 191.51; accordingly, § 181.47(b)(2)(ii)(G), as set forth below, has been modified by adding at the end of the first sentence the words ", or any other evidence of exportation provided for in § 191.51 of this chapter".

Section 181.47(b)(2)(ii)(H)

Comment: Three commenters stated that providing a waiver from the importer is redundant since a certificate of delivery already serves the same purpose. One of these commenters suggested that if Customs must have it, it should be provided for directly on the certificate of delivery.

Customs response: A certificate of delivery does not in itself constitute a waiver of the right to claim drawback. Thus, an explicit waiver is necessary.

Customs agrees in principle that the waiver could be incorporated into the certificate of delivery form. However, until that form is revised to include the waiver, a separate waiver is needed.

Section 181.47(b)(2)(ii)(I)

Comment: One commenter recommended that the affidavit be incorporated onto the "J" side of Customs Form 7539, but with reference to "designated goods" changed to "identified goods". Another commenter stated that the affidavit is unnecessary but that if Customs must have it, it should be included on the drawback entry form instead.

Customs response: So long as the affidavit is included with the drawback entry, the legal requirement will be satisfied.

Section 181.47(b)(2)(iii)(B)

Comment: One commenter objected to the requirement of submission of the commercial invoice because it will not be available in hard copy. This commenter stated that a pro forma invoice would solve this problem.

Customs response: Customs took the position in promulgating 19 CFR 191.142(b)(6) that drawback under 19 U.S.C. 1313(c) is payable to an exporter claimant who is the importer of record or the actual owner named in the import entry. There is nothing in section 203 or 632 of the Act which would require a change to that position. As such, it is unclear why the person who ordered the merchandise and who determined that the merchandise did not meet the order specifications would not have the original invoice issued by the foreign supplier.

Section 181.47(b)(2)(iii)(C)

Comment: It was pointed out by a commenter that import documents for foreign countries are not available to the U.S. seller and that it is virtually impossible for the U.S. seller to obtain proof of payment and final duty determination notices.

Customs response: The commenter has misread the section. Subparagraph (C) states the evidence needed to show that the specifications were not met.

Section 181.47(c)

Comment: Two commenters stated that the phrase "for purposes of evidence of duties paid" is confusing in that § 181.47(a) also refers to "evidence of exportation". They also suggested that Customs may want to consider a single definition for "evidence of exportation" as has always been done under Part 191 of the regulations and introduce specific requirements only for 19 U.S.C. 1313 (a) or (b) drawback for "evidence of duties paid" since this information is germane only to manufacturing drawback when calculating the "lesser of the two duties".

Customs response: It would be quite difficult for Customs to draft an affidavit for the parties. The language needed to demonstrate that the claimant's goods were received by its Mexican or Canadian customer and the amount of duty paid to Canada or Mexico by that customer would depend on that customer's statement.

There is a difference between the provision on exportation in § 181.47(b)(2)(ii)(G) (which has specific reference to 19 U.S.C. 1313(j)(1)) and the provision in § 181.47(c). Because in the former case there is full drawback available without a comparison between the duty that was paid in the United States and the duty paid in Canada or Mexico, the provisions necessarily differ. The provisions of § 181.47(c) also apply in a NAFTA context to other duty reduction programs such as temporary importations under bond, bonded warehouses, and foreign trade zones (*see* § 181.53(a)(3)).

Section 181.48

Comment: With regard to paragraphs (b) and (c), two commenters pointed out that the wording is confusing and not consistent with "mainline" drawback in that, under Part 191 of the regulations and under the Customs modernization provisions of the Act, it is always the exporter of record who is entitled to drawback. One of these commenters suggested the following alternative language: "The exporter of record is entitled to the drawback unless the exporter directs in writing that another entity receive the drawback refund."

Customs response: The provision in § 181.48(b) follows the position set forth in 19 CFR 191.142(b)(6). Section 181.48(c) is consistent with current law regarding the identity of the claimant for same condition drawback. The Customs modernization provisions of the Act followed this interpretation with respect to the identity of the claimant for unused merchandise drawback.

Section 181.49

Comment: One commenter stated that this section does not specify which records are required to be kept by the exporter, importer, manufacturer or producer. This commenter argued that Customs recordkeeping requirements are strictly limited to those records which are referenced in the statute and that this is consistent with Congressional intent under H.R. 3450. This commenter also suggested that Customs review the commentary in the House Report with regard to section 632 of the Act and that Customs also compare § 181.49 to § 181.53(g).

Customs response: The types of records are set forth in § 181.47(b); this section simply sets the retention period. Since payment occurs in most instances under the accelerated payment program before liquidation takes place, the period starts and ends earlier. In any event, § 181.49 follows the existing policy set forth in 19 CFR 191.5. Customs notes that 19 U.S.C. 1313(t), which was added by section 632 of the Act, makes the general recordkeeping requirements set forth in 19 U.S.C. 1508(c) applicable in the context of drawback certificates and provides that the retention period starts on the date the certificate is issued in the case of a person who issues a certificate relating to another person's drawback claim. Accordingly, § 181.49, as set forth below, has been modified by adding at the end the following sentence: "However, any person who issues a drawback certificate that enables another person to make or perfect a drawback claim shall keep records in support of that certificate commencing on the date that the certificate is issued and shall retain those records for three years following the date of payment of the claim."

Section 181.50(a)

Comment: A commenter raised the issue that whereas the regulations require that the amount of duties paid to Canada or Mexico be "established" as a prerequisite to the completion of the claim, they do not provide instructions as to how these duty amounts will be established and they do not prescribe a time frame in which the duty amounts will be settled for the purpose of finalizing the claim.

Customs response: This section describes generally the process by which Customs will determine the amount of drawback to be paid. A directive for the guidance of Customs officers will address the internal Customs procedures that will implement the process in detail. With regard to the time frame issue, see the discussion of § 181.50(b) below.

Section 181.50(b)

Comment: Two commenters stated that requiring liquidation of entries made in Mexico and Canada before a drawback claim is liquidated eliminates most drawback claims from the Customs modernization act bypass system. In a related comment, another commenter stated that this section is in conflict with the Customs modernization provisions of the Act in a bypass (selectivity) system context because the liquidation of all designated import entries is no longer required for drawback liquidation. This commenter argued that requiring that there be prior liquidation of the import entry in Canada or Mexico undermines the process and conflicts with the requirement for fair and reasonable procedures as described in the legislative history accompanying the Customs modernization provisions of the Act.

Customs response: Customs will not be able to determine the "lesser of" the two duties unless the final amount of duties paid upon entry to Canada or Mexico is available. See also the response to the next comment.

Comment: A commenter stated that a time limit for liquidations is needed and that the current indefinite time period is in conflict with the intent expressed by Congress in the new drawback provisions contained in section 632 of the Act. In this regard this commenter referred to the accompanying House Report in which it was stated that "the Committee expects that Customs should issue drawback regulations which take into consideration the various time limitations for recordkeeping, filing claims, amendments and clarifications and for auditing and liquidating drawback claims."

Customs response: There is no requirement under the law that provides for a specific time period for liquidation of drawback claims, and practical considerations (including differences in the entry laws of the three NAFTA Parties) militate against imposing a strict time limit for liquidation of a drawback claim.

On a related subject, the United States and Canada have agreed that each import transaction involving goods subject to a NAFTA drawback claim in the exporting country should be monitored for a period of 3 years so that appropriate information may be provided to the exporting country for purposes of applying the "lesser of" rule; this 3-year period was chosen because it represents in most cases the time during which all factors affecting ultimate finalization of the import entry (including changes to the entry made by the importer after importation) would be set. Accordingly, § 181.50(b) as set forth below has been modified to provide that a drawback claim shall not be liquidated for a period of 3 years after the date of entry of the goods in Canada or Mexico.

Comment: A commenter made the following suggestion with respect to the policy that liquidation of the drawback claim not occur until the liquidation of the Canadian or Mexican customs entry has become final: In order to avoid a long waiting period, a waiver of the right to challenge the amount of estimated Canadian or Mexican duties should be established. Under this procedure, the claimant would agree to waive the right to claim any additional duties owed to Canadian or Mexican Customs.

Customs response: The commenter alleges that liquidation of a drawback claim can be done more quickly if the right to challenge the amount of duties assessed by Canada or Mexico is waived. However, a U.S. drawback claimant, unless it is also the importer into Mexico or Canada, has no right to waive the amount of duty paid by the Mexican or Canadian importer. Also, a system involving payment of drawback claims based upon the waiving of rights to challenge the Canadian or Mexican duty amounts could result in the United

States issuing an overpayment to the drawback claimant each time the import entry was liquidated for a lower amount of duties. The change to § 181.50(b) discussed in the response to the preceding comment represents Customs view regarding the proper time period during which liquidation of a drawback claim should not take place.

Section 181.50(c)

Comment: With respect to the requirement that a person who receives a drawback refund through accelerated payment must repay the duties if a NAFTA claim is adversely affected thereafter, a commenter stated that this should be amended to state that repayment is not required until the adverse decision has been made final by the courts and/or by operation of law.

Customs response: The suggestion that a claimant who receives an accelerated payment before liquidation need not repay it until the adverse action which makes that accelerated payment erroneous would be acceptable if the bond required the recipient to repay the principal sum with interest running from the date that Customs made the accelerated payment and until repaid. Since that process could take years, the bond amounts would have to be increased accordingly to protect the revenue. Accordingly, Customs concludes that the obligation to repay arises whenever an administrative action occurs which affects the NAFTA drawback claim.

Section 181.51(a)

Comment: Three commenters noted that certifying that an entry was not designated and paid on a prior drawback claim is unnecessary because a claimant that knowingly does this is guilty of fraud, and the Compliance Program and the civil penalties should offer sufficient protection against fraudulent claims.

Customs response: Customs believes that the regulation serves a useful purpose in reminding the claimant to exercise care to make certain that double claims are not made.

Section 181.51(b)

Comment: A commenter stated that the requirement for the claimant to state that no Certificate of Origin has been provided for the goods should be changed to a statement that no other "NAFTA" Certificate of Origin has been provided for the goods. This is because sometimes exporters may use Certificates of Origin for other purposes (for example, for enforcement of trade sanctions).

Customs response: The first sentence under § 181.51(b) refers to a Certificate of Origin "provided for under § 181.11(a)", and the second sentence refers to "any such" Certificate of Origin; as such the Certificate of Origin cannot be mistaken for any other certificate of origin that may apply to other laws. Therefore, use of "NAFTA" as suggested would be redundant and thus inappropriate.

Comment: A commenter referred specifically to the requirement that the claimant provide notice of whether another person has prepared a NAFTA Certificate of Origin for those goods. This commenter stated that this is in conflict with the new regulation that the claimant provide an affidavit that no Certificate of Origin has been provided for those goods.

Customs response: Section 181.47(b)(2)(i)(F) requires a claimant to affirm that no NAFTA Certificate of Origin was provided "except as stated on the drawback claim". Section 181.51(b) supplements that provision and makes it clear that a claimant who provides a NAFTA Certificate of Origin must report that fact to Customs.

Comment: A commenter stated that new subsection (t) of 19 U.S.C. 1313 provides that "any person who issues a certificate which would enable another person to claim drawback shall be subject to the recordkeeping provisions of this chapter, with the retention period beginning on the date that such certificate is issued" and that the interim regulations are deficient in that they do not implement the language of this statutory provision. This commenter stated that subsection (t) would be helpful because it would establish a retention period beginning on the date the certificate was issued, instead of the date of payment.

Customs response: The NAFTA Certificate of Origin record retention period is set forth in § 181.12. *See* 19 U.S.C. 1508(c). The NAFTA Certificate of Origin is not a certificate that would enable another person to claim drawback. The certificates covered by 19 U.S.C. 1313(t) are the certificate of delivery and the certificate of manufacture and delivery.

Comment: A commenter stated that should this regulation remain as is, the 30-day window for filing the Certificate of Origin after filing the claim will create another administrative nightmare for Customs because all of the affidavits regarding Certificates issued (which may come in at various times after submission of the drawback entry) will have to be matched with previously filed drawback entries. This commenter stated that some adjustment should be made in the regulatory text to meet this problem.

Customs response: This comment is unclear because there is no "30-day window for filing the Certificate of Origin." There are, however, two 30-day windows established in this section which involve notifying Customs of the existence of a Certificate of Origin for goods on which drawback has been paid. These two notification periods are necessary because if a drawback claimant prepares a Certificate of Origin for its Canadian or Mexican customer, it could result in a reduction of duty paid to Canada or Mexico on the goods for which the claimant is basing its drawback claim. Therefore, it must be reported to Customs so that Customs will be able to track and adjust that drawback claim. A drawback claimant who makes a drawback claim and then provides a Certificate of Origin to its customer jeopardizes its drawback claim.

Section 181.52

Comment: Two commenters stated that this provision creates contingent liabilities on every claim filed that could go on for a significant amount of time and that, therefore, the time frames allowed under NAFTA Article 502(3) for duty refunds in Canada and Mexico should be clearly indicated. These two commenters also stated that Customs will not be able to comply with this requirement without automation, or without recording the Canadian or Mexican entry number at the time the drawback claim is filed. In this regard, they referred to language pertaining to Title VI of H.R. 3450 which states that monitoring of drawback information can only be carried out effectively through exchange of electronic information.

Customs response: The commenters are correct. The very nature of the Agreement creates that contingent liability because of the differences in national laws and the right of an importer to make a post-entry NAFTA claim that is expressly provided in the Agreement. The alternative that was considered by the three Governments was to prohibit all refunds on goods moving from one NAFTA party to another NAFTA party. Permitting limited refunds necessarily increases uncertainty.

Section 181.53

General comments: The following general comments were made with regard to the operation of this section:

1. A commenter requested that the effective dates of this section be stated at the beginning of the section.

2. One commenter stated that the regulations should address the importation of goods from NAFTA countries covered by U.S. duty deferral programs, even though there will be some duties which could be deferred under these programs until all of the staged duty reductions and eliminations under NAFTA have been completed. This commenter also asked, if a claim for preferential tariff treatment is filed upon importation, whether an importer may file a warehouse entry or application for admission to a foreign trade zone and, if the claim is valid, whether it will be honored upon warehouse withdrawal or foreign trade zone entry for consumption.

3. A commenter asked whether the "lesser of the two" method will apply when zero payment of duties is an issue.

4. A commenter stated that this section does not address originating goods which are entered into a bonded warehouse, manipulated to the point where they are deemed produced in the bonded warehouse, and subsequently withdrawn for consumption in the United States.

5. Three commenters stated that the 60-day allowance for obtaining proof of exportation and duty payment in Canada or Mexico should be extended to a longer period, and one of these commenters suggested a 120-day period.

Customs response: The effective dates are already stated at the beginning of Subpart E.

The comment dealing with imports from NAFTA countries is beyond the scope of Subpart E.

Zero payment of duty into Canada or Mexico will be considered in making the comparison. If no duty is paid into Canada or Mexico, there will be no duty refund or deferral. Under the agreement, Canada and Mexico are required to provide reciprocal treatment of goods sent to the United States.

The treatment of originating goods entered into a warehouse and withdrawn for consumption is beyond the scope of Subpart E.

The 60-day time period was set by Article 303(5) of the Agreement. Knowing of the time frame, there is no reason why the beneficiary of the refund cannot structure its transfer to ensure that it can comply with the time period.

Section 181.53(a)(1)

Comment: One commenter took issue with the definition of "duty deferral" provided in this section, stating that Class 2 and 3 customs bonded warehouses are excluded from this list, whereas their counterparts, "warehousing/distribution foreign-trade zones" are not excluded. This commenter stated that the initial sentence in § 181.53(e) provides a better definition of "a good that is manufactured or otherwise changed in condition in a foreign-trade zone * * *"

Customs response: The comment seems to state that a class 2/8 warehouse or a class 3/8 warehouse is excluded from coverage of § 181.53. Such warehouses are included under § 181.53(b).

Section 181.53(a)(2)

Comment: A commenter suggested adding to this section the following phrase: "except for a good eligible for full drawback as provided for by section 181.45 of this Subpart". In this regard, this commenter stated that NAFTA Article 303(6) provides for several import transactions that are unaffected by any limitations on drawback refunds or duty-deferral programs. This commenter also stated that § 181.45 captures these Article 303(6) transactions for drawback refund purposes. This commenter also stated that the regulations should clearly state that a good departing a foreign-trade zone for export to Mexico or Canada under circumstances included in Article 303(6) and/or § 181.45 shall not be subject to treatment "* * * as if it had been entered or withdrawn for domestic consumption, and thus subject to duty."

Customs response: Customs agrees that goods entitled to full drawback under § 181.45 should be excluded from this provision. Accordingly, § 181.53(a)(2), as set forth below, has been modified by the addition of the following sentence: "However, the provisions of this paragraph shall not apply to goods covered by § 181.45."

Comment: A commenter questioned the meaning of the phrase "treatment as withdrawn for consumption." This commenter stated that, from an operations standpoint in the case of merchandise shipments from foreign trade zones, a "pro-forma" Customs Form 3461 and/or Customs Form 7501 must be prepared. Since there is no legal provision for a pro-forma version of these two forms, this commenter stated that the exact methodology of how to do this should be provided in the regulations.

Customs response: With respect to the meaning of "treatment as withdrawn for consumption" the provision informs the person who withdraws that it will be liable for duties on a good withdrawn for exportation to Canada or Mexico unless it is exempted by the Agreement or statute. As regards documentation requirements, Customs agrees that the regulations should incorporate specific provisions setting forth the procedural (including documentary) requirements that would apply for purposes of § 181.53. However, Customs believes that it would be preferable to deal with this matter in a separate **Federal Register** document rather than include such provisions in this final rule document. Accordingly, Customs intends to publish in the near future a separate document amending § 181.53 to address these procedural issues with a view to having appropriate regulations in place on January 1, 1996, when the Subpart E provisions go into effect.

Section 181.53(a)(3)

Comment: A commenter posed several questions about the process of "waiver or reduction" as provided for in this section. Will a pro forma Customs entry be prepared and held or will it be filed in some manner with Customs? How will the structure of the paperwork be organized? Because merchandise that is the subject of the pro forma entry will also be the subject of a Customs Form 7512 and Customs Form 7525, how will the Census reporting structure be organized?

Customs response: The section sets the legal requirement for Customs to waive or reduce the duties paid or owed on goods sent to Canada or Mexico. As indicated in the response to the preceding comment, the documentary and other procedural aspects of § 181.53 will be addressed in a separate document.

Section 181.53(e)

General comments: The following general comments were made with regard to the operation of this section:

1. One commenter stated that, by requiring actual payment of duties to Mexico or Canada, these regulations defeat the purpose for which this 60-day hiatus was created for foreign trade zones. This purpose was to address the paperwork and procedural burden the proposed "NAFTA Drawback" would impose on Customs and on companies that use foreign trade zones and export to Canada and/or Mexico. This commenter saw the burden as follows:

Step One—Merchandise shipped from a zone to Mexico and/or Canada with an appropriate tariff payment to U.S. Customs.
Step Two—Merchandise arrives in Mexico or Canada with appropriate tariff payments made.
Step Three—The U.S. exporter files for NAFTA Drawback with the evidence of payment(s) made in Canada or Mexico.

This commenter went on to state that, originally, the 60-day hiatus was

SE
6
995
MI

expected to provide an opportunity to combine steps one and three but that, by requiring payments to be made, this section forces a return back to the three-step procedure. As it is, the potential for this situation already exists when a Mexican or Canadian importer decides to use a deferral program that extends his payment of duties owed beyond the 60-day schedule imposed on the U.S. exporter. The regulations and H.R. 3450 provide adequate anti-fraud provisions to protect against the opportunity for any abuses that the suggested modifications might otherwise provide. Moreover, § 181.52 provides for the adjustment of drawback payments pursuant to a NAFTA preference claim made subsequent to the payment of a NAFTA drawback refund. This commenter therefore suggested that in similar fashion such a protection could become part of the § 181.53(e) procedures so that evidence of duty paid could be based on the duty owed (but not yet paid) in Mexico or Canada.

2. The same commenter requested that the phrase "as calculated under paragraph (e)(1) or (e)(2)" in the introductory paragraph of this section be replaced by the phrase "as calculated consistent with the provisions of 19 CFR 146 Section 146.65".

3. Another commenter stated that this section does not take into account that the Customs modernization provisions of the Act allow for periodic entry procedures for goods transferred from foreign trade zones to be expanded to a monthly timeframe instead of submission of entry-by-entry paperwork.

4. Two commenters stated that the examples provided in this section are convoluted and should be replaced. One commenter suggested that the examples should set forth the following facts: The imported products HTSUS classification; the rate of duty in the United States and in Mexico or Canada; dutiable value; and total value. Moreover, it was suggested that there should also be an example illustrating NAFTA treatment for a good departing a foreign trade zone for Mexico or Canada that combines both privileged and non-privileged foreign components and/or materials.

5. A commenter pointed out that there is no provision for mixed status merchandise (privileged and nonprivileged). This commenter also stated that there is no provision for zone restricted status merchandise. Since no production can occur in zone restricted status, if storage distribution were not included in the special actions under § 181.53, new special provisions for this status would not be necessary but should be mentioned.

6. Two commenters stated that the provision under section 202(a)(2)(A) of H.R. 3450 should be included in this section or it will be misinterpreted. These commenters believed that it should be interpreted only to mean that a foreign trade zone cannot be used to create a NAFTA originating good qualifying for NAFTA duty reduction. On a related subject, another commenter stated that this section does not address goods which are processed but not produced in a foreign trade zone (processed with non-originating materials). This commenter asked whether privileged foreign status would be permitted to "lock in" NAFTA preferential tariff treatment.

7. A commenter requested further clarification of the valuation methodology included in this section. This commenter further believed that weight should not be a factor other than when it is a factor for HTSUS purposes and therefore suggested using the language "in its condition and HTSUS quantity."

8. A commenter asked what the date of exportation is for NAFTA purposes.

9. A commenter requested that a definition of "assessed" be provided.

10. A commenter believed that the requirement for proof of exportation in this section is an unnecessary paperwork burden and suggested that a summary procedure similar to the one used in drawback should be established.

Customs response: The requirement for the collection of duties is set forth in Article 303(5)(a) of the Agreement.

The inclusion of paragraphs (e)(1) and (2) facilitate having the zone withdrawal NAFTA requirements in one part.

Whether a good is removed under the current weekly entry procedure or some other periodic entry procedure will not change the concepts set forth in the provision.

Creating complex examples will tend to obscure the principles sought to be illustrated: That is, which duty amounts are to be compared? The use of oil is appropriate since the principle is illustrated when privileged foreign status is claimed. There is no need for a separate example of merchandise consisting of nonprivileged and privileged status merchandise since the principles set in both examples would apply to such merchandise.

Export to Canada or Mexico of zone restricted status merchandise will not require an entry for consumption. It will require the goods so exported to be treated as a withdrawal for consumption for the sole purpose of computing whether there should be a reduction or waiver of duty.

The comment on section 202(a)(2) of the Act is beyond the scope of Subpart E. It deals with goods that are entered for consumption from a zone.

With respect to the use of weight as part of the valuation methodology, Customs does not concur with the suggested change because the provisions of this section follow the provisions of the Foreign Trade Zones Act (*see* 19 U.S.C. 81c(a)).

In the case of a shipment from the United States to Canada or Mexico, the date of exportation would be the date on which the goods leave the United States with evidence that the person sending those goods to Canada or Mexico intends to join them to the commerce of Canada or Mexico (*see* 19 CFR 101.1(k)).

The common meaning of the term "assessed" applies. As such, there is no need to provide for a separate definition that repeats the common meaning.

With respect to the proof of export burden under NAFTA, the comment fails to recognize that unlike drawback for shipments to non-NAFTA countries, the basis for entitlement to a refund, waiver or reduction in duty there depends entirely on the article and the amount of duty paid to Canada or Mexico. Also, the comment confuses the distinction between one drawback claim which may involve many exportations of merchandise on which duty was previously paid and specific withdrawals on which potential duty liability starts when that merchandise is withdrawn from a zone.

Section 181.53(e)(1)

Comment: A commenter stated that there are imported goods in foreign trade zones destined for Canada and/or Mexico under zone restricted status (19 CFR 146.44). This commenter stated that a general exemption from 19 CFR 146.63(b) should be provided for these goods because, for these goods to be entered or withdrawn for domestic consumption from an FTZ, § 146.63(b) provides that merchandise in zone restricted status may be entered for consumption only when the Foreign Trade Zone Board has ruled that the merchandise can be entered for consumption. To require rulings on such a routine matter will impose an unnecessary procedural burden on the Foreign Trade Zone Board, zone users and on Customs.

Customs response: The issue of goods in a zone restricted status will be addressed in the separate document regarding § 181.53 procedures to be published in the near future as mentioned above.

Section 181.53(e)(2)

Comment: A commenter took issue with the implication of this section that payments may be refunded only up to the limits established by § 181.44. Specifically, this commenter stated that under these regulations the exporter is required to make payments to U.S. Customs that might otherwise be unnecessary or larger in amount than is legally required for reasons of failure to meet the 60-day deadline. There should be an explicit provision that provides for the refund of these unnecessary or excessive payments in whole or in part when the evidence required by § 181.53 becomes available.

Customs response: There is no allowance for a time extension or a reconsideration of the initial determination in the NAFTA legislation. As regards available remedies for any "unnecessary or excessive" payments referred to by this commenter, this issue will be addressed in the separate § 181.53 document to be published as mentioned above.

Comment: A commenter stated that the 60-day period should be defined on a business month basis, not on a daily basis.

Customs response: As previously stated, the 60-day period was set by the three Governments in the Agreement. The purpose of the 60-day requirement was to enable the refund claimant to provide the Canadian or Mexican entry information so that the appropriate duty comparison could be made.

Comment: A commenter pointed out that separately defining duty calculations when treating exports from foreign trade zones as domestic entries provides for many questions and potentially disparate procedures. To diminish the likelihood for both these questions and procedures, this commenter suggested that this section be amended to reflect current FTZ regulations that cover entries for consumption.

Customs response: These procedural issues will be addressed in the separate § 181.53 document to be published as mentioned above.

Comment: A commenter alleged that there is a conflict in this section in that the section states that duty is assessed on privileged foreign status goods at the time of admission to the zone but in the example refers to duty assessed one month after admission.

Customs response: The commenter is correct. Accordingly, § 181.53(e)(2), as set forth below, has been modified by replacing the words "at the time of its admission to" with the words "at the time privileged status is granted in".

Section 181.53(g)

Comment: A commenter stated that the recordkeeping period is unclear, and therefore this commenter assumed that the normal recordkeeping periods apply to drawback claims and to import entries. Two other commenters stated that the 3-year period for record retention should be stated to avoid confusion.

Customs response: Under 19 U.S.C. 1508(c) and the regulations thereunder, the periods for record retention vary according to the type of transaction involved. With respect to warehouse withdrawals, foreign trade zone entries, and temporary importation bond transactions, the period is five years from the date of entry. With respect to drawback, the period is three years from the payment of drawback to the claimant.

Section 181.53(i)

Comment: A commenter stated that if this section relates to waiver or reduction of duty under duty deferral programs, it is inappropriate to state that "* * * Customs shall reliquidate the NAFTA drawback claim" because that issue already is addressed in § 181.52.

Customs response: The reference in this section is necessary because, while § 181.52 is limited to traditional drawback, § 181.53 includes all of the other contexts which are included in the term "NAFTA drawback" as defined in § 181.1(o) of the regulations.

Section 181.54

Comment: A commenter stated that the open-ended time period for U.S. Customs to verify Canadian and Mexican documentation creates indefinite contingent liabilities. This commenter suggested that a definite time period should be clearly indicated.

Customs response: Because the national laws differ and because the Agreement expressly provides for post-entry claims to be filed up to one year after entry, it is impossible to fix one time limit that will cover all situations.

Appendix to Part 181

Additional comments were submitted regarding the relationship between the Subpart E provisions and the provisions of Schedule X of the Appendix to Part 181. Those comments are addressed below in connection with the discussion of the Appendix comments.

Part 181, Subpart G (Origin Verifications and Determinations)

Section 181.72

Comment: In order to enable sureties to better protect their interests, one commenter stated that the regulations should be modified to require Customs to provide notice to the surety: (1) When Customs commences an origin verification under paragraph (a) involving the bond principal's goods; (2) when Customs makes an inquiry of the importer under paragraph (c); and (3) whenever the foreign producer or exporter or the U.S. importer fails to cooperate during an origin verification.

Customs response: Requiring such notices to sureties would impose an unnecessary burden on Customs. Accordingly, this is a matter more appropriate for the surety and its principal to resolve in the context of their contractual relationship.

Section 181.75

Comment: One commenter stated that the regulations should be modified to require Customs to provide notice to a surety when a negative origin determination is issued to the surety's bond principal under paragraph (b).

Customs response: A negative determination of origin does not necessarily result in a bond breach. Consequently, no useful purpose under these regulations would be served by obligating Customs to provide such notice to the surety. This is a matter that is best left to the private parties to resolve as a part of their contractual relationship.

Part 181, Appendix (Rules of Origin Regulations)

Section 2

Comment: The following comments were submitted on the definitions and interpretation set forth in section 2:

1. With regard to the definition of "direct labor costs", one commenter noted that many companies include direct labor fringe benefits as part of their burden, not as part of their direct labor costs. Thus, it would be more correct to indicate that the defined term "may" include fringe benefits in costs that are associated with employees who are directly involved in the production of a good.

2. In the definition of "light-duty vehicle", a commenter stated that the second reference to "8702.10.60" should read "8702.90.60".

3. One commenter noted that the definitions and interpretation of "similar goods" and "similar materials" are important parts in determining

eligibility for averaging costs over time where goods are produced in the same facility. Given this purpose, this commenter argued that these definitions and interpretation are unduly restrictive because goods and materials should qualify as "similar" for purposes of averaging if they simply serve identical functions. For example, if both automatic and manual transmissions are otherwise eligible for averaging, the fact that these two transmissions may not meet the "similar characteristics and component materials" definitional standard should not disqualify them from averaging. To accomplish this result this commenter suggested (1) that the two definitions should be revised to encompass goods and materials that "although not alike in all respects, serve the same function" and (2) that the interpretation should be eliminated because it suggests that only identical goods or materials qualify as "similar".

Customs response: With regard to the first comment, the commenter is correct that some companies may include direct labor "fringe benefits" as part of their overhead. However, for purposes of allocating direct labor, the United States, Canada and Mexico agreed that the cost of fringe benefits for direct labor must be included in the "direct labor costs". Salaries and fringe benefits for other than direct labor employees may be included as overhead and would be allocated according to the methods for overhead in Schedule VII.

Customs agrees that the second reference to "8702.10.60" should read "8702.90.60" in the definition for "light-duty vehicle", and the definition, as set forth below, has been modified accordingly.

Customs disagrees with the statement that goods should be considered "similar" if they merely serve identical functions. Averaging in section 6(15) for regional value content purposes is allowed so that a producer would not have to segregate the value of its materials and its production costs when there is very little difference in the materials and the production costs that would be allocated to goods for which NAFTA preference is to be claimed and to goods which are to be consumed in a domestic or non-NAFTA market. The use of the term "similar" provides the necessary balance between the intended benefit and the need for assurance that the averaged costs will have a real relationship to the goods. For example, although an electric motor and a gasoline motor may serve the same function in a model toy, averaged costs for non-originating materials and for net costs for these two motors would not provide a meaningful measure of the regional value content for each type of motor. When this issue was discussed trilaterally, it was agreed that the current reference to "similar" should not be changed.

Section 4

Comment: With regard to section 4(4) which sets forth exceptions to the change in tariff classification requirement for originating goods, one commenter stated that subparagraph (b)(iii) should be removed because it imposes a further qualification that is not reflected in the NAFTA provisions as set forth in General Note 12(b)(iv)(B), HTSUS. Specifically, whereas the NAFTA text simply refers to a case where the undivided tariff headings or the tariff subheadings for the goods "provide for and specifically describe both the goods themselves and their parts", the Appendix text at issue adds a further requirement that the non-originating materials and the good "are not both classified as parts of goods under the heading or subheading" under consideration. This commenter suggested that this limiting Appendix text is not required by either the language or the purpose of the NAFTA provision and that the "specifically describe" language of the NAFTA text could reasonably apply where the tariff provision is a "parts" provision because the minimum regional value content requirement would still apply.

Customs response: Customs disagrees. Note 22 to the NAFTA clearly states that the phrase "specifically describes" in Article 401(d) was intended to exclude situations in which both the good and the non-originating material are classifiable as "parts" in the heading or subheading under consideration.

Section 6

Comment: The following comments were submitted on the regional value content provisions of section 6:

1. With regard to subsection (14) which concerns non-allowable interest costs, one commenter agreed that the "700 basis points" standard (above which interest would not be countable toward total cost) was appropriately high. However, this commenter stated that, by referring to the yield on debt obligations of comparable maturities issued by the federal government of "the country in which the producer is located", this provision could result in disparate treatment of similarly situated companies located in different NAFTA countries. In order to avoid the possibility that two companies with similar interest costs on a debt of the same denomination may face different interest caps because their production occurs in different NAFTA countries, this commenter stated that subsection (14) should be modified to reflect linkage of the interest rate on a debt to the interest rate on government debt obligations of the country that issues the debt, so that the amount of allowable interest costs would depend on the denomination of the debt rather than the location of the company.
2. One commenter pointed out that in subsection (18) the reference to the period chosen in "subsection (14)(a)" should properly refer to "subsection 15(a)".
3. With regard to the examples contained in subsection (20), a commenter stated that Example 9 would be more clear if it explained that the tooling expensed on the books of Producer A is considered as non-originating because the material that the tooling produced is non-originating.

Customs response: With regard to the first comment, Customs agrees that disparate treatment may arise because the interest caps in the NAFTA countries may be different. However, in order to provide certainty and stability in this area, the United States, Canada and Mexico agreed to apply the interest cap of the NAFTA country in which the producer is located.

Customs agrees that the reference to "subsection (14)(a)" should properly read "subsection (15)(a)" in subsection (18) which, as set forth below, has been modified accordingly.

Although Customs agrees that Example 9 in section 6(20) could be more illustrative by addressing the treatment of the cost of tooling as a "non-originating cost" because it is included in the cost of the non-originating material produced by the tooling, Customs also notes that this example was merely intended to illustrate how the cost must be captured and that it cannot be counted twice. This commenter's suggestion, however, has been incorporated as a new Example 8 which has been added to section 7(18) (renumbered from 7(17)) as set forth below.

Section 7

Comment: With regard to section 7(17), one commenter pointed out that in the first paragraph of Example 4 the reference to "Material A" should read "Material X".

Customs response: This typographical error was corrected in a document published in the **Federal Register** on March 31, 1994 (59 FR 15047).

Section 9

Comment: With regard to Example 6 under section 9(10), one commenter

noted that although the example states that the producer designates the short block as an intermediate material, the example does not explain why this designation is made or what its effect might be on the origin of the part or the traced value in the vehicle.

Customs response: The purpose of Example 6 in section 9(10) is to illustrate section 9(9)(a) which provides that the designation of a self-produced material as an intermediate material is only effective with regard to the calculation of the net cost of the light-duty automotive good and, therefore, does not permit the producer to ignore the value of the traced materials for purposes of the calculation of the value of non-originating materials in the light duty automotive good. Customs agrees that, in this case, it may be clearer to state that the intermediate material qualifies as an originating material. Accordingly, Example 6, as set forth below, has been modified as follows: (1) By adding a sentence immediately after the second sentence in the first paragraph to read "The intermediate material qualifies as an originating material"; and (2) by changing the last clause in the first sentence of the second paragraph to read "even though the intermediate material is an originating material."

Section 10

Comment: One commenter alleged that the language of section 10, and in particular the language of sections 10(1) and 10(2), is contrary to the wording of Article 403(2) of the NAFTA in that the Appendix language appears to require only tracing of the value of non-originating listed materials of the producer of the engine and transmission (the components), with two different results depending on the factual circumstances: (1) If the producer of the components is also the producer of the vehicle, then the tracing must be made through to the vehicle; or (2) if the producer of the components and vehicle are different, then the tracing stops at the production of the components. In other words, where the producer of the vehicle is not the producer of the component, that vehicle producer simply applies the normal rules of NAFTA Annex 401 to his product because he by definition does not "use" any material listed in NAFTA Annex 403(2) within the meaning of Article 403(2)(a) (it is the component producer who uses the listed material, that is, to produce the component, while the vehicle producer uses that component to produce the vehicle): thus, the component, not being a listed material, becomes the "other material" referred to in Article 403(2)(b) and is either originating or non-originating as far as calculation of the regional value content of the vehicle is concerned. This commenter, apparently concerned by the appearance of a narrower tracing rule under the Appendix text, stated that section 10 should be revised to reflect the correct, broader rule under the NAFTA text, that is, that the value of non-originating listed materials must be traced to the original-equipment engine and transmission and through them to the vehicle for purposes of calculating the regional value content of the vehicle.

In the event that the revision suggested above is not done, this commenter made the following additional recommendations regarding section 10:

1. As regards subsection (4) concerning the option of using the light-duty tracing rules for heavy-duty components, three suggestions were made. First, the materials covered by the subsection should be expanded to include listed materials and subcomponents. Second, if light-duty and heavy-duty vehicles are produced in the same plant, the producer should have the option of using the light-duty rules for calculating regional value content. Third, paragraph (b) should be removed because even if a producer knows the final use of the component, he should still have the option of using the light-duty rules.
2. As regards subsection (9)(c) which provides that section 10 does not apply to a subcomponent for purposes of calculating its regional value content before it is incorporated into a heavy-duty automotive good, this commenter questioned the authority for this subsection and stated that, if there is no authority for it, then Situation 1 of Example 6 under subsection (10) is incorrect. Furthermore, this commenter suggested that if there is authority for subsection (9)(c), then there is a basis for setting up separate manufacturing companies to convert non-originating cost to originating for determining the regional value content of a subcomponent that crosses a border, because the tracing requirement is eliminated.

Customs response: Customs disagrees with the commenter's conclusion that the text of section 10 does not reflect Article 403(2) of the NAFTA which requires that the value of a listed non-originating material be "traced" through to any heavy-duty automotive good in which it is used. The rules in section 10(1) are cumulative. If a producer of a heavy-duty automotive good "uses" a listed non-originating material, then paragraph (a), (b) or (c) would apply, depending, of course, on the specific facts. If a producer uses an automotive component assembly, automotive component or subcomponent, then paragraph (d) or (e) would apply, resulting in the "tracing" of either the values of all non-originating materials that were incorporated into that material acquired and used by the producer or the entire value of that material acquired and used by the producer. The structure of section 10(1) eliminates any doubt that, regardless of the stage in which a listed non-originating material is used, the value of that listed material must always be included in the value of non-originating materials when calculating the regional value content of any heavy-duty automotive good into which the listed material is subsequently incorporated.

Customs disagrees with this commenter's proposals for redrafting section 10(4) because the regulation reflects the relevent NAFTA provisions and the intent of the Parties. First, Article 403(2), which provides the rule for determining the value of non-originating materials in heavy-duty automotive goods, does not apply to listed materials or to subcomponents. Second, Article 403 is very clear in that it provides a specific rule for light-duty vehicles and a specific rule for heavy-duty vehicles. Third, with the exception of the situation in which averaging is permitted under Article 403(4) (see section 12 of the Appendix), Article 403(2) does not provide for the alternative use of the light-duty tracing rule for heavy-duty automotive components. In view of the fact that it may be impossible to identify interchangeable heavy-duty components and light-duty components that are produced in the same plant, the United States, Canada and Mexico agreed that the regulations should specifically address this situation.

With regard to the comment on section 10(9)(c) that there is no authority to exclude subcomponents from the regional value content calculation in section 10, Customs simply notes that the special rule set out in Article 403(2) of the NAFTA is for vehicles and components. Furthermore, the use of a listed non-originating material in the production of a subcomponent does not defeat the "tracing" requirement applicable to heavy-duty automotive goods. The regulations set out in section 10(1) make it clear that the value of a listed non-originating material will always be traced through to any heavy-duty automotive good into which it is incorporated. For example, section

10(1)(d) requires the "tracing" of a listed non-originating material even if it was used in the production of an originating subcomponent.

Section 13

Comment: The following comments were submitted on the special regional value-content requirements contained in section 13:

1. Two commenters referred to subsection (4) which concerns the averaging period for calculation of regional value content for vehicles of a new plant or a refit plant.

One of these commenters noted that paragraph (a)(i) would allow a producer to use launch and start-up cost for a period up to 23 months as originating content in computing the regional value content. This commenter suggested that the cost incurred from the first prototype date to the end of the fiscal year in which the first prototype was produced should be used for the regional value content calculation for the vehicles produced in the first fiscal year.

The second commenter concluded that subsection (4) allows a motor vehicle producer to elect one of the following three periods over which regional value content is calculated by averaging: (1) Paragraph (a)(i) allows averaging from the date of the production of a prototype through the end of the first fiscal year that begins after that date, thus allowing the producer to roll the first partial year into the first full fiscal year for averaging purposes; (2) paragraph (a)(ii) allows averaging over any fiscal year that begins after production of a prototype and ends before the end of the special regional value content period (the 5-year or 2-year period specified in section 13(2)); and (3) paragraph (a)(iii) allows averaging over part of a fiscal year up to the last day of that 5-year or 2-year special regional value content period. However, this commenter stated that the exact time periods covered by these three alternative averaging periods are not clear in the Appendix text as written. In addition, this commenter suggested that the end of an averaging period involving a special regional value content period should coincide with the end of the producer's fiscal year because significant accounting problems will arise if the averaging period cuts off before the fiscal year end. Thus, for example, a 5-year period under section 13(2) would allow averaging for full five fiscal years plus that portion of a year beginning with the date of production of the first qualifying prototype.

2. One commenter noted that subsection (5)(h) requires that the document in which the election to average is made must be filed at least 10 days before the first day of the producer's fiscal year, or such other shorter period that the concerned customs administration may accept. This commenter recommended that this provision be amended to specify "10 days before the shipment of the first vehicle intended for sale".

Customs response: Customs agrees that section 13(4)(a)(i) would permit a producer to average over a period of up to 23 months. In the interest of aligning the averaging period with the period for which the special RVC is effective for production from a new plant or a refit plant, it was considered to be more practical to combine the initial "stub" period with the first full fiscal year. Paragraphs (a)(ii) and (a)(iii) provide for the subsequent full fiscal years and for the final stub period, if any.

Concerning the second comment on section 13(4)(a), Customs first notes that the commenter has referred to subparagraphs (i), (ii) and (iii) as "alternative averaging periods". This is not correct. One, two or all three of these subparagraphs could apply in any given situation, depending on the length of the special RVC period and the relationship of the first year of that period to the beginning of the producer's fiscal year.

In response to the remainder of this commenter's remarks, Customs notes that under Article 403(6), the "years" in the periods for which a special RVC applies to vehicles of a new plant or vehicles of a refit plant are not necessarily coterminous with the fiscal year of a producer. Under Article 403(6) the "year" in the special RVC period begins when the first prototype motor vehicle is produced in the new or refit plant. Under Article 403(3), the "year" in the averaging period for the RVC calculation is the fiscal year of a producer. It was the intent of the drafters of the regulations to align the averaging period with the special RVC period in order to allow a producer to obtain the maximum benefit from the statutory 5-year or 2-year special RVC period. Customs has no authority to extend or reduce these NAFTA periods which are also reflected in section 202(c)(6) of the Act.

As regards the comment on section 13(5), Customs does not disagree entirely with the idea behind the commenter's proposal. Inasmuch as the first averaging period would not include the full fiscal year (if the first prototype of a motor vehicle is produced in a plant on a date after the beginning of the producer's fiscal year), it would appear reasonable to allow the producer to file at least 10 days before the beginning of the period which will constitute the first period in which the producer must average. However, the United States, Canada and Mexico agreed that the election should be filed at the same time that other elections to average under section 11 must be filed. The requirement does not impose an unnecessary hardship on a producer because the producer will have the requisite knowledge as to when such prototypes will be produced.

Section 15

Comment: One commenter made the following observations regarding section 15 which concerns the inability of a supplier, exporter or producer to provide sufficient information during a verification of the origin of a good:

1. Whereas section 15 sets forth alternative means to verify the origin or value of a material used in the production of a good when the person from whom the producer obtained the material is unable to provide sufficient verifying information, when a producer supplies verifying information the relevant customs administration should accept it. Moreover, the customs administration should have the obligation to explain in writing any refusal to accept the offered information supporting the origin of the material.

2. While section 15 properly provides that the customs administration shall take into consideration whether the customs administration of the importing country issued an advance ruling under Article 509 of the NAFTA which concluded that the material is an originating material, a provision should be added to authorize a "retroactive ruling" that a material is an originating material (for U.S. purposes, this could be done as a request for internal advice as provided for in Part 177 of the Customs Regulations). A producer often learns of a supplier's financial weakness in advance of problems that would make it impossible to obtain the information necessary to verify the origin of a material, and a "retroactive ruling" provision would allow the producer to obtain a ruling that would cover prior periods. The procedure for obtaining such a ruling should be consistent with the advance ruling provisions, except that the supplier of the material should provide exact historical data, including exporter's certificates of origin, rather than projected costs. Addition of a retroactive ruling provision would also reduce the need to rely on the other section 15

alternative means to verify the origin of a material.

Customs response: With regard to the first comment, Customs notes that subsection (1) of section 15 provides for factors to be considered by a customs administration where, during a verification of a good, a *producer of a material* is unable to supply sufficient verifying information for reasons beyond that person's control. The regulation thus contemplates the situation in which a verification requires information from the producer of the material, perhaps, for example, in the form of that person's books or records. It is unclear what the commenter's reference is to accepting the information offered. Of course, nothing in section 15 precludes the customs administration from considering information from the producer of the good or from any other source; rather, the section enumerates certain sources of information which may provide relevant information. Normally, of course, the verification process proceeds by seeking information from the producer of that good and, if necessary, from the producer of a material. If the customs administration is satisfied with respect to the origin of a material by virtue of information provided by the producer of the good, then presumably the situation identified in section 15 will not occur. The NAFTA countries did not perceive the need to provide for an obligation to accept proffered information or to explain any unwillingness to do so. Customs does not believe that any amendment in this regard is necessary or appropriate.

As regards the second comment, the commenter accurately observes that section 15(1)(a) provides that, among the factors to be considered, is whether an advance ruling under Article 509 of the NAFTA has been issued with respect to the material. The commenter appears to be seeking a separate procedure through which the producer of the good could obtain a decision with respect to the origin of a material which would presumably affect the origin determination with respect to the good. Such a procedure is intrinsic to the verification process. Thus, if the outcome of the verification depends on the origin of the material, it would be expected that the producer of the good would provide such information in its possession to demonstrate where the material originated. The customs adminstration would then apply the conclusion to the goods subject to the verification. Accordingly, it does not appear that there is any need for the regulations to be amended in order to meet the concern identified by the commenter.

Schedule III

Comment: One commenter stated that the valuation provisions of the interim regulations should be reviewed and revised to more accurately reflect the terms of General Note 12(c), HTSUS, which specifically refers to the legal standards set forth in section 402 of the Tariff Act of 1930, as amended (19 U.S.C. 1401a). This commenter cited the following specific examples in this regard:

1. Under section 3 of Schedule III, subsection (4) provides for the acceptance of transaction value between related parties when the producer demonstrates "that the transaction value of the good in that sale closely approximates a test value referred to in subsection (5)." However, the "test value" referred to in subsection (5) is limited to "the transaction value of identical goods or similar goods sold at or about the same time as the good being valued is sold to an unrelated buyer who is located in the territory of the NAFTA country in which the buyer is located." This commenter stated that this is much more limited than the comparable statutory provision (19 U.S.C. 1401a(b)(2)(B)) that applies under General Note 12(c), HTSUS, which includes other "test values" that can be used to demonstrate the acceptability of the transaction value between related parties.

2. Also under section 3 of Schedule III, subsection (8) appears to require that the "test value" has been "previously accepted by the customs administration". This commenter stated that this requirement is not contained in the U.S. valuation statute referred to in General Note 12(c), HTSUS.

Customs response: Schedules II, III and VIII of the Appendix to Part 181 of the interim NAFTA regulations were based on the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade (the "Customs Valuation Code," or "Code"), rather than on the U.S. valuation statute (19 U.S.C. 1401a), or the valuation statutes of Canada or Mexico. Since the Code is a neutral document common to all three NAFTA parties, it was therefore decided that the Code should form the basis of that part of the regulations that is concerned with how to determine regional value content under the transaction value method.

In regard to the specific points raised by the commenter, the test value referred to in Schedule III, section 3(5), is based on the transaction value of identical or similar goods since the purpose of the test value is to establish whether a transaction value between a related producer and seller, determined in accordance with Schedule II, is acceptable. Since transaction value is the only method of determining the value of a good under Schedule II, there is no justification for any alternative bases of determining test values as there is under the Code. Just as test values under the Code must be based on a value previously accepted by a customs administration, so too NAFTA requires that a test value shall have been previously accepted.

Schedule VII

Comment: The following comments were submitted in regard to the reasonable allocation of costs provisions contained in Schedule VII:

1. Two commenters referred specifically to sections 3(1)–(3) which concern methods used for internal management purposes by a producer of a good to reasonably allocate to that good direct material costs, direct labor costs or overhead.

One of these commenters noted that although the text in each case sets forth the criterion of "benefit, cause or ability to bear" for purposes of determining the reasonableness of the method used, the elements of this criterion are neither defined anywhere in the Appendix nor further explained in the examples under Schedule VII. This commenter suggested that: (1) This criterion should be eliminated, on the theory that a cost allocation method used for a (true) internal management purpose (that is, as stated in section 7 of Schedule VII, not solely for the purpose of qualifying a good as an originating good) should satisfy the reasonableness requirement; or (2) at the least, a definition or explanation of "benefit, cause or ability to bear" should be included in the final Appendix texts.

The second commenter expressed similar views and stated that the following interpretation of section 3 should be expressly affirmed in the final Appendix text: (1) That section 3 requires a customs administration to accept an allocation method that is used by the producer of a good for an internal management purpose, unless the allocation method is determined to be manifestly unreasonable; and (2) that a customs administration bears a heavy burden to disqualify any allocation method based on lack of relation to the criterion of benefit, cause or ability to bear because an allocation method that is used for internal management purposes is presumptively reasonable since a company is unlikely to rely on an allocation method for internal decision-making if it does not meet the benefit, cause or ability to bear criterion. Consistent with this interpretation, this commenter further suggested that section 3 should be revised to reflect a pure internal use test because the "reasonableness" requirement, based on the benefit, cause or ability to bear criterion, does not add meaningfully to the rule, injects an unnecessary degree of subjectivity into the cost allocation approval process, and is adequately provided for by the terms of section 7 of Schedule VII. Finally, this commenter recommended that, at a minimum, the following definitions be added to the Appendix to clarify the meaning of the "benefit, cause or ability to bear" criterion:

Benefit or benefits received: This criterion identifies the beneficiaries of the outputs of the cost pool and allocates the costs in proportion to the benefits received.

Cause or cause and effect: This criterion identifies the outputs of the cost pool (any grouping of individual costs) and allocates the costs in proportion to the services provided.

Ability to bear: This criterion advocates allocating costs in proportion to the cost objective's ability to bear.

2. With regard to section 6, one commenter stated that paragraph (d) should be eliminated so as to permit allocation of a gain or loss from the sale of a capital asset consistent with Generally Accepted Accounting Principles (GAAP) because, under GAAP, a gain or loss from the disposal of an asset constitutes a legitimate element of the total cost of the asset. Thus, a gain or loss on depreciation does not represent an extraordinary cost, and any write-off on sale or disposal of an asset should be reflected in total cost.

3. One commenter argued that section 7 should be eliminated for several reasons. First, section 7 is ambiguous when taken in context with section 4, which applies when an allocation method does not satisfy section 3 and which requires use of an allocation method that is reasonable based on the criterion of benefit, cause or ability to bear. The ambiguity exists because, if an internally used allocation method is deemed not to satisfy the reasonableness requirement in section 3 by virtue of the restriction in section 7, section 4 requires the producer of a good to use an alternative allocation method that does meet the benefit, cause or ability to bear reasonableness criterion. Given the rejection of the internally used allocation method under section 3, the only solution under section 4 is to use an allocation method that is solely for the purpose of qualifying a good as an originating good. This is precisely what section 7 is designed to prevent. Second, section 7 is unnecessary because, so long as an allocation method meets the reasonableness test under the benefit, cause or ability to bear criterion, the purpose of the allocation method is irrelevant. Finally, section 7 is redundant given the non-qualifying operations provision in section 17 of the Appendix as regards any production or pricing practice the object of which is to circumvent the Appendix. This commenter also suggested that if section 7 is to be retained, it should, at a minimum, provide specific and objective criteria for determining whether a cost allocation method is used solely to qualify a good as an originating good.

Customs response: Customs disagrees with the commenters' suggestions that the criteria of "benefit, cause or ability to bear" are not necessary in section 3, or, in the alternative, that the terms should be defined. The terms are recognized principles used in the cost accounting industry. They are broad principles that provide a measure by which Customs can determine the reasonableness of a cost allocation method for an internal management purpose. Customs does not dispute the fact that most producers, for one or more internal management purposes, are likely to rely on allocation methods that satisfy one of these criteria. The regulation, however, is intended to capture all situations and, therefore, must necessarily identify criteria against which the regulatory requirement is to be measured.

Concerning the comment on section 6(d), Customs agrees with the commenter's analysis of the treatment, for cost accounting purposes, of the gain or loss from the sale of a capital asset. However, in this case the Parties agreed that, for purposes of a "reasonable" allocation of costs in the calculation of total cost, such gains or losses are not reasonably allocated to a good.

The commenter's remarks concerning section 7 are understandable because the criteria of "benefit, cause or ability to bear" are used in both sections 3 and 4 to determine whether a cost allocation is reasonable. Nevertheless, Customs does not agree that section 7 should be eliminated. The structure of Schedule VII requires that, under section 3, an allocation method for an internal management purpose is to be used if it is a reasonable allocation. However, section 7 states that any allocation method for an internal management purpose will, on its face, not be accepted as "reasonable" if it is solely for the purpose of qualifying a good as an originating good. If costs are not reasonably allocated under section 3, then the producer is required to comply with section 4. Section 4 provides for the use of a method set out in the addenda to Schedule VII and/or any method based on one of the criteria of benefit, cause or ability to bear.

Schedule VIII

Comment: With regard to Schedule VIII (value of materials), one commenter raised an issue concerning section 3 which operates as an exception to the general rule that the transaction value of a material is unacceptable if, among other things, the producer and the seller are related persons and the relationship between them influenced the price actually paid or payable for the material. Referring specifically to the first sentence of subsection (7) which states that "[s]ubsection (4) provides an opportunity for the seller or the producer to demonstrate that the transaction value closely approximates a test value previously accepted by the customs administration of the NAFTA country in which the producer is located, and is therefore acceptable under subsection (1)", the commenter suggested the following interpretation thereof: the customs administration of the NAFTA country into which a good is imported is required to accept (and thus may not audit) the transaction value of a material used in the production of the good if the customs administration of the country into which the material was imported (and where the material was incorporated into the exported good) approved that transaction value during a valuation audit performed on the material when it was imported. This commenter stated that because section 3 is ambiguous, the provision should be clarified to reflect this interpretation. In addition, this commenter recommended that section 3 be modified to expressly state that the customs administration attempting to verify the value of a good that incorporates a material must accept any pre-approval or advance ruling concerning the value of the material by the customs administration of the country into which the material was first imported.

Customs response: For the purposes of Schedule VIII, unless otherwise stated, the term "customs administration" is defined as "the customs administration of the NAFTA country into whose territory the good, in the production of which the material being valued is used, is imported." Section 3 sets forth the basis for

determining whether the transaction value of a material determined under section 2(1) is acceptable. One basis under section 3 for validating a transaction value of a material is for a seller or producer to demonstrate to a customs administration (that is, a customs administration as defined above) that the transaction value determined in accordance with section 2(1) closely approximates a test value previously accepted by the customs administration of the NAFTA country in which the producer is located. Accordingly, the regulations permit the customs administration of one NAFTA country to accept the transaction value of a material if it closely approximates a test value determined by the customs administration of another NAFTA country. However, this must be demonstrated to the satisfaction of the customs administration (as defined for purposes of Schedule VIII), and there is no requirement that a customs administration must accept any test value put forward by a particular seller or producer.

Schedule X

Comment: The following comments were submitted regarding Schedule X, principally in the context of the drawback and duty-deferral program provisions of Subpart E of Part 181:

1. With respect to the commingling of fungible goods and the inventory methods that are allowable to determine the origin of materials, one commenter stated that Schedule X excludes identification procedures (inventory methods) that have been allowed in drawback such as "lower to higher", "higher to lower" and blanket identification. This commenter also stated that FIFO is administratively unworkable and economically unfeasible for most companies, in part because the association of entry numbers with imported part numbers which is needed under FIFO is too detailed. On this same subject, two commenters stated that Schedule X is unworkable and not consistent with the intent of Congress which, as stated in Ways and Means Report 103–361, was "* * * to provide sufficient flexibility in the inventory accounting methods for such goods to make them administratively workable for industry." Another commenter stated that the words "completely fungible" should be changed to "commercially interchangeable" because of the redefinition of the term "fungible" in the Customs modernization provisions of the Act.

2. Three commenters raised the issue of commingled fungible goods that are 100 percent imported, two of them stating that, in such a case, entries for goods (within the appropriate time period) may be designated under the inventory averaging procedure and that this is supported by the legislative history relating to the Customs modernization provisions of the Act. These commenters also stated that, in such circumstances, the "high-to-low" method or any other Customs approved accounting method may be used.

3. Another commenter stated that the Appendix should not be used for the purposes of determining inventory methods because the Appendix is generally for rules of origin purposes. This commenter also stated that the inventory methods used to support a same condition drawback claim should be set forth separately because Article 303 of the NAFTA is not subject to the uniform regulations requirement of Chapter 5 of the NAFTA.

4. Two commenters pointed out that Customs should give some thought to companies that must keep extremely detailed records such as those dealing in footwear, eye wear, finished clothing and other articles that are produced in a wide variety of styles, sizes and colors. This commenter stated that the requirements of Schedule X are so onerous that companies that produce or distribute these types of articles will not be able to export to Canada and Mexico for lack of ability to comply with these requirements. This commenter also suggested that Customs should address the area of former 19 U.S.C. 1313(j)(2) substitution drawback claimants in a NAFTA context. In this regard, the commenter stated that, assuming such claimants meet the requirements for drawback under 19 U.S.C. 1313(j)(1), Customs should recognize that they do not need to resubmit any applications for purposes of obtaining drawback under 19 U.S.C. 1313(j)(1) in a NAFTA context but rather would simply file the claims in accordance with the applicable regulations. This commenter, after stating that Customs officials from the Office of Trade Operations have indicated that the Schedule X inventory procedures will be applied to all 19 U.S.C. 1313(j)(1) drawback claims, expressed the view that Schedule X should apply only in the context of Part 181.

5. A commenter pointed out that §§ 191.141(e) and 191.22, taken together, also provide for storage and identification methods and provide more options for approved accounting methods than Schedule X does. For example, these sections allow use of "high-to-low", but Schedule X does not. This commenter therefore suggested that the provisions of § 191.22 should be used instead of Schedule X.

6. Two commenters stated that the inventory methods authorized for foreign trade zone procedures (§ 146.23) should be included in Schedule X in order to avoid the need for multiple inventory systems as the price for using both trade programs. These commenters cited, as an example that these two provisions are not in agreement (at least with respect to terminology), the fact that Schedule X calls for a specific identification method whereas § 146.23 requires a unique identification number. If these two requirements are the same, these commenters suggested that the regulatory text should state that this is the case.

7. Another commenter asked whether LIFO and average methods are acceptable for drawback and, if so, whether they can be used on exports to non-NAFTA countries. If not, this commenter asked whether claimants must switch to FIFO or maintain different accounting methods for the same goods.

Customs response: These comments principally address an allegedly impractical and unworkable application of the inventory management methods of Schedule X as required under § 181.45(b)(2)(i). In sum, the commenters argue that the Customs-approved methods in §§ 191.121(e) and 191.22 (drawback) and in § 146.23 (foreign trade zones) of the Customs Regulations should be allowed in place of the methods set forth in Schedule X.

Customs disagrees with these comments to the extent that they propose an expansion of the allowable methods for determining which commingled goods are eligible for full drawback under § 181.45(b). Schedule X was promulgated under NAFTA Article 511 and applies, by operation of NAFTA Article 303(6)(b), to imported goods which have been commingled with fungible goods and which are exported to Canada or Mexico in the same condition as when imported into the United States.

Nevertheless, the number of comments submitted on this point suggests that the text of § 181.45(b)(2)(i) could be improved. Accordingly, § 181.45(b)(2)(i), as set forth below, has been modified to more clearly reflect the intended effect of Article 303(6)(b), that is, as a narrow exception to the broad operation of Article 303 which restricts drawback to the amount determined under the "lesser of" rule. Beginning in 1996 (for exports to Canada) and in 2001 (for exports to Mexico), same condition substitution drawback will be prohibited altogether. The only exceptions are for the goods described in Article 303(6). Thus, "same condition" drawback for imported goods commingled with fungible goods is allowed, but only to the extent that the identity of the imported goods is determined by use of one of the approved inventory management methods set forth in Schedule X.

Additional Changes to the Regulations

In addition to the changes to the interim regulatory texts discussed above, this document modifies the interim texts to set forth changes that are necessary (1) to reflect subsequent trilateral discussion and agreement regarding regulatory standards pursuant to Article 511 of the NAFTA or (2) based on an independent review of the interim texts within Customs. These changes are discussed below.

Changes Pursuant to Trilateral Discussions

Subsequent to the publication of the interim regulations in T.D. 94–1, and in keeping with the principle of ongoing cooperation in the implementation and administration of the NAFTA as provided for in Section F of Chapter Five of the NAFTA, representatives of the United States, Canada and Mexico held further meetings which resulted in agreement regarding (1) use of the definition of "conspicuous" as set forth in Annex 311 of the NAFTA, (2) the adoption of an additional standard covering denial of preferential tariff treatment based on a failure to provide certain documentation in transshipment cases, (3) the adoption of additional standards for origin verifications, (4) the adoption of additional standards to be applied with regard to requests for advance rulings under Article 509 of the NAFTA, and (5) the modification of the substantively verbatim texts implementing the rules of origin provisions of Chapter Four of the NAFTA. The agreed changes, as reflected in the final regulatory texts set forth in this document, are summarized below.

Definition of "Conspicuous"

During the trilateral discussions it was pointed out that the interim amendments to Part 134 did not set forth the definition of "conspicuous" contained in the country of origin marking provisions of Annex 311 of the NAFTA. Accordingly, § 134.1 has been modified, as set forth below, by the addition of that definition as a new paragraph (k). Customs believes that this definition is appropriate for both NAFTA and non-NAFTA contexts since the NAFTA definition reflects existing Customs practice and regulatory standards (see, for example, the last sentence of § 134.41(b)).

Failure to Provide Documents in Transshipment Cases

The new standard regarding shipping documents provides that preferential tariff treatment may be denied to an originating good if the good is shipped through or transshipped in a non-NAFTA country and the importer does not provide, upon request, copies of the customs control documents showing that the good remained under customs control while in that non-NAFTA country. Section 181.23, as set forth below, has been modified by the addition of a new paragraph (b) to reflect this new standard, and § 181.31 (regarding post-importation claims) and § 181.71 (regarding origin verifications), as set forth below, have been appropriately modified as a consequence of the adoption of this new standard.

Origin Verifications

The Parties agreed to a new standard for origin verifications that permits verification of the applicable rate of duty applied to an originating good in accordance with NAFTA Annex 302.2 and determination of whether a good is a qualifying good for purposes of NAFTA Annex 703.2. Accordingly, § 181.72 as set forth below has been modified by the addition of a new paragraph (a)(2) to reflect this standard.

In addition, the new standard for origin verifications provides that a questionnaire may be completed, at the option of the exporter or producer, either in the language of the importing country or in the language of the country in which the exporter or producer is located. Paragraph (a)(3)(ii) (paragraph (a)(2)(ii) in the interim texts) of § 181.72, as set forth below, has been modified accordingly.

Requests for Advance Rulings

The new trilaterally-agreed standards regarding advance ruling requests concern the information required to be submitted with the request and therefore only affect § 181.93 of the interim regulations. The substantive changes reflected in § 181.93, as set forth below, are as follows:

1. In paragraph (b)(1), which concerns general information to be included in the request, the following requirements have been added: identification of the specific subject matter of the request; inclusion of a statement regarding the accuracy and completeness of the information submitted; inclusion of the name and address of the exporter and producer of the good where the importer is the requesting party; inclusion of the name and address of the producer and importer of the good where the exporter is the requesting party; inclusion of the name and address of the exporter and importer of the good where the producer is the requesting party; submission of copies of advance rulings or other rulings issued to the requesting party by Customs regarding the tariff classification of the good, if relevant to the issue in the advance ruling request; and, if no ruling on tariff classification was issued to the requesting party, sufficient information to enable Customs to classify the good if relevant to the issue in the advance ruling request.

2. Paragraph (b)(2)(ii), which concerns tariff change rulings, has been changed by designating the interim text as subparagraph (A) in order to facilitate the addition of a new subparagraph (B) setting forth information that must be in an advance ruling request which involves an origin issue requiring an assessment of whether materials undergo an applicable change in tariff classification.

3. In paragraph (b)(2)(iii), which concerns rulings on regional value content, the following changes have been made: in the first sentence, the words "or under both methods" have been added to reflect the fact that satisfaction of a regional value content requirement may involve use of both the transaction value method and the net cost method as well as the fact that a ruling on both issues may be sought; the second sentence, which sets forth the information to be submitted for purposes of the transaction value method, has been changed by inserting specific references to relevant provisions of the Appendix to Part 181, by adding a requirement for information sufficient to calculate the value of each material for which the origin is unknown and that is used in the production of the good, by adding a requirement for specific information regarding each material that is claimed to be an originating material and is used in the production of the good, and by adding a requirement specifying information to be submitted where the advance ruling request involves an issue as to whether the transaction value is acceptable with respect to the good; the third sentence, which sets forth the information to be submitted for purposes of the net cost method, has been changed by inserting specific references to relevant provisions of the Appendix to Part 181, by adding references to lists of all "product, period and other" costs and of all "excluded"

costs, by limiting the required materials value information to non-originating materials or materials for which the origin is unknown and that are used in the production of the good, and by requiring a statement regarding the period over which the net cost calculation is to be made; and a new sentence has been added at the end to limit the information required to be submitted where the advance ruling request concerns only the calculation of an element of a regional value content formula.

4. A new paragraph (b)(2)(iv), with the heading "NAFTA rulings on producer materials", has been added to specify information that must be submitted where the advance ruling request either involves an issue with respect to an intermediate material or is submitted by a Canadian or Mexican producer of a material and concerns only the origin of such material.

5. Paragraph (b)(5), which requires the submission of information regarding prior or current transactions, has been reconfigured to facilitate the addition of references to information regarding the following: judicial or quasi-judicial review in Canada or Mexico; a verification of origin performed in the United States, Canada or Mexico; an administrative appeal in the United States, Canada or Mexico; a request for an advance ruling in the United States, Canada or Mexico; and the status or disposition of any current or prior judicial or quasi-judicial review, verification of origin, administrative appeal, or advance ruling request.

Chapter Four Rules of Origin

With regard to the substantively verbatim regulatory texts covering the rules of origin provisions of Chapter Four of the NAFTA, which were set forth in the interim regulations in the Appendix to Part 181, the trilaterally-agreed changes thereto concern clarifications of ambiguous provisions, corrections in grammar or punctuation and, in certain cases, textual additions to remedy instances in which the original trilateral text was incomplete or the intent of the Parties was not adequately expressed. These changes, which are incorporated in the text of the Appendix to Part 181 as set forth below, are as follows:

Calculation of Total Cost

Calculation of total cost is required for purposes of the *de minimis* rule in section 5, the net cost method in section 6 and the valuation of intermediate materials in sections 7 and 10. However, references in the original trilateral texts to the calculation of total cost were incomplete in sections 5, 7 and 10. Therefore, in order to make it clear as to what costs are included in the "total cost" as that term is used in the trilateral texts, new subsection (6) has been added to section 2, new sections 5(10), 7(7) and 10(9)(f) have been added, and consequential changes have been made to the following provisions in sections 5, 6 and 7: sections 5(9) (a) and (b) (sections 5(8) (a) and (b) in the interim texts); section 6(12); and sections 7(6)(a) and (b).

Effect of Choice to Average

Throughout the trilateral texts there are references to "averaging" for purposes of determining the net cost of goods, the value of materials or the value of traced materials. Whenever a producer makes the choice to average, the period over which that producer averages cannot be changed, and the duration of the choice to average must extend to the end of the fiscal year of that producer. Although these requirements were implicit in the original trilateral texts, it became apparent that it was necessary to state them explicitly. Therefore, new subsections (7) through (10) have been added to section 2, and the following changes have been made to the related provisions in sections 6 and 12 and in Schedule X: revision of section 6(15)(a)(ii); addition of new sections 6(18) and 6(19) and redesignation of interim sections 6(18) and 6(19) as 6(20) and 6(21); in sections 12(5) (a) and (b), addition of the words "that is evenly divisible into the number of months of the producer's fiscal year remaining at the beginning of that period"; addition of new sections 12(6) through 12(9) and redesignation of interim sections 12(6) and 12(7) as 12(10) and 12(11); and revision of sections 3 and 12 of Schedule X.

Averaging For De Minimis and Accumulation

The original trilateral texts failed to provide specifically for the use of averaging in determining the value of the non-originating materials in subsections (1) and (5) of section 5 (*de minimis*), and in determining the net cost and value of non-originating materials in subsection (2) of section 14 (accumulation). To provide guidance on the use of averaging in situations involving *de minimis* or accumulation, new subsections (11) and (12) have been added to section 5 and new subsection (3) has been added to section 14. Consequential amendments, such as redesignation of subsections and internal references, have also been made.

Section 4

Section 7(10) provides for the situation in which a self-produced material may be designated as an intermediate material if it is used in the production of a good that is subject to a regional value content requirement. It was not clear under the original trilateral texts that a self-produced material, used in a good which is not subject to a regional value content requirement, could be considered as a material for purposes of the NAFTA rules of origin. Accordingly, a new subsection (8) has been added to section 4 in order to make it clear that a self-produced material may be considered as a material used in the production of a good even if the good is not subject to a regional value content requirement. Such a self-produced material must have either originating or non-originating status under the NAFTA rules of origin, and that status will influence the application of a particular NAFTA rule of origin to the good produced from that material. In addition, a new subsection (9) has been added to section 4 setting forth an example to illustrate such a situation.

Section 6

Article 403 of the NAFTA specifically provides a producer with the option to use an averaging method for calculating the net cost for automotive goods, and sections 11, 12 and 13 of the trilateral regulations implement the specific provisions of Article 403 for automotive goods. The NAFTA does not specifically provide for averaging with respect to any other goods. However, because it was recognized that in many situations non-automotive producers will have to use standard or projected costs to calculate the net cost and the value of non-originating materials in their goods, an averaging method was included in section 6(15) of the trilateral texts in order to permit, in a commercially practicable manner, averaging of the values required under the net cost method for non-automotive goods. The introductory text of section 6(15) as set forth in this document has been amended to more clearly state the intent of the Parties, that is, that the regional value content calculation for certain automotive goods may not be calculated by the "averaging" permitted under section 6(15). Although this exclusion of automotive goods from the application of section 6(15) appears to be a limitation, this is not the case. The category of goods for which averaging may be chosen under section 6(15) is restricted to goods which are "identical or similar" as defined in section 2, whereas the various categories of automotive goods for which averaging may be chosen under section 11, 12 or 13 are not so restricted. Thus, this amendment will provide greater textual clarity but will have minimal adverse effect on producers of automotive goods for which averaging may be chosen under section 11, 12 or 13.

Section 7

Under Article 402(9) of the NAFTA, the value of materials is either the transaction value (as defined in Article 415) or, if there is no transaction value or the transaction value is unacceptable, the value determined in accordance with the Articles 2 through 7 of the Customs Valuation Code. Section 7(1) and Schedule VIII of the trilateral regulations implement the NAFTA with respect to the valuation of materials. Section 7(1) states that, if the producer of the good is the importer of a material, the value of that material for NAFTA purposes is the customs value. However, "transaction value" or other value used as the basis for the customs value may not, in fact, reflect the transaction value "of the producer" or other applicable value as defined in the NAFTA. Section 7(2) as set forth in this document has been revised to make it clear that if the customs value for the materials referred to in section 7(1) was not determined in a manner consistent with Schedule VIII, then the customs value may not be used as the value of the material: in such a case the value of the material must be determined according to Schedule VIII. In addition, in order to illustrate this principle, a new Example 1 has been added in section 7(20) (section 7(17) in the interim texts) and interim Examples 1 through 6 have been renumbered as Examples 2 through 7. For the same reasons, similar references to the use of "customs value" as the value of a material have been clarified by revising sections 9(3) and 10(3) and section 1(2) of Schedule VIII.

Paragraph (b) of section 7(12) in the original trilateral texts (renumbered in this document as section 7(13)) could have been incorrectly interpreted as requiring that self-produced packaging materials or containers be valued under subparagraphs (i) or (ii). Under such an interpretation, the value of a self-produced material would always have to be treated as a non-originating value if the self-produced material were a non-originating material. However, under the NAFTA a producer is not required to treat a self-produced material as a material or to designate a self-produced material as an intermediate material. Therefore, this unnecessary and potentially confusing paragraph (b) has been removed. This change does not affect a producer's option to designate self-produced packaging materials as intermediate materials if it is in the producer's interest to do so, and this point has been clarified by the addition of a new section 7(14). Similarly, a new section 7(19) has been added to cover accessories, spare parts and tools that are self-produced. Consequential amendments have also been made by renumbering the subsections which follow these new provisions.

A new Example 8 has also been added to section 7(20) (section 7(17) in the interim texts) in order to illustrate the effects of section 7(1) and section 7(11) (section 7(10) in the interim texts) on a situation in which a producer of a good provides an indirect material, which is also an assist in this example, to a material producer for use in the production of a material that is subsequently used in the production of the good. If the indirect material is provided free of charge and the cost of the indirect material is not recorded on the books of that material producer, section 7(11) provides that the value of the indirect material is not included in the regional value content calculation under the net cost method for the material when determining whether or not the material is originating. However, if, as in this example, the indirect material is also an assist and the material that is made with benefit of the indirect material is subsequently used in the production of a good by the producer who supplied the indirect material, section 7(1) provides that the value of the indirect material (assist) is included in the value of that material (whether or not originating) when calculating the regional value content of the good.

Section 9

If a traced material has been incorporated into an originating material that is then acquired by the producer of a light duty automotive good, the value of that traced material may be determined by one of the methods set out in section 9(2)(e) or 9(2)(f) of the trilateral regulations. Paragraph (e) requires information on the actual value of a traced material. Paragraph (f) provides an alternative which will always result in a value that represents the maximum value of a traced material allowable in the originating acquired material.

In order to provide the supplier of an acquired material with an option to pass forward a value that is closer to the actual value of the traced material, but which does not require revealing the actual value as required in paragraph (e), it was determined that a third option should be allowed. Accordingly, a new paragraph (f) has been added to provide that the value of the traced material may be an amount that is based on the actual regional value content (RVC) of the acquired material (rather than the regional value content requirement, or RVCR), the amount being represented by the formula $VM \times (1 - RVC)$. As a consequence of the addition of this new paragraph (f), interim paragraphs (f) through (h) have been redesignated as (g) through (i), the internal cross-references in these paragraphs have been revised to reflect these changes, and, in section 9(10), Example 9 has been amended and Examples 12 and 13 have been added in order to reflect the new option for determining the value of a traced material which has been incorporated into an originating material acquired by a producer of a light duty automotive good.

Section 10

A new section 10(1)(d)(ii) has been added to provide, as in the case of new section 9(2)(f), for a third alternative method to determine the value of a listed non-originating material incorporated into an originating material that is acquired for use in the production of a heavy duty automotive good. Necessary consequential changes have also been made involving renumbering interim subparagraphs (ii) and (iii) as (iii) and (iv), changing the affected internal cross-references in the texts, and making changes in Examples 1, 2 and 4 under section 10(10) to reflect the new method.

A new text of Example 10 replaces the interim text in section 10(10) in order to illustrate the application of section 10(8) which allows the use of averaging under the principles of section 12(3) in order to determine the value of a non-originating material for purposes of the statement required in section 10(1)(b)(ii), section 10(1)(d)(i) or section 10(1)(e)(i). The value of a non-originating material, in such a case, would not be the value of the acquired material which is a listed non-originating material; it would be the value of the non-originating material incorporated into the listed non-originating material by the producer of that listed material.

Section 11

A new subsection (11) has been added to section 11 setting forth an Example to illustrate the options available under section 11(9)(b) in the event that a producer of a motor vehicle chooses to

average only those motor vehicles to be exported to the territory of only one NAFTA country or to the territories of more than one NAFTA country.

Section 12

Section 12(1) has been amended in order to remove an ambiguous reference to the averaging of the regional value content for automotive component assemblies, automotive components, sub-components or listed materials and thereby avoid any misunderstanding with respect to the goods that may be averaged together if produced in the same plant. Specifically, the words "any or all automotive component assemblies, automotive components, sub-components or listed materials" have been replaced by the words "an automotive component assembly, an automotive component, a subcomponent or a listed material". The text as amended more closely follows the language of NAFTA Article 403(4) (which refers to "a component" or "a listed material" of Annex 403.2) and thus makes it clear, for example, that engines and transmissions may not be grouped together for purposes of averaging regional value content.

Section 16

Section 16(1) has been revised in order to provide a clearer interpretation with respect to the nature of operations that, when performed on an originating good during transshipment through a non-NAFTA country, do not cause the good to lose its status as an originating good. The revised text in subsection (1)(a) further makes it clear that, except for goods covered by section 16(3), a good is considered *not* to be an originating good if it is removed from customs control when outside the territories of the NAFTA countries.

Schedule VII

The definition of "discontinued operations" in section 1 has been revised in both scope and meaning in order to link the term, when used with respect to a producer's operations that are located in a NAFTA country, to the meaning set out in that NAFTA country's Generally Accepted Accounting Principles. This maintains the consistent treatment given in the NAFTA to issues related to allocation of costs.

For similar reasons, the reference in section 6(c) to "cumulative effect of accounting changes" has been amended to reflect that such changes are those reported in accordance with a specific requirement of the applicable Generally Accepted Accounting Principles.

Schedule VIII

The texts of sections 10(1)(c) and 10(3) have been revised in order to resolve an ambiguity with respect to which word is modified by the phrase "in the country in which the material is produced". These changes reflect the understanding that the determination of the amount added for profit and general expenses depends on whether the material is imported by the producer or acquired from another person in the territory in which the producer is located. In both cases the amount added should be based on sales of materials of the same class or kind as that being valued. However, in regard to the former, the determination should be based on sales of such materials by producers located in the country in which the imported material was produced, whereas in the latter, the determination should be based on sales by producers located in the same country as the producer of the material being valued.

Schedule X

During the trilateral discussions, it was noted that the first table in Addendum A as set forth in the interim Appendix was incomplete in that the trilaterally-agreed table included a third column "Total Value" under the heading "Materials inventory sales (Receipts of material A)". Accordingly, the first table in Addendum A has been corrected to reflect the trilateral text.

Technical Amendments

Many additional amendments reflected in the texts set forth in this document concern simply technical changes relating to matters such as punctuation, cross references, typographical format and consequential renumbering of provisions. These changes are not intended to have any effect on the substance or content of the texts.

Section 181.131

In light of certain of the trilaterally-agreed changes to the Appendix texts as discussed above, the Parties also agreed that it would be necessary to have a rule covering the transition from the interim Appendix texts to the new Appendix texts in the case of producers for whom an averaging period started prior to, and would extend beyond, the agreed October 1, 1995, effective date of the new Appendix texts. Accordingly, § 181.131 as set forth below has been modified by designating the interim text as paragraph (a) and by adding new paragraphs (b) and (c) to reflect the agreed-upon transitional rules.

Other Changes

Based on further internal review of the interim regulatory texts, Customs has determined that the following additional changes thereto should be made.

Section 10.8(a)

The interim regulatory amendments in T.D. 94–1 included the addition of a new paragraph (a) to § 10.8 of the Customs Regulations (19 CFR 10.8) to clarify that the provisions of that section do not apply in the case of goods returned to the United States after exportation for repairs or alterations in Canada or Mexico, for which separate provisions were set forth in interim § 181.64. Subsequently, on May 17, 1994, Customs published in the **Federal Register** (59 FR 25563) as T.D. 94–47 a final rule document which included a complete revision of § 10.8. However, the text of this revised § 10.8 did not carry forward the substance of the interim NAFTA amendment. Accordingly, this document amends the introductory text of § 10.8(a) as published in T.D. 94–47 to incorporate the substance of that NAFTA provision.

Section 12.132

The interim regulatory amendments in T.D. 94–1 included the addition of a new § 12.132 to clarify the use of country of origin declarations, which were provided for in § 12.130(f) of the Customs Regulations (19 CFR 12.130(f)), in the case of textile and apparel goods which are subject to the provisions of Annex 300–B of the NAFTA. Subsequently, on June 20, 1994, Customs published in the **Federal Register** (59 FR 31519) as T.D. 94–52 an interim rule document which amended interim § 12.132 by adding thereto a new paragraph (b) requiring submission of a Certificate of Eligibility in connection with a claim for NAFTA preferential tariff treatment involving non-originating textile and apparel goods subject to the tariff preference level provisions of Appendix 6.B. to Annex 300–B of the NAFTA. In order to ensure that this document accurately reflects current regulatory requirements, the text of § 12.132 is republished below to incorporate the interim amendment effected by T.D. 94–52. Customs intends to publish a separate final rule document in the near future which will specifically address T.D. 94–52, including any public comments submitted in response thereto.

Section 181.22(a)

Interim § 181.22(a) provided that the importer must maintain documentation relating to an imported good for five years after the date of "importation" of the good. In order to reflect the requirements of U.S. law (19 U.S.C. 1508(c), as amended by section 614 of the Act), § 181.22(a) as set forth below has been modified to refer to five years after the date of "entry" of the good.

Section 181.22(b)(2)

In addition to the removal of the references to a "producer" as discussed above, § 181.22(b)(2), as set forth below, has been modified to refer to signature of the Certificate of Origin by the exporter's authorized agent "having knowledge of the relevant facts". Customs believes that this change is appropriate to ensure that the signature has substantive relevance that goes beyond that of a mere agency relationship.

Section 181.22(d)

The following changes have been made to § 181.22(d) which specifies circumstances in which a Certificate of Origin is not required:

1. For editorial and citation purposes, the text as set forth below has been rearranged and divided into paragraph (d)(1) (which sets forth the general rules for when a Certificate is not required) and paragraph (d)(2) (which covers the exception regarding a series of importations).
2. The introductory text of newly designated paragraph (d)(1) has been modified as set forth below by replacing the words "a Certificate of Origin shall not be required for" with the words "an importer shall not be required to have a Certificate of Origin in his possession". Customs believes that this change is necessary to clarify the intent which relates to the basic requirement for possession of a Certificate when a claim for preferential tariff treatment is made (see the last sentence of § 181.21(a)) rather than to the requirement for submission of the Certificate to Customs when requested under § 181.21(b).
3. In order to provide for proper notification and related procedural safeguards in a case where a Certificate is required because the importation is determined to be part of a series of importations that may reasonably be considered to have been undertaken or arranged for the purpose of avoiding a certification requirement, the text of newly designated paragraph (d)(2), as set forth below, has been modified (1) to require written notice to the importer that possession of a Certificate covering the importation at issue is required, (2) to allow the importer 30 calendar days to obtain a valid Certificate, and (3) to specify the consequence of a failure to timely obtain the Certificate (denial of the claim for preferential tariff treatment).

Section 181.41

In § 181.41, which prescribes the applicability of the Subpart E "NAFTA drawback" (as defined in § 181.1(o)) provisions, the first sentence has been changed as set forth below by the addition of a reference to "any good that is a 'good subject to NAFTA drawback' within the meaning of 19 U.S.C. 3333" in order to (1) incorporate by reference the terms of NAFTA Article 303(6) as implemented in U.S. law and (2) clarify that those NAFTA Article 303 and U.S. statutory standards are applicable under Subpart E both for drawback purposes and for purposes of the § 181.53 duty-deferral provisions. In addition, for similar clarification purposes, the first sentence of § 181.53(a)(2) as set forth below has been changed to refer to a "'good subject to NAFTA drawback' within the meaning of 19 U.S.C. 3333".

Section 181.44

In § 181.44, which specifies the circumstances in which drawback is calculated under the NAFTA "lesser of the two" rule, a new paragraph (g) has been added as set forth below to cover goods that are "unused" within the meaning of 19 U.S.C. 1313(j)(1) but have changed in condition after importation into the United States so as not to be eligible for full drawback under § 181.45(b).

Section 181.47

In order to facilitate Customs processing of NAFTA drawback claims, the following changes have been made to the text of interim § 181.47 which concerns the completion of claims for drawback under Subpart E: (1) In paragraph (a), language has been added at the end of the second sentence to provide that claims under Subpart E must be filed separately from non-NAFTA claims filed under Part 191; and (2) a sentence has been added at the end of paragraph (b)(1) to provide for inclusion of the word "NAFTA" at the top of each drawback entry form filed under Subpart E.

Section 181.50

In § 181.50, which concerns payment and liquidation of drawback claims, paragraph (b) as set forth below has been modified (1) to refer to when a drawback claim is to be liquidated (rather than when it becomes "final") and (2) by the addition of a sentence at the end to refer to adjustments of drawback claims under 19 U.S.C. 1508(b)(2)(B)(iii).

Section 181.62

With regard to interim § 181.62 which concerns duty-free treatment of commercial samples of negligible value imported from Canada or Mexico, Customs notes that paragraphs (b)(3) and (c) thereof, which specifically addressed textile samples, did not devolve from a specific statutory provision whereas the remainder of the section did reflect the terms of an underlying U.S. statutory provision (subheading 9811.00.60, HTSUS). Since implementation of the commercial sample provision in Article 306 of the NAFTA is a function of what is permissible or required under applicable U.S. law (in this case, subheading 9811.00.60, HTSUS), § 181.62 as set forth below has been modified by the removal of paragraphs (b)(3) and (c).

Section 181.63

Interim § 181.63, which concerned duty-free treatment of printed advertising materials imported from Canada or Mexico, reflected both the terms of Article 306 of the NAFTA and the definition of "printed advertising materials" in Article 318 of the NAFTA; thus, the regulatory text referred generically to "goods classified in Chapter 49, HTSUS", which chapter covers some goods for which duty-free treatment is not provided. Since U.S. duty treatment of goods covered by NAFTA Article 306 is controlled by the terms of the HTSUS, Customs has determined that § 181.63 serves no effective purpose and therefore should be removed and reserved until such time as appropriate changes are made to the HTSUS to reflect the terms of NAFTA Article 306.

Section 181.64(c)(1)(ii)

With regard to interim § 181.64 which concerns goods returned after repair or alteration in Canada or Mexico, Customs notes that paragraph (c)(1)(ii) thereof provides for a declaration by the owner, importer, consignee, or agent stating that, among other things, "the goods were not previously imported in bond or admitted into a foreign trade zone or imported in similar status". This statement was included in the declaration to address the exception for "goods subject to NAFTA drawback" in U.S. Note 1 to Subchapter II of Chapter 98, HTSUS. That note, which applies to the whole subchapter and thus pertains, *inter alia,* to all articles returned after repair or alteration abroad (including those goods repaired or altered in Canada or Mexico and covered by § 181.64), sets forth four circumstances in which articles may not be classified and thus receive the duty treatment prescribed in the subchapter (under subheading 9802.00.40 or 9802.00.50 in the case of repaired or altered goods). The note, which prior to the NAFTA did not contain the "NAFTA drawback" exception language, was intended to ensure that goods imported into the United States in certain circumstances in which duty is not paid or is later refunded (for example, duty-free under a temporary importation bond or with subsequent drawback of duties upon exportation), and which are subsequently exported (for example, for repair or alteration) and then returned, do not re-enter the commerce of the United States and again escape full duty assessment by virtue of their classification in a reduced-duty provision under Subchapter II. The exception in the note for "goods subject to NAFTA drawback" was added in connection with the adoption of the NAFTA in consideration of the fact that the NAFTA drawback and duty-deferral provisions (see Subpart E of Part 181 below) render the note unnecessary in a NAFTA context because assessment of duty is required prior to exportation to Canada or Mexico under the NAFTA drawback provisions (see the definition of "NAFTA drawback" in § 181.1(o) below).

On further review, Customs believes that the language in the declaration quoted above does not adequately address the basic issue under U.S. Note 1 to Subchapter II of Chapter 98, HTSUS, that is, whether the imported goods were subject to NAFTA drawback. In other words, if the goods were subject to NAFTA drawback, then none of the restrictions in the note would apply and the note would not be a bar to classification of the repaired or altered goods in the subchapter. On the other hand, if the goods were not subject to NAFTA drawback and one of the restrictions in the note applied to the goods, then the note would operate as a bar to classification of the repaired or altered goods in the subchapter. Accordingly, the declaration in § 181.64(c)(1)(ii), as set forth below, has been modified in this regard to more accurately reflect the minimum information that Customs must have to ensure compliance with the applicable statutory standard.

Section 181.72(a)(2)(i)

In order to provide necessary flexibility to Customs and at the same time reflect the method most often employed by Customs, § 181.72(a)(2)(i), which concerns origin verification letters, has been modified as set forth below to provide that the verification letter "may be on Customs Form 28 or other appropriate format".

Section 181.72(d)(2)(ii)

In § 181.72(d)(2)(ii) which concerns the consequences of a failure on the part of the exporter or producer of a good to respond to a follow-up verification letter or questionnaire, the introductory text has been modified as set forth below to provide that Customs may "consider the good to be non-originating and consequently may" deny preferential tariff treatment on the good. Customs believes that the reference to non-originating status in this context is necessary if the follow-up letter or questionnaire is to include the "written determination" (that is, a determination as to whether the good is an originating good) referred to in paragraphs (d)(1)(i) and (d)(2)(ii)(A).

Section 181.73(a)

Section 181.73(a), which requires written notification prior to conducting a verification visit in Canada or Mexico, has been modified as set forth below by removing from the first sentence the words ", including a follow-up to an earlier visit,". On further review, Customs has determined that this requirement is neither reflected in the text of the Agreement nor otherwise necessary since the procedural safeguards afforded by the notification requirement are covered by the notification given prior to the initial visit. Moreover, requiring written notification (and, thus, written consent under § 181.74) prior to each follow-up visit would impose an unreasonable administrative burden on Customs and could compromise the overall effectiveness of the verification visit process.

Section 181.75(a)(2)

Section 181.75(a)(2) requires that a written origin determination include a statement setting forth the findings of fact made in connection with the origin verification and upon which the origin determination is based. An exception has been added to this section as set forth below to cover the case of a negative origin determination where specific findings of fact cannot be made because of a failure to respond to a follow-up verification letter or questionnaire. Customs believes that this change is necessary because, under modified § 181.72(d)(2)(ii) as discussed above, the negative origin determination may result merely from a failure on the part of the exporter or producer of the good to respond to the follow-up letter or questionnaire.

Section 181.75(b)(2)(iv)

Section 181.75(b)(2)(iv) as set forth below has been modified by the addition of language at the end to cover cases where an exporter or producer would protest the negative origin determination itself rather than the liquidation of an entry (for example, where the importer's NAFTA claim was made in a protest rather than as part of the entry process).

Section 181.76(a)

Section 181.76(a) has been modified as set forth below to provide that an origin determination "may be applied" (rather than "shall be effective") upon issuance of the determination, and the provisions regarding the negative origin determination exception to this general rule have been set forth as a new paragraph (b). Customs believes that these editorial changes are necessary to align on terminology used elsewhere in § 181.76 and to reflect the fact that a Customs decision regarding a rate of duty takes effect only when actually applied to a transaction (that is, in connection with the liquidation of an entry).

Section 181.76(c)

In § 181.76(c) (§ 181.76(b) in the interim texts), which concerns the application of origin determinations where there is a pattern of conduct by an exporter or producer involving false or unsupported representations on Certificates of Origin that a good qualifies as an originating good, the first sentence as set forth below has been modified (1) to state that Customs may "deny subsequent claims for" (rather than "withhold") preferential tariff treatment and (2) by adding at the end the words ", provided that advance written notice of the intent to deny such claims is given to the importer." The first change is intended both to conform the text to the legal responsibility of Customs in connection with the entry and liquidation process and to reflect the intent of the underlying NAFTA provision which is prospective in nature. The second change is simply intended to ensure that the importer will receive appropriate notice of the intended action by Customs. In addition, as a consequence of the replacement of the word "withhold" in § 181.76(c), § 181.71 as set forth below has been modified by removing the words "or withhold" before the words "preferential tariff treatment".

Section 181.76(e)

In § 181.76(e) (§ 181.76(d) in the interim texts), which limits the application of negative origin determinations to prior importations in certain specified circumstances, the first sentence as set forth below has been modified by adding at the end the words "and on which that person did in fact rely." Customs believes that this change is necessary because the underlying NAFTA provision is founded on the principle of equitable relief based on detrimental reliance, and there can be no occasion for equitable relief if no reliance, and thus no detriment, has occurred.

Section 181.76(f)

Section 181.76(f) (§ 181.76(e) in the interim texts) has been modified as set forth below (1) by replacing "denies" with "proposes to deny", (2) by replacing "effective date of the denial" with "application of the determination", and (3) and by adding after "90 calendar days" the words "from the date of issuance of the determination". Customs believes that these changes are appropriate for purposes of precision as regards the procedures discussed in the section.

Section 181.81

Interim § 181.81 concerned the applicability of penalties to NAFTA transactions and consisted of a general statement (paragraph (a)) and a specific provision regarding false certifications by U.S. exporters or producers (paragraph (b)). On further review of this section, Customs believes that interim paragraph (b) is redundant and thus unnecessary because its purpose is already achieved by the general interim paragraph (a) statement. Accordingly, § 181.81 as set forth below has been modified to reflect only the text contained in interim paragraph (a).

Section 181.100(b)(3)

Section 181.100(b)(3) concerns the effective date for a modification or revocation of an advance ruling and provides for a delayed effective date of up to 90 days in some circumstances. In a case where the delay is requested by the party to whom the ruling letter was issued, the text, as set forth below, has been modified to refer to reliance "in good faith" rather than to reliance that is "reasonable". This change aligns the text on the standard set forth in Article 509(8) of the NAFTA.

Conclusion

Accordingly, based on the comments received and the analysis of those comments as set forth above, and based on the additional considerations discussed above, Customs believes that the interim regulations published in T.D. 94–1 should be adopted as a final rule with certain changes thereto as discussed above and as set forth below. Although this document sets forth the majority of the interim regulatory amendments adopted herein as a final rule and thus both republishes portions of the interim texts without change and amends other portions of the interim texts to incorporate the changes discussed above, it does not republish those unchanged interim amendments, involving the following provisions, which were set forth in T.D. 94–1 within an amendatory instruction rather than in full regulatory text format: §§ 10.36a, 10.66, 10.67, 134.1, 134.22, 134.23, 134.24, 134.32, 134.35, 134.43, 134.44, 174.12, 174.29, 177.0, and 177.1. This document also includes an appropriate update of the list of information collection approvals contained in § 178.2 of the Customs Regulations (19 CFR 178.2).

Inapplicability of Public Notice and Comment Procedures and Delayed Effective Date Requirements

Pursuant to the provisions of 5 U.S.C. 553(a), public notice and comment procedures are inapplicable to these final regulations because they are within the foreign affairs function of the United States. In addition, for the above reason and because the Parties have agreed to promulgate final NAFTA implementing regulations with effect from October 1, 1995, it is determined that good cause exists under the provisions of 5 U.S.C. 553(d)(3) for dispensing with a 30-day delayed effective date.

Executive Order 12866

Because this document involves a foreign affairs function of the United States and implements an international agreement, it is not subject to the provisions of E.O. 12866.

Regulatory Flexibility Act

Based on the supplementary information set forth above and because these regulations implement obligations of international agreements and statutory requirements relating thereto, pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) it is certified that the regulations will not have a significant economic impact on a substantial number of small entities. Accordingly, the regulations are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Paperwork Reduction Act

The collection of information requirements contained in these final regulations have been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507) under control number 1515–0205. The estimated average annual burden associated with this collection is 6.31 hours per respondent or recordkeeper. Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the U.S. Customs Service, Paperwork Management Branch, Room 6316, 1301 Constitution Avenue, NW., Washington, DC 20229, or the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Drafting Information

The principal author of this document was Francis W. Foote, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects

19 CFR Part 10

Alterations, Bonds, Customs duties and inspection, Exports, Imports, Preference programs, Repairs, Reporting and recordkeeping requirements, Trade agreements.

19 CFR Part 12

Canada, Customs duties and inspection, Marking, Mexico, Reporting and recordkeeping requirements, Textiles and textile products, Trade agreements.

19 CFR Part 24

Accounting, Canada, Customs duties and inspection, Financial and accounting procedures, Reporting and recordkeeping requirements, Trade agreements, User fees.

19 CFR Part 123

Canada, Customs duties and inspection, Imports, Mexico, Reporting and recordkeeping requirements, Trade agreements.

19 CFR Part 134

Canada, Country of origin, Customs duties and inspection, Labeling, Marking, Mexico, Packaging and containers, Trade agreements.

19 CFR Part 162

Administrative practice and procedure, Customs duties and inspection, Reporting and recordkeeping requirements, Trade agreements.

19 CFR Part 174

Administrative practice and procedure, Customs duties and inspection, Reporting and recordkeeping requirements, Trade agreements.

19 CFR Part 177

Administrative practice and procedure, Courts, Judicial proceedings, Rulings, Trade agreements.

19 CFR Part 178

Administrative practice and procedure, Exports, Imports, Reporting and recordkeeping requirements.

19 CFR Part 181

Administrative practice and procedure, Canada, Customs duties and inspection, Exports, Imports, Mexico, Reporting and recordkeeping requirements, Trade agreements (North American Free-Trade Agreement).

19 CFR Part 191

Canada, Commerce, Customs duties and inspection, Drawback, Mexico, Reporting and recordkeeping requirements, Trade agreements.

Amendments to the Regulations

Accordingly, the interim rule amending Parts 10, 12, 24, 123, 134, 162, 174, 177, 178 and 191 (19 CFR Parts 10, 12, 24, 123, 134, 162, 174, 177, 178 and 191) and adding Part 181, Customs Regulations (19 CFR Part 181), which was published at 58 FR 69460–69565 on December 30, 1993, and which was corrected at 59 FR 8852 on February 24, 1994, and at 59 FR 15047 on March 31, 1994, and the interim rule amending Part 12, Customs Regulations (19 CFR Part 12), which was published at 59 FR 31519–31521 on June 20, 1994, are adopted as a final rule with certain changes set forth below. The final texts, except for those amendments published in T.D. 94–1 which were set forth within an amendatory instruction rather than in full regulatory text format, are either republished below without change or are set forth below with the amendments discussed above under SUPPLEMENTARY INFORMATION.

PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

1. The general authority citation for part 10 is revised to read as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States), 1321, 1481, 1484, 1498, 1508, 1623, 1624, 3314;

* * * * *

2. Section 10.8 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 10.8 Articles exported for repairs or alterations.

(a) Except as otherwise provided for in this section and except in the case of goods covered by § 181.64 of this chapter, the following documents shall be filed in connection with the entry of articles which are returned after having been exported for repairs or alterations and which are claimed to be subject to duty only on the value of the repairs or alterations performed abroad under subheading 9802.00.40 or 9802.00.50, Harmonized Tariff Schedule of the United States (HTSUS):

* * * * *

3. The last sentence of § 10.31(f) is republished to read as follows:

§ 10.31 Entry; bond.

* * * * *

(f) * * * In addition, notwithstanding any other provision of this paragraph, in the case of professional equipment necessary for carrying out the business activity, trade or profession of a business person, equipment for the press or for sound or television broadcasting, cinematographic equipment, articles imported for sports purposes and articles intended for display or demonstration, if brought into the United States by a resident of Canada or Mexico and entered under Chapter 98, Subchapter XIII, HTSUS, no bond or other security shall be required if the entered article is a good originating in Canada or Mexico within the meaning of General Note 12, HTSUS.

* * * * *

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The authority citation for part 12 continues to read in part as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States (HTSUS)), 1624;

* * * * *

2. Section 12.132 is republished to read as follows:

§ 12.132 Textile and apparel goods under the North American Free Trade Agreement.

(a) *Country of origin declaration.* The provisions of § 12.130(f) of this part regarding submission of a country of origin declaration shall apply to all textile and apparel goods which are subject to the provisions of Annex 300–B of the North American Free Trade Agreement (NAFTA). Although a separate country of origin declaration shall not be required for such goods for NAFTA purposes, the following additional requirements shall apply for purposes of this section:

(1) All commercial importations of textile and apparel goods shall be accompanied by the appropriate declaration;

(2) A declaration by each U.S., Canadian, and/or Mexican manufacturer or producer of the goods, or by the exporter of the goods if a declaration cannot be obtained from the manufacturer or producer, and, if there are multiple manufacturers or producers, a separate declaration by each manufacturer, producer or exporter, shall be furnished by the importer. Packaging operations shall not be considered manufacture or production for purposes of this paragraph; and

(3) If the district director is unable to determine the country of origin of the goods because the information contained in a declaration is incomplete, the shipment to which that declaration pertains shall not be entitled to preferential tariff treatment or any other benefit under the NAFTA for which it would otherwise be eligible.

(b) *Certificate of Eligibility.* In connection with a claim for NAFTA preferential tariff treatment involving non-originating textile and apparel goods subject to the tariff preference level provisions of Appendix 6.B. to Annex 300–B of the NAFTA and Additional U.S. Notes 3 through 6 to Section XI, Harmonized Tariff Schedule of the United States, the importer shall submit to Customs a Certificate of Eligibility covering the goods. The Certificate of Eligibility shall be properly completed and signed by an authorized official of the Canadian or Mexican government and shall be presented to Customs at the time the claim for preferential tariff treatment is filed under § 181.21 of this chapter. Failure to timely submit the required Certificate of Eligibility will result in a denial of the claim.

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

1. The general authority citation for Part 24 is revised to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 58a–58c, 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States), 1624; 31 U.S.C. 9701.

* * * * *

2. In § 24.22, paragraph (g)(1), the introductory text of paragraph (g)(2)(i)(A), and paragraph (g)(2)(iv) are republished to read as follows:

§ 24.22 Fees for certain services.

* * * * *

(g) *Fee for arrival of passengers aboard commercial vessels and commercial aircraft.*

(1) *Fee.* Except as provided in paragraph (g)(2) of this section:

(i) For the period from January 1, 1994 through September 30, 1997, a fee of $6.50 shall be collected and remitted to Customs for services provided in connection with the arrival of each passenger aboard a commercial vessel or commercial aircraft from outside the customs territory of the United States; and

(ii) Commencing on October 1, 1997, a fee of $5 shall be collected and remitted to Customs for services provided in connection with the arrival of each passenger aboard a commercial vessel or commercial aircraft from a place outside the United States.

(2) * * *

(i)(A) Except during the period from January 1, 1994 through September 30, 1997, persons whose journey:

* * * * *

(iv) Except during the period from January 1, 1994 through September 30, 1997, persons departing from and returning to the United States without having touched a foreign port or place;

* * * * *

3. Section 24.23(c)(3) is republished to read as follows:

§ 24.23 Fees for processing merchandise.

* * * * *

(c) * * *

(3) The ad valorem, surcharge, and specific fees provided for under paragraphs (b)(1) and (b)(2)(i) of this section shall not apply either to goods originating in Canada within the meaning of General Note 9, HTSUS, or to goods originating in Canada within the meaning of General Note 12, HTSUS, where such goods qualify to be marked as goods of Canada pursuant to Annex 311 of the North American Free Trade Agreement and without regard to whether the goods are marked. Where originating goods as described in the preceding sentence are entered or released with other goods that are not originating goods, the ad valorem, surcharge, and specific fees shall apply only to those goods which are not originating goods.

* * * * *

PART 123—CUSTOMS RELATIONS WITH CANADA AND MEXICO

1. The authority citation for part 123 continues to read in part as follows:

Authority: 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States (HTSUS)), 1431, 1433, 1624.

* * * * *

2. The last sentence of § 123.0 is republished to read as follows:

§ 123.0 Scope.

* * * Regulations pertaining to the treatment of goods from Canada or Mexico under the North American Free Trade Agreement are contained in part 181 of this chapter.

PART 134—COUNTRY OF ORIGIN MARKING

1. The authority citation for part 134 is revised to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States), 1304, 1624.

2. The last sentence of § 134.0 is republished to read as follows:

§ 134.0 Scope.

* * * Provisions regarding the review and appeal rights of exporters and producers resulting from adverse North American Free Trade Agreement marking decisions are contained in subpart J of part 181 of this chapter.

3. In § 134.1, the last sentence of paragraph (d)(2) and paragraphs (g), (h), (i) and (j) are republished, and a new paragraph (k) is added, to read as follows:

§ 134.1 Definitions.

* * * * *

(d) * * *

(2) * * * With respect to a good of a NAFTA country, if the manufacturing process does not result in one of the changes prescribed in the NAFTA Marking Rules as effecting a change in the article's country of origin, the consumer who purchases the article after processing will be regarded as the ultimate purchaser.

* * * * *

(g) *Good of a NAFTA country.* A "good of a NAFTA country" is an article for which the country of origin is Canada, Mexico or the United States as determined under the NAFTA Marking Rules.

(h) *NAFTA.* "NAFTA" means the North American Free Trade Agreement entered into by the United States, Canada and Mexico on December 17, 1992.

(i) *NAFTA country.* "NAFTA country" means the territory of the United States, Canada or Mexico, as defined in Annex 201.1 of the NAFTA.

(j) *NAFTA Marking Rules.* The "NAFTA Marking Rules" are the rules promulgated for purposes of determining whether a good is a good of a NAFTA country.

(k) *Conspicuous.* "Conspicuous" means capable of being easily seen with normal handling of the article or container.

4. Section 134.22(d) is republished to read as follows:

§ 134.22 General rules for marking of containers or holders.

* * * * *

(d) *Usual containers*—(1) *"Usual container" defined.* For purposes of this subpart, a usual container means the container in which a good will ordinarily reach its ultimate purchaser. Containers which are not included in the price of the goods with which they are sold, or which impart the essential character to the whole, or which have significant uses, or lasting value independent of the contents, will generally not be regarded as usual containers. However, the fact that a container is sturdy and capable of repeated use with its contents does not preclude it from being considered a usual container so long as it is the type of container in which its contents are ordinarily sold. A usual container may be any type of container, including one which is specially shaped or fitted to contain a specific good or set of goods such as a camera case or an eyeglass case, or packing, storage and transportation materials.

(2) *A good of a NAFTA country which is a usual container.* A good of a NAFTA country which is a usual container, whether or not disposable and whether or not imported empty or filled, is not required to be marked with its own country of origin. If imported empty, the importer must be able to provide satisfactory evidence to Customs at the time of importation that it will be used only as a usual container (that it is to be filled with goods after importation and that such container is of a type in which these goods ordinarily reach the ultimate purchaser).

* * * * *

5. In § 134.32, paragraphs (p) and (q) are republished to read as follows:

§ 134.32 General exceptions to marking requirements.

* * * * *

(p) Goods of a NAFTA country which are original works of art; and

(q) Goods of a NAFTA country which are provided for in subheading 6904.10 or heading 8541 or 8542 of the Harmonized Tariff Schedule of the United States (HTSUS) (19 U.S.C. 1202).

* * * * *

6. Section 134.35(b) is republished to read as follows:

§ 134.35 Articles substantially changed by manufacture.

* * * * *

(b) *Goods of a NAFTA country.* A good of a NAFTA country which is to be processed in the United States in a manner that would result in the good becoming a good of the United States under the NAFTA Marking Rules is excepted from marking. Unless the good is processed by the importer or on its behalf, the outermost container of the good shall be marked in accord with this part.

7. Section 134.45(a) is republished to read as follows:

§ 134.45 Approved markings of country name.

(a) *Language.* (1) Except as otherwise provided in paragraph (a)(2) of this section, the markings required by this part shall include the full English name of the country of origin, unless another marking to indicate the English name of the country of origin is specifically authorized by the Commissioner of Customs. Notice of acceptable markings other than the full English name of the country of origin shall be published in the **Federal Register** and the Customs Bulletin.

(2) A good of a NAFTA country may be marked with the name of the country of origin in English, French or Spanish.

* * * * *

PART 162—RECORDKEEPING, INSPECTION, SEARCH, AND SEIZURE

1. The authority citation for part 162 continues to read in part as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1624.

* * * * *

2. The last sentence of § 162.0 is republished to read as follows:

§ 162.0 Scope.

* * * Additional provisions concerning records maintenance and examination applicable to U.S. importers, exporters and producers under the North American Free Trade Agreement are contained in part 181 of this chapter.

PART 174—PROTESTS

1. The authority citation for Part 174 continues to read as follows:

Authority: 19 U.S.C. 66, 1514, 1515, 1624.

2. The last sentence of § 174.0 is republished to read as follows:

§ 174.0 Scope.

* * * Provisions applicable to Canadian and Mexican exporters and producers regarding administrative review and appeal of adverse marking decisions under the North American Free Trade Agreement are contained in part 181 of this chapter.

3. Section 174.12(a)(5) is republished to read as follows:

§ 174.12 Filing of protests.

(a) * * *

(5) With respect to a determination of origin under subpart G of part 181 of this chapter, any exporter or producer of the merchandise subject to that determination, if the exporter or producer completed and signed a Certificate of Origin covering the merchandise as provided for in § 181.11(a) of this chapter; or

* * * * *

4. Section 174.12(e)(2) is revised to read as follows:

§ 174.12 Filing of protests.

* * * * *

(e) * * *

(2) The date of the decision, involving neither a liquidation nor reliquidation, as to which the protest is made (e.g., the date of an exaction, the date of written notice excluding merchandise from entry or delivery under any provision of the Customs laws, the date of a refusal to reliquidate under section 520(c)(1) of the Tariff Act of 1930, as amended, or the date of written notice of a denial of a claim filed under section 520(d) of the Tariff Act of 1930, as amended); or

* * * * *

15. Section 174.15 is republished to read as follows:

§ 174.15 Consolidation of protests filed by different parties.

(a) *General.* Subject to paragraph (b) of this section, separate protests relating to one category of merchandise covered by an entry shall be considered as a single protest whether filed as a single protest or filed as separate protests relating to the same category by one or more parties in interest or an authorized agent.

(b) *NAFTA transactions.* The following rules shall apply to a consolidation of multiple protests concerning a determination of origin under subpart G of part 181 of this chapter if one of the protests is filed by or on behalf of an exporter or producer described in § 174.12(a)(5) of this part:

(1) If consolidation under paragraph (a) of this section is pursuant to specific written requests for consolidation received from all interested parties who filed protests under this part, those interested parties shall be deemed to have waived their rights to confidentiality as regards business information within the meaning of § 181.121 of this chapter. In such cases, a separate notice of the decision will be issued to each interested party under this part but without regard to whether the notice reflects confidential business information obtained from one but not all of those interested parties.

(2) If consolidation under paragraph (a) of this section is done by the district director in the absence of specific written requests for consolidation from all interested parties who filed protests under this part, no waiver of confidentiality by those interested parties shall be deemed to have taken place. In such cases, a separate notice of the decision will be issued to each interested party and each such notice shall adhere to the principle of confidentiality set forth in § 181.121 of this chapter.

PART 178—APPROVAL OF INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for part 178 is revised to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 1624; 44 U.S.C. 3501 *et seq.*

2. Section 178.2 is amended by adding new listings to the table in numerical order to read as follows:

§ 178.2 Listing of OMB control numbers.

19 CFR section	Description	OMB control No.
	* * * * *	
§ 12.132	Country of origin declaration covering textile and apparel goods under the North American Free Trade Agreement.	1515–0205
	* * * * *	
§ 181.11	Certificate of Origin for purposes of the North American Free Trade Agreement	1515–0205
§§ 181.22 and 181.32	Claim for preferential tariff treatment under the North American Free Trade Agreement.	1515–0205
§§ 181.47 and 181.53	Claim for refund, waiver or reduction of duty under the drawback and duty deferral provisions of the North American Free Trade Agreement.	1515–0205
§ 181.64	Claim for duty-free or reduced-duty treatment on repaired or altered goods under the North American Free Trade Agreement.	1515–0205
§ 181.72	Submission of information in connection with origin verifications under the North American Free Trade Agreement.	1515–0205
§ 181.82	Statement accompanying corrected declaration or notification of incorrect certification under the North American Free Trade Agreement.	1515–0205

§§ 181.113, 181.115 and 181.116	Submission of information in connection with the review and appeal of adverse marking decisions under the North American Free Trade Agreement.	1515–0205
§ 181.131	Claim for preferential tariff treatment under the North American Free Trade Agreement.	1515–0205
	* * * * *	

1. Part 181 is revised to read as follows:

PART 181—NORTH AMERICAN FREE TRADE AGREEMENT

Sec.
181.0 Scope.

Subpart A—General Provisions

181.1 Definitions.

Subpart B—Export Requirements

181.11 Certificate of Origin.
181.12 Maintenance and availability of records.
181.13 Failure to comply with requirements.

Subpart C—Import Requirements

181.21 Filing of claim for preferential tariff treatment upon importation.
181.22 Maintenance of records and submission of Certificate by importer.
181.23 Effect of noncompliance; failure to provide documentation regarding transshipment.

Subpart D—Post-Importation Duty Refund Claims

181.31 Right to make post-importation claim and refund duties.
181.32 Filing procedures.
181.33 Customs processing procedures.

Subpart E—Restrictions on Drawback and Duty-Deferral Programs

181.41 Applicability.
181.42 Duties and fees not subject to drawback.
181.43 Eligible goods subject to drawback.
181.44 Calculation of drawback.
181.45 Goods eligible for full drawback.
181.46 Time and place for filing drawback claim.
181.47 Completion of claim for drawback.
181.48 Person entitled to receive drawback.
181.49 Retention of records.
181.50 Liquidation and payment of drawback claims.
181.51 Prevention of improper payment of claims.
181.52 Subsequent claims for preferential tariff treatment.
181.53 Waiver or reduction of duty under duty-deferral programs.
181.54 Verification of claim for drawback, waiver or reduction of duties.

Subpart F—Commercial Samples and Goods Returned After Repair or Alteration

181.61 Applicability.
181.62 Commercial samples of negligible value.
181.63 [Reserved]
181.64 Goods re-entered after repair or alteration in Canada or Mexico.

Subpart G—Origin Verifications and Determinations

181.71 Denial of preferential tariff treatment dependent on origin verification and determination.
181.72 Verification scope and method.
181.73 Notification of verification visit.
181.74 Verification visit procedures.
181.75 Issuance of origin determination.
181.76 Application of origin determinations.

Subpart H—Penalties

181.81 Applicability to NAFTA transactions.
181.82 Exceptions to application of penalties.

Subpart I—Advance Ruling Procedures

181.91 Applicability.
181.92 Definitions and general NAFTA advance ruling practice.
181.93 Submission of advance ruling requests.
181.94 Nonconforming requests for advance rulings.
181.95 Oral discussion of issues.
181.96 Change in status of transaction.
181.97 Withdrawal of NAFTA advance ruling requests.
181.98 Situations in which no NAFTA advance ruling may be issued.
181.99 Issuance of NAFTA advance rulings or other advice.
181.100 Effect of NAFTA advance ruling letters; modification and revocation.
181.101 Publication of decisions.
181.102 Administrative and judicial review of advance rulings.

Subpart J—Review and Appeal of Adverse Marking Decisions

181.111 Applicability.
181.112 Definitions.
181.113 Request for Basis of Adverse Marking Decision.
181.114 Customs response to request.
181.115 Intervention in importer's protest.
181.116 Petition regarding adverse marking decision.

Subpart K—Confidentiality of Business Information

181.121 Maintenance of confidentiality.
181.122 Disclosure to government authorities.

Subpart L—Rules of Origin

181.131 Rules of origin.

Appendix to Part 181—Rules of Origin Regulations

Authority: 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States), 1624, 3314.

§ 181.0 Scope.

This part implements the duty preference and related Customs

provisions applicable to imported goods under the North American Free Trade Agreement (the NAFTA) entered into on December 17, 1992, and under the North American Free Trade Agreement Implementation Act (107 Stat. 2057) (the Act). Except as otherwise specified in this part, the procedures and other requirements set forth in this part are in addition to the Customs procedures and requirements of general application contained elsewhere in this chapter. Additional provisions implementing certain aspects of the NAFTA and the Act are contained in parts 10, 12, 24, 134 and 174 of this chapter.

Subpart A—General Provisions

§ 181.1 Definitions.

As used in this part, the following terms shall have the meanings indicated unless either the context in which they are used requires a different meaning or a different definition is prescribed for a particular subpart, section or other portion of this part:

(a) *Canada. Canada,* when used in a geographical rather than governmental context, means the territory of Canada as defined in Annex 201.1 of the NAFTA.

(b) *Commercial importation. Commercial importation* means the importation of a good into the United States, Canada or Mexico for the purpose of sale, or any commercial, industrial or other like use.

(c) *Customs administration. Customs administration* means the competent authority that is responsible under the law of the United States, Canada or Mexico for the administration of its customs laws and regulations.

(d) *Customs duty. Customs duty* means any customs or import duty and a charge of any kind imposed in connection with the importation of a good, including any form of surtax or surcharge in connection with such importation, other than any:

(1) Charge equivalent to an internal tax imposed consistently with Article III:2 of the General Agreement on Tariffs and Trade, or any equivalent provision of a successor agreement to which the United States, Canada and Mexico are party, in respect of like, directly competitive or substitutable goods of the United States, Canada or Mexico, or in respect of goods from which the imported good has been manufactured or produced in whole or in part;

(2) Antidumping or countervailing duty that is applied pursuant to the domestic law of the United States, Canada or Mexico and that is not applied inconsistently with Chapter Nineteen of the NAFTA;

(3) Fee or other charge in connection with importation commensurate with the cost of services rendered;

(4) Premium offered or collected on an imported good arising out of any tendering system in respect of the administration of quantitative import restrictions, tariff rate quotas or tariff preference levels; and

(5) Fee applied pursuant to section 22 of the U.S. Agricultural Adjustment Act, subject to the provisions of Chapter Seven of the NAFTA.

(e) *Determination of origin. Determination of origin* means a determination as to whether a good qualifies as a good originating in the United States, Canada and/or Mexico under the rules set forth in General Note 12, HTSUS, and in the appendix to this part.

(f) *Exporter. Exporter* means an exporter located, and required under this part to maintain records regarding exportations of a good, in the United States, Canada or Mexico.

(g) *Generally Accepted Accounting Principles. Generally Accepted Accounting Principles* means the recognized consensus or substantial authoritative support in the United States, Canada or Mexico with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements. Generally Accepted Accounting Principles under this definition may encompass broad guidelines of general application as well as detailed standards, practices and procedures.

(h) *HTSUS. HTSUS* means the Harmonized Tariff Schedule of the United States.

(i) *Importer. Importer* means an importer located, and required under this part to maintain records regarding importations of a good, in the United States, Canada or Mexico.

(j) *Intermediate material. Intermediate material* means an "intermediate material" as defined in the appendix to this part.

(k) *Marking Rules. Marking Rules* means the "NAFTA Marking Rules" as defined in § 134.1(j) of this chapter.

(l) *Measure. Measure* means any law, regulation, procedure, requirement or practice.

(m) *Mexico. Mexico,* when used in a geographical rather than governmental context, means the territory of Mexico as defined in Annex 201.1 of the NAFTA.

(n) *NAFTA. NAFTA* means the North American Free Trade Agreement approved by the Congress under section 101(a) of the North American Free Trade Agreement Implementation Act (107 Stat. 2057).

(o) *NAFTA drawback. NAFTA drawback* means any drawback, waiver or reduction of U.S. customs duty provided for in subpart E of this part.

(p) *Net cost of a good. Net cost of a good* means the "net cost of a good" as defined in the appendix to this part.

(q) *Originating. Originating,* when used with regard to a good or a material, means a good or material which qualifies as originating in the United States, Canada and/or Mexico under the rules set forth in General Note 12, HTSUS, and in the appendix to this part.

(r) *Person. Person* means a natural person or an enterprise.

(s) *Preferential tariff treatment. Preferential tariff treatment* means the duty rate applicable to an originating good or to a good to which Appendix 6.B. to Annex 300–B of the NAFTA applies.

(t) *Producer. Producer* means a *producer* as defined in the appendix to this part.

(u) *Production. Production* means *production* as defined in the appendix to this part.

(v) *Transaction value. Transaction value* means transaction value as defined in the appendix to this part.

(w) *United States. United States,* when used in a geographical rather than governmental context, means the territory of the United States as defined in Annex 201.1 of the NAFTA.

(x) *Used. Used* means *used* as defined in the appendix to this part.

(y) *Value. Value* means the value of a good or material for purposes of calculating customs duties or for purposes of applying the provisions of the appendix to this part.

Subpart B—Export Requirements

§ 181.11 Certificate of Origin.

(a) *General.* A Certificate of Origin shall be employed to certify that a good being exported either from the United States into Canada or Mexico or from Canada or Mexico into the United States qualifies as an originating good for purposes of preferential tariff treatment under the NAFTA.

(b) *Preparation of Certificate in the United States.* An exporter in the United States who completes and signs a Certificate of Origin for the purpose set forth in paragraph (a) of this section shall use Customs Form 434 or such other medium or format as approved by the Canadian or Mexican customs administration for that purpose. Where the U.S. exporter is not the producer of the good, that exporter may complete and sign a Certificate on the basis of:

(1) Its knowledge of whether the good qualifies as an originating good;

(2) Its reasonable reliance on the producer's written representation that the good qualifies as an originating good; or

(3) A completed and signed Certificate for the good voluntarily provided to the exporter by the producer.

(c) *Submission of Certificate to Customs.* An exporter in the United States, and a producer in the United States who has voluntarily provided a copy of a Certificate of Origin to that exporter pursuant to paragraph (b)(3) of this section, shall provide a copy of the Certificate to Customs upon request.

(d) *Notification of errors in Certificate.* An exporter or producer in the United States who has completed and signed a Certificate of Origin, and who has reason to believe that the Certificate contains information that is not correct, shall within 30 calendar days after the date of discovery of the error notify in writing all persons to whom the Certificate was given by the exporter or producer of any change that could affect the accuracy or validity of the Certificate.

§ 181.12 Maintenance and availability of records.

(a) *Maintenance of records*—(1) *General.* An exporter or producer in the United States who completes and signs a Certificate of Origin shall maintain in the United States, for five years after the date on which the Certificate was signed, all records relating to the origin of a good for which preferential tariff treatment may be claimed in Canada or Mexico, including records associated with:

(i) The purchase of, cost of, value of, and payment for, the good that is exported from the United States;

(ii) The purchase of, cost of, value of, and payment for, all materials, including indirect materials, used in the production of the good that is exported from the United States; and

(iii) The production of the good in the form in which the good is exported from the United States.

(2) *Method of maintenance.* The records referred to in paragraph (a) of this section shall be maintained in accordance with the Generally Accepted Accounting Principles applied in the United States and may be maintained in hard-copy form, on microfilm or microfiche or in automated record storage devices (for example, magnetic discs and tapes) if associated computer programs are available to facilitate retrieval of the data in a usable form.

(b) *Availability of records*—(1) *To Customs.* For purposes of determining compliance with the provisions of this part, the records required to be maintained under this section shall be made available for examination and inspection by the port director or other appropriate Customs officer in the same manner as provided in § 162.1d of this chapter in the case of U.S. importer records.

(2) *To the Canadian or Mexican customs administration.* If a U.S. exporter or producer receives notification of, and consents to, an origin verification visit by the Canadian or Mexican customs administration under Article 506 of the NAFTA (see § 181.74(e) of this part), such consent shall constitute agreement by the U.S. exporter or producer to make available to an officer of that customs administration all records required to be maintained under this section and to provide facilities for the inspection thereof. If, during the course of an origin verification of a U.S. producer, the Canadian or Mexican customs administration finds that the U.S. producer has failed to maintain its records in accordance with the Generally Accepted Accounting Principles applied in the United States, that customs administration will so inform the U.S. producer in writing and will give the U.S. producer 60 calendar days to conform the records to those Principles. If a U.S. exporter or producer fails to maintain records or make records available to the Canadian or Mexican customs administration in accordance with the provisions of this section, or if a U.S. producer fails to conform its records to Generally Accepted Accounting Principles as provided in this paragraph, the Canadian or Mexican customs administration may deny preferential tariff treatment to the good that is the subject of the verification visit.

§ 181.13 Failure to comply with requirements.

The port director may apply such measures as the circumstances may warrant where an exporter or a producer in the United States fails to comply with any requirement of this part.

Subpart C—Import Requirements

§ 181.21 Filing of claim for preferential tariff treatment upon importation.

(a) *Declaration.* In connection with a claim for preferential tariff treatment for a good under the NAFTA, the U.S. importer shall make a written declaration that the good qualifies for such treatment. The written declaration may be made by including on the entry summary, or equivalent documentation, the symbol "CA" for a good of Canada, or the symbol "MX" for a good of Mexico, as a prefix to the subheading of the HTSUS under which each qualifying good is classified. Except as otherwise provided in § 181.22 of this part and except in the case of a good to which Appendix 6.B. to Annex 300–B of the NAFTA applies (see, however, § 12.132 of this chapter), the declaration shall be based on a complete and properly executed original Certificate of Origin, or copy thereof, which is in the possession of the importer and which covers the good being imported.

(b) *Corrected declaration.* If, after making the declaration required under paragraph (a) of this section or under § 181.32(b)(2) of this part, the U.S. importer has reason to believe that a Certificate of Origin on which a declaration was based contains information that is not correct, the importer shall within 30 calendar days after the date of discovery of the error make a corrected declaration and pay any duties that may be due. A corrected declaration shall be effected by submission of a letter or other written statement to the Customs office where the original declaration was filed.

§ 181.22 Maintenance of records and submission of Certificate by importer.

(a) *Maintenance of records.* Each importer claiming preferential tariff treatment for a good imported into the United States shall maintain in the United States, for five years after the date of entry of the good, all documentation relating to the importation of the good. Such documentation shall include a copy of the Certificate of Origin and any other relevant records as specified in § 162.1a(a) of this chapter.

(b) *Submission of Certificate.* An importer who claims preferential tariff treatment on a good under § 181.21 of this part shall provide, at the request of the port director, a copy of each Certificate of Origin pertaining to the good which is in the possession of the importer. A Certificate of Origin submitted to Customs under this paragraph or under § 181.32(b)(3) of this part:

(1) Shall be on Customs Form 434, including privately-printed copies thereof, or on such other form as approved by the Canadian or Mexican customs administration, or, as an alternative to Customs Form 434 or such other approved form, in an approved computerized format or such other medium or format as is approved by the Office of Field Operations, U.S. Customs Service, Washington, DC 20229. An alternative format must contain the same information and certification set forth on Customs Form 434;

(2) Shall be signed by the exporter or by the exporter's authorized agent having knowledge of the relevant facts;

(3) Shall be completed either in the English language or in the language of the country from which the good is exported. If the Certificate is completed in a language other than English, the importer shall also provide to the port director, upon request, a written English translation thereof;

(4) Shall be accepted by Customs for four years after the date on which the Certificate was signed by the exporter or producer; and

(5) May be applicable to:

(i) A single importation of a good into the United States, including a single shipment that results in the filing of one or more entries and a series of shipments that results in the filing of one entry; or

(ii) Multiple importations of identical goods into the United States that occur within a specified period, not exceeding 12 months, set out therein by the exporter or producer.

(c) *Acceptance of Certificate.* A Certificate of Origin shall be accepted by the port director as valid for the purpose set forth in § 181.11(a) of this part, provided that the Certificate is completed, signed and dated in accordance with the requirements of paragraph (b) of this section. If the port director determines that a Certificate is illegible or defective or has not been completed in accordance with paragraph (b) of this section, the importer shall be given a period of not less than five working days to submit a corrected Certificate. Acceptance of a Certificate will result in the granting of preferential tariff treatment to the imported good unless, in connection with an origin verification initiated under subpart G of this part or based on a pattern of conduct within the meaning of § 181.76(c) of this part, the port director determines that the imported good does not qualify as an originating good or should not be accorded such treatment for any other reason as specifically provided for elsewhere in this part. A Certificate shall not be accepted in connection with subsequent importations during a period referred to in paragraph (b)(5)(ii) of this section if, based on an origin verification under subpart G of this part, the port director determined that a previously imported identical good covered by the Certificate did not qualify as an originating good.

(d) *Certificate not required*—(1) *General.* Except as otherwise provided in paragraph (d)(2) of this section, an importer shall not be required to have a Certificate of Origin in his possession for:

(i) An importation of a good for which the port director has in writing waived the requirement for a Certificate of Origin because the port director is otherwise satisfied that the good qualifies for preferential tariff treatment under the NAFTA;

(ii) A non-commercial importation of a good; or

(iii) A commercial importation of a good whose value does not exceed US$2,500, provided that, unless waived by the port director, the producer, exporter, importer or authorized agent includes on, or attaches to, the invoice or other document accompanying the shipment the following signed statement:

> I hereby certify that the good covered by this shipment qualifies as an originating good for purposes of preferential tariff treatment under the NAFTA.
>
> Check One:
> ( ) Producer
> ( ) Exporter
> ( ) Importer
> ( ) Agent
>
> ____________________________
> Name
>
> ____________________________
> Title
>
> ____________________________
> Address
>
> ____________________________
> Signature and Date

(2) *Exception.* If the port director determines that an importation described in paragraph (d)(1) of this section forms part of a series of importations that may reasonably be considered to have been undertaken or arranged for the purpose of avoiding a certification requirement set forth in this part, the port director shall notify the importer in writing that for that importation the importer must have in his possession a valid Certificate of Origin to support the claim for preferential tariff treatment. The importer shall have 30 calendar days from the date of the written notice to obtain a valid Certificate, and a failure to timely obtain the Certificate will result in denial of the claim for preferential tariff treatment. For purposes of paragraph (d)(2) of this section, a "series of importations" means two or more entries covering goods arriving on the same day from the same exporter and consigned to the same person.

§ 181.23 Effect of noncompliance; failure to provide documentation regarding transshipment.

(a) *Effect of noncompliance.* If the importer fails to comply with any requirement under this part, including submission of a Certificate of Origin under § 181.22(b) or submission of a corrected Certificate under § 181.22(c), the port director may deny preferential tariff treatment to the imported good.

(b) *Failure to provide documentation regarding transshipment.* Where the requirements for preferential tariff treatment set forth elsewhere in this part are met, the port director nevertheless may deny preferential tariff treatment to an originating good if the good is shipped through or transshipped in a country other than the United States, Canada or Mexico and the importer of the good does not provide, at the request of the port director, copies of the customs control documents that indicate to the satisfaction of the port director that the good remained under customs control while in such other country.

Subpart D—Post-Importation Duty Refund Claims

§ 181.31 Right to make post-importation claim and refund duties.

Notwithstanding any other available remedy, including the right to amend an entry so long as liquidation of the entry has not become final, where a good would have qualified as an originating good when it was imported into the United States but no claim for preferential tariff treatment on that originating good was made at that time under § 181.21(a) of this part, the importer of that good may file a claim for a refund of any excess duties at any time within one year after the date of importation of the good in accordance with the procedures set forth in § 181.32 of this part. Subject to the provisions of § 181.23 of this part, Customs may refund any excess duties by liquidation or reliquidation of the entry covering the good in accordance with § 181.33(c) of this part.

§ 181.32 Filing procedures.

(a) *Place of filing.* A post-importation claim for a refund under § 181.31 of this part shall be filed with the director of the port at which the entry covering the good was filed.

(b) *Contents of claim.* A post-importation claim for a refund shall be filed by presentation of the following:

(1) A written declaration stating that the good qualified as an originating good at the time of importation and setting forth the number and date of the entry covering the good;

(2) Subject to § 181.22(d) of this part, a copy of each Certificate of Origin (see § 181.11 of this part) pertaining to the good;

(3) A written statement indicating whether or not the importer of the good provided a copy of the entry summary or equivalent documentation to any other person. If such documentation was so provided, the statement shall identify each recipient by name, Customs identification number and address and shall specify the date on which the documentation was provided;

(4) A written statement indicating whether or not the importer of the good is aware of any claim for refund, waiver or reduction of duties relating to the good within the meaning of Article 303 of the NAFTA (see subpart E of this part). If the importer is aware of any such claim, the statement shall identify each claim by number and date and shall identify the person who made the claim by name, Customs identification number and address; and

(5) A written statement indicating whether or not any person has filed a protest or a petition or request for reliquidation relating to the good under any provision of law, and if any such protest or petition or request for reliquidation has been filed, the statement shall identify the protest, petition or request by number and date.

§ 181.33 Customs processing procedures.

(a) *Status determination.* After receipt of a post-importation claim under § 181.32 of this part, the port director shall determine whether the entry covering the good has been liquidated and, if liquidation has taken place, whether the liquidation has become final.

(b) *Pending protest, petition or request for reliquidation or judicial review.* If the port director determines that any protest or any petition or request for reliquidation relating to the good has not been finally decided, the port director shall suspend action on the claim filed under this subpart until the decision on the protest, petition or request becomes final. If a summons involving the tariff classification or dutiability of the good is filed in the Court of International Trade, the port director shall suspend action on the claim filed under this subpart until judicial review has been completed.

(c) *Allowance of claim.*—(1) *Unliquidated entry.* If the port director determines that a claim for a refund filed under this subpart should be allowed and the entry covering the good has not been liquidated, the port director shall take into account the claim for refund under this subpart in connection with the liquidation of the entry.

(2) *Liquidated entry.* If the port director determines that a claim for a refund filed under this subpart should be allowed and the entry covering the good has been liquidated, whether or not the liquidation has become final, the entry must be reliquidated in order to effect a refund of duties pursuant to this subpart. If the entry is otherwise to be reliquidated based on administrative review of a protest or petition for reliquidation or as a result of judicial review, the port director shall reliquidate the entry taking into account the claim for refund under this subpart.

(3) *Information to be provided to Canada or Mexico.* If any information is provided to Customs pursuant to § 181.32(b) (4) or (5) of this part, that information, together with notice of the allowance of the claim and the amount of duty refunded pursuant to this subpart, shall be provided by the port director to the customs administration of the country from which the good was exported.

(d) *Denial of claim*—(1) *General.* The port director may deny a claim for a refund filed under this subpart if the claim was not filed timely, if the importer has not complied with the requirements of this subpart, if the Certificate of Origin submitted under § 181.32(b)(3) of this part cannot be accepted as valid (see § 181.22(c) of this part), or if, following initiation of an origin verification under § 181.72(a) of this part, the port director determines either that the imported good did not qualify as an originating good at the time of importation or that a basis exists upon which preferential tariff treatment may be denied under § 181.72(d), § 181.74(c) or § 181.76(c) of this part.

(2) *Unliquidated entry.* If the port director determines that a claim for a refund filed under this subpart should be denied and the entry covering the good has not been liquidated, the port director shall deny the claim in connection with the liquidation of the entry, and written notice of the denial and the reason therefor shall be given to the importer and, in the case of a denial on the merits, to any person who completed and signed a Certificate of Origin relating to the good. Each notice of denial given to a person who completed and signed a Certificate of Origin shall also include a statement regarding the right to file a protest against the denial under part 174 of this chapter.

(3) *Liquidated entry.* If the port director determines that a claim for a refund filed under this subpart should be denied and the entry covering the good has been liquidated, whether or not the liquidation has become final, the claim may be denied without reliquidation of the entry. If the entry is otherwise to be reliquidated based on administrative review of a protest or petition for reliquidation or as a result of judicial review, such reliquidation may include denial of the claim filed under this subpart. In either case, the port director shall give written notice of the denial and the reason therefor to the importer and, in the case of a denial on the merits, to any person who completed and signed a Certificate of Origin relating to the good. Each notice of denial given to a person who completed and signed a Certificate of Origin shall also include a statement regarding the right to file a protest against the denial under part 174 of this chapter.

Subpart E—Restrictions on Drawback and Duty-Deferral Programs

§ 181.41 Applicability.

This subpart sets forth the provisions regarding drawback claims and duty-deferral programs under Article 303 of the NAFTA and applies to any good that is a "good subject to NAFTA drawback" within the meaning of 19 U.S.C. 3333. Except in the case of § 181.42(d), the provisions of this subpart apply to goods which are imported into the United States and then subsequently exported from the United States to Canada on or after January 1, 1996, or to Mexico on or after January 1, 2001. The requirements and procedures set forth in this subpart for NAFTA drawback are in addition to the general definitions, requirements and procedures for all drawback claims set forth in part 191 of this chapter, unless otherwise specifically provided in this subpart. Also, the requirements and procedures set forth in this subpart for NAFTA duty-deferral programs are in addition to the requirements and procedures for manipulation, manufacturing and smelting and refining warehouses contained in part 19 and part 144 of this chapter, for foreign trade zones under part 146 of this chapter, and for temporary importations under bond contained in part 10 of this chapter.

§ 181.42 Duties and fees not subject to drawback.

The following duties or fees which may be applicable to a good entered for consumption in the Customs territory of the United States are not subject to drawback under this subpart:

(a) Antidumping and countervailing duties;

(b) A premium offered or collected on a good with respect to quantitative import restrictions, tariff rate quotas or tariff preference levels;

(c) Fees applied under section 22 of the U.S. Agricultural Adjustment Act; and

(d) Customs duties paid or owed under unused merchandise substitution drawback. There shall be no payment of such drawback under 19 U.S.C. 1313(j)(2) on goods exported to Canada or Mexico on or after January 1, 1994.

§ 181.43 Eligible goods subject to drawback.

Except as otherwise provided in this subpart, drawback is authorized for an imported good that is entered for consumption and is:

(a) Subsequently exported to Canada or Mexico (see 19 U.S.C. 1313(j)(1));

(b) Used as a material in the production of another good that is subsequently exported to Canada or Mexico (see 19 U.S.C. 1313(a)); or

(c) Substituted by a good of the same kind and quality as defined in § 181.44(c) of this subpart and used as a material in the production of another good that is subsequently exported to Canada or Mexico (see 19 U.S.C. 1313(b)).

§ 181.44 Calculation of drawback.

(a) *General.* Except in the case of goods specified in § 181.45 of this part, drawback of the duties previously paid upon importation of a good into the United States may be granted by the United States, upon presentation of a NAFTA drawback claim under this subpart, on the lower amount of:

(1) The total duties paid or owed on the good in the United States; or

(2) The total amount of duties paid on the exported good upon subsequent importation into Canada or Mexico.

(b) *Individual relative value and duty comparison principle.* For purposes of this section, relative value shall be determined, and the comparison between the duties referred to in paragraph (a)(1) of this section and the duties referred to in paragraph (a)(2) of this section shall be made, separately with reference to each individual exported good, including where two components or materials are used to produce one exported good or one component or material is divided among multiple exported goods.

Example. Upon importation of Chemical X into the United States, Company A entered Chemical X and paid $2.00 in duties. Company A processed Chemical X into Products Y and Z, each having the same relative value; that is, $1.00 in duty is attributable to Product Y and $1.00 in duty is attributable to Product Z. Company A exported Product Y to Canada and Canada assessed a free rate of duty. Company A exported Product Z to Mexico and Mexico assessed the equivalent of US$2.00 in duty. There is no entitlement to drawback on the export of Product Y to Canada because zero is the lesser amount when compared to the $1.00 in duty attributable to Product Y as a result of the separation of Chemical X into Products Y and Z. There would be entitlement to drawback on the export to Mexico, consisting of the $1.00 duty attributable to Product Z, because that amount is the lesser amount when comparing the duty paid to the United States and the US$ equivalent duty paid to Mexico.

(c) *Direct identification manufacturing drawback under 19 U.S.C. 1313(a).* Upon presentation of the NAFTA drawback claim under 19 U.S.C. 1313(a), in which the amount of drawback payable is based on the lesser amount of the customs duties paid on the good either to the United States or to Canada or Mexico, the amount of drawback refunded shall not exceed 99 percent of the duty paid on such imported merchandise into the United States.

Example 1. Upon the importation of Product X to the United States from Japan, Company A paid $2.00 in duties. Company A manufactured the imported Product X into Product Y, and subsequently exported it to Mexico. Mexico assessed the equivalent of US$11.00 in duties upon importation of Product Y. Upon presenting a drawback claim in the United States, in accordance with 19 U.S.C. 1313(a), Company A would be entitled to a refund of 99 percent of the $2.00, or $1.98. The $2.00 paid by Company A (less 1 percent) on the importation of Product X into the United States is a lesser amount of duties than the total amount of customs duties paid to Mexico (the equivalent of US$11.00) on Product Y.

Example 2. Upon the importation of Product X into the United States from Hong Kong, Company A entered Product X and paid $5.00 in duties. Company A manufactured Product X into Product Y, sold it to Company B in Mexico and subsequently exported it to Mexico. Company A reserved its right to drawback. Upon Product Y's importation, Company B was assessed a free rate of duty. Company A's claim for drawback will be denied because Company A is entitled to zero drawback for the reason that, as between the duty paid in the United States and the duty paid in Mexico, the duty in Mexico was zero.

(d) *Substitution manufacturing drawback under 19 U.S.C. 1313(b).* Upon presentation of a NAFTA drawback claim under 19 U.S.C. 1313(b), on which the amount of drawback payable is based on the lesser amount of the customs duties paid on the good either to the United States or to Canada or Mexico, the amount of drawback is the same as that which would have been allowed had the substituted merchandise used in manufacture been itself imported. For purposes of drawback under this subpart, the term "same kind and quality" used in § 1313(b) (see § 191.2(m) of this chapter) shall have the same meaning as the term "identical or similar good" used in Article 303 of the NAFTA except that there shall be no requirement that the good be manufactured in the same country.

Example 1. Upon importation of Product X from Japan to the United States, Company A paid $5.00 in duties. Company A substituted a same kind and quality domestic Product X for the Japanese Product X in its production of Product Y under its 19 U.S.C. 1313(b) drawback contract. Company A sold Product Y to Company B which subsequently exported it to Canada. On the importation of Product Y by Company B, Company B paid the equivalent of US$2.00 in duties assessed by Revenue Canada and waived its right to drawback to Company A. Company A is entitled to obtain drawback under 19 U.S.C. 1313(b) in the United States in the amount of $1.98 (or 99 percent of the US$2.00 equivalent Company B paid in duty to Canada) since that $2.00 was the lesser of the total amount of customs duties paid on the product to either Canada or the United States.

Example 2. Same facts as above example, but Company B paid the equivalent of US$5.00 to Revenue Canada. Company A is entitled to obtain $4.95 in drawback (a refund of 99 percent of $5.00 paid to the United States). Since the same amount of duty was assessed by each country, drawback is allowable because the drawback paid does not exceed the lesser amount paid.

(e) *Meats cured with imported salt.* Meats, whether packed or smoked, which have been cured with imported salt may be eligible for drawback in aggregate amounts of not less than $100 in duties paid on the imported salt upon exportation of the meats to Canada or Mexico (see 19 U.S.C. 1313(f)).

Example. Company Z produced Virginia smoked ham on its Smithfield, Virginia farm, using 4,000 pounds of imported salt in curing the meat. The salt was imported from an HTSUS Column 2 country, with a duty of $200. Upon exportation of the hams to Mexico, Company Z pays the equivalent of US$250.00 in duties to Mexico. Company Z is entitled to drawback of the full 100 percent of the $200.00 in duties it paid on the importation of the salt into the United States because that $200.00 is a lesser amount than the total amount of customs duties paid to Mexico on the exported meat.

(f) *Jet aircraft engines.* A foreign-built jet aircraft engine that has been overhauled, repaired, rebuilt, or reconditioned in the United States with the use of imported merchandise, including parts, may be eligible for drawback of duties paid on the imported merchandise in aggregate amounts of not less than $100 upon exportation of the engine to Canada or Mexico (19 U.S.C. 1313(h)).

Example. A Swedish-made jet aircraft engine is repaired in the United States using imported parts from Korea on which $160.00 in duties have been paid by Company W. The engine is subsequently exported to Canada by Company W and Company W pays the equivalent of US$260.00 in duties to Canada. Upon showing the country in which the engine was manufactured and a description of the processing performed thereon in the United States on Customs Form 7575–A, appropriately modified, Company W is entitled to the full refund of the duties paid to the United States since that $160.00 was a lesser amount than the duties paid on the engine to Canada.

(g) *Unused goods under 19 U.S.C. 1313(j)(1) that have changed in condition*. An imported good that is unused in the United States under 19 U.S.C. 1313(j)(1) and that is shipped to Canada or Mexico not in the same condition within the meaning of § 181.45(b)(1) may be eligible for drawback under this section, except when the shipment to Canada or Mexico does not constitute an exportation under 19 U.S.C. 1313(j)(4).

Example. Upon importation of Product X from Spain to the United States, the U.S. importer pays $10.00 in duties. While in the original package in the importer's warehouse, Product X becomes damaged. A Canadian purchaser buys Product X and imports it into Canada and pays the equivalent of US$5.00 in duties assessed by Revenue Canada. The Canadian purchaser who exported Product X from the United States to Canada and who otherwise qualifies for drawback is entitled to drawback under 19 U.S.C. 1313(j)(1) in the amount of $4.95 (99 percent of the US$5.00 equivalent in duties paid to Canada). Eligibility for full drawback of the $10.00 in U.S. duties under § 181.45(b) would be precluded because Product X, although unused, was not exported to Canada in the same condition as when imported into the United States within the meaning of § 181.45(b)(1).

§ 181.45 Goods eligible for full drawback.

(a) *Goods originating in Canada or Mexico*. A Canadian or Mexican originating good that is dutiable and is imported into the United States is eligible for drawback without regard to the limitation on drawback set forth in § 181.44 of this part if that originating good is:

(1) Subsequently exported to Canada or Mexico;

(2) Used as a material in the production of another good that is subsequently exported to Canada or Mexico; or

(3) Substituted by a good of the same kind and quality and used as a material in the production of another good that is subsequently exported to Canada or Mexico.

Example. Company A imports a dutiable (3 percent rate) Canadian originating good. During Company A's manufacturing process, Company A substitutes a German good of the same kind and quality (on which duty was paid at a 2.5 percent rate) in the production of another good that is subsequently exported to Canada. Company A may designate the dutiable Canadian entry and claim full drawback (99 percent) on the 3 percent duty paid under 19 U.S.C. 1313(b). (Note: NAFTA originating goods will continue to receive full drawback as they cross NAFTA borders for successive stages of production until NAFTA tariffs are fully phased out.)

(b) *Claims under 19 U.S.C 1313(j)(1) for goods in same condition*. A good imported into the United States and subsequently exported to Canada or Mexico in the same condition is eligible for drawback under 19 U.S.C. 1313(j)(1) without regard to the limitation on drawback set forth in § 181.44 of this part.

Example. X imports a desk into the United States from England and pays $25.00 in duty. X immediately exports the desk to Z in Mexico and Z pays the equivalent of US$10.00 in Mexican duties. X can obtain a refund of 99 percent of the $25.00 paid upon importation of the desk into the United States.

(1) *Same condition defined*. For purposes of this subpart, a reference to a good in the "same condition" includes a good that has been subjected to any of the following operations provided that no such operation materially alters the characteristics of the good:

(i) Mere dilution with water or another substance;

(ii) Cleaning, including removal of rust, grease, paint or other coatings;

(iii) Application of preservative, including lubricants, protective encapsulation, or preservation paint;

(iv) Trimming, filing, slitting or cutting;

(v) Putting up in measured doses, or packing, repacking, packaging or repackaging; or

(vi) Testing, marking, labelling, sorting or grading.

(2) *Commingling of fungible goods*—(i) *General*. Commingling of fungible goods in inventory, such as parts, is permissible (see § 191.141(e) of this chapter), provided that the entries for designation for same condition drawback are identified on the basis of an approved inventory method set forth in the appendix to this part.

(ii) *Exception*. Agricultural goods imported from Mexico may not be commingled with fungible agricultural goods in the United States for purposes of same condition drawback under this subpart.

(c) *Goods not conforming to sample or specifications or shipped without consent of consignee under 19 U.S.C. 1313(c)*. An imported good exported to Canada or Mexico by reason of failure of the good to conform to sample or specification or by reason of shipment of the good without the consent of the consignee is eligible for drawback under 19 U.S.C. 1313(c) without regard to the limitation on drawback set forth in § 181.44 of this part. Such a good must be returned to Customs custody for exportation under Customs supervision within three years after the release from Customs custody.

Example. X orders, after seeing a sample in the ABC Company's catalog, a certain quantity of 2-by-4 lumber from ABC Company located in Honduras. ABC Company, having run out of the specific lumber, ships instead a different kind of lumber. X rejects the lumber because it did not conform to the sample and is asked to send it to a customer of ABC in Canada. X exports it within 90 days of its release from Customs custody. X may recover 99 percent of the $500 duties it paid to U.S. Customs upon the exportation of the lumber, or $495.00.

(d) *Certain goods exported to Canada*. Goods identified in Annex 303.6 of the NAFTA and in sections 203(a) (7) and (8) of the North American Free Trade Agreement Implementation Act, if exported to Canada, are eligible for drawback without regard to the limitation on drawback set forth in § 181.44 of this part.

§ 181.46 Time and place for filing drawback claim.

(a) *Time of filing*. A drawback claim under this subpart shall be filed or applied for, as applicable, within 3 years after the date of exportation of the goods on which drawback is claimed. No extension will be granted unless it is established that a Customs officer was responsible for the untimely filing. Drawback shall be allowed only if the completed good is exported within 5 years after importation of the merchandise identified or designated to support the claim. A good subject to a claim for same condition drawback must be exported before the close of the 3-year period beginning on the date of importation of the good into the United States.

(b) *Place of filing*. A drawback claim must be filed at the port(s) where the manufacturing drawback contract is on file, whether a general rate or specific rate, but exportation need not occur from that port. To facilitate expedited processing of claims, claimants should file same condition drawback claims in the port where the examination would take place (see § 191.141(b)(3) (ii) and (iii) of this chapter). Customs must be notified at least 2 working days in advance of the intended date of

exportation in order to have the opportunity to examine the goods.

§ 181.47 Completion of claim for drawback.

(a) *General*. A claim for drawback shall be granted, upon the submission of appropriate documentation to substantiate compliance with the drawback laws and regulations of the United States, evidence of exportation to Canada or Mexico, and satisfactory evidence of the payment of duties to Canada or Mexico. Unless otherwise provided in this subpart, the documentation, filing procedures, time and place requirements and other applicable procedures required to determine whether a good qualifies for drawback shall be in accordance with the provisions of part 191 of this chapter; however, a drawback claim subject to the provisions of this subpart shall be filed separately from any part 191 drawback claim (that is, a claim that involves goods exported to countries other than Canada or Mexico). Claims inappropriately filed or otherwise not completed within the 3-year period specified in § 181.46 of this part shall be considered abandoned.

(b) *Complete drawback claim*—(1) *General*. A complete drawback claim under this subpart shall consist of the filing of the appropriate completed drawback entry form, evidence of exportation (a copy of the Canadian or Mexican customs entry showing the amount of duty paid to Canada or Mexico) and its supporting documents, certificate(s) of delivery, when necessary, or certificate(s) of manufacture and delivery, and a certification from the Canadian or Mexican importer as to the amount of duties paid. Each drawback entry form filed under this subpart shall be conspicuously marked at the top with the word "NAFTA".

(2) *Specific claims*. The following documentation, for the drawback claims specified below, must be submitted to Customs in order for a drawback claim to be processed under this subpart. Missing documentation or incorrect or incomplete information on required customs forms or supporting documentation will result in an incomplete drawback claim.

(i) *Manufacturing drawback claim*. The following shall be submitted in connection with a claim for direct identification manufacturing drawback or substitution manufacturing drawback:

(A) A completed Customs Form 331, to establish the manufacture of goods made with imported merchandise and, if applicable, the identity of substituted domestic, duty-paid or duty-free merchandise, and including the tariff classification number of the imported merchandise;

(B) Customs Form 7501 or the import entry number;

(C) Exporter's summary procedure, if applicable. For purposes of this subpart, the exporter's summary procedure must include the Canadian or Mexican customs entry number and the amount of duty paid to Canada or Mexico;

(D) Evidence of exportation and satisfactory evidence of the payment of duties in Canada or Mexico, as provided in paragraph (c) of this section;

(E) Waiver of right to drawback. If the person exporting to Canada or Mexico was not the importer or the manufacturer, written waivers executed by the importer or manufacturer and by any intervening person to whom the good was transferred shall be submitted in order for the claim to be considered complete; and

(F) An affidavit of the party claiming drawback stating that no other drawback claim has been made on the designated goods, that such party has not provided an exporter's Certificate of Origin pertaining to the exported goods to another party except as stated on the drawback claim, and that the party agrees to notify Customs if he subsequently provides such an exporter's Certificate of Origin to any person.

(ii) *Same condition drawback claim under 19 U.S.C. 1313(j)(1)*. The following shall be submitted in connection with a drawback claim covering a good in the same condition:

(A) A completed Customs Form 7539J. In addition, the tariff classification number of the imported goods shall be recorded on the form;

(B) Customs Form 7501. The form must show the entry number, date of entry, port of importation, date of importation, importing carrier, and importer of record or ultimate consignee name and Customs or taxpayer identification number. Explicit line item information shall be clearly noted on the Customs Form 7501 so that the subject goods are easily discernible;

(C) Customs Form 7505, if applicable, to trace the movement of the imported goods after importation;

(D) The certificate of delivery portion of Customs Form 331, if applicable, for purposes of tracing the transfer of ownership of the imported goods from the importer to the claimant. This is required if the drawback claimant is not the original importer of the merchandise which is the subject of a same condition claim;

(E) Customs Form 7512, if applicable. This is required for merchandise which is examined at one port but exported through border points outside of that port. Such goods must travel in bond from the location where they were examined to the point of the border crossing (exportation). If examination is waived, in-bond transportation is not required;

(F) Notification of intent to export or waiver of prior notice;

(G) Evidence of exportation. If a claimant is not approved for the exporter's summary procedure, either a certified Customs Form 7511 or an uncertified Customs Form 7511 supported by documentary evidence of exportation to Canada or Mexico such as a bill of lading, air waybill, freight waybill, export ocean bill of lading, Canadian customs manifest, cargo manifest, or certified copies thereof, issued by the exporting carrier, or any other evidence of exportation provided for in § 191.51 of this chapter. Supporting documentary evidence shall establish fully the time and fact of exportation, the identity of the exporter, and the identity and location of the ultimate consignee of the exported goods;

(H) Waiver of right to drawback. If the party exporting to Canada or Mexico was not the importer, a written waiver from the importer and from each intermediate person to whom the goods were transferred shall be required in order for the claim to be considered complete; and

(I) An affidavit of the party claiming drawback stating that no other drawback claim has been made on the designated goods.

(iii) *Nonconforming or improperly shipped goods drawback claim*. The following shall be submitted in the case of goods not conforming to sample or specifications or shipped without the consent of the consignee and subject to a drawback claim under 19 U.S.C. 1313(c):

(A) Customs Form 7539C, completed and submitted at the time the goods are returned to Customs custody;

(B) Customs Form 7501 to establish the fact of importation, the receipt of the imported goods and the identity of the party to whom drawback is payable (see § 181.48(c) of this part);

(C) Documentary evidence to support the claim that the goods did not conform to sample or specifications or were shipped without [illegible] consent of the consignee. In the [illegible] nonconforming goods, such documentation may include a copy of a purchase order and any related documents such as a specification sheet, catalogue or advertising brochure from the supplier, the basis for which the order was placed, and copy of a letter or telex or credit memo from the supplier indicating acceptance of the returned merchandise. This documentation is necessary to establish that the goods are, in fact, being returned to the party from which they were procured or that they are being sent to the supplier's other customer directly;

(D) Customs Form 7512, if applicable; and

(E) Evidence of exportation, as provided in paragraph (b)(2)(ii)(G) of this section.

(iv) *Meats cured with imported salt.* The provisions of paragraph (b)(2)(i) of this section relating to direct identification manufacturing drawback shall apply to claims for drawback on meats cured with imported salt filed under this subpart insofar as applicable to and not inconsistent with the provisions of this subpart, and the forms referred to in that paragraph shall be modified to show that the claim is being made for refund of duties paid on salt used in curing meats.

(v) *Jet aircraft engines.* The provisions of paragraph (b)(2)(i) of this section relating to direct identification manufacturing drawback shall apply to claims for drawback on foreign-built jet aircraft engines repaired or reconditioned in the United States filed under this subpart insofar as applicable to and not inconsistent with the provisions of this subpart and the provisions of subpart L of part 191 of this chapter.

(c) *Evidence of exportation and of duties paid in Canada or Mexico.* For purposes of this subpart, evidence of exportation and satisfactory evidence of payment of duties in Canada or Mexico shall consist of one of the following types of documentation, provided that, for purposes of evidence of duties paid, such documentation includes the import entry number, the date of importation, the tariff classification number, the rate of duty and the amount of duties paid:

(1) In the case of Canada, the Canadian entry document, referred to as the Canada Customs Invoice or B–3, presented with either the K–84 Statement or the Detailed Coding Statement. A Canadian customs document that is not accompanied by a valid receipt is not adequate evidence of exportation and payment of duty in Canada;

(2) In the case of Mexico, the Mexican entry document (the "pedimento");

(3) The final customs duty determination of Canada or Mexico, or a copy thereof, respecting the relevant entry; or

(4) An affidavit, from the person claiming drawback, which is based on information received from the importer of the good in Canada or Mexico.

§ 181.48 Person entitled to receive drawback.

(a) *Manufacturing drawback.* The person named as exporter on the notice of exportation or on the bill of lading, air waybill, freight waybill, Canadian or Mexican customs manifest, cargo manifest, or certified copies of these documents, shall be considered the exporter and entitled to manufacturing drawback, unless the manufacturer or producer shall reserve the right to claim drawback. The manufacturer or producer who reserves this right may claim drawback, and he shall receive payment upon production of satisfactory evidence that the reservation was made with the knowledge and consent of the exporter. Drawback also may be granted to the agent of the manufacturer, producer, or exporter, or to the person the manufacturer, producer, exporter, or agent directs in writing to receive the drawback of duties.

(b) *Nonconforming or improperly shipped goods drawback.* Only the importer of record or the actual owner of the merchandise or its agent may claim drawback under 19 U.S.C. 1313(c).

(c) *Same condition drawback.* The importer of record on the consumption entry is entitled to claim same condition drawback under 19 U.S.C. 1313(j)(1) unless he has in writing waived his right to claim drawback.

§ 181.49 Retention of records.

All records required to be kept by the exporter, importer, manufacturer or producer under this subpart with respect to manufacturing drawback claims, and all records kept by others which complement the records of the importer, exporter, manufacturer or producer (see § 191.5 of this chapter) shall be retained for at least three years after payment of such claims. However, any person who issues a drawback certificate that enables another person to make or perfect a drawback claim shall keep records in support of that certificate commencing on the date that the certificate is issued and shall retain those records for three years following the date of payment of the claim.

§ 181.50 Liquidation and payment of drawback claims.

(a) *General.* When the drawback claim has been fully completed by the filing of all required documents, and exportation of the articles has been established and the amount of duties paid to Canada or Mexico has been established, the entry will be liquidated to determine the proper amount of drawback due either in accordance with the limitation on drawback set forth in § 181.44 of this part or in accordance with the regular drawback calculation. The liquidation procedures of subpart G of part 191 of this chapter shall control for purposes of this subpart.

(b) *Time for liquidation.* A drawback claim shall not be liquidated until either a written waiver of the right to protest under 19 U.S.C. 1514 is filed with Customs or the liquidation of the import entry has become final under U.S. law. In addition, except in the case of goods covered by § 181.45 of this part, a drawback claim shall not be liquidated for a period of 3 years after the date of entry of the goods in Canada or Mexico. A drawback claim may be adjusted pursuant to 19 U.S.C. 1508(b)(2)(B)(iii) even after liquidation of the U.S. import entry has become final.

(c) *Accelerated payment.* Accelerated drawback payment procedures shall apply as set forth in § 191.72 of this chapter. However, a person who receives drawback of duties under this procedure shall repay the duties paid if a NAFTA drawback claim is adversely affected thereafter by administrative or court action.

§ 181.51 Prevention of improper payment of claims.

(a) *Double payment of claim.* The drawback claimant shall certify to Customs that he has not earlier received payment on the same import entry for the same designation of goods. If, notwithstanding such a certification, such an earlier payment was in fact made to the claimant, the claimant shall repay any amount paid on the second claim.

(b) *Preparation of Certificate of Origin.* The drawback claimant shall, within 30 calendar days after the filing of the drawback claim under this subpart, submit to Customs a written statement as to whether he has prepared, or has knowledge that another person has prepared, a Certificate of Origin provided for under § 181.11(a) of this part and pertaining to the goods which are covered by the claim. If, following such 30-day period, the claimant prepares, or otherwise learns of the existence of, any such Certificate of Origin, the claimant shall, within 30 calendar days thereafter, disclose that fact to Customs.

§ 181.52 Subsequent claims for preferential tariff treatment.

If a claim for a refund of duties is allowed by the Canadian or Mexican customs administration under Article 502(3) of the NAFTA (post-importation claim) or under any other circumstance after drawback has been granted under this subpart, the appropriate Customs officer shall reliquidate the drawback claim and obtain a refund of the amount paid in drawback in excess of the amount permitted to be paid under § 181.44 of this part.

§ 181.53 Waiver or reduction of duty under duty-deferral programs.

(a) *General*—(1) *Duty-deferral program defined.* For purposes of this section, a "duty-deferral program" means a measure which postpones duty payment upon arrival of a good in the United States, including a measure governing manipulation warehouses, manufacturing warehouses, smelting and refining warehouses, foreign trade zones, or temporary importations under bond under Chapter 98, HTSUS, until withdrawn or removed for exportation to Canada or Mexico.

(2) *Treatment as entered or withdrawn for domestic consumption.* Where a "good subject to NAFTA drawback" within the meaning of 19 U.S.C. 3333 is imported into the United States pursuant to a duty-deferral program and is subsequently exported to Canada or Mexico or is used as a material in the production of another good that is subsequently exported to Canada or Mexico, the exported good shall be treated, for purposes of this section, as if it had been entered or withdrawn for domestic consumption and thus subject to duty. However, the provisions of this paragraph shall not apply to goods covered by § 181.45.

(3) *Adjustment to duties paid.* Customs shall waive or reduce the duties paid or owed under paragraph (a)(2) of this section by the person who exports the good to Canada or Mexico in accordance with paragraphs (b) through (f) of this section, provided that evidence of exportation and satisfactory evidence of duties paid in Canada or Mexico (see § 181.47(c) of this part) are submitted within 60 calendar days of the date of exportation.

(b) *Manipulation in warehouse.* Where a good subject to NAFTA drawback under this subpart is withdrawn from a bonded warehouse (19 U.S.C. 1562) after manipulation for exportation to Canada or Mexico, duty shall be assessed on the good in its condition and quantity, and at its weight, at the time of such withdrawal from the warehouse and with such additions to, or deductions from, the final appraised value as may be necessary by reason of its change in condition. Such duty shall be paid no later than 60 calendar days after the date of exportation except that, upon presentation of evidence of exportation and satisfactory evidence of the amount of any customs duties paid to Canada or Mexico on the exported good, the duty shall be waived or reduced in an amount that does not exceed the lesser of either the total amount of duty payable on the good under this section or the total amount of customs duties paid to Canada or Mexico.

Example. Company B imports toys in bulk and makes a warehouse entry into a Class 8 warehouse, whereupon Company B repackages the toys for retail sale. Upon withdrawal of the goods from the warehouse, $200 in U.S. duty is assessed. Company B exports this merchandise to Mexico and pays the equivalent of US$300 in duties. Thirty days after exportation from the United States, Company B submits to Customs evidence of exportation and a copy of the Mexican consumption entry ("pedimento") as evidence of the payment of the US$300 equivalent to Mexico. Customs will waive the collection of the $200 assessment since $200 is a lesser amount than the total amount of duties paid to Mexico.

(c) *Bonded manufacturing warehouse.* Where a good is manufactured in a bonded warehouse (19 U.S.C. 1311) with imported materials and is then withdrawn for exportation to Canada or Mexico, duty shall be assessed on the materials in their condition and quantity, and at their weight, at the time of their importation into the United States. Such duty shall be paid no later than 60 calendar days after the date of exportation except that, upon presentation of evidence of exportation and satisfactory evidence of the amount of any customs duties paid to Canada or Mexico on the exported good, the duty shall be waived or reduced in an amount that does not exceed the lesser of either the total amount of duty payable on the materials under this section or the total amount of customs duties paid to Canada or Mexico.

Example. Company N imports tea into the United States and makes a Class 6 warehouse entry. Company N manufactures sweetened ice tea mix by combining the imported tea with refined cane sugar and other flavorings and packaging it in retail size canisters. Upon withdrawal of the ice tea mix from the warehouse for immediate exportation to Canada, U.S. duty is assessed on the basis of the unmanufactured tea in the amount of $900. Company N, however, does not pay the duties at this time. Canada assesses the equivalent of US$800 on the exported ice tea mix. Company N submits to Customs both evidence of exportation to Canada and a Canadian K–84 Statement showing payment of the US$800 equivalent in duties to Canada. Company N will only be required to pay $100 in U.S. duties out of the original $900 bill.

(d) *Bonded smelting or refining warehouse.* For any qualifying imported metal-bearing materials (19 U.S.C. 1312), duty shall be assessed on the imported materials and the charges against the bond canceled no later than 60 calendar days after the date of exportation of the treated materials to Canada or Mexico either from the bonded smelting or refining warehouse or from such other customs bonded warehouse after the transfer of the same quantity of material from a bonded smelting or refining warehouse. However, upon presentation of evidence of exportation and satisfactory evidence of the amount of any customs duties paid to Canada or Mexico on the exported treated materials, the duty on the imported materials shall be waived or reduced in an amount that does not exceed the lesser of either the total amount of duty payable on the imported materials under this section or the total amount of customs duties paid to Canada or Mexico.

Example. Company Z imports 47 million pounds of electrolytic zinc which is entered into a bonded smelting and refining warehouse (Class 7) for processing. Thereafter, Company Z withdraws the merchandise and pays $90,000 in U.S. duty on the dutiable quantity of metal contained in the imported metal-bearing materials and Customs cancels the bond charges. Two weeks later, Company Z secures a buyer, Company B, in Canada and exports the merchandise. Upon importation of the processed zinc into Canada, the equivalent of US$50,000 in duties are assessed against Company B. Company Z would like to claim a NAFTA refund under this section. Company Z must secure from Company B the necessary Canadian documentation to show exportation and to show that the US$50,000 equivalent in duties was paid to Revenue Canada in order for Company Z to obtain a refund of that amount from Customs.

(e) *Foreign trade zone.* For a good that is manufactured or otherwise changed in condition in a foreign trade zone (19 U.S.C. 81c(a)) and then exported from the zone to Canada or Mexico, the duty assessed, as calculated under paragraph (e)(1) or (e)(2) of this section, shall be paid no later than 60 calendar days after the date of exportation of the good to Canada or Mexico except that, upon presentation of evidence of exportation and satisfactory evidence of the amount of any customs duties paid to Canada or Mexico on the exported good, the duty shall be waived or reduced in an amount that does not exceed the lesser of either the total amount of duty payable on the good under this section or the total amount of customs duties paid to Canada or Mexico.

(1) *Nonprivileged foreign status.* In the case of a nonprivileged foreign status good, duty is assessed on the good in its condition and quantity, and at its weight, at the time of its exportation from the zone to Canada or Mexico.

Example. CMG imports $1,000,000 worth of auto parts from Korea and admits them into Foreign-Trade Subzone number 00, claiming nonprivileged foreign status. (If the auto parts had been regularly entered they would have been dutiable at 4 percent, or $40,000.) CMG manufactures subcompact automobiles. Automobiles are dutiable at 2.5 percent ($25,000) if entered for consumption in the United States. CMG withdraws the automobiles from the zone and sells them to XYZ who ships them to Mexico. XYZ enters the automobiles in Mexico, pays the equivalent of US$20,000 in duty, and does not claim NAFTA preferential tariff treatment. Before the expiration of 60 calendar days from exportation, CMG submits the required documentation showing exportation and payment of duty in Mexico and pays $5,000 in duty to Customs representing the difference between the $25,000 which would have been paid if the automobiles had been entered for consumption from the zone and the US$20,000 equivalent paid to Mexico by XYZ.

(2) *Privileged foreign status.* In the case of a privileged foreign status good, duty is assessed on the good in its condition and quantity, and at its weight, at the time privileged status is granted in the zone.

Example. O&G, Inc. admits Kuwaiti crude petroleum into its zone and requests, one month later, privileged foreign status on the crude before refining the crude into motor gasoline and kerosene. Upon entry of the refined goods from the zone by O&G, Inc., U.S. duty is assessed on the imported crude petroleum in the amount of $700 rather than on the refined goods (which would have been assessed $1,200). O&G, Inc. then ships the refined goods to Canada. D&O is the consignee in Canada and pays the Canadian customs duty assessment of the equivalent of US$1,500 on the goods. D&O claims NAFTA preferential tariff treatment in Canada. O&G, Inc. potentially is entitled to a duty remission of the full $700 assessed in the United States. However, if D&O's NAFTA claim is approved and results in a refund of duty by Canada, O&G, Inc.'s actual duty remission or refund will be reduced by that amount of refund received by D&O in excess of $800.

(f) *Temporary importation under bond.* Where a good, regardless of its origin, was imported temporarily free of duty for repair, alteration or processing (subheading 9813.00.05, HTSUS) and is subsequently exported to Canada or Mexico, duty shall be assessed on the good on the basis of its condition at the time of its importation into the United States. Such duty shall be paid no later than 60 calendar days after the date of exportation except that, upon presentation of evidence of exportation and satisfactory evidence of the amount of any customs duties paid to Canada or Mexico on the exported good, the duty shall be waived or reduced in an amount that does not exceed the lesser of the total amount of duty payable on the good under this section or the total amount of customs duties paid to Canada or Mexico.

Example. Company A imports glassware under subheading 9813.00.05, HTSUS. The glassware is from France and would be dutiable under a regular consumption entry at $6,000. Company A alters the glassware by etching hotel logos on the glassware. Two weeks later, Company A sells the glassware to Company B, a Mexican company, and ships the glassware to Mexico. Company B enters the glassware and is assessed duties in an amount equivalent to US$6,200 and claims NAFTA preferential tariff treatment. Company B provides a copy of the Mexican landing certificate to Company A showing that the US$6,200 equivalent in duties was assessed but not yet paid to Mexico, and Customs sends a bill to Company A for the $6,000 in U.S. duty which Company A pays. If Mexico ultimately denies Company B's NAFTA claim and the Mexican duty payment becomes final, Company A, upon submission to Customs of evidence of the finality of the collection of the US$6,200 equivalent by Mexico, is entitled to a refund of the full $6,000 in U.S. duty.

(g) *Recordkeeping requirements.* If a person intends to claim a waiver or reduction of duty on goods under this section, that person shall maintain records concerning the value of all involved goods or materials at the time of their importation into the United States and concerning the value of the goods at the time of their exportation to Canada or Mexico. Failure to maintain adequate records will result in denial of the claim for waiver or reduction of duty.

(h) *Failure to timely provide evidence of duties paid or owed to Canada or Mexico.* If the person who exports the goods to Canada or Mexico fails to provide satisfactory evidence of duties paid or owed to Canada or Mexico within the 60-day period specified in this section, that person will be liable for payment of the full duties assessed under this section and without any waiver or reduction thereof.

(i) *Subsequent claims for preferential tariff treatment.* If a claim for a refund of duties is allowed by the Canadian or Mexican customs administration under Article 502(3) of the NAFTA or under any other circumstance after duties have been waived or reduced under this section, Customs shall reliquidate the NAFTA drawback claim and obtain a refund of the amount waived or reduced in excess of the amount permitted to be waived or reduced under this section.

§ 181.54 Verification of claim for drawback, waiver or reduction of duties.

The allowance of a claim for drawback, waiver or reduction of duties submitted under this subpart shall be subject to such verification, including verification with the Canadian or Mexican customs administration of any documentation obtained in Canada or Mexico and submitted in connection with the claim, as Customs may deem necessary.

Subpart F—Commercial Samples and Goods Returned After Repair or Alteration

§ 181.61 Applicability.

This subpart sets forth the rules which apply for purposes of duty-free entry of commercial samples of negligible value as provided for in Article 306 of the NAFTA and for purposes of the re-entry of goods after repair or alteration in Canada or Mexico as provided for in Article 307 of the NAFTA.

§ 181.62 Commercial samples of negligible value.

(a) *General.* Commercial samples of negligible value imported from Canada or Mexico may qualify for duty-free entry under subheading 9811.00.60, HTSUS. For purposes of this section, "commercial samples of negligible value" means commercial samples which have a value, individually or in the aggregate as shipped, of not more than US$1, or the equivalent amount in the currency of Canada or Mexico, or which are so marked, torn, perforated, or otherwise treated that they are unsuitable for sale or for use except as commercial samples.

(b) *Qualification for duty-free entry.* Commercial samples of negligible value imported from Canada or Mexico will qualify for duty-free entry under subheading 9811.00.60, HTSUS, only if:

(1) The samples are imported solely for the purpose of soliciting orders for foreign goods; and

(2) If valued over US$1, the samples are properly marked, torn, perforated or otherwise treated prior to arrival in the United States so that they are unsuitable for sale or for use except as commercial samples.

§ 181.63 [Reserved]

§ 181.64 Goods re-entered after repair or alteration in Canada or Mexico.

(a) *General.* This section sets forth the rules which apply for purposes of

---

obtaining duty-free or reduced-duty treatment on goods returned after repair or alteration in Canada or Mexico as provided for in subheadings 9802.00.40 and 9802.00.50, HTSUS. Goods returned after having been repaired or altered in Mexico, whether or not pursuant to a warranty, and goods returned after having been repaired or altered in Canada pursuant to a warranty, are eligible for duty-free treatment, provided that the requirements of this section are met. Goods returned after having been repaired or altered in Canada other than pursuant to a warranty are subject to duty upon the value of the repairs or alterations using the applicable duty rate under the United States-Canada Free-Trade Agreement (see § 10.301 of this chapter), provided that the requirements of this section are met. For purposes of this section, "repairs or alterations" means restoration, addition, renovation, redyeing, cleaning, resterilizing, or other treatment which does not destroy the essential characteristics of, or create a new or commercially different good from, the good exported from the United States.

Example. Glass mugs produced in the United States are exported to Canada for etching and tempering operations, after which they are returned to the United States for sale. The foreign operations exceed the scope of an alteration because they are manufacturing processes which create commercially different products with distinct new characteristics.

(b) *Goods not eligible for duty-free or reduced-duty treatment after repair or alteration.* The duty-free or reduced-duty treatment referred to in paragraph (a) of this section shall not apply to goods which, in their condition as exported from the United States to Canada or Mexico, are incomplete for their intended use and for which the processing operation performed in Canada or Mexico constitutes an operation that is performed as a matter of course in the preparation or manufacture of finished goods.

Example. Unflanged metal wheel rims are exported to Canada for a flanging operation to strengthen them so as to conform to U.S. Army specifications for wheel rims; although the goods when exported from the United States are dedicated for use in the making of wheel rims, they cannot be used for that purpose until flanged. The flanging operation does not constitute a repair or alteration because that operation is necessary for the completion of the wheel rims.

(c) *Documentation*—(1) *Declarations required.* Except as otherwise provided in this section, the following declarations shall be filed in connection with the entry of goods which are returned from Canada or Mexico after having been exported for repairs or alterations and which are claimed to be duty free or subject to duty only on the value of the repairs or alterations performed abroad:

(i) A declaration from the person who performed such repairs or alterations, in substantially the following form:

I/We, ____________, declare that the goods herein specified are the goods which, in the condition in which they were exported from the United States, were received by me (us) on ____________, 19________, from ____________ (name and address of owner or exporter in the United States); that they were received by me (us) for the sole purpose of being repaired or altered; that only the repairs or alterations described below were performed by me (us); that such repairs or alterations were (were not) performed pursuant to a warranty; that the full cost or (when no charge is made) value of such repairs or alterations is correctly stated below; and that no substitution whatever has been made to replace any of the goods originally received by me (us) from the owner or exporter thereof mentioned above.

Marks and numbers	Description of goods and of repairs or alterations	Full cost or (when no charge is made) value of repairs or alterations (see Subchapter II, Chapter 98, HTSUS)	Total value of goods after repairs or alterations

(ii) A declaration by the owner, importer, consignee, or agent having knowledge of the pertinent facts in substantially the following form:

I, ______________, declare that the (above) (attached) declaration by the person who performed the repairs or alterations abroad is true and correct to the best of my knowledge and belief; that the goods ________ were ________ were not (check one) subject to NAFTA drawback; that such goods were exported from the United States for repairs or alterations from ________ (port) on ________, 19____; and that the goods entered in their repaired or altered condition are the same goods that were exported on the above date and that are identified in the (above) (attached) declaration.

(2) *Additional documentation.* The port director may require such additional documentation as is deemed necessary to prove actual exportation of the goods from the United States for repairs or alterations, such as a foreign customs entry, a foreign customs invoice, a foreign landing certificate, bill of lading, or airway bill.

(3) *Waiver of declarations.* If the port director concerned is satisfied, because of the nature of the goods or production of other evidence, that the goods are imported under circumstances meeting the requirements of this section, he may waive submission of the declarations provided for in paragraph (c)(1) of this section.

(4) *Deposit of estimated duties.* For goods returned after having been repaired or altered in Canada other than pursuant to a warranty, the port director shall require a deposit of estimated duties based upon the full cost or value of the repairs or alterations. The cost or value of the repairs or alterations performed in Canada other than pursuant to a warranty, which is to be set forth in the invoice and entry papers as the basis for the assessment of duty for such goods, shall be limited to the cost or value of the repairs or alterations actually performed in Canada, which shall include all domestic and foreign articles furnished for the repairs or alterations but shall not include any of the expenses incurred in the United States whether by way of engineering costs, preparation of plans or specifications, furnishing of tools or equipment for doing the repairs or alterations in Canada, or otherwise.

Subpart G—Origin Verifications and Determinations

§ 181.71 Denial of preferential tariff treatment dependent on origin verification and determination.

Except where a Certificate of Origin either is not submitted when requested under § 181.22(b) of this part or is not acceptable and a corrected Certificate is not submitted or accepted as provided in § 181.22(c) of this part and except as otherwise provided in § 181.23 of this part and except in the case of a pattern of conduct provided for in § 181.76(c) of this part, Customs shall deny preferential tariff treatment on an imported good, or shall deny a post-importation claim for a refund filed under subpart D of this part, only after initiation of an origin verification under § 181.72(a) of this part which results in a determination that the imported good does not qualify as an originating good or should not be accorded such treatment for any other reason as specifically provided for elsewhere in this part.

§ 181.72 Verification scope and method.

(a) *General.* Subject to paragraph (e) of this section, Customs may initiate a verification in order to determine whether a good imported into the United States qualifies as an originating good for purposes of preferential tariff treatment under the NAFTA as stated on the Certificate of Origin pertaining to the good. Such a verification:

(1) May also involve a verification of the origin of a material that is used in the production of a good that is the subject of a verification under this section;

(2) May include verification of the applicable rate of duty applied to an originating good in accordance with Annex 302.2 of the NAFTA and may include a determination of whether a good is a qualifying good for purposes of Annex 703.2 of the NAFTA; and

(3) Shall be conducted only by means of one or more of the following:

(i) A verification letter which requests information from a Canadian or Mexican exporter or producer, including a Canadian or Mexican producer of a material, and which identifies the good or material that is the subject of the verification. The verification letter may be on Customs Form 28 or other appropriate format and may be sent:

(A) By certified or registered mail, or by any other method that produces a confirmation of receipt by the exporter or producer; or

(B) By any other method, regardless of whether it produces proof of receipt by the exporter or producer;

(ii) A written questionnaire sent to an exporter or a producer, including a producer of a material, in Canada or Mexico. The questionnaire:

(A) May be sent by certified or registered mail, or by any other method that produces a confirmation of receipt by the exporter or producer; or

(B) May be sent by any other method, regardless of whether it produces proof of receipt by the exporter or producer; and

(C) May be completed by the Canadian or Mexican exporter or producer either in the English language or in the language of the country in which that exporter or producer is located;

(iii) Visits to the premises of an exporter or a producer, including a producer of a material, in Canada or Mexico to review the types of records referred to in § 181.12 of this part and observe the facilities used in the production of the good or material; and

(iv) Any other method which results in information from a Canadian or Mexican exporter or producer, including a Canadian or Mexican producer of a material, that is relevant to the origin determination. The information so obtained may form a basis for a negative determination regarding a good (see § 181.75(b) of this part) only if the information is in writing and is signed by the exporter or producer.

(b) *Applicable accounting principles.* Any verification of a regional value-content requirement undertaken pursuant to paragraph (a) of this section shall be conducted in accordance with the Generally Accepted Accounting Principles applied in the country from which the good was exported to the United States.

(c) *Inquiries to importer not precluded.* Nothing in paragraph (a) of this section shall preclude Customs from directing inquiries or requests to a U.S. importer for documents or other information regarding the imported good. If such an inquiry or request involves requesting the importer to obtain and provide written information from the exporter or producer of the good or from the producer of a material that is used in the production of the good, such information shall be requested by the importer and provided to the importer by the exporter or producer only on a voluntary basis, and a failure or refusal on the part of the importer to obtain and provide such information shall not be considered a failure of the exporter or producer to provide the information and shall not constitute a ground for denying preferential tariff treatment on the good.

(d) *Failure to respond to letter or questionnaire.*—(1) *Nonresponse to initial letter or questionnaire.* If the exporter or producer, including a producer of a material, fails to respond to a verification letter or questionnaire sent under paragraph (a)(2)(i) or (a)(2)(ii) of this section within 30 calendar days from the date on which the letter or questionnaire was sent, or such longer period as may be specified in the letter or questionnaire, Customs shall send a follow-up verification letter or questionnaire to that exporter or producer. The follow-up letter or questionnaire:

(i) Except where the verification letter or questionnaire only involved the origin of a material used in the production of a good and was sent to the producer of the material, may include the written determination referred to in § 181.75 of this part, provided that the information specified in paragraph (b) of that section is also included; and

(ii) Shall be sent:

(A) By certified or registered mail, or by any other method that produces a confirmation of receipt by the exporter or producer, if so requested by the customs administration of Canada or Mexico from which the good was exported; or

(B) By any method, if no request under paragraph (d)(1)(ii)(A) of this section has been made by the Canadian or Mexican customs administration.

(2) *Nonresponse to follow-up letter or questionnaire*—(i) *Producer of a material.* If a producer of a material fails to respond to a follow-up verification letter or questionnaire sent under paragraph (d)(1) of this section, Customs may consider the material to be non-originating for purposes of determining whether the good to which that material relates is an originating good.

(ii) *Exporter or producer of a good.* If the exporter or producer of a good fails to respond to a follow-up verification letter or questionnaire sent under paragraph (d)(1) of this section, Customs may consider the good to be non-originating and consequently may deny preferential tariff treatment on the good as follows:

(A) If the follow-up letter or questionnaire included a written determination as provided for in paragraph (d)(1)(i) of this section and the exporter or producer fails to respond to the follow-up letter or questionnaire within 30 calendar days or such longer period as specified therein:

(*1*) From the date on which the follow-up letter or questionnaire and

written determination were received by the exporter or producer, if sent pursuant to paragraph (d)(1)(ii)(A) of this section; or

(*2*) From the date on which the follow-up letter or questionnaire and written determination were either received by the exporter or producer or sent by Customs, if sent in accordance with paragraph (d)(1)(ii)(B) of this section; or

(B) Provided that the procedures set forth in §§ 181.75 and 181.76 of this part are followed, if the follow-up letter or questionnaire does not include a written determination as provided for in paragraph (d)(1)(i) of this section and the exporter or producer fails to respond to the follow-up letter or questionnaire within 30 calendar days or such longer period as specified in the letter or questionnaire:

(*1*) From the date on which the follow-up letter or questionnaire was received by the exporter or producer, if sent pursuant to paragraph (d)(1)(ii)(A) of this section; or

(*2*) From the date on which the follow-up letter or questionnaire was either received by the exporter or producer or sent by Customs, if sent in accordance with paragraph (d)(1)(ii)(B) of this section.

(e) *Calculation of regional value content under net cost method*—(1) *General.* Where a Canadian or Mexican producer of a good elects to calculate the regional value content of a good under the net cost method as set forth in General Note 12, HTSUS, and in the appendix to this part, Customs may not, during the time period over which that net cost is calculated, conduct a verification under § 181.72(a) of this part with respect to the regional value content of that good.

(2) *Cost submission for motor vehicles.* Where, pursuant to General Note 12, HTSUS, and the appendix to this part, a Canadian or Mexican producer of a light duty vehicle or heavy duty vehicle, as defined in the appendix to this part, elects to average its regional value content calculation over its fiscal year, Customs may request, in writing, that the producer provide a cost submission reflecting the actual costs incurred in the production of the category of motor vehicles for which the election was made. Such a written request shall constitute a verification letter under paragraph (a)(2)(i) of this section, and the requested cost submission shall be submitted to Customs within 180 calendar days after the close of the producer's fiscal year or within 60 days from the date on which the request was made, whichever is later.

§ 181.73 Notification of verification visit.

(a) *Written notification required.* Prior to conducting a verification visit in Canada or Mexico pursuant to § 181.72(a)(2)(iii) of this part, Customs shall give written notification of the intention to conduct the visit. Such notification shall be delivered:

(1) By certified or registered mail, or by any other method that produces a confirmation of receipt, to the address of the Canadian or Mexican exporter or producer whose premises are to be visited;

(2) To the customs administration of the country in which the visit is to occur; and

(3) If requested by the country in which the visit is to occur, to the embassy of that country located in the United States.

(b) *Contents of notification.* The notification referred to in paragraph (a) of this section shall include:

(1) The identity of the Customs office and officer issuing the notification;

(2) The name of the Canadian or Mexican exporter or producer of the good, or producer of the material, whose premises are to be visited;

(3) The date and place of the proposed verification visit;

(4) The object and scope of the proposed verification visit, including specific reference to the good or material that is the subject of the verification;

(5) The names and titles of the Customs officers performing the proposed verification visit;

(6) The legal authority for the proposed verification visit; and

(7) A request that the Canadian or Mexican exporter or producer of the good, or producer of the material, provide its written consent for the proposed verification visit.

§ 181.74 Verification visit procedures.

(a) *Written consent required.* Prior to conducting a verification visit in Canada or Mexico pursuant to § 181.72(a)(2)(iii) of this part, Customs shall obtain the written consent of the Canadian or Mexican exporter or producer of the good or producer of the material whose premises are to be visited.

(b) *Written consent procedures.* The written consent provided for in paragraph (a) of this section shall be delivered by certified or registered mail, or by any other method that generates a reliable receipt, to the Customs officer who gave the notification provided for in § 181.73 of this part.

(c) *Failure to provide written consent or to cooperate or to maintain records.* Except as otherwise provided in paragraph (d) of this section, where a Canadian or Mexican exporter or producer of a good, or a Canadian or Mexican producer of a material, has not given its written consent to a proposed verification visit within 30 calendar days of receipt of notification pursuant to § 181.73 of this part, Customs may deny preferential tariff treatment to that good, or for purposes of determining whether a good is an originating good may consider as non-originating that material, that would have been the subject of the visit, provided that, as regards the good, notice of intent to deny such treatment is given to that exporter or producer of the good and to the U.S. importer thereof prior to taking such action. A failure on the part of the Canadian or Mexican exporter or producer of a good, or on the part of the Canadian or Mexican producer of a material, to maintain records or provide access to such records or otherwise cooperate during the verification visit shall mean that the verification visit never took place and may be treated by Customs in the same manner as a failure to give written consent to a verification visit. However, in the case of a Canadian or Mexican producer of a good who is found during a verification visit to have not maintained records in accordance with the Generally Accepted Accounting Principles applied in the producer's country, Customs may deny preferential tariff treatment on the good based solely on a failure to so maintain those records only if the producer does not conform the records to those Principles within 60 calendar days after Customs informs the producer in writing of that failure.

(d) *Postponement of visit in Canada or Mexico.* Following receipt of the notification provided for in § 181.73 of this part, the Canadian or Mexican customs administration may, within 15 calendar days of receipt of the notification, postpone the proposed verification visit for a period not exceeding 60 calendar days from the date of such receipt by providing written notice of the postponement to the Customs officer who issued the notification of the verification visit, unless a longer period is requested and agreed to by Customs. Such a postponement shall not constitute a failure to provide written consent within the meaning of paragraph (c) of this section and shall not otherwise by itself constitute a valid basis upon which Customs may:

(1) Consider a material that is used in the production of a good to be a non-originating material; or

(2) Deny preferential tariff treatment to a good.

(e) *Verification visits within the United States*—(1) *Notification and consent procedure*. When the Canadian or Mexican customs administration intends to conduct a verification visit in the United States, notification of such intent will be given, and consent will be required, as provided for under Article 506 of the NAFTA. For purposes of the required notification to Customs, such notification shall be sent to Project North Star Coordination Center, P.O. Box 400, Buffalo, New York 14225–0400.

(2) *Postponement of visit*. Following receipt of notification from the Canadian or Mexican customs administration of its intention to conduct a verification visit in the United States, Customs may, within 15 calendar days of receipt of the notification, postpone the proposed verification visit for a period not exceeding 60 calendar days from the date of such receipt by providing written notice of the postponement to the Canadian or Mexican customs administration.

(3) *Designation of observers*. A U.S. exporter or producer, including a producer of a material, whose good or material is the subject of a verification visit by the Canadian or Mexican customs administration shall be allowed to designate two observers to be present during the visit, subject to the following conditions:

(i) The U.S. exporter or producer shall not be required to designate observers;

(ii) There shall be no restriction on the class of persons that may be designated as observers by the U.S. exporter or producer;

(iii) The observers to be present are designated in the written consent to the proposed visit or subsequent thereto;

(iv) The observers do not participate in the verification visit in a manner other than as passive observers;

(v) The presence of observers shall in no way affect the right to have legal counsel or other advisors present during the visit;

(vi) There shall be no obligation on the part of the United States government or on the part of the Canadian or Mexican government to designate observers from its staff, even when the U.S. exporter or producer fails to, or specifically declines to, designate observers; and

(vii) The failure of the U.S. exporter or producer to designate observers shall not result in the postponement of the visit.

§ 181.75 Issuance of origin determination.

(a) *General*. Except in the case of a pattern of conduct within the meaning of § 181.76(c) of this part, following receipt and analysis of the results of an origin verification initiated under § 181.72(a) of this part in regard to a good imported into the United States and prior to denying preferential tariff treatment on the import transaction which gave rise to the origin verification, Customs shall provide the exporter or producer whose good is the subject of the verification with a written determination of whether the good qualifies as an originating good. Subject to paragraph (b) of this section, the written origin determination shall be sent within 60 calendar days after conclusion of the origin verification process, unless circumstances require additional time, and shall set forth:

(1) A description of the good that was the subject of the verification together with the identifying numbers and dates of the export and import documents pertaining to the good;

(2) Subject to the provisions of § 181.131 of this part and except in the case of a negative origin determination where specific findings of fact cannot be made because of a failure to respond to a follow-up verification letter or questionnaire sent under § 181.72 of this part, a statement setting forth the findings of fact made in connection with the verification and upon which the determination is based; and

(3) With specific reference to the rules applicable to originating goods as set forth in General Note 12, HTSUS, and in the appendix to this part, the legal basis for the determination.

(b) *Negative origin determinations*. If Customs determines, as a result of an origin verification initiated under § 181.72(a) of this part, that the good which is the subject of the verification does not qualify as an originating good, the written determination required under paragraph (a) of this section:

(1) Shall be sent by certified or registered mail, or by any other method that produces a confirmation of receipt by the exporter or producer, if so requested by the customs administration of Canada or Mexico from which the good was exported; and

(2) Shall, in addition to the information specified in paragraph (a) of this section, set forth the following:

(i) A notice of intent to deny preferential tariff treatment on the good which is the subject of the determination;

(ii) The specific date after which preferential tariff treatment will be denied, as established in accordance with § 181.76(a)(1) of this part;

(iii) The period, established in accordance with § 181.76(a)(1) of this part, during which the exporter or producer of the good may provide written comments or additional information regarding the determination; and

(iv) A statement advising the exporter or producer of the right to file a protest under 19 U.S.C. 1514 and part 174 of this chapter:

(A) Within 90 days after notice of liquidation is provided pursuant to part 159 of this chapter; or

(B) In cases where the negative origin determination does not result in a liquidation, within 90 days after the date of issuance of the written determination.

§ 181.76 Application of origin determinations.

(a) *General*. Except as otherwise provided in this section, an origin determination may be applied upon issuance of the determination under § 181.75 of this part.

(b) *Negative origin determinations*. In the case of a negative origin determination issued under § 181.75(b) of this part:

(1) The date on which preferential tariff treatment may be denied shall be no earlier than 30 calendar days from the date on which:

(i) Receipt of the written determination by the exporter or producer is confirmed, if a request under § 181.75(b)(1) of this part has been made; or

(ii) The written determination is sent by Customs, if no request under § 181.75(b)(1) of this part has been made; and

(2) Before denying preferential tariff treatment, Customs shall take into account any comments or additional information provided by the exporter or producer during the period established in accordance with paragraph (b)(1) of this section.

(c) *Cases involving a pattern of conduct*. Where multiple origin verifications initiated under § 181.72(a) of this part indicate a pattern of conduct by an exporter or producer involving false or unsupported representations on Certificates of Origin that a good imported into the United States qualifies as an originating good, Customs may deny subsequent claims for preferential tariff treatment on identical goods exported or produced by such person until that person establishes compliance with the rules applicable to originating goods as set forth in General Note 12, HTSUS, and in this part, provided that advance written notice of the intent to deny such claims is given to the importer. For purposes of this paragraph, a "pattern of conduct" means repeated instances of

false or unsupported representations by an exporter or producer as established by Customs on the basis of not fewer than two origin verifications of two or more importations of the good that result in the issuance of not fewer than two written determinations issued to that exporter or producer pursuant to § 181.75 of this part which conclude, as a finding of fact, that Certificates of Origin completed and signed by that exporter or producer with respect to identical goods contain false or unsupported representations.

(d) *Differing determinations*. Where Customs determines, either as a result of an origin verification initiated under § 181.72(a) of this part or under any other circumstance, that a certain good imported into the United States does not qualify as an originating good based on a tariff classification or a value applied in the United States to one or more materials used in the production of the good, including a material used in the production of another material that is used in the production of the good, which differs from the tariff classification or value applied to the materials by the country from which the good was exported, the Customs determination shall not become effective until Customs provides written notification thereof both to the U.S. importer of the good and to the person who completed and signed the Certificate of Origin upon which the claim for preferential tariff treatment for the good was based.

(e) *Applicability of a determination to prior importations*. Customs shall not apply a determination made under paragraph (c) of this section to an importation made before the effective date of the determination if, prior to notification of the determination, the customs administration of the country from which the good was exported either issued an advance ruling under Article 509 of the NAFTA or any other ruling on the tariff classification or on the value of such materials, or gave consistent treatment to the entry of the materials under the tariff classification or value at issue, on which a person is entitled to rely and on which that person did in fact rely. For purposes of this paragraph, the person who received notification of the determination shall demonstrate to the satisfaction of Customs, in writing within 30 calendar days of receipt of the notification, that the conditions set forth herein have been met. For purposes of this paragraph:

(1) A "ruling" on which a person is entitled to rely in the case of Canada must be issued pursuant to section 43.1(1) of the Customs Act (Advance Rulings) or in accordance with Departmental Memorandum 11–11–1 (National Customs Rulings) and in the case of Mexico must be issued pursuant to Article 34 of the Codigo Fiscal de la Federacion and pursuant to Article 30 of the Ley Aduanera or the applicable provision of Mexican law related to advance rulings under Article 509 of the NAFTA; and

(2) "Consistent treatment" means the established application by the Canadian or Mexican customs administration that can be substantiated by the continued acceptance by the customs administration of the tariff classification or value of identical materials on importations of the materials into Canada or Mexico by the same importer over a period of not less than two years immediately prior to the date of signature of the Certificate of Origin for the good that is the subject of the determination referred to in paragraph (d) of this section, provided that with regard to those importations:

(i) The tariff classification or value of the materials was not the subject of a verification, review or appeal by that customs administration on the date of the determination under paragraph (d) of this section; and

(ii) The materials had not been accorded a different tariff classification or value by one or more district, regional or local offices of that customs administration on the date of the determination under paragraph (d) of this section.

(f) *Detrimental reliance*. If Customs proposes to deny preferential tariff treatment to a good pursuant to a determination made under paragraph (d) of this section, Customs shall postpone the application of the determination for a period not exceeding 90 calendar days from the date of issuance of the determination where the U.S. importer of the good, or the person who completed and signed the Certificate of Origin upon which the claim for preferential tariff treatment for the good was based, demonstrates to the satisfaction of Customs that it has relied in good faith to its detriment on the tariff classification or value applied to such materials by the customs administration of the country from which the good was exported.

Subpart H—Penalties

§ 181.81 Applicability to NAFTA transactions.

Except as otherwise provided in § 181.82 of this part, all criminal, civil or administrative penalties which may be imposed on U.S. importers, exporters and producers for violations of the Customs and related laws and regulations shall also apply to U.S. importers, exporters and producers for violations of the laws and regulations relating to the NAFTA.

§ 181.82 Exceptions to application of penalties.

(a) *General*. A U.S. importer who makes a corrected declaration under § 181.21(b) of this part shall not be subject to civil or administrative penalties for having made an incorrect declaration, provided that the corrected declaration was voluntarily made. In addition, civil or administrative penalties provided for under the U.S. Customs laws and regulations shall not be imposed on an exporter or producer in the United States who voluntarily provides written notification pursuant to § 181.11(d) of this part with respect to the making of an incorrect certification.

(b) *"Voluntarily" defined*—(1) *General*. For purposes of paragraph (a) of this section, the making of a corrected declaration or the providing of written notification of an incorrect certification will be deemed to have been done voluntarily if:

(i) Done before the commencement of a formal investigation;

(ii) Done before any of the events specified in § 162.74(g) of this chapter have occurred;

(iii) Done within 30 calendar days after either the U.S. importer with respect to a declaration that an imported good qualified as an originating good, or the U.S. exporter or producer with respect to a certification pertaining to a good exported to Canada or Mexico, had reason to believe that the declaration or certification was not correct;

(iv) Accompanied by a written statement setting forth the information specified in paragraph (b)(3) of this section; and

(v) In the case of a corrected declaration, accompanied or followed by a tender of any actual loss of duties in accordance with paragraph (b)(5) of this section.

(2) *Cases involving fraud*. Notwithstanding paragraph (b)(1) of this section, a person who acted by means of fraud in making an incorrect declaration or certification may not make a voluntary correction thereof. For purposes of this paragraph (b)(2), the term "fraud" shall have the meaning set forth in paragraph (B)(3) of appendix B to part 171 of this chapter.

(3) *Written statement*. For purposes of paragraph (a) of this section, each corrected declaration or notification of an incorrect certification shall be

accompanied by a written statement which:

(i) Identifies the class or kind of good to which the incorrect declaration or certification relates;

(ii) Identifies each import or export transaction affected by the incorrect declaration or certification with reference to each port of importation or exportation and the approximate date of each importation or exportation. A U.S. producer who provides written notification that certain information in a Certificate of Origin is incorrect and who is unable to identify the specific export transactions under this paragraph shall provide as much information concerning those transactions as the producer, by the exercise of good faith and due diligence, is able to obtain;

(iii) Specifies the nature of the incorrect statements or omissions regarding the declaration or certification; and

(iv) Sets forth, to the best of the person's knowledge, the true and accurate information or data which should have been covered by or provided in the declaration or certification, and states that the person will provide any additional information or data which is unknown at the time of making the corrected declaration or certification within 30 calendar days or within any extension of that 30-day period as Customs may permit in order for the person to obtain the information or data.

(4) *Substantial compliance.* For purposes of this section, a person shall be deemed to have voluntarily corrected a declaration or certification even though that person provides corrected information in a manner which does not conform to the requirements of the written statement specified in paragraph (b)(3) of this section, provided that:

(i) Customs is satisfied that the information was provided before the commencement of a formal investigation; and

(ii) The information provided includes, orally or in writing, substantially the same information as that specified in paragraph (b)(3) of this section.

(5) *Tender of actual loss of duties.* A U.S. importer who makes a corrected declaration shall tender any actual loss of duties at the time of making the corrected declaration, or within 30 calendar days thereafter, or within any extension of that 30-day period as Customs may allow in order for the importer to obtain the information or data necessary to calculate the duties owed.

(6) *Applicability of prior disclosure provisions.* Where a person fails to meet the requirements of this section because the correction of the declaration or the written notification of an incorrect certification is not considered to be done voluntarily as provided in this section, that person may nevertheless qualify for prior disclosure treatment under 19 U.S.C. 1592(c)(4) and the regulations issued thereunder.

Subpart I—Advance Ruling Procedures

§ 181.91 Applicability.

This subpart sets forth the rules which govern the issuance and application of advance rulings under Article 509 of the NAFTA and the procedures which apply for purposes of review of advance rulings under Article 510 of the NAFTA. Importers in the United States and exporters and producers located in Canada or Mexico may request and obtain an advance ruling on a NAFTA transaction only in accordance with the provisions of this subpart whenever the requested ruling involves a subject matter specified in § 181.92(b)(6) of this part. Accordingly, the provisions of this subpart shall apply in lieu of the administrative ruling provisions contained in subpart A of part 177 of this chapter except where the request for a ruling involves a subject matter not specified in § 181.92(b)(6).

§ 181.92 Definitions and general NAFTA advance ruling practice.

(a) *Definitions.* For purposes of this subpart:

(1) An *advance ruling* is a written statement issued by the Headquarters Office or the National Commodity Specialist Division or by such other office as designated by the Commissioner of Customs that interprets and applies the provisions of NAFTA to a specific set of facts involving any subject matter specified in § 181.92(b)(6) of this part. An "advance ruling letter" is an advance ruling issued in response to a written request and set forth in a letter addressed to the person making the request or his designee. A "published advance ruling" is an advance ruling which has been published in full text in the Customs Bulletin.

(2) An *authorized agent* is a person expressly authorized by a principal to act on his or her behalf. An advance ruling requested by an attorney or other person acting as an agent must include a statement describing the authority under which the request is made. With the exception of attorneys whose authority to represent is known, any person appearing before Customs as an agent in connection with an advance ruling request may be required to present evidence of his or her authority to represent the principal. The foregoing requirements will not apply to an individual representing his or her full-time employer or to a bona-fide officer, director or other qualified representative of a corporation, association, or organized group.

(3) The term *Headquarters Office,* means the Office of Regulations and Rulings at Headquarters, United States Customs Service, Washington, DC.

(4) An *information letter* is a written statement issued by the Headquarters Office or the National Commodity Specialist Division or by such other office as designated by the Commissioner of Customs that does no more than call attention to a well-established interpretation of principles under the NAFTA, without applying it to a specific set of facts. If Customs believes that general information may be of some benefit to the person making the request, an information letter may be issued in response to a request for an advance ruling when:

(i) The request suggests that general information, rather than an advance ruling, is actually being sought;

(ii) The request is incomplete or otherwise fails to meet the requirements set forth in this subpart; or

(iii) The requested advance ruling cannot be issued for any other reason.

(5) A *NAFTA transaction* is an act or activity to which the NAFTA provisions apply. A "prospective" NAFTA transaction is one that is merely contemplated or is currently being undertaken but has not resulted in any arrival or in the filing of any entry or entry summary or other document or in any other act so as to bring the transaction, or any part of it, under the jurisdiction of any Customs office. A "current" NAFTA transaction is one which is presently under consideration by a field office of Customs. A "completed" NAFTA transaction is one which has been acted upon by a Customs field office and with respect to which that office has issued a determination which is final in nature, but is (or was) subject to appeal, petition, protest or other review as provided in the applicable Customs laws and regulations. An "ongoing" NAFTA transaction is a series of identical, recurring transactions, consisting of current and completed transactions where future transactions are contemplated.

(6) The term *National Commodity Specialist Division* means the National Commodity Specialist Division, United States Customs Service, New York, New York.

(b) *General advance ruling practice.* An advance ruling may be requested under the provisions of this subpart with respect to prospective NAFTA transactions. An advance ruling will be based on the facts and circumstances presented by the requester.

(1) *Prospective NAFTA transactions.* It is in the interest of the sound administration of the NAFTA that persons engaging in any transaction affected by NAFTA fully understand the consequences of that transaction prior to its consummation. For this reason, Customs will give full and careful consideration to written requests from importers in the United States and exporters or producers in Canada or Mexico for advance rulings or information setting forth, with respect to a specifically described transaction, a definitive interpretation of applicable law or other appropriate information.

(2) *Current or ongoing NAFTA transactions.* A question arising in connection with a NAFTA transaction already before a Customs field office by reason of arrival, entry or otherwise will be resolved by that office in accordance with the principles and precedents previously announced by the Headquarters Office. If such a question cannot be resolved on the basis of clearly established rules set forth in the NAFTA or the regulations thereunder, or in applicable Treasury Decisions, rulings, opinions, or court decisions published in the Customs Bulletin, that field office may, if it believes it appropriate, forward the question to the Headquarters Office for consideration.

(3) *Completed NAFTA transactions.* A question arising in connection with an entry of merchandise which has been liquidated, or in connection with any other completed NAFTA transaction, may not be the subject of an advance ruling request under this subpart.

(4) *Oral advice.* Customs will not issue an advance ruling in response to an oral request. Oral opinions or advice of Customs personnel are not binding on Customs. However, oral inquiries may be made to Customs offices regarding existing advance rulings, the scope of such advance rulings, the types of transactions with respect to which Customs will issue advance rulings, the scope of the advance rulings which may be issued, or the procedures to be followed in submitting advance ruling requests, as prescribed in this subpart.

(5) *Who may request an advance ruling.* An advance ruling may be requested by any of the following persons (individuals, corporations, partnerships, associations, or other entities or groups) having a direct and demonstrable interest in the question or questions presented in the advance ruling request, or by the authorized agent of any such person:

(i) An importer in the United States;

(ii) An exporter or a producer of a good in Canada or Mexico; or

(iii) A Canadian or Mexican producer of a material that is used in the production of a good imported into the United States, but only with regard to that material and only in regard to a matter described in paragraphs (b)(6)(i) through (v) and (vii) of this section.

(6) *Subject matter of advance rulings.* Customs shall issue advance rulings under this subpart concerning the following:

(i) Whether materials imported from a country other than the United States, Canada or Mexico and used in the production of a good undergo an applicable change in tariff classification set forth in General Note 12, HTSUS, as a result of production occurring entirely in the United States, Canada and/or Mexico;

(ii) Whether a good satisfies a regional value-content requirement under the transaction value method or under the net cost method as provided for in General Note 12, HTSUS, and in this part;

(iii) For purposes of determining whether a good satisfies a regional value-content requirement under General Note 12, HTSUS, and under this part, the appropriate basis or method for value to be applied by an exporter or a producer in Canada or Mexico, in accordance with the principles set forth in the appendix to this part, for calculating the transaction value of the good or of the materials used in the production of the good;

(iv) For purposes of determining whether a good satisfies a regional value-content requirement under General Note 12, HTSUS, and under this part, the appropriate basis or method for reasonably allocating costs, in accordance with the allocation methods set forth in the appendix to this part, for calculating the net cost of the good or the value of an intermediate material;

(v) Whether a good qualifies as an originating good under General Note 12, HTSUS, and under the appendix to this part;

(vi) Whether a good that re-enters the United States after having been exported from the United States to Canada or Mexico for repair or alteration qualifies for duty-free treatment in accordance with § 181.64 of this part;

(vii) Whether the proposed or actual marking of a good satisfies country of origin marking requirements under part 134 of this chapter and under the Marking Rules set forth in part 102 of this chapter;

(viii) Whether an originating good qualifies as a good of Canada or Mexico under Annex 300–B, Annex 302.2 and Chapter Seven of the NAFTA; and

(ix) Whether a good is a qualifying good under Chapter Seven of the NAFTA.

§ 181.93 Submission of advance ruling requests.

(a) *Form.* A request for an advance ruling should be written in the English language and in the form of a letter. For any subject matter specified in § 181.92(b)(6) (i), (v), (vi), (vii), (viii) or (ix) of this part, the request may be directed either to the Commissioner of Customs, Attention: Office of Regulations and Rulings, Washington, DC 20229, or to the National Commodity Specialist Division, United States Customs Service, 6 World Trade Center, New York, NY 10048. For any subject matter specified in § 181.92(b)(6)(ii), (iii) or (iv) of this part, the request must be directed to the Commissioner of Customs, Attention: Office of Regulations and Rulings, Washington, DC 20229.

(b) *Content*—(1) *General.* Each request for an advance ruling must identify the specific subject matter under § 181.92(b)(6) of this part to which the request relates, must contain a complete statement of all relevant facts relating to the NAFTA transaction and must state that the information presented is accurate and complete. The following facts must be included: the names, addresses, and other identifying information of all interested parties (if known); the name of the port or place at which any good involved in the transaction will be imported or which will otherwise have jurisdiction with respect to the act or activity described in the transaction; and a description of the transaction itself, appropriate in detail to the subject matter of the requested advance ruling. Where the request for an advance ruling is submitted by or on behalf of the importer of the good involved in the transaction, the request must include the name and address of the exporter and, if known, producer of the good. Where the request for an advance ruling is submitted by or on behalf of the exporter of the good involved in the transaction, the request must include the name and address of the producer and importer of the good, if known. Where the request for an advance ruling is submitted by or on behalf of the producer of the good involved in the transaction, the request must include the name and address of the exporter and importer of the good, if known. In addition, where relevant to the issue that is the subject of the request for an advance ruling, and regardless of the specific nature of the advance ruling requested, the request must include:

(i) A copy of any advance ruling or other ruling with respect to the tariff classification of the good that has been issued by Customs to the person submitting the request; or

(ii) Sufficient information to enable Customs to classify the good where no advance ruling or other ruling with respect to the tariff classification of the good has been issued by Customs to the person submitting the request. Such information includes a full description of the good, including, where relevant, the composition of the good, a description of the process by which the good is manufactured, a description of the packaging in which the good is contained, the anticipated use of the good and its commercial, common or technical designation, and product literature, drawings, photographs or schematics.

(2) *Description of transaction*—(i) *General.* The prospective Customs transaction to which the advance ruling request relates must be described in sufficient detail to permit proper application of the relevant NAFTA provisions.

(ii) *Tariff change rulings*—(A) *General.* If the transaction involves the importation of a good or material for which a ruling is requested as to whether a change in tariff classification has occurred, the request should set forth: The principal or chief use of the good or material in the United States and the commercial, common, or technical designation of the good or material; if the good or material is composed of two or more substances, the relative quantity (by both weight and by volume) and value of each substance; any applicable special invoicing requirements set forth in part 141 of this chapter (if known); and any other information which may assist in determining the appropriate tariff classification of the good or material. The advance ruling request should also note, whenever germane, the purchase price of the good or material, and its approximate selling price in the United States. Each individual request for an advance ruling must be limited to five merchandise items, all of which must be of the same class or kind. Only NAFTA tariff change rulings will be issued under this subpart. Tariff classification rulings which do not involve the application of the NAFTA shall be issued under part 177 of this chapter.

(B) *Issues involving a change in tariff classification of a material.* Where the request for the advance ruling involves the application of a rule of origin that requires an assessment of whether materials used in the production of an imported good undergo an applicable change in tariff classification, the request must list each material used in the production of the good and must:

(*1*) Identify each material which is claimed to be an originating material and provide a complete description of each such material, including the basis for the claim as to originating status;

(*2*) Identify each material which is a non-originating material, or for which the origin is unknown, and provide a complete description of each such material, including its tariff classification if known; and

(*3*) Describe all processing operations employed in the production of the good, the location of each operation and the sequence in which the operations occur.

(iii) *NAFTA rulings on regional value content.* NAFTA advance ruling requests, if involving the issue of whether a good satisfies a regional value content requirement under the transaction value method or under the net cost method, or under both methods, as provided for in General Note 12, HTSUS, and in the appendix to this part, must specify each method under which eligibility is sought. Where the transaction value method is specified, the advance ruling request must include: information sufficient to calculate the transaction value of the good in accordance with schedule II of the appendix to this part with respect to the transaction of the producer of the good, adjusted to an F.O.B. basis; information sufficient to calculate the value of each non-originating material, or material the origin of which is unknown, that is used by the producer in the production of the good in accordance with the provisions of section 7 and, where applicable, section 6(10) of the appendix to this part; a complete description of each material that is claimed to be an originating material and that is used in the production of the good, including the basis for the claim as to originating status; information sufficient to permit an examination of the factors enumerated in schedule III or VIII of the appendix to this part where the advance ruling request involves an issue of whether, with respect to the good or material under the applicable schedule, the transaction value is acceptable; and information sufficient for any other circumstance to make any determination relevant to the application of the regional value content requirement to the good. Where the net cost method is specified, the advance ruling request must include: a list of all product, period and other costs relevant to determining the total cost of the good as defined in the appendix to this part; a list of all excluded costs to be subtracted from the total cost of the good as provided in the appendix to this part; information sufficient to calculate the value of each non-originating material, or material the origin of which is unknown, that is used in the production of the good, in accordance with section 7 of the appendix to this part; the basis for any allocation of costs in accordance with schedule VII of the appendix to this part; the period over which the net cost calculation is to be made; and any other information relevant to determining the appropriate value of any cost under this part. Where the advance ruling request concerns only the calculation of an element of a regional value content formula, and with regard to the information specified in paragraphs (b)(1) through (b)(5) of this section, the request need only contain the following: the information in paragraph (b)(1), other than the information specified in paragraph (b)(1)(i) or (b)(1)(ii); the information in paragraph (b)(5); and any information in this paragraph (b)(2)(iii) which is relevant to the issue that is the subject of the request.

(iv) *NAFTA rulings on producer materials.* Where the advance ruling request involves an issue with respect to an intermediate material under Article 402(10) of the NAFTA (see section 7(4) of the appendix to this part), the request must contain sufficient information to determine the origin and value of the material in accordance with Article 402(11) of the NAFTA (see section 7(6) of the appendix to this part). Where the advance ruling request is submitted by a Canadian or Mexican producer of a material under § 181.92(b)(5)(iii) of this part and concerns only the origin of such material, and with regard to the information specified in paragraphs (b)(1) through (b)(5) of this section, the request need only include the following: the information in paragraph (b)(1), including any information specified in paragraph (b)(1)(i) or (b)(1)(ii) which is relevant to the issue that is the subject of the request; any information in paragraph (b)(2)(ii)(B) which is relevant to the issue that is the subject of the request; a sample as provided for in paragraph (b)(3) if relevant to the issue that is the subject of the request; and the information in paragraph (b)(5).

(3) *Samples.* Each request for an advance ruling should be accompanied by photographs, drawings, or other

pictorial representations of the good and, whenever possible, by a sample of the good unless a precise description of the good is not essential to the advance ruling requested. Any good consisting of materials in chemical or physical combination for which a laboratory analysis has been prepared by or for the manufacturer should include a copy of that analysis, flow charts, CAS number, and related information. A sample submitted in connection with a request for an advance ruling becomes a part of the Customs file in the matter and will be retained until the advance ruling is issued or the advance ruling request is otherwise disposed of. A sample should only be submitted with the understanding that all or a part of it may be damaged or consumed in the course of examination, testing, analysis, or other actions undertaken in connection with the advance ruling request.

(4) *Related documents.* If the question or questions presented in the advance ruling request directly relate to matters set forth in any invoice, contract, agreement, or other document, a copy of the document must be submitted with the request. (Original documents should not be submitted inasmuch as any documents or exhibits furnished with the advance ruling request become a part of the Customs file in the matter and cannot be returned.) The relevant facts reflected in any documents submitted, and an explanation of their bearing on the question or questions presented, must be expressly set forth in the advance ruling request.

(5) *Prior or current transactions.—(i) General.* Each request for an advance ruling must state:

(A) Whether, to the knowledge of the person submitting the request, the same transaction or issue, or one identical to it, has ever been considered, or is currently being considered by any Customs office;

(B) Whether, to the knowledge of the person submitting the request, the issue involved has ever been, or is currently, the subject of:

(*1*) Review by the United States Court of International Trade, the United States Court of Appeals for the Federal Circuit, or any court of appeal therefrom, or review by a judicial or quasi-judicial body in Canada or Mexico;

(*2*) A verification of origin performed in the United States, Canada or Mexico;

(*3*) An administrative appeal in the United States, Canada or Mexico; or

(*4*) A request for an advance ruling under this subpart, or a request for an advance ruling in Canada or Mexico under an appropriate authority referred to in § 181.76(d)(1) of this part;

(C) The status or disposition of any matter on which an affirmative statement is made under paragraph (b)(5)(i)(B) of this section; and

(D) Whether the transaction described in the advance ruling request is but one of a series of similar and related transactions.

(ii) *Change in status of transaction.* If a prospective transaction which is the subject of an advance ruling request becomes a current transaction, the person who submitted the request shall so notify the office processing the request.

(6) *Statement of position.* If the request for an advance ruling asks that a particular determination or conclusion be reached in the advance ruling letter, a statement must be included in the request setting forth the basis for that determination or conclusion, together with a citation of all relevant supporting authority.

(7) *Privileged or confidential information.* Information which is claimed to constitute trade secrets or privileged or confidential commercial or financial information regarding the business transactions of private parties the disclosure of which would cause substantial harm to the competitive position of the person making the request (or of another interested party) must be identified clearly, and the reasons such information should not be disclosed, including, where applicable, the reasons the disclosure of the information would prejudice the competitive position of the person making the request (or of another interested party), must be set forth. An advance ruling will not be issued until all trade secret, privilege or confidentiality issues are resolved (see § 181.99(a)(3) of this part).

(c) *Signing; instruction as to reply.* The request for an advance ruling must be signed by a person authorized to make the request, as described in § 181.92(b)(5) of this part. An advance ruling requested by a principal or authorized agent may direct that the advance ruling letter be addressed to the other.

(d) *Requests for immediate consideration.* Customs will normally process requests for advance rulings in the order they are received and as expeditiously as possible, as specified in § 181.99 of this part. However, a request that a particular matter be given consideration ahead of its regular order, if made in writing at the time the request is submitted, or subsequent thereto, and showing a clear need for such treatment, will be given consideration as the particular circumstances warrant and permit. Requests for special consideration made by telegram or electronic transmission will be treated in the same manner as requests made by letter, but advance rulings will not be issued by telegram or electronic transmission. A telegram or electronic transmission must be followed up with a signed original within 14 calendar days of the submission of the telegram or electronic transmission. In no event can any assurance be given that a particular request for an advance ruling will be acted upon by the time requested.

§ 181.94 Nonconforming requests for advance rulings.

A person submitting a request for an advance ruling that does not comply with all of the provisions of this subpart will be so notified in writing, and the requirements that have not been met will be pointed out. Such person will be given a period of 30 calendar days from the date of the notice (or such longer period as the notice may provide) to supply any additional information that is requested or otherwise conform the advance ruling request to the requirements referred to in the notice. The Customs file with respect to advance ruling requests which are not brought into compliance with the provisions of this subpart within the period of time allowed will be administratively closed and the request removed from active consideration. A request for an advance ruling that is removed from active consideration by reason of failure to comply with the provisions of this subpart may be treated as withdrawn. A failure to comply with the provisions of this subpart will result in the rejection of the advance ruling request with the notice specifying the deficiencies.

§ 181.95 Oral discussion of issues.

(a) *General.* A person submitting a request for an advance ruling and desiring an opportunity to orally discuss the issue or issues involved should indicate that desire in writing at the time the advance ruling request is filed. Such a discussion will only be scheduled when, in the opinion of the Customs personnel by whom the advance ruling request is under consideration, a conference will be helpful in deciding the issue or issues involved or when a determination or conclusion contrary to that advocated in the advance ruling request is contemplated. Conferences are scheduled for the purpose of affording the parties an opportunity to freely and openly discuss the matters set forth in the advance ruling request. Accordingly, the parties will not be bound by any argument or position advocated or agreed to, expressly or by implication, during the conference unless either party subsequently agrees to be so bound in writing. The conference will not conclude with the issuance of an advance ruling letter.

(b) *Time, place and number of conferences.* If a request for a conference is granted, the person making the request will be notified of the time and place of the conference. No more than one conference with respect to the matters set forth in an advance ruling request will be scheduled, unless, in the opinion of the Customs personnel by whom the advance ruling request is under consideration, additional conferences are necessary.

(c) *Representation.* A person whose request for a conference has been granted may be accompanied at that conference by counsel or other representatives, or may designate such persons to attend the conference in his or her place.

(d) *Additional information presented at conferences.* It will be the responsibility of the person submitting the request for an advance ruling to provide for inclusion in the Customs file in the matter a written record setting forth any and all additional information, documents, and exhibits introduced during the conference to the extent that person considers such material relevant to the consideration of the advance ruling request. Such information, documents and exhibits shall be given consideration only if received by Customs within 30 calendar days following the conference.

§ 181.96 Change in status of transaction.

Each person submitting a request for an advance ruling in connection with a NAFTA transaction must immediately advise Customs in writing of any change in the status of that transaction upon becoming aware of the change. In particular, Customs must be advised when any transaction described in the advance ruling request as prospective becomes current and under the jurisdiction of a Customs field office. In addition, any person engaged in a NAFTA transaction coming under the jurisdiction of a Customs field office who has previously requested a NAFTA advance ruling with respect to that transaction must advise the field office of that fact.

§ 181.97 Withdrawal of NAFTA advance ruling requests.

Any request for an advance ruling may be withdrawn by the person submitting it at any time before the issuance of an advance ruling letter or any other final disposition of the request. All correspondence, documents, and exhibits submitted in connection with the request will be retained in the Customs file and will not be returned. In addition, the Headquarters Office may forward, to Customs field offices which have or may have jurisdiction over the transaction to which the advance ruling request relates, its views in regard to the transaction or the issues involved therein, as well as appropriate information derived from materials in the Customs file.

§ 181.98 Situations in which no NAFTA advance ruling may be issued.

(a) *General.* No advance ruling letter will be issued in response to a request therefor which fails to comply with the provisions of this subpart. No advance ruling letter will be issued in regard to a completed transaction.

(b) *Pending matters.* Where a request for an advance ruling involves an issue that is under review in connection with an origin verification under subpart G of this part or that is the subject of an administrative review procedure provided for in subpart J of this part or in part 174 of this chapter, Customs may decline to issue the requested advance ruling. In addition, no NAFTA advance ruling letter will be issued with respect to any issue which is pending before the United States Court of International Trade, the United States Court of Appeals for the Federal Circuit, or any court of appeal therefrom. Litigation before any other court will not preclude the issuance of an advance ruling letter, provided neither Customs nor any of its officers or agents is named as a party to the action.

§ 181.99 Issuance of NAFTA advance rulings or other advice.

(a) *NAFTA advance ruling letters*—(1) *General.* Except as otherwise provided in paragraph (a)(2) of this section, Customs will, within 120 calendar days of receipt of a request, including any required information supplemental thereto, issue an advance ruling letter in the English language setting forth the position of Customs and the reasons therefor with respect to a specifically described Customs transaction whenever a request for such an advance ruling is submitted in accordance with the provisions of this subpart and it is in the sound administration of the NAFTA provisions to do so. Otherwise, a request for an advance ruling will be answered by an information letter or, in those situations in which general information is likely to be of little or no value, by a letter stating that no advance ruling can be issued. In the course of evaluating the advance ruling request Customs may solicit supplemental information from the person requesting the advance ruling. The submission of supplemental information will extend the time for response. The time for response will also be extended if it is necessary to obtain information from other government agencies or in the form of a laboratory analysis.

(2) *Submission of NAFTA advance ruling letters to field offices.* Any importer engaging in a NAFTA transaction with respect to which an advance ruling letter has been issued under this subpart either must ensure that a copy of the advance ruling letter is attached to the documents filed with the appropriate Customs office in connection with that transaction or must otherwise indicate with the information filed for that transaction that an advance ruling has been received. Any person receiving an advance ruling stating Customs determination must set forth such determination in the documents or information filed in connection with any subsequent entry of that merchandise; failure to do so may result in a rejection of the entry and the imposition of such penalties as may be appropriate. An advance ruling received after the filing of such documents or information must immediately be brought to the attention of the appropriate Customs field office.

(3) *Disclosure of NAFTA advance ruling letters.* No part of the advance ruling letter, including names, addresses, or information relating to the business transactions of private parties, shall be deemed to constitute privileged or confidential commercial or financial information or trade secrets exempt from disclosure pursuant to the Freedom of Information Act, as amended (5 U.S.C. 552), and part 103 of this chapter, or shall be deemed to be subject to the confidentiality principle set forth in § 181.121 of this part, unless, as provided in § 181.93(b)(7) of this part, the information claimed to be exempt from disclosure is clearly identified and a valid basis for nondisclosure is set forth. Before the issuance of the advance ruling letter, the person submitting the advance ruling request will be notified of any decision adverse to his request for nondisclosure and will, upon written request to Customs within 10 working days of the date of notification, be permitted to withdraw the advance ruling request. If in the opinion of Customs an impasse exists on the issue of confidentiality and the person who submitted the advance ruling request does not withdraw the request, Customs

will decline to issue the advance ruling. All advance ruling letters issued by Customs will be available, upon written request, for inspection and copying by any person (with any portions determined to be exempt from disclosure deleted).

(4) *Penalties for misrepresented or omitted material facts or for noncompliance.* If Customs determines that an issued advance ruling was based on incorrect information, the person to whom the advance ruling was issued may be subject to appropriate penalties unless that person demonstrates that he used reasonable care and acted in good faith in presenting the facts and circumstances on which the advance ruling was based. In addition, Customs may apply such measures as the circumstances may warrant in a case where a person to whom an advance ruling was issued has failed to act in accordance with the terms and conditions of the advance ruling.

(b) *Other NAFTA advice and guidance.* The Headquarters Office may on its own initiative from time to time issue other external advice and guidance with respect to issues or transactions arising under the NAFTA which come to its attention. Such NAFTA advice and guidance, which represent the official position of Customs and which are likely to be of widespread interest and application, are published in the Customs Bulletin, as described in § 181.101 of this part. Nothing in this subpart shall preclude Customs from issuing advice and guidance to its field offices concerning the application of the NAFTA.

§ 181.100 Effect of NAFTA advance ruling letters; modification and revocation.

(a) *Effect of NAFTA advance ruling letters*—(1) *General.* An advance ruling letter issued by Customs under the provisions of this subpart represents the official position of Customs with respect to the particular transaction or issue described therein and is binding on all Customs personnel in accordance with the provisions of this subpart until modified or revoked. In the absence of a change of practice or other modification or revocation which affects the principle of the advance ruling set forth in the advance ruling letter, that principle may be cited as authority in the disposition of transactions involving the same circumstances. An advance ruling letter is generally effective on the date it is issued or such later date as may be specified in the advance ruling and, commencing on its effective date, may be applied to entries for consumption and warehouse withdrawals for consumption which are unliquidated, or to other transactions with respect to which Customs has not taken final action on that date. See, however, paragraph (b) of this section (ruling letters which modify previous advance ruling letters) and § 181.101 of this part (advance ruling letters published in the Customs Bulletin).

(2) *Application of NAFTA rulings to transactions*—(i) *General.* Each NAFTA ruling letter is issued on the assumption that all of the information furnished in connection with the ruling request and incorporated in the ruling letter, either directly, by reference, or by implication, is accurate and complete in every material respect. The application of an advance ruling letter by a Customs field office to the transaction to which it is purported to relate is subject to the verification of the facts incorporated in the advance ruling letter, a comparison of the transaction described therein to the actual transaction, and the satisfaction of any conditions on which the advance ruling was based, and if the facts are materially different or a condition has not been satisfied, the treatment specified in the advance ruling will not be applied to the actual transaction. If, in the opinion of any Customs field office by whom the transaction is under consideration or review, the advance ruling letter should be modified or revoked, the findings and recommendations of that office will be forwarded to the Headquarters Office for consideration, prior to any final disposition with respect to the transaction by that office. If the transaction described in the NAFTA advance ruling letter and the actual transaction are the same, and any and all conditions set forth in the advance ruling letter have been satisfied, the advance ruling will be applied to the transaction.

(ii) *Tariff change rulings.* Each advance ruling letter concerning whether a change in tariff classification has occurred will be applied only with respect to transactions involving either articles which are identical to the sample submitted with the advance ruling request and reflect the same processing or articles which conform to the description set forth in the advance ruling letter.

(iii) *Regional value content rulings.* Each advance ruling letter concerning the application of a regional value content requirement will be applied only with respect to transactions involving the same merchandise and identical facts.

(3) *Reliance on NAFTA advance rulings by others.* An advance ruling letter is subject to modification or revocation without notice to any person other than the person to whom the letter was addressed. Accordingly, no other person may rely on the advance ruling letter or assume that the principles of that advance ruling will be applied in connection with any transaction other than the one described in the letter. However, any person eligible to request an advance ruling under § 181.92(b)(5) of this part may request information as to whether a previously-issued advance ruling letter has been modified or revoked by writing the Commissioner of Customs, Attention: Office of Regulations and Rulings, Washington, DC 20229, and either enclosing a copy of the advance ruling letter or furnishing other information sufficient to permit the advance ruling letter in question to be identified.

(b) *Modification or revocation of NAFTA advance ruling letters*—(1) *General.* Any NAFTA advance ruling letter may be modified or revoked by Customs Headquarters in any of the following circumstances or for any of the following purposes, provided that written notice of the modification or revocation is given to the person to whom the advance ruling letter was addressed:

(i) If the ruling letter reflects or is based on an error:

(A) Of fact;

(B) In the tariff classification of a good or material that is the subject of the ruling;

(C) In the application of a regional value-content requirement under General Note 12, HTSUS, and under this part;

(D) In the application of the rules for determining whether a good qualifies as a good of Canada or Mexico under Annex 300–B, Annex 302.2 or Chapter Seven of the NAFTA;

(E) In the application of the rules for determining whether a good is a qualifying good under Chapter Seven of the NAFTA; or

(F) In the application of the rules for determining whether a good qualifies for duty-free treatment under § 181.64 of this part when the good re-enters the United States after having been exported to Canada or Mexico for repair or alteration;

(ii) If the ruling letter is not in accordance with an interpretation agreed on by the United States, Canada and Mexico regarding Chapter Three or Chapter Four of the NAFTA;

(iii) If there is a change in the material facts or circumstances on which the ruling is based;

(iv) To conform to a modification of Chapter Three, Four, Five or Seven of the NAFTA, or of the Marking Rules, or of the regulations set forth in this part; or

(v) To conform to a judicial decision or change in domestic law.

(2) *Application of modification or revocation of NAFTA advance ruling letters.* The modification or revocation of a NAFTA advance ruling letter will not be applied to entries or warehouse withdrawals for consumption which were made prior to the effective date of such modification or revocation, except where the person to whom the advance ruling was issued has not acted in accordance with its terms and conditions.

(3) *Effective dates.* Generally, a NAFTA letter modifying or revoking an earlier advance ruling will be effective on the date it is issued. However, Customs may, upon request or on its own initiative, delay the effective date of such a modification or revocation for a period of up to 90 calendar days from the date of issuance. Such a delay may be granted at the request of the party to whom the ruling letter was issued, provided such party can demonstrate to the satisfaction of Customs that it relied on the earlier advance ruling in good faith and to its detriment. The evidence of such reliance must cover the period from the date of the letter modifying or revoking the advance ruling back to the date of that advance ruling and must list all transactions claimed to be covered by the modified or revoked advance ruling by entry number (or other Customs assigned number), the quantity and value of merchandise covered by each such transaction (where applicable), the ports of entry, and the dates of final action by Customs. Such evidence must also include contracts, purchase orders, or other materials tending to establish that future transactions were arranged based on the earlier advance ruling. The request for delay must specifically identify the prior ruling on which reliance is claimed. All persons requesting a delay will be issued a separate letter setting forth the period, if any, of the delay to be provided. In appropriate circumstances, Customs may decide to make its decision, with respect to a delay, applicable to all persons, irrespective of demonstrated reliance; in this event, a notice announcing the delay will be published in the **Customs Bulletin** and individual ruling letters will not be issued.

§ 181.101 Publication of decisions.

Within 90 days after issuing any precedential decision relating to any NAFTA transaction, Customs shall publish the decision in the **Customs Bulletin** or otherwise make it available for public inspection. Disclosure is governed by 31 CFR part 1, part 103 of this chapter, and § 181.99(a)(3) of this part.

§ 181.102 Administrative and judicial review of advance rulings.

(a) *Administrative review*—(1) *Submission of request for review.* Any person who received an advance ruling issued under this subpart, or an authorized agent of such person, may request administrative review, at Customs Headquarters, of that advance ruling, including any modification or revocation thereof, by letter addressed to the Assistant Commissioner, Office of Regulations and Rulings, U.S. Customs Service, Washington, DC 20229. Such request shall be filed within 30 calendar days after issuance of the advance ruling and shall set forth the following information:

(i) The name and address of the person seeking review and the name and address of his authorized agent if the request is signed by such an agent;

(ii) The Customs identification number or employer identification number in the case of a U.S. importer and authorized agent thereof, the employer number or importer/exporter number assigned by Revenue Canada in the case of a Canadian exporter or producer and authorized agent thereof, and the federal taxpayer registry number (RFC) in the case of a Mexican exporter or producer and authorized agent thereof;

(iii) The number and date of the advance ruling at issue;

(iv) The numbers and dates of any involved entries for consumption or warehouse withdrawals for consumption;

(v) The nature of, and justification for, the objection to the advance ruling set forth distinctly and specifically with respect to each aspect of the advance ruling for which administrative review is sought; and

(vi) Whether an oral discussion of the issues, as provided in § 181.95 of this part, is desired.

(2) *Issuance of review decision.* Customs will normally issue a written decision within 120 days of receipt of the request for administrative review submitted under this section. However, Customs will, upon a reasonable showing of business necessity, issue a written decision within 60 days of receipt of the request for administrative review. For purposes of this paragraph, the date of receipt of the request for administrative review shall be the date on which all information necessary to process the request, including any information provided after submission of the request in connection with a conference, is filed with Customs.

(b) *Judicial review.* Any person whose claims with regard to a request for administrative review of an advance ruling have been denied in whole or in part under this section may seek judicial review by filing a civil action in the United States Court of International Trade in accordance with 28 U.S.C. 2632 within 180 days after the date of mailing of notice of the denial.

Subpart J—Review and Appeal of Adverse Marking Decisions

§ 181.111 Applicability.

This subpart sets forth the circumstances and procedures under which exporters and producers of merchandise imported into the United States may obtain information about, and administrative and judicial review of, an adverse marking decision, as provided for in Article 510 of the NAFTA. This subpart does not apply to the review of advance rulings issued under Article 509 of the NAFTA (see subpart I of this part) or to the review of determinations that a good is not an originating good under General Note 12, HTSUS, and the appendix to this part (see part 174 of this chapter).

§ 181.112 Definitions.

For purposes of this subpart, the following words and phrases have the meanings indicated:

(a) *Adverse marking decision* means a decision made by the port director which an exporter or producer of merchandise believes to be contrary to the provisions of Annex 311 of the NAFTA and which may be protested by the importer pursuant to § 514, Tariff Act of 1930, as amended (19 U.S.C. 1514), and part 174 of this chapter. Notification of an adverse marking decision is given to an importer in the form of a Customs Form 4647 (Notice to Mark and/or Notice to Redeliver) and/or by assessing marking duties on improperly marked merchandise. Examples of adverse marking decisions include determinations by the port director: that an imported article is not a good of a NAFTA country, as determined under the Marking Rules, and that it therefore cannot be marked "Canada" or "Mexico"; that a good of a NAFTA country is not marked in a manner which is sufficiently permanent; and that a good of a NAFTA country does not qualify for an exception from marking specified in Annex 311 of the NAFTA. Adverse marking decisions do not include: decisions issued in response to requests for advance rulings under subpart I of

this part or for internal advice under part 177 of this chapter; decisions on protests under part 174 of this chapter; and determinations that an article does not qualify as an originating good under General Note 12, HTSUS, and the appendix to this part.

(b) An *exporter* of merchandise is an exporter located in Canada or Mexico who must maintain records in that country relating to the transaction to which the adverse marking decision relates. The records must be sufficient to enable Customs to evaluate the merits of the exporter's claim(s) regarding the adverse marking decision.

(c) A *producer* of merchandise is a person who grows, mines, harvests, fishes, traps, hunts, manufactures, processes or assembles such merchandise in Canada or Mexico.

§ 181.113 Request for basis of adverse marking decision.

(a) *Request; form and filing.* The exporter or producer of the merchandise which is the subject of an adverse marking decision may request a statement concerning the basis for the decision by filing a typewritten request, in English, with the port director who issued the decision. The request should be on letterhead paper in the form of a letter and clearly designated as a "Request for Basis of Adverse Marking Decision" and shall be signed by the exporter, producer or his authorized agent. The provisions of § 174.3 of this chapter shall apply for purposes of signature by a person other than the principal.

(b) *Content.* The Request for Basis of Adverse Marking Decision letter shall set forth the following information:

(1) The name and address of the exporter or producer of the merchandise and the name and address of any authorized agent filing the request on behalf of such principal;

(2) A statement that the inquirer is the exporter or producer of the merchandise that was the subject of the adverse marking decision;

(3) In the case of a Canadian exporter or producer, the employer number assigned by Revenue Canada, Customs and Excise; in the case of a Mexican exporter or producer, the Federal taxpayer registry number (RFC); and the Customs identification number of an authorized agent filing the request on behalf of such principal;

(4) The number and date of each entry involved in the request;

(5) A specific description of the merchandise which is the subject of the adverse marking decision; and

(6) A complete statement of all relevant facts relating to the adverse marking decision and the transaction to which it relates, including the date of the decision.

§ 181.114 Customs response to request.

(a) *Time for response.* The port director will issue a written response to the requestor within 30 days of receipt of a request containing the information specified in § 181.113 of this part. If the request is incomplete, such that the transaction in question cannot be identified, the port director will notify the requestor in writing within 30 days of receipt of the request regarding what information is needed.

(b) *Content.* The response by the port director shall include the following:

(1) A statement concerning the basis for the adverse marking decision;

(2) A copy of the relevant Customs Form 4647 (Notice to Mark and/or Notice to Redeliver), if one was issued to the importer and is available. If the basis for the adverse marking decision is indicated on the Customs Form 4647, no statement under paragraph (b)(1) of this section is required;

(3) A statement as to whether the importer has filed a protest regarding the adverse marking decision and, if so, where the protest was filed and the protest number; and

(4) A statement concerning the exporter's or producer's right to either intervene in the importer's protest as provided in § 181.115 of this part or file a petition as provided in § 181.116 of this part.

§ 181.115 Intervention in importer's protest.

(a) *Conditional right to intervene.* An exporter or producer of merchandise does not have an independent right to protest an adverse marking decision. However, if an importer protests the adverse marking decision in accordance with section 514, Tariff Act of 1930, as amended (19 U.S.C. 1514), and part 174 of this chapter, the exporter or producer of the merchandise which is the subject of the adverse marking decision may intervene in the importer's protest. Such intervention shall not affect any time limits applicable to the protest or delay action on the protest.

(b) *Form and filing of intervention.* In order to intervene in an importer's protest, as provided for in paragraph (a) of this section, the exporter or producer of the merchandise shall file, in triplicate, a typewritten statement of intervention, in English, with the port director with whom the protest was filed. The statement should be on letterhead paper in the form of a letter and should be clearly designated "NAFTA Exporter or Producer Intervention in Protest". The statement shall be signed by the exporter, producer or his authorized agent. The provisions of § 174.3 of this chapter shall apply for purposes of signature by a person other than the principal.

(c) *Content.* The NAFTA Exporter or Producer Intervention in Protest letter shall include the following:

(1) The name and address of the exporter or producer of the merchandise and the name and address of any authorized agent filing the request on behalf of such principal;

(2) In the case of a Canadian exporter or producer, the employer number assigned by Revenue Canada, Customs and Excise; in the case of a Mexican exporter or producer, the Federal taxpayer registry number (RFC); and the Customs identification number of an authorized agent filing the request on behalf of such principal;

(3) The number and date of each entry involved in the adverse marking decision;

(4) A specific description of the merchandise which is the subject of the adverse marking decision;

(5) A complete statement of all relevant facts relating to the adverse marking decision and the transaction to which it relates, including the date of the decision;

(6) A detailed statement of position regarding why the exporter or producer believes the adverse marking decision is contrary to the provision of Annex 311 of the NAFTA;

(7) A statement as to whether a Request for Basis of Adverse Marking Decision was filed under § 181.113 of this part, and if so, the date of such Request and of any Customs response thereto issued under § 181.114 of this part. Copies of the Request and the Customs response shall be submitted, if available;

(8) The number assigned to the importer's protest;

(9) A statement that the intervenor is the exporter or producer of the merchandise that was the subject of the adverse marking decision being protested by the importer and, if the intervenor is the exporter, a statement that it maintains sufficient records to enable Customs to evaluate the merits of its claim(s) regarding the adverse marking decision; and

(10) If the intervenor prefers that the principle of confidentiality set forth in § 181.121 of this part be applied to the information submitted under this section, a statement to that effect. If no such statement is included in the letter, the intervention and information submitted in connection therewith shall be subject to the same treatment as that

provided in the case of requests by all interested parties for consolidation of protests as set forth in § 174.15(b)(1) of this chapter.

(d) *Effect of Intervention.* The rights of the intervenor under this section are subordinate to the importer's protest rights. Accordingly, intervention by an exporter or producer of merchandise will not affect the procedures under part 174 of this chapter, and the importer's elections concerning accelerated disposition and application for further review of the protest will govern how the protest is handled and how the intervention is considered. If the importer withdraws or settles the protest, the exporter or producer has no right to continue the intervention action.

(e) *Action by port director.* If final administrative action has already been taken with respect to the importer's protest at the time the intervention is filed, the port director shall so advise the exporter or producer and, if the importer has filed a civil action in the Court of International Trade as a result of a denial of the protest, the port director shall advise the exporter or producer of that filing and of the exporter's or producer's right to seek to intervene in such judicial proceeding. If final administrative action has not been taken on the protest, the port director shall forward the intervention letter to the Customs office which has the importer's protest under review for consideration in connection with the protest.

(f) *Final disposition.* The intervenor shall be notified in writing of the final disposition of the protest. If the protest is denied in whole or in part, the intervenor shall be furnished a copy of the notice given to the importer under § 174.29.

§ 181.116 Petition regarding adverse marking decision.

(a) *Right to petition.* If the importer does not protest an adverse marking decision in accordance with section 514, Tariff Act of 1930, as amended (19 U.S.C. 1514), and part 174 of this chapter, the exporter or producer of the merchandise which was the subject of the adverse marking decision may file a petition with Customs requesting reconsideration of the decision. The petition may not be filed until after the importer's time to protest the adverse marking decision has expired (see § 174.12(e) of this chapter for the time limits for filing protests). If the importer filed a protest upon which final administrative action has been taken, the exporter or producer may file a petition under this section, provided that the exporter or producer was not given notice of the pending protest pursuant to § 181.114 of this part. If the importer filed a protest on which final administrative action has not been taken and notice of the pending protest was not provided to the exporter or producer under § 181.114 of this part, a petition filed under this section shall be treated by the port director as an intervention under § 181.115 of this part.

(b) *Form and filing of petition.* A petition under this section shall be typewritten, in English, and shall be filed, in triplicate, with the port director who issued the adverse marking decision. The petition under this subpart should be on letterhead paper in the form of a letter, clearly designated as a "Petition for NAFTA Review of Adverse Marking Decision" and shall be signed by the exporter, producer or his authorized agent. The provisions of § 174.3 of this chapter shall apply for purposes of signature by a person other than the principal.

(c) *Content.* The Petition for NAFTA Review of Adverse Marking Decision letter shall contain all the information specified § 181.115 of this part, except for the protest number. It shall also include a statement that petitioner was not notified by Customs in writing of a pending protest.

(d) *Review of petition*—(1) *Review by port director.* Within 60 days of the date of receipt of the petition, the port director shall determine if the petition is to be granted or denied, in whole or in part. If, after reviewing the petition, the port director agrees with all of the petitioner's claims and determines that the initial adverse marking decision was not correct, a written notice granting the petition shall be issued to the petitioner. A description of the merchandise, a brief summary of the issue(s) and the port director's findings shall be forwarded to the Director, Tariff Classification Appeals Division, Customs Headquarters, for publication in the Customs Bulletin. If, after reviewing the petition, the port director determines that the initial adverse marking decision was correct in its entirety, a written notice shall be issued to the petitioner advising that the matter has been forwarded to the Director, Tariff Classification Appeals Division, Customs Headquarters, for further review and decision. All relevant background information, including available samples, a description of the adverse marking decision and the reasons for the decision, and the port director's recommendation shall be furnished to Headquarters.

(2) *Review by Headquarters.* Within 120 days of the date the petition and background information are received at Customs Headquarters, the Director, Tariff Classification Appeals Division, shall determine if the petition is to be granted or denied, in whole or in part, and the petitioner shall be notified in writing of the determination. If the petition is granted in whole or in part, a description of the merchandise, a brief summary of the issue(s) and the director's findings will be published in the Customs Bulletin.

(3) *Effect of granting the petition.* The decision on the petition, if contrary to the initial adverse marking decision, will be implemented with respect to merchandise entered or withdrawn from warehouse for consumption after 30 days from the date on which the notice of determination is published in the Customs Bulletin.

(e) *Pending litigation.* No decision on a petition will be issued under this section with respect to any issue which is pending before the United States Court of International Trade, the United States Court of Appeals for the Federal Circuit, or any court of appeal therefrom. Litigation before any other court will not preclude the issuance of a decision on a petition under this section, provided neither Customs nor any of its officers or agents is named as a party to the action.

(f) *Judicial review of denial of petition.*

Any person whose petition under this section has been denied, in whole or in part, may contest the denial by filing a civil action in the United States Court of International Trade within 30 days after the date of mailing of the notice of denial.

Subpart K—Confidentiality of Business Information

§ 181.121 Maintenance of confidentiality.

The port director or other Customs officer who has possession of confidential business information collected pursuant to this part shall, in accordance with part 103 of this chapter, maintain its confidentiality and protect it from any disclosure that could prejudice the competitive position of the persons providing the information.

§ 181.122 Disclosure to government authorities.

Nothing in § 181.121 of this part shall preclude the disclosure of confidential business information to governmental authorities in the United States responsible for the administration and enforcement of determinations of origin and of customs and revenue matters.

Subpart L—Rules of Origin

§ 181.131 Rules of origin.

(a) The regulations effective October 1, 1995, implementing the rules of origin provisions of General Note 12, HTSUS, and Chapter Four of the NAFTA are contained in the appendix to this part.

(b) If the fiscal year of a producer of goods begins before October 1, 1995, the producer may choose to have the regulations implementing the rules of origin provisions of General Note 12, HTSUS, and Chapter Four of the NAFTA that were in effect prior to October 1, 1995 (see 19 CFR chapter I, 1994 edition, appendix to part 181) continue to apply in regard to all goods produced by that producer for the remainder of that fiscal year.

(c) If a motor vehicle producer's fiscal year that has been chosen by a producer of goods pursuant to section 12(5) of the regulations referred to in paragraph (b) of this section begins before October 1, 1995, the producer of the goods may choose to have those regulations continue to apply in regard to the goods produced by that producer for the remainder of that fiscal year, provided that:

(1) The producer of the goods has made an election under section 12(1) of those regulations or has provided a statement referred to in section 9(6) or 10(8) of those regulations that states the value of non-originating materials determined in accordance with section 12(3) of those regulations; and

(2) The period chosen under section 12(5) of those regulations is the fiscal year of the motor vehicle producer to whom those goods are sold.

Appendix to Part 181—Rules of Origin Regulations

SECTION 1. CITATION

This Appendix may be cited as the *NAFTA Rules of Origin Regulations.*

PART I

SECTION 2. DEFINITIONS AND INTERPRETATION

Definitions

(1) For purposes of this Appendix,

"accessories, spare parts or tools that are delivered with a good and form part of the good's standard accessories, spare parts or tools" means goods that are delivered with a good, whether or not they are physically affixed to that good, and that are used for the transport, protection, maintenance or cleaning of the good, for instruction in the assembly, repair or use of that good, or as replacements for consumable or interchangeable parts of that good;

"adjusted to an F.O.B. basis" means, with respect to a good, adjusted by
  (a) deducting
    (i) the costs of transporting the good after it is shipped from the point of direct shipment,
    (ii) the costs of unloading, loading, handling and insurance that are associated with that transportation, and
    (iii) the cost of packing materials and containers,
  where those costs are included in the transaction value of the good, and
  (b) adding
    (i) the costs of transporting the good from the place of production to the point of direct shipment,
    (ii) the costs of loading, unloading, handling and insurance that are associated with that transportation, and
    (iii) the costs of loading the good for shipment at the point of direct shipment,
  where those costs are not included in the transaction value of the good;

"Agreement" means the *North American Free Trade Agreement;*

"applicable change in tariff classification" means, with respect to a non-originating material used in the production of a good, a change in tariff classification specified in a rule set out in Schedule I for the tariff provision under which the good is classified;

"automotive component" means a good that is referred to in column I of an item of Schedule V;

"automotive component assembly" means a good, other than a heavy-duty vehicle, that incorporates an automotive component;

"costs incurred in packing" means, with respect to a good or material, the value of the packing materials and containers in which the good or material is packed for shipment and the labor costs incurred in packing it for shipment, but does not include the costs of preparing and packaging it for retail sale;

"customs value" means
  (a) in the case of Canada, value for duty as defined in the *Customs Act*, except that for purposes of determining that value the reference in section 55 of that Act to "in accordance with the regulations made under the *Currency Act*" shall be read as a reference to "in accordance with subsection 3(1) of these Regulations",
  (b) in the case of Mexico, the *valor en aduana* as determined in accordance with the *Ley Aduanera,* converted, in the event such value is not expressed in Mexican currency, to Mexican currency at the rate of exchange determined in accordance with subsection 3(1) of these Regulations, and
  (c) in the case of the United States, the value of imported merchandise as determined by the Customs Service in accordance with section 402 of the *Tariff Act of 1930,* as amended, converted, in the event such value is not expressed in United States currency, to United States currency at the rate of exchange determined in accordance with subsection 3(1) of these Regulations.

"days" means calendar days, and includes weekends and holidays;

"direct labor costs" means costs, including fringe benefits, that are associated with employees who are directly involved in the production of a good;

"direct material costs" means the value of materials, other than indirect materials and packing materials and containers, that are used in the production of a good;

"direct overhead" means costs, other than direct material costs and direct labor costs, that are directly associated with the production of a good;

"enterprise" means any entity constituted or organized under applicable laws, whether or not for profit and whether privately owned or governmentally owned, including any corporation, trust, partnership, sole proprietorship, joint venture or other association;

"excluded costs" means sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and non-allowable interest costs;

"fungible goods" means goods that are interchangeable for commercial purposes and the properties of which are essentially identical;

"fungible materials" means materials that are interchangeable for commercial purposes and the properties of which are essentially identical;

"Harmonized System" means the Harmonized Commodity Description and Coding System, including its General Rules of Interpretation, Section Notes and Chapter Notes, as set out in

(a) in the case of Canada, the *Customs Tariff*,

(b) in the case of Mexico, the *Tarifa de la Ley del Impuesto General de Importación*, and

(c) in the case of the United States, the *Harmonized Tariff Schedule of the United States;*

"heavy-duty vehicle" means a motor vehicle provided for in any of heading 8701, tariff items 8702.10.30 and 8702.90.30 (vehicles for the transport of 16 or more persons), subheadings 8704.10, 8704.22, 8704.23, 8704.32 and 8704.90 and heading 8705 and 8706;

"identical goods" means, with respect to a good, goods that

(a) are the same in all respects as that good, including physical characteristics, quality and reputation but excluding minor differences in appearance,

(b) were produced in the same country as that good, and

(c) were produced

(i) by the producer of that good, or

(ii) by another producer, where no goods that satisfy the requirements of paragraphs (a) and (b) were produced by the producer of that good;

"identical materials" means, with respect to a material, materials that

(a) are the same as that material in all respects, including physical characteristics, quality and reputation but excluding minor differences in appearance,

(b) were produced in the same country as that material, and

(c) were produced

(i) by the producer of that material, or

(ii) by another producer, where no materials that satisfy the requirements of paragraphs (a) and (b) were produced by the producer of that material;

"incorporated" means, with respect to the production of a good, a material that is physically incorporated into that good, and includes a material that is physically incorporated into another material before that material or any subsequently produced material is used in the production of the good;

"indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, and includes

(a) fuel and energy,

(b) tools, dies and molds,

(c) spare parts and materials used in the maintenance of equipment and buildings,

(d) lubricants, greases, compounding materials and other materials used in production or used to operate equipment and buildings,

(e) gloves, glasses, footwear, clothing, safety equipment and supplies,

(f) equipment, devices and supplies used for testing or inspecting the other goods,

(g) catalysts and solvents, and

(h) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be part of that production;

"interest costs" means all costs paid or payable by a person to whom credit is, or is to be advanced, for the advancement of credit or the obligation to advance credit;

"intermediate material" means a self-produced material that is used in the production of a good and is designated as an intermediate material under section 7(4) ;

"light-duty automotive good" means a light-duty vehicle or a good of a tariff provision listed in Schedule IV that is subject to a regional value-content requirement and is for use as original equipment in the production of a light-duty vehicle;

"light-duty vehicle" means a motor vehicle provided for in any of tariff items 8702.10.60 and 8702.90.60 (vehicles for the transport of 15 or fewer persons) and subheadings 8703.21 through 8703.90, 8704.21 and 8704.31;

"listed material" means a good that is referred to in column II of an item of Schedule V;

"location of the producer" means,

(a) where the warehouse or other receiving station at which a producer receives materials for use by the producer in the production of a good is located within a radius of 75 km (46.60 miles) from the place at which the producer produces the good, the location of that warehouse or other receiving station, and

(b) in any other case, the place at which the producer produces the good in which a material is to be used;

"material" means a good that is used in the production of another good, and includes a part or ingredient;

"motor vehicle assembler" means a producer of motor vehicles and any related person with whom, or joint venture in which, the producer participates with respect to the production of motor vehicles;

"month" means a calendar month;

"NAFTA country" means a Party to the Agreement;

"national" means a natural person who is a citizen or permanent resident of a NAFTA country, and includes

(a) with respect to Mexico, a national or citizen according to Articles 30 and 34, respectively, of the Mexican Constitution, and

(b) with respect to the United States, a "national of the United States" as defined in the *Immigration and Nationality Act* on the date of entry into force of the Agreement;

"net cost method" means the method of calculating the regional value content of a good that is set out in section 6(3);

"non-allowable interest costs" means interest costs incurred by a producer on the producer's debt obligations that are more than 700 basis points above the yield on debt obligations of comparable maturities issued by the federal government of the country in which the producer is located;

"non-originating good" means a good that does not qualify as originating under this Appendix;

"non-originating material" means a material that does not qualify as originating under this Appendix;

"original equipment" means a material that is incorporated into a motor vehicle before the first transfer of title or consignment of the motor vehicle to a person who is not a motor vehicle assembler, and that is

(a) a good of a tariff provision listed in Schedule IV, or

(b) an automotive component assembly, automotive component, sub-component or listed material;

"originating good" means a good that qualifies as originating under this Appendix;

"originating material" means a material that qualifies as originating under this Appendix;

"other costs," with respect to total cost, means all costs that are not product costs or period costs;

"packaging materials and containers" means materials and containers in which a good is packaged for retail sale;

"packing materials and containers" means materials and containers that are used to protect a good during transportation, but does not include packaging materials and containers;

"payments" means, with respect to royalties and sales promotion, marketing and after-sales service costs, the costs expensed on the books of a producer, whether or not an actual payment is made;

"period costs" means costs, other than product costs, that are expensed in the period in which they are incurred;

"person" means a natural person or an enterprise;

"person of a NAFTA country" means a national, or an enterprise constituted or organized under the laws of a NAFTA country;

"point of direct shipment" means the location from which a producer of a good normally ships that good to the buyer of the good;

"producer" means a person who grows, mines, harvests, fishes, traps, hunts, manufactures, processes or assembles a good;

"product costs" means costs that are associated with the production of a good, and includes the value of materials, direct labor costs and direct overhead;

"production" means growing, mining, harvesting, fishing, trapping, hunting, manufacturing, processing or assembling a good;

"related person" means a person related to another person on the basis that

(a) they are officers or directors of one another's businesses,

(b) they are legally recognized partners in business,

(c) they are employer and employee,

(d) any person directly or indirectly owns, controls or holds 25 percent or more of the outstanding voting stock or shares of each of them,

(e) one of them directly or indirectly controls the other,

(f) both of them are directly or indirectly controlled by a third person, or

(g) they are members of the same family (members of the same family are natural or adopted children, brothers, sisters, parents, grandparents, or spouses);

"reusable scrap or by-product" means waste and spoilage that is generated by the producer of a good and that is used in the production of a good or sold by that producer;

"right to use," for purposes of the definition of royalties, includes the right to sell or distribute a good;

"royalties" means payments of any kind, including payments under technical assistance agreements or similar agreements, made as consideration for the use of, or right to use, any copyright, literary, artistic, or scientific work, patent, trademark, design, model, plan, secret formula or process, excluding those payments under technical assistance agreements or similar agreements that can be related to specific services such as

(a) personnel training, without regard to where performed, and

(b) if performed in the territory of one or more of the NAFTA countries, engineering, tooling, die-setting, software design and similar computer services, or other services;

"sales promotion, marketing and after-sales service costs" means the following costs related to sales promotion, marketing and after-sales service:

(a) sales and marketing promotion; media advertising; advertising and market research; promotional and demonstration materials; exhibits; sales conferences, trade shows and conventions; banners; marketing displays; free samples; sales, marketing and after-sales service literature (product brochures, catalogs, technical literature, price lists, service manuals, sales aid information); establishment and protection of logos and trademarks; sponsorships; wholesale and retail restocking charges; entertainment;

(b) sales and marketing incentives; consumer, retailer or wholesaler rebates; merchandise incentives;

(c) salaries and wages, sales commissions, bonuses, benefits (for example, medical, insurance, pension), traveling and living expenses, membership and professional fees, for sales promotion, marketing and after-sales service personnel;

(d) recruiting and training of sales promotion, marketing and after-sales service personnel, and after-sales training of customers' employees, where such costs are identified separately for sales promotion, marketing and after-sales service of goods on the financial statements or cost accounts of the producer;

(e) product liability insurance;

(f) office supplies for sales promotion, marketing and after-sales service of goods, where such costs are identified separately for sales promotion, marketing and after-sales service of goods on the financial statements or cost accounts of the producer;
(g) telephone, mail and other communications, where such costs are identified separately for sales promotion, marketing and after-sales service of goods on the financial statements or cost accounts of the producer;
(h) rent and depreciation of sales promotion, marketing and after-sales service offices and distribution centers;
(i) property insurance premiums, taxes, cost of utilities, and repair and maintenance of sales promotion, marketing and after-sales service offices and distribution centers, where such costs are identified separately for sales promotion, marketing and after-sales service of goods on the financial statements or cost accounts of the producer; and
(j) payments by the producer to other persons for warranty repairs;
"self-produced material" means a material that is produced by the producer of a good and used in the production of that good;
"shipping and packing costs" means the costs incurred in packing a good for shipment and shipping the good from the point of direct shipment to the buyer, excluding the costs of preparing and packaging the good for retail sale;
"similar goods" means, with respect to a good, goods that
  (a) although not alike in all respects to that good, have similar characteristics and component materials that enable the goods to perform the same functions and to be commercially interchangeable with that good,
  (b) were produced in the same country as that good, and
  (c) were produced
    (i) by the producer of that good, or
    (ii) by another producer, where no goods that satisfy the requirements of paragraphs (a) and (b) were produced by the producer of that good;
"similar materials" means, with respect to a material, materials that
  (a) although not alike in all respects to that material, have similar characteristics and component materials that enable the materials to perform the same functions and to be commercially interchangeable with that material,
  (b) were produced in the same country as that material, and (c) were produced
    (i) by the producer of that material, or
    (ii) by another producer, where no materials that satisfy the requirements of paragraphs (a) and (b) were produced by the producer of that material;
"subject to a regional value-content requirement" means, with respect to a good, that the provisions of this Appendix that are applied to determine whether the good is an originating good include a regional value-content requirement;
"sub-component" means a good that comprises a listed material and one or more other materials or listed materials;
"tariff provision" means a heading, subheading or tariff item;
"territory" means, with respect to
  (a) Canada, the territory to which its customs laws apply, including any areas beyond the territorial seas of Canada within which, in accordance with international law and its domestic law, Canada may exercise rights with respect to the seabed and subsoil and their natural resources,
  (b) Mexico,
    (i) the states of the Federation and the Federal District,
    (ii) the islands, including the reefs and keys, in adjacent seas,
    (iii) the islands of Guadalupe and Revillagigedo situated in the Pacific Ocean,
    (iv) the continental shelf and the submarine shelf of such islands, keys and reefs,
    (v) the waters of the territorial seas, in accordance with international law, and its interior maritime waters,
    (vi) the space located above the national territory, in accordance with international law, and
    (vii) any areas beyond the territorial seas of Mexico within which, in accordance with international law, including the United Nations Convention on the Law of the Sea, and its domestic law, Mexico may exercise rights with respect to the seabed and subsoil and their natural resources, and
  (c) the United States,
    (i) the customs territory of the United States, which includes the 50 states, the District of Columbia and Puerto Rico,
    (ii) the foreign trade zones located in the United States and Puerto Rico, and
    (iii) any areas beyond the territorial seas of the United States within which, in accordance with international law and its domestic law, the United States may exercise rights with respect to the seabed and subsoil and their natural resources;
"total cost" means the total of all product costs, period costs and other costs incurred in the territory of one or more of the NAFTA countries;
"transaction value method" means the method of calculating the regional value content of a good that is set out in subsection 6(2);
"used" means used or consumed in the production of a good;
"verification of origin" means a verification of origin of goods under
  (a) in the case of Canada, paragraph 42.1(1)(a) or subsection 42.2(2) of the *Customs Act*,
  (b) in the case of Mexico, Article 506 of the Agreement, and
  (c) in the case of the United States, section 509 of the *Tariff Act* of 1930, as amended.

Interpretation: "similar"

(2) For purposes of the definitions of "similar goods" and "similar materials," the quality of the goods or materials, their reputation and the existence of a trademark are among the factors to be considered for purposes of determining whether goods or materials are similar.

Interpretation: terms used to refer to HTSUS; use of term "books"

(3) For purposes of this Appendix,
  (a) "chapter," unless otherwise indicated, refers to a chapter of the Harmonized System;
  (b) "heading" refers to any four-digit number, or the first four digits of any number, set out in the column "Heading/Subheading" in the Harmonized System;
  (c) "subheading" refers to any six-digit number, or the first six digits of any number, set out in the column "Heading/Subheading" in the Harmonized System;
  (d) "tariff item" refers to any eight-digit number set out in the column "Heading/Subheading" in the Harmonized System;
  (e) any reference to a tariff item in Chapter Four of the Agreement or this Appendix that includes letters shall be reflected as the appropriate eight-digit number in the Harmonized System as implemented in each NAFTA country; and
  (f) "books" refers to,
    (i) with respect to the books of a person who is located in a NAFTA country,
      (A) books and other documents that support the recording of revenues, expenses, costs, assets and liabilities and that are maintained in accordance with Generally Accepted Accounting Principles set out in the publications listed in Schedule XII with respect to the territory of the NAFTA country in which the person is located, and
      (B) financial statements, including note disclosures, that are prepared in accordance with Generally Accepted Accounting Principles set out in the publications listed in Schedule XII with respect to the territory of the NAFTA country in which the person is located, and
    (ii) with respect to the books of a person who is located outside the territories of the NAFTA countries,
      (A) books and other documents that support the recording of revenues, expenses, costs, assets and liabilities and that are maintained in accordance with generally accepted accounting principles applied in that location or, where there are no such principles, in accordance with the International Accounting Standards, and
      (B) financial statements, including note disclosures, that are prepared in accordance with generally accepted accounting principles applied in that location or, where there are no such principles, in accordance with the International Accounting Standards.

Use of Examples to illustrate the application of a provision

(4) Where an example, referred to as an "Example," is set out in this Appendix, the example is for purposes of illustrating the application of a provision, and where there is any inconsistency between the example and the provision, the provision prevails to the extent of the inconsistency.

References to domestic laws

(5) Except as otherwise provided, references in this Appendix to domestic laws of the NAFTA countries apply to those laws as they may be amended or superseded.

Calculation of total cost

(6) For purposes of sections 5(9), 6(11) and 7(6) and sections 10(1)(a) (i) and (ii),
  (a) total cost consists of all product costs, period costs and other costs that are recorded, except as otherwise provided in paragraphs (b) (i) and (ii), on the books of the producer without regard to the location of the persons to whom payments with respect to those costs are made;
  (b) in calculating total cost,
    (i) the value of materials, other than intermediate materials, indirect materials and packing materials and containers, shall be the value determined in accordance with section 7(1),
    (ii) the value of intermediate materials used in the production of the good or material with respect to which total cost is being calculated shall be calculated in accordance with section 7(6),
    (iii) the value of indirect materials and the value of packing materials and containers shall be the costs that are recorded on the books of the producer for those materials, and
    (iv) product costs, period costs and other costs, other than costs referred to in subparagraphs (i) and (ii), shall be the costs thereof that are recorded on the books of the producer for those costs;
  (c) total cost does not include profits that are earned by the producer, regardless of whether they are retained by the producer or paid out to other persons as dividends, or taxes paid on those profits, including capital gains taxes;
  (d) gains related to currency conversion that are related to the production of the good shall be deducted from total cost, and losses related to currency conversion that are related to the production of the good shall be included in total cost; and
  (e) the value of materials with respect to which production is accumulated under section 14 shall be determined in accordance with that section.
(7) For purposes of calculating total cost under sections 5(9) and 7(6) and sections 10(1)(a) (i) and (ii),
  (a) where the regional value content of the good is calculated on the basis of the net cost method and the producer has chosen under section 6(15), 11 (1), (3) or (6), 12(5) or 13(4) to calculate the regional value content over a period, the total cost shall be calculated over that period; and
  (b) in any other case, the producer may choose that the total cost be calculated over
    (i) a month,
    (ii) any consecutive three month or six month period that falls within and is evenly divisible into the number of months of the producer's fiscal year remaining at the beginning of that period, or
    (iii) the producer's fiscal year.
(8) A choice made under subsection (7) may not be rescinded or modified with respect to the good or material, or the period, with respect to which the choice is made.

(9) Where a producer chooses a one, three or six month period under subsection (7) with respect to a good or material, the producer shall be considered to have chosen under that subsection a period or periods of the same duration for the remainder of the producer's fiscal year with respect to that good or material.

(10) With respect to a good exported to a NAFTA country, a choice to average is considered to have been made

(a) in the case of a choice referred to in section 11 (1), (3) or (6) or 13(4), if the choice is received by the customs administration of that NAFTA country; and

(b) in the case of a choice referred to in section 2(7), 6(15) or 12(1), if the customs administration of that NAFTA country is informed in writing during the course of a verification of the origin of the good that the choice has been made.

SECTION 3. CURRENCY CONVERSION

(1) Where the value of a good or a material is expressed in a currency other than the currency of the country in which the producer of the good is located, that value shall be converted to the currency of the country in which that producer is located on the basis of

(a) in the case of the sale of that good or the purchase of that material, the rate of exchange used by the producer for purposes of recording that sale or purchase, as the case may be; and

(b) in the case of a material that is acquired by the producer other than by a purchase,

(i) where the producer used a rate of exchange for purposes of recording another transaction in that other currency that occurred within 30 days of the date on which the producer acquired the material, that rate, and

(ii) in any other case,

(A) with respect to a producer located in Canada, the rate of exchange referred to in section 5 of the *Currency Exchange for Customs Valuation Regulations* for the date on which the material was shipped directly to the producer,

(B) with respect to a producer located in Mexico, the rate of exchange published by the *Banco de Mexico* in the *Diario Oficial de la Federacion*, under the title "*TIPO de cambio para solventar obligaciones denominadas en moneda extranjera pagaderas en la Republica Mexicana*", for the date on which the material was shipped directly to the producer, and

(C) with respect to a producer located in the United States, the rate of exchange referred to in 31 U.S.C. 5151 for the date on which the material was shipped directly to the producer.

(2) Where a producer of a good has a statement referred to in section 9, 10 or 14 that includes information in a currency other than the currency of the country in which that producer is located, the currency shall be converted to the currency of the country in which the producer is located on the basis of

(a) if the material was purchased by the producer in the same currency as the currency in which the information in the statement is provided, the rate of exchange used by the producer for purposes of recording the purchase;

(b) if the material was purchased by the producer in a currency other than the currency in which the information in the statement is provided,

(i) where the producer used a rate of exchange for purposes of recording a transaction in that other currency that occurred within 30 days of the date on which the producer acquired the material, that rate, and

(ii) in any other case,

(A) with respect to a producer located in Canada, the rate of exchange referred to in section 5 of the *Currency Exchange for Customs Valuation Regulations* for the date on which the material was shipped directly to the producer,

(B) with respect to a producer located in Mexico, the rate of exchange published by the *Banco de Mexico* in the *Diario Oficial de la Federacion*, under the title "*TIPO de cambio para solventar obligaciones denominadas en moneda extranjera pagaderas en la Republica Mexicana*", for the date on which the material was shipped directly to the producer, and

(C) with respect to a producer located in the United States, the rate of exchange referred to in 31 U.S.C. 5151 for the date on which the material was shipped directly to the producer; and

(c) if the material was acquired by the producer other than by a purchase,

(i) where the producer used a rate of exchange for purposes of recording a transaction in that other currency that occurred within 30 days of the date on which the producer acquired the material, that rate, and

(ii) in any other case,

(A) with respect to a producer located in Canada, the rate of exchange referred to in section 5 of the *Currency Exchange for Customs Valuation Regulations* for the date on which the material was shipped directly to the producer,

(B) with respect to a producer located in Mexico, the rate of exchange published by the *Banco de Mexico* in the *Diario Oficial de la Federacion*, under the title "*TIPO de cambio para solventar obligaciones denominadas en moneda extranjera pagaderas en la Republica Mexicana*", for the date on which the material was shipped directly to the producer, and

(C) with respect to a producer located in the United States, the rate of exchange referred to in 31 U.S.C. 5151 for the date on which the material was shipped directly to the producer.

PART II

SECTION 4. ORIGINATING GOODS

Identification of goods which are "wholly obtained or produced"

(1) A good originates in the territory of a NAFTA country where the good is

(a) a mineral good extracted in the territory of one or more of the NAFTA countries;

(b) a vegetable or other good harvested in the territory of one or more of the NAFTA countries;

(c) a live animal born and raised in the territory of one or more of the NAFTA countries;

(d) a good obtained from hunting, trapping or fishing in the territory of one or more of the NAFTA countries;

(e) fish, shellfish or other marine life taken from the sea by a vessel registered or recorded with a NAFTA country and flying its flag;

(f) a good produced on board a factory ship from a good referred to in paragraph (e), where the factory ship is registered or recorded with the same NAFTA country as the vessel that took that good and flies that country's flag;

(g) a good taken by a NAFTA country or a person of a NAFTA country from or beneath the seabed outside the territorial waters of that country, where a NAFTA country has the right to exploit that seabed;

(h) a good taken from outer space, where the good is obtained by a NAFTA country or a person of a NAFTA country and is not processed outside the territories of the NAFTA countries;

(i) waste and scrap derived from

(i) production in the territory of one or more of the NAFTA countries, or

(ii) used goods collected in the territory of one or more of the NAFTA countries, where those goods are fit only for the recovery of raw materials; or

(j) a good produced in the territory of one or more of the NAFTA countries exclusively from a good referred to in any of paragraphs (a) through (i), or from the derivatives of such a good, at any stage of production.

Goods made from non-originating materials: change in tariff classification requirement; regional value-content requirement

(2) A good originates in the territory of a NAFTA country where

(a) each of the non-originating materials used in the production of the good undergoes the applicable change in tariff classification as a result of production that occurs entirely in the territory of one or more of the NAFTA countries, where the applicable rule in Schedule I for the tariff provision under which the good is classified specifies only a change in tariff classification, and the good satisfies all other applicable requirements of this Appendix;

(b) each of the non-originating materials used in the production of the good undergoes the applicable change in tariff classification as a result of production that occurs entirely in the territory of one or more of the NAFTA countries and the good satisfies the applicable regional value-content requirement, where the applicable rule in Schedule I for the tariff provision under which the good is classified specifies both a change in tariff classification and a regional value-content requirement, and the good satisfies all other applicable requirements of this Appendix; or

(c) the good satisfies the applicable regional value-content requirement, where the applicable rule in Schedule I for the tariff provision under which the good is classified specifies only a regional value-content requirement, and the good satisfies all other applicable requirements of this Appendix.

Goods made exclusively from originating materials

(3) A good originates in the territory of a NAFTA country where the good is produced entirely in the territory of one or more of the NAFTA countries exclusively from originating materials.

Exceptions to the change in tariff classification requirement

(4) A good originates in the territory of a NAFTA country where

(a) except in the case of a good provided for in any of Chapters 61 through 63,

(i) the good is produced entirely in the territory of one or more of the NAFTA countries,

(ii) one or more of the non-originating materials used in the production of the good do not undergo an applicable change in tariff classification because the materials were imported together, whether or not with originating materials, into the territory of a NAFTA country as an unassembled or disassembled good, and were classified as an assembled good pursuant to Rule 2(a) of the General Rules for the Interpretation of the Harmonized System,

(iii) the regional value content of the good, calculated in accordance with section 6, is not less than 60 percent where the transaction value method is used, or is not less than 50 percent where the net cost method is used, and

(iv) the good satisfies all other applicable requirements of this Appendix, including any applicable, higher regional value-content requirement provided for in section 13 or Schedule I; or

(b) except in the case of a good provided for in any of Chapters 61 through 63,

(i) the good is produced entirely in the territory of one or more of the NAFTA countries,

(ii) one or more of the non-originating materials used in the production of the good do not undergo an applicable change in tariff classification because

(A) those materials are provided for under the Harmonized System as parts of the good, and

(B) the heading for the good provides for both the good and its parts and is not further subdivided into subheadings, or the subheading for the good provides for both the good and its parts,

(iii) the non-originating materials that do not undergo a change in tariff classification in the circumstances described in subparagraph (ii) and the good are not both classified as parts of goods under the heading or subheading referred to in subparagraph (ii)(B),

(iv) each of the non-originating materials that is used in the production of the good and is not referred to in subparagraph (iii) undergoes an applicable change in tariff classification or satisfies any other applicable requirement set out in Schedule I,

(v) the regional value content of the good, calculated in accordance with section 6, is not less than 60 percent where the transaction value method is used, or is not less than 50 percent where the net cost method is used, and

(vi) the good satisfies all other applicable requirements of this Appendix, including any applicable, higher regional value-content requirement provided for in section 13 or Schedule I.

Interpretation: heading or subheading which provides for both a good and parts of the good

(5) For purposes of subsection (4)(b),

(a) the determination of whether a heading or subheading provides for a good and its parts shall be made on the basis of the nomenclature of the heading or subheading and the relevant Section or Chapter Notes, in accordance with the General Rules for the Interpretation of the Harmonized System; and

(b) where, in accordance with the Harmonized System, a heading includes parts of goods by application of a Section Note or Chapter Note of the Harmonized System and the subheadings under that heading do not include a subheading designated "Parts", a subheading designated "Other" under that heading shall be considered to cover only the goods and parts of the goods that are themselves classified under that subheading.

(6) For purposes of subsection (2), where Schedule I sets out two or more alternative rules for the tariff provision under which a good is classified, if the good satisfies the requirements of one of those rules, it need not satisfy the requirements of another of the rules in order to qualify as an originating good.

Special rule for certain goods

(7) A good originates in the territory of a NAFTA country if the good is referred to in Table 308.1.1 of Section B of Annex 308.1 to Chapter Three of the Agreement and is imported from the territory of a NAFTA country at a time when the NAFTA countries' most-favored-nation rate of duty for that good is in accordance with paragraph 1 of Section A of that Annex.

Self-produced material may be a material for determining applicability of rules of origin

(8) For purposes of determining whether non-originating materials undergo an applicable change in tariff classification, a self-produced material may, at the choice of the producer of a good into which the self-produced material is incorporated, be considered as an originating material or non-originating material, as the case may be, used in the production of that good.

(9) The following example is an "Example" as referred to in section 2(4).

Example: section 4(8), Self-produced Materials as Materials for Purposes of Determining Whether Non-originating Materials Undergo an Applicable Change in Tariff Classification

Producer A, located in a NAFTA country, produces Good A. In the production process, Producer A uses originating Material X and non-originating Material Y to produce Material Z. Material Z is a self-produced material that will be used to produce Good A.

The rule set out in Schedule I for the heading under which Good A is classified specifies a change in tariff classification from any other heading. In this case, both Good A and the non-originating Material Y are of the same heading. However, the self-produced Material Z is of a heading different than that of Good A.

For purposes of determining whether the non-originating materials that are used in the production of Good A undergo the applicable change in tariff classification, Producer A has the option to consider the self-produced Material Z as the material that must undergo a change in tariff classification. As Material Z is of a heading different than that of Good A, Material Z satisfies the applicable change in tariff classification and Good A would qualify as an originating good.

SECTION 5. DE MINIMIS

De minimis rule for non-originating materials that do not undergo subject to authorization, a required tariff change

(1) Except as otherwise provided in subsection (4), a good shall be considered to originate in the territory of a NAFTA country where the value of all non-originating materials that are used in the production of the good and that do not undergo an applicable change in tariff classification as a result of production occurring entirely in the territory of one or more of the NAFTA countries is not more than seven percent

(a) of the transaction value of the good determined in accordance with Schedule II with respect to the transaction in which the producer of the good sold the good, adjusted to an F.O.B. basis, or

(b) of the total cost of the good, where there is no transaction value for the good under section 2(1) of Schedule III or the transaction value of the good is unacceptable under section 2(2) of that Schedule,

provided that,

(c) if, under the rule in which the applicable change in tariff classification is specified, the good is also subject to a regional value-content requirement, the value of those non-originating materials shall be taken into account in calculating the regional value content of the good in accordance with the method set out for that good, and

(d) the good satisfies all other applicable requirements of this Appendix.

(2) For purposes of subsection (1), where

(a) Schedule I sets out two or more alternative rules for the tariff provision under which the good is classified, and

(b) the good, in accordance with subsection (1), is considered to originate under one of those rules,

the good is not required to satisfy the requirements specified in any alternative rule referred to in paragraph (a).

(3) For purposes of subsection (1), in the case of a good that is provided for in heading 2402, the percentage shall be nine percent instead of seven percent.

Exceptions

(4) Subsections (1) and (2) do not apply to

(a) a non-originating material provided for in Chapter 4 or tariff items 1901.90.31, 1901.90.41 and 1901.90.81 (dairy preparations containing over 10 percent by weight of milk solids) that is used in the production of a good provided for in Chapter 4;

(b) a non-originating material provided for in Chapter 4 or tariff items 1901.90.31, 1901.90.41 and 1901.90.81 (dairy preparations containing over 10 percent by weight of milk solids) that is used in the production of a good provided for in any of tariff items 1901.10.10 (infant preparations containing over 10 percent by weight of milk solids), 1901.20.10 (mixes and doughs, containing over 25 percent by weight of butterfat, not put up for retail sale), 1901.90.31, 1901.90.41 and 1901.90.81 (dairy preparations containing over 10 percent by weight of milk solids), heading 2105 and tariff items 2106.90.05, 2106.90.13, 2106.90.41, 2106.90.51 and 2106.90.61 (preparations containing over 10 percent by weight of milk solids), 2202.90.10 and 2202.90.20 (beverages containing milk) and 2309.90.31 (animal feeds containing over 10 percent by weight of milk solids);

(c) a non-originating material provided for in any of heading 0805 and subheadings 2009.11 through 2009.30 that is used in the production of a good provided for in any of subheadings 2009.11 through 2009.30 and tariff items 2106.90.16 and 2106.90.17 (concentrated fruit or vegetable juice of any single fruit or vegetable, fortified with minerals or vitamins) and 2202.90.30, 2202.90.35 and 2202.90.36 (fruit or vegetable juice of any single fruit or vegetable, fortified with minerals or vitamins);

(d) a non-originating material provided for in Chapter 9 that is used in the production of a good provided for in tariff item 2101.10.21 (instant coffee, not flavored);

(e) a non-originating material provided for in Chapter 15 that is used in the production of a good provided for in any of headings 1501 through 1508, 1512, 1514 and 1515;

(f) a non-originating material provided for in heading 1701 that is used in the production of a good provided for in any of headings 1701 through 1703;

(g) a non-originating material provided for in Chapter 17 or heading 1805 that is used in the production of a good provided for in subheading 1806.10; (h) a non-originating material provided for in any of headings 2203 through 2208 that is used in the production of a good provided for in any of headings 2207 through 2208;

(i) a non-originating material that is used in the production of a good provided for in any of tariff item 7321.11.30 (gas stove or range), subheadings 8415.10, 8415.81 through 8415.83, 8418.10 through 8418.21, 8418.29 through 8418.40, 8421.12, 8422.11, 8450.11 through 8450.20 and 8451.21 through 8451.29, Mexican tariff item 8479.82.03 (trash compactors) or Canadian or U.S. tariff item 8479.89.55 (trash compactors), and tariff item 8516.60.40 (electric stove or range);

(j) a printed circuit assembly that is a non-originating material used in the production of a good, where the applicable change in tariff classification for the good places restrictions on the use of that non-originating material, such as by prohibiting, or limiting the quantity of, that non-originating material;

(k) a non-originating material that is a single juice ingredient provided for in heading 2009 that is used in the production of a good provided for in any of subheading 2009.90 and tariff items 2106.90.18 (concentrated mixtures of fruit or vegetable juice, fortified with minerals or vitamins) and 2202.90.37 (mixtures of fruit or vegetable juices, fortified with minerals or vitamins);

(l) a non-originating material that is used in the production of a good provided for in any of Chapters 1 through 27, unless the non-originating material is of a different subheading than the good for which origin is being determined under this section; or

(m) a non-originating material that is used in the production of a good provided for in any of Chapters 50 through 63.

De minimis rule for regional value-content requirement

(5) A good that is subject to a regional value-content requirement shall be considered to originate in the territory of a NAFTA country and shall not be required to satisfy that requirement where

(a) the value of all non-originating materials used in the production of the good is not more than seven percent

(i) of the transaction value of the good determined in accordance with Schedule II with respect to the transaction in which the producer of the good sold the good, adjusted to an F.O.B. basis, or

(ii) of the total cost of the good, where there is no transaction value for the good under section 2(1) of Schedule III or the transaction value of the good is unacceptable under section 2(2) of that Schedule; and

(b) the good satisfies all other applicable requirements of this Appendix.

De minimis rule for textile goods

(6) A good provided for in any of Chapters 50 through 63, that does not originate in the territory of a NAFTA country because certain fibers or yarns that are used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification as a result of production occurring entirely in the territory of one or more of the NAFTA countries, shall be considered to originate in the territory of a NAFTA country if

(a) the total weight of all those fibers or yarns is not more than seven percent of the total weight of that component; and

(b) the good satisfies all other applicable requirements of this Appendix.

(7) For purposes of subsection (6),

(a) the component of a good that determines the tariff classification of that good shall be identified in accordance with the first of the following General Rules for the Interpretation of the Harmonized System under which the identification can be determined, namely, Rule 3(b), Rule 3(c) and Rule 4; and

(b) where the component of the good that determines the tariff classification of the good is a blend of two or more yarns or fibers, all yarns and fibers used in the production of the component shall be taken into account in determining the weight of fibers and yarns in that component.

(8) For purposes of subsections (1) and (5), the value of non-originating materials shall be determined in accordance with sections 7(1) through (4).

Calculation of "total cost" for de minimis rules: choice of methods

(9) For purposes of subsection (1)(b) and subsection (5)(a)(ii), the total cost of a good shall be, at the choice of the producer of the good,

(a) the total cost incurred with respect to all goods produced by the producer that can be reasonably allocated to that good in accordance with Schedule VII; or

(b) the aggregate of each cost that forms part of the total cost incurred with respect to that good that can be reasonably allocated to that good in accordance with Schedule VII.

Calculation of total cost; application of Schedules IX and X for determining value of non-originating materials

(10) Total cost under subsection (9) consists of the costs referred to in section 2(6), and is calculated in accordance with that subsection and section 2(7).

(11) For purposes of determining the value under subsection (1) of non-originating materials that do not undergo an applicable change in tariff classification, where Schedule X is not being used to determine the value of those non-originating materials,

(a) if the value of those non-originating materials is being determined as a percentage of the transaction value of the good and the producer chooses under section 6(10) that one of the methods set out in Schedule IX be used to determine the value of those non-originating materials for purposes of calculating the regional value content of the good, the value of those non-originating materials shall be determined in accordance with that method;

(b) if

(i) the value of those non-originating materials is being determined as a percentage of the total cost of the good,

(ii) under the rule in which the applicable change in tariff classification is specified, the good is also subject to a regional value-content requirement and subsection (5)(a) does not apply with respect to that good,

(iii) the regional value content of the good is calculated on the basis of the net cost method, and

(iv) the producer chooses under section 6(15), 11(1), (3) or (6), 12(1) or 13(4) that the regional value content of the good be calculated over a period,

the value of those non-originating materials shall be the sum of the values of non-originating materials determined in accordance with that choice, divided by the number of units of the goods with respect to which the choice is made;

(c) if

(i) the value of those non-originating materials is being determined as a percentage of the total cost of the good,

(ii) under the rule in which the applicable change in tariff classification is specified, the good is not also subject to a regional value-content requirement or subsection (5)(a) applies with respect to that good, and

(iii) the producer chooses under section 2(7)(b) that, for purposes of section 5(9), the total cost of the good be calculated over a period,

the value of those non-originating materials shall be the sum of the values of non-originating materials divided by the number of units produced during that period; and

(d) in any other case, the value of those non-originating materials may, at the choice of the producer, be determined in accordance with one of the methods set out in Schedule IX.

(12) For purposes of subsection (5), the value of the non-originating materials used in the production of the good may, at the choice of the producer, be determined in accordance with one of the methods set out in Schedule IX.

Examples illustrating de minimis rules

(13) Each of the following examples is an "Example" as referred to in section 2(4).

Example 1: section 5(1)

Producer A, located in a NAFTA country, uses originating materials and non-originating materials in the production of copper anodes provided for in heading 7402. The rule set out in Schedule I for heading 7402 specifies a change in tariff classification from any other chapter. There is no applicable regional value-content requirement for this heading. Therefore, in order for the copper anode to qualify as an originating good under the rule set out in Schedule I, Producer A may not use in the production of the copper anode any non-originating material provided for in Chapter 74.

All of the materials used in the production of the copper anode are originating materials, with the exception of a small amount of copper scrap provided for in heading 7404, that is in the same chapter as the copper anode. Under section 5(1), if the value of the non-originating copper scrap does not exceed seven percent of the transaction value of the copper anode or the total cost of the copper anode, whichever is applicable, the copper anode would be considered an originating good.

Example 2: section 5(2)

Producer A, located in a NAFTA country, uses originating materials and non-originating materials in the production of ceiling fans provided for in subheading 8414.51. There are two alternative rules set out in Schedule I for subheading 8414.51, one of which specifies a change in tariff classification from any other heading. The other rule specifies both a change in tariff classification from the subheading under which parts of the ceiling fans are classified and a regional value-content requirement. Therefore, in order for the ceiling fan to qualify as an originating good under the first of the alternative rules, all of the materials that are classified under the subheading for parts of ceiling fans and used in the production of the completed ceiling fan must be originating materials.

In this case, all of the non-originating materials used in the production of the ceiling fan satisfy the change in tariff classification set out in the rule that specifies a change in tariff classification from any other heading, with the exception of one non-originating material that is classified under the subheading for parts of ceiling fans. Under section 5(1), if the value of the non-originating material that does not satisfy the change in tariff classification specified in the first rule does not exceed seven percent of the transaction value of the ceiling fan or the total cost of the ceiling fan, whichever is applicable, the ceiling fan would be considered an originating good. Therefore, under section 5(2), the ceiling fan would not be required to satisfy the alternative rule that specifies both a change in tariff classification and a regional value-content requirement.

Example 3: section 5(2)

Producer A, located in a NAFTA country, uses originating materials and non-originating materials in the production of plastic bags provided for in subheading 3923.29. The rule set out in Schedule I for subheading 3923.29 specifies both a change in tariff classification from any other heading, except from subheadings 3920.20 or 3920.71, under which certain plastic materials are classified, and a regional value-content requirement. Therefore, with respect to that part of the rule that specifies a change in tariff classification, in order for the plastic bag to qualify as an originating good, any plastic materials that are classified under subheading 3920.20 or 3920.71 and that are used in the production of the plastic bag must be originating materials.

In this case, all of the non-originating materials used in the production of the plastic bag satisfy the specified change in tariff classification, with the exception of a small amount of plastic materials classified under subheading 3920.71. Section 5(1) provides that the plastic bag can be considered an originating good if the value of the non-originating plastic materials that do not satisfy the specified change in tariff classification does not exceed seven percent of the transaction value of the plastic bag or the total cost of the plastic bag, whichever is applicable. In this case, the value of those non-originating materials that do not satisfy the specified change in tariff classification does not exceed the seven percent limit.

However, the rule set out in Schedule I for subheading 3923.29 specifies both a change in tariff classification and a regional value-content requirement. Therefore, under section 5(1)(c), in order to be considered an originating good, the plastic bag must also, except as otherwise provided in section 5(5), satisfy the regional value-content requirement specified in that rule. As provided in section 5(1)(c), the value of the non-originating materials that do not satisfy the specified change in tariff classification, together with the value of all other non-originating materials used in the production of the plastic bag, will be taken into account in calculating the regional value content of the plastic bag.

Example 4: section 5(5)

Producer A, located in a NAFTA country, primarily uses originating materials in the production of shoes provided for in heading 6405. The rule set out in Schedule I for heading 6405 specifies both a change in tariff classification from any subheading other than subheadings 6401.10 through 6406.10 and a regional value-content requirement.

With the exception of a small amount of materials provided for in Chapter 39, all of the materials used in the production of the shoes are originating materials.

Under section 5(5), if the value of all of the non-originating materials used in the production of the shoes does not exceed seven percent of the transaction value of the shoes or the total cost of the shoes, whichever is applicable, the shoes are not required to satisfy the regional value-content requirement specified in the rule set out in Schedule I in order to be considered originating goods.

Example 5: section 5(5)

Producer A, located in a NAFTA country, produces barbers' chairs provided for in subheading 9402.10. The rule set out in Schedule I for goods provided for in heading 9402 specifies a change in tariff classification from any other chapter. All of the materials used in the production of these chairs are originating materials, with the exception of a small quantity of non-originating materials that are classified as parts of barbers' chairs. These parts undergo no change in tariff classification because subheading 9402.10 provides for both barbers' chairs and their parts.

Although Producer A's barbers' chairs do not qualify as originating goods under the rule set out in Schedule I, section 4(4)(b) provides, among other things, that, where there is no change in tariff classification from the non-originating materials to the goods because the subheading under which the goods are classified provides for both the goods and their parts, the goods shall qualify as originating goods if they satisfy a specified regional value-content requirement.

However, under section 5(5), if the value of the non-originating materials does not exceed seven percent of the transaction value of the barbers' chairs or the total cost of the barbers' chairs, whichever is applicable, the barbers' chairs will be considered originating goods and are not required to satisfy the regional value-content requirement set out in section 4(4)(b)(v).

Example 6: sections 5 (6) and (7)

Producer A, located in a NAFTA country, produces women's dresses provided for in subheading 6204.41 from fine wool fabric of heading 5112. This fine wool fabric, also produced by Producer A, is the component of the dress that determines its tariff classification under subheading 6204.41.

The rule set out in Schedule I for subheading 6204.41, under which the dress is classified, specifies both a change in tariff classification from any other chapter, except from those headings and chapters under which certain yarns and fabrics, including combed wool yarn and wool fabric, are classified, and a requirement that the good be cut and sewn or otherwise assembled in the territory of one or more of the NAFTA countries.

Therefore, with respect to that part of the rule that specifies a change in tariff classification, in order for the dress to qualify as an originating good, the combed wool yarn and the fine wool fabric made therefrom that are used by Producer A in the production of the dress must be originating materials.

At one point Producer A uses a small quantity of non-originating combed wool yarn in the production of the fine wool fabric. Under section 5(6), if the total weight of the non-originating combed wool yarn does not exceed seven percent of the total weight of all the yarn used in the production of the component of the dress that determines its tariff classification, that is, the wool fabric, the dress would be considered an originating good.

PART III

SECTION 6. REGIONAL VALUE CONTENT

(1) Except as otherwise provided in subsection (6), the regional value content of a good shall be calculated, at the choice of the exporter or producer of the good, on the basis of either the transaction value method or the net cost method.

Transaction Value Method

(2) The transaction value method for calculating the regional value content of a good is as follows:

$$RVC = \frac{TV - VNM}{TV} \times 100$$

where

RVC is the regional value content of the good, expressed as a percentage;

TV is the transaction value of the good, determined in accordance with Schedule II with respect to the transaction in which the producer of the good sold the good, adjusted to an F.O.B. basis; and

VNM is the value of non-originating materials used by the producer in the production of the good, determined in accordance with section 7.

Net Cost Method

(3) The net cost method for calculating the regional value content of a good is as follows:

$$RVC = \frac{NC - VNM}{NC} \times 100$$

where

RVC is the regional value content of the good, expressed as a percentage;
NC is the net cost of the good, calculated in accordance with subsection (11); and
VNM is the value of non-originating materials used by the producer in the production of the good, determined, except as otherwise provided in sections 9 and 10, in accordance with section 7.

VNM does not include value of non-originating materials used in originating material

(4) Except as otherwise provided in section 9 and section 10(1)(d), for purposes of calculating the regional value content of a good under subsection (2) or (3), the value of non-originating materials used by a producer in the production of the good shall not include

(a) the value of any non-originating materials used by another producer in the production of originating materials that are subsequently acquired and used by the producer of the good in the production of that good; or

(b) the value of any non-originating materials used by the producer in the production of a self-produced material that is an originating material and is designated as an intermediate material.

(5) For purposes of subsection (4),

(a) in the case of any self-produced material that is not designated as an intermediate material, only the value of any non-originating materials used in the production of the self-produced material shall be included in the value of non-originating materials used in the production of the good; and

(b) where a self-produced material that is designated as an intermediate material and is an originating material is used by the producer of the good with non-originating materials (whether or not those non-originating materials are produced by that producer) in the production of the good, the value of those non-originating materials shall be included in the value of non-originating materials.

Net Cost Method required in certain circumstances

(6) The regional value content of a good shall be calculated only on the basis of the net cost method where

(a) there is no transaction value for the good under section 2(1) of Schedule III;

(b) the transaction value of the good is unacceptable under section 2(2) of Schedule III;

(c) the good is sold by the producer to a related person and the volume, by units of quantity, of sales by that producer of identical goods or similar goods, or any combination thereof, to related persons during the six month period immediately preceding the month in which the goods are sold exceeds 85 percent of the producer's total sales to all persons, whether or not related and regardless of location, after "the producer's total sales"of identical goods or similar goods, or any combination thereof, during that period;

(d) the good is

- (i) a motor vehicle provided for in any of headings 8701 and 8702, subheadings 8703.21 through 8703.90 and headings 8704, 8705 and 8706,
- (ii) a good provided for in a tariff provision listed in Schedule IV or an automotive component assembly, automotive component, sub-component or listed material, and is for use in a motor vehicle referred to in subparagraph (i), either as original equipment or as an after-market part,
- (iii) a good provided for in any of subheadings 6401.10 through 6406.10, or
- (iv) a good provided for in tariff item 8469.10.40 (word processing machines);

(e) the exporter or producer chooses to accumulate with respect to the good in accordance with section 14; or

(f) the good is an intermediate material and is subject to a regional value-content requirement.

Option to change from TVM to NCM for calculation of regional value content

(7) If the exporter or producer of a good calculates the regional value content of the good on the basis of the transaction value method and the customs administration of a NAFTA country subsequently notifies that exporter or producer in writing, during the course of a verification of origin, that

(a) the transaction value of the good, as determined by the exporter or producer, is required to be adjusted under section 4 of Schedule II or is unacceptable under section 2(2) of Schedule III, there is no transaction value for the good under section 2(1) of Schedule III or the transaction value method may not be used because of the application of subsection (6)(c), or

(b) the value of any material used in the production of the good, as determined by the exporter or producer, is required to be adjusted under section 5 of Schedule VIII or is unacceptable under section 2(3) of Schedule VIII, or there is no transaction value for the material under section 2(2) of Schedule VIII or the transaction value method may not be used to calculate the regional value content of the material because of the application of subsection (6)(c),

the exporter or producer may choose that the regional value content of the good be calculated on the basis of the net cost method, in which case the calculation must be made within 60 days after the producer receives the notification, or such longer period as that customs administration specifies.

Change from NCM to TVM not permitted

(8) If the exporter or producer of a good chooses that the regional value content of the good be calculated on the basis of the net cost method and the customs administration of a NAFTA country subsequently notifies that exporter or producer in writing, during the course of a verification of origin, that the good does not satisfy the applicable regional value-content requirement, the exporter or producer of the good may not recalculate the regional value content on the basis of the transaction value method.

(9) Nothing in subsection (7) shall be construed as preventing any review and appeal under Article 510 of the Agreement, as implemented in each NAFTA country, of an adjustment to or a rejection of

(a) the transaction value of the good; or

(b) the value of any material used in the production of the good.

Application of Schedule IX for determining value of "identical" non-originating materials under TVM

(10) For purposes of the transaction value method, where non-originating materials that are the same as one another in all respects, including physical characteristics, quality and reputation but excluding minor differences in appearance, are used in the production of a good, the value of those non-originating materials may, at the choice of the producer of the good, be determined in accordance with one of the methods set out in Schedule IX.

Options for calculating the net cost of a good

(11) For purposes of subsection (3), the net cost of a good may be calculated, at the choice of the producer of the good, by

(a) calculating the total cost incurred with respect to all goods produced by that producer, subtracting any excluded costs that are included in that total cost, and reasonably allocating, in accordance with Schedule VII, the remainder to the good;

(b) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating, in accordance with Schedule VII, that total cost to the good, and subtracting any excluded costs that are included in the amount allocated to that good; or

(c) reasonably allocating, in accordance with Schedule VII, each cost that forms part of the total cost incurred with respect to the good so that the aggregate of those costs does not include any excluded costs.

Calculation of total cost

(12) Total cost under subsection (11) consists of the costs referred to in section 2(6), and is calculated in accordance with that subsection.

Calculation of net cost; excluded costs

(13) For purposes of calculating net cost under subsection (11),

(a) excluded costs shall be the excluded costs that are recorded on the books of the producer of the good;

(b) excluded costs that are included in the value of a material that is used in the production of the good shall not be subtracted from or otherwise excluded from the total cost; and

(c) excluded costs do not include any amount paid for research and development services performed in the territory of a NAFTA country.

Non-allowable interest; determination under Schedule XI

(14) For purposes of calculating non-allowable interest costs, the determination of whether interest costs incurred by a producer are more than 700 basis points above the yield on debt obligations of comparable maturities issued by the federal government of the country in which the producer is located shall be made in accordance with Schedule XI.

Use of "averaging" over a period to calculate RVC under NCM; period cannot be changed

(15) For purposes of the net cost method, the regional value content of the good, other than a good with respect to which a choice to average may be made under section 11(1), (3) or (6), 12(1) or 13(4), may be calculated, where the producer chooses to do so, by

(a) calculating the sum of the net costs incurred and the sum of the values of non-originating materials used by the producer of the good with respect to the good and identical goods or similar goods, or any combination thereof, produced in a single plant by the producer over

- (i) a month,
- (ii) any consecutive three month or six month period that falls within and is evenly divisible into the number of months of the producer's fiscal year remaining at the beginning of that period, or
- (iii) the producer's fiscal year; and

(b) using the sums referred to in paragraph (a) as the net cost and the value of non-originating materials, respectively.

(16) The calculation made under subsection (15) shall apply with respect to all units of the good produced during the period chosen by the producer under subsection (15)(a).

(17) A choice made under subsection (15) may not be rescinded or modified with respect to the goods or the period with respect to which the choice is made.

Choice of averaging period cannot be changed for remainder of fiscal year

(18) Where a producer chooses a one, three or six month period under subsection (15) with respect to goods, the producer shall be considered to have chosen under that subsection a period or periods of the same duration for the remainder of the producer's fiscal year with respect to those goods.

Choice of net cost method cannot be changed for remainder of the fiscal year

(19) Where the net cost method is required to be used or has been chosen and a choice has been made under subsection (15), the regional value content of the good shall be calculated on the basis of the net cost method over the period chosen under that subsection and for the remainder of the producer's fiscal year.

Obligation to perform self-analysis and give notification of changed circumstance if RVC calculated on basis of estimated costs

(20) Except as otherwise provided in sections 11(10), 12(11) and 13(10), where the producer of a good has calculated the regional value content of the good under the net cost method on the basis of estimated costs, including standard costs, budgeted forecasts or other similar estimating procedures, before or during the period chosen in subsection (15)(a), the producer shall conduct an analysis at the end of the producer's fiscal year of the actual costs incurred over the period with respect to the production of the good and, if the good does not satisfy the regional value-content requirement on the basis of the actual costs during that period, immediately inform any person to whom the producer has provided a Certificate of Origin for the good, or a written statement that the good is an originating good, that the good is a non-originating good.

Option to treat any material as non-originating

(21) For purposes of calculating the regional value content of a good, the producer of that good may choose to treat any material used in the production of that good as a non-originating material.

Examples of Calculation of RVC under TVM and NCM

(22) Each of the following examples is an "Example" as referred to in section 2(4).

Example 1: example of point of direct shipment (with respect to adjusted to an F.O.B. basis)

A producer has only one factory, at which the producer manufactures finished office chairs. Because the factory is located close to transportation facilities, all units of the finished good are stored in a factory warehouse 200 meters from the end of the production line. Goods are shipped worldwide from this warehouse. The point of direct shipment is the warehouse.

Example 2: examples of point of direct shipment (with respect to adjusted to an F.O.B. basis)

A producer has six factories, all located within the territory of one of the NAFTA countries, at which the producer produces garden tools of various types. These tools are shipped worldwide, and orders usually consist of bulk orders of various types of tools. Because different tools are manufactured at different factories, the producer decided to consolidate storage and shipping facilities and ships all finished products to a large warehouse located near the seaport, from which all orders are shipped. The distance from the factories to the warehouse varies from 3 km to 130 km. The point of direct shipment for each of the goods is the warehouse.

Example 3: examples of point of direct shipment (with respect to adjusted to an F.O.B. basis)

A producer has only one factory, located near the center of one of the NAFTA countries, at which the producer manufactures finished office chairs. The office chairs are shipped from that factory to three warehouses leased by the producer, one on the west coast, one near the factory and one on the east coast. The office chairs are shipped to buyers from these warehouses, the shipping location depending on the shipping distance from the buyer. Buyers closest to the west coast warehouse are normally supplied by the west coast warehouse, buyers closest to the east coast are normally supplied by the warehouse located on the east coast and buyers closest to the warehouse near the factory are normally supplied by that warehouse. In this case, the point of direct shipment is the location of the warehouse from which the office chairs are normally shipped to customers in the location in which the buyer is located.

Example 4: section 6(3), net cost method

A producer located in NAFTA country A sells Good A that is subject to a regional value-content requirement to a buyer located in NAFTA country B. The producer of Good A chooses that the regional value content of that good be calculated using the net cost method. All applicable requirements of this Appendix, other than the regional value-content requirement, have been met. The applicable regional value-content requirement is 50 percent.

In order to calculate the regional value-content of Good A, the producer first calculates the net cost of Good A. Under section 6(11)(a), the net cost is the total cost of Good A (the aggregate of the product costs, period costs and other costs) per unit, minus the excluded costs (the aggregate of the sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and non-allowable interest costs) per unit. The producer uses the following figures to calculate the net cost:

Product costs:	
Value of originating materials	$30.00
Value of non-originating materials	40.00
Other product costs	20.00
Period costs	10.00
Other costs	0.00
Total cost of Good A, per unit	$100.00
Excluded costs:	
Sales promotion, marketing and after-sales service cost	$5.00
Royalties	2.50
Shipping and packing costs	3.00
Non-allowable interest costs	1.50
Total excluded costs	$12.00

The net cost is the total cost of Good A, per unit, minus the excluded costs.

Total cost of Good A, per unit:	$100.00
Excluded costs	−12.00
Net cost of Good A, per unit	$88.00

The value for net cost ($88) and the value of non-originating materials ($40) are needed in order to calculate the regional value content. The producer calculates the regional value content of Good A under the net cost method in the following manner:

$$RVC = \frac{NC - VNM}{NC} \times 100$$

$$= \frac{88 - 40}{88} \times 100$$

$$= 54.5\%$$

Therefore, under the net cost method, Good A qualifies as an originating good, with a regional value-content of 54.5 percent.

Example 5: section 6(6)(c), net cost method required for certain sales to related persons

On January 15, 1994, a producer located in NAFTA country A sells 1,000 units of Good A to a related person, located in NAFTA country B. During the six month period beginning on July 1, 1993 and ending on December 31, 1993, the producer sold 90,000 units of identical goods and similar goods to related persons from various countries, including that buyer. The producer's total sales of those identical goods and similar goods to all persons from all countries during that six month period were 100,000 units.

The total quantity of identical goods and similar goods sold by the producer to related persons during that six month period was 90 percent of the producer's total sales of those identical goods and similar goods to all persons. Under section 6(6)(c), the producer must use the net cost method to calculate the regional value content of Good A sold in January 1994, because the 85 percent limit was exceeded.

Example 6: section 6(11)(a)

A producer in a NAFTA country produces Good A and Good B during the producer's fiscal year.

The producer uses the following figures, which are recorded on the producer's books and represent all of the costs incurred with respect to both Good A and Good B, to calculate the net cost of those goods:

Product costs:	
Value of originating materials	$2,000
Value of non-originating materials	1,000
Other product costs	2,400
Period costs: (including $1,200 in excluded costs)	3,200
Other costs	400
Total cost of Good A and Good B	$9,000
The net cost is the total cost of Good A and Good B, minus the excluded costs incurred with respect to those goods.	
Total cost of Good A and Good B	$9,000
Excluded costs	−1,200
Net cost of Good A and Good B	$7,800

The net cost must then be reasonably allocated, in accordance with Schedule VII, to Good A and Good B.

Example 7: section 6(11)(b)

A producer located in a NAFTA country produces Good A and Good B during the producer's fiscal year. In order to calculate the regional value content of Good A and Good B, the producer uses the following figures that are recorded on the producer's books and incurred with respect to those goods:

Product costs:	
Value of originating materials	$2,000
Value of non-originating materials	1,000
Other product costs	2,400
Period costs: (including $1,200 in excluded costs)	3,200
Other costs	400
Total cost of Good A and Good B	$9,000

Under section 6(11)(b), the total cost of Good A and Good B is then reasonably allocated, in accordance with Schedule VII, to those goods. The costs are allocated in the following manner:

	Allocated to Good A	Allocated to Good B
Total cost ($9,000 for both Good A and Good B)	$5,220	$3,780

The excluded costs ($1,200) that are included in total cost allocated to Good A and Good B, in accordance with Schedule VII, are subtracted from that amount.

		Excluded Cost Allocated to Good A	Excluded Cost Allocated to Good B
Total excluded costs:			
Sales promotion, marketing and after-sale service costs	500	290	210
Royalties	200	116	84
Shipping and packing costs	500	290	210
Net cost (total cost minus excluded costs)	....	$4,524	$3,276

The net cost of Good A is thus $4,524, and the net cost of Good B is $3,276.

Example 8: section 6(11)(c)

A Producer located in a NAFTA country produces Good C and Good D. The following costs are recorded on the producer's books for the months of January, February and March, and each cost that forms part of the total cost are reasonably allocated, in accordance with Schedule VII, to Good C and Good D.

	Total cost: Good C and Good D (in thousands of dollars)	Allocated to Good C (in thousands of dollars)	Allocated to Good D (in thousands of dollars)
Product costs:			
Value of originating materials	100	0	100
Value of non-originating materials	900	800	100
Other product costs	500	300	200
Period costs (including $420 in excluded costs)	5,679	3,036	2,643
Minus Excluded Costs	420	300	120
Other costs	0	0	0
Total cost (aggregate of product costs, period costs and other costs)	6,759	3,836	2,923

Example 9: section 6(12)

Producer A, located in a NAFTA country, produces Good A that is subject to a regional value-content requirement. The producer chooses that the regional value content of that good be calculated using the net cost method. Producer A buys Material X from Producer B, located in a NAFTA country. Material X is a non-originating material and is used in the production of Good A. [illegible] A provides Producer B, at no charge, with tools to be used in the production of Material X. The cost of the tools that is recorded [illegible] the books of Producer A has been expensed in the current year. Pursuant to section 5(1)(b)(ii) of Schedule VIII, the value of [illegible] included in the value of Material X. Therefore, the cost of the tools that is recorded on the books of Producer A and that has be[illegible]ed in the current year cannot be included as a separate cost in the net cost of Good A because it has already been included in the value of Material X.

Example 10: section 6(12)

Producer A, located in a NAFTA country, produces Good A that is subject to a regional value-content requirement. The producer chooses that the regional value content of that good be calculated using the net cost method and averages the calculation over the producer's fiscal year under section 6(15). Producer A determines that during that fiscal year Producer A incurred a gain on foreign currency conversion of $10,000 and a loss on foreign currency conversion of $8,000, resulting in a net gain of $2,000. Producer A also determines that $7,000 of the gain on foreign currency conversion and $6,000 of the loss on foreign currency conversion is related to the purchase of non-originating materials used in the production of Good A, and $3,000 of the gain on foreign currency conversion and $2,000 of the loss on foreign currency conversion is not related to the production of Good A. The producer determines that the total cost of Good A is $45,000 before deducting the $1,000 net gain on foreign currency conversion related to the production of Good A. The total cost of Good A is therefore $44,000. That $1,000 net gain is not included in the value of non-originating materials under section 7(1).

Example 11: section 6(12)

Given the same facts as in example 10, except that Producer A determines that $6,000 of the gain on foreign currency conversion and $7,000 of the loss on foreign currency conversion is related to the purchase of non-originating materials used in the production of Good A. The total cost of Good A is $45,000, which includes the $1,000 net loss on foreign currency conversion related to the production of Good A. That $1,000 net loss is not included in the value of non-originating materials under section 7(1).

PART IV

SECTION 7. MATERIALS

Valuation of materials used in the production of a good other than certain automotive goods

(1) Except as otherwise provided for non-originating materials used in the production of a good referred to in section 9(1) or 10(1), and except in the case of indirect materials, intermediate materials and packing materials and containers, for purposes of calculating the regional value content of a good and for purposes of sections 5(1) and (5), the value of a material that is used in the production of the good shall be

- (a) except as otherwise provided in subsection (2), where the material is imported by the producer of the good into the territory of the NAFTA country in which the good is produced, the customs value of the material with respect to that importation, or
- (b) where the material is acquired by the producer of the good from another person located in the territory of the NAFTA country in which the good is produced
  - (i) the transaction value, determined in accordance with section 2(1) of Schedule VIII, with respect to the transaction in which the producer acquired the material, or
  - (ii) the value determined in accordance with sections 6 through 11 of Schedule VIII, where, with respect to the transaction in which the producer acquired the material, there is no transaction value under section 2(2) of that Schedule or the transaction value is unacceptable under section 2(3) of that Schedule,

and shall include the following costs if they are not included under paragraph (a) or (b):

- (c) the costs of freight, insurance and packing and all other costs incurred in transporting the material to the location of the producer,
- (d) duties and taxes paid or payable with respect to the material in the territory of one or more of the NAFTA countries, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable,
- (e) customs brokerage fees, including the cost of in-house customs brokerage services, incurred with respect to the material in the territory of one or more of the NAFTA countries, and
- (f) the cost of waste and spoilage resulting from the use of the material in the production of the good, minus the value of any reusable scrap or by-product.

Valuation of material if customs value is not in accordance with Schedule VIII

(2) For purposes of subsection (1)(a), where the customs value of the material referred to in that paragraph was not determined in a manner consistent with Schedule VIII, the value of the material shall be determined in accordance with Schedule VIII with respect to the importation of that material and, where the costs referred to in subsections (1)(c) through (f) are not included in that value, those costs be added to that value.

Costs recorded on books

(3) For purposes of subsection (1), the costs referred to in subsections (1)(c) through (f) shall be the costs referred to in those paragraphs that are recorded on the books of the producer of the good.

Designation of self-produced material as an intermediate material; limitation on designations; designation is optional

(4) Except for purposes of determining the value of non-originating materials used in the production of a light-duty automotive good and except in the case of an automotive component assembly, automotive component or sub-component for use as original equipment in the production of a heavy-duty vehicle, for purposes of calculating the regional value content of a good the producer of the good may designate as an intermediate material any self-produced material that is used in the production of the good, provided that where an intermediate material is subject to a regional value-content requirement, no other self-produced material that is subject to a regional value-content requirement and is incorporated into that intermediate material is also designated by the producer as an intermediate material.

(5) For purposes of subsection (4),

(a) in order to qualify as an originating material, a self-produced material that is designated as an intermediate material must qualify as an originating material under these Regulations;

(b) the designation of a self-produced material as an intermediate material shall be made solely at the choice of the producer of that self-produced material; and

(c) except as otherwise provided in section 14(4), the proviso set out in subsection (4) does not apply with respect to an intermediate material used by another producer in the production of a material that is subsequently acquired and used in the production of a good by the producer referred to in subsection (4).

Valuation of an intermediate material

(6) The value of an intermediate material shall be, at the choice of the producer of the good,

(a) the total cost incurred with respect to all goods produced by the producer that can be reasonably allocated to that intermediate material in accordance with Schedule VII; or

(b) the aggregate of each cost that forms part of the total cost incurred with respect to that intermediate material that can be reasonably allocated to that intermediate material in accordance with Schedule VII.

Calculation of total cost

(7) Total cost under subsection (6) consists of the costs referred to in section 2(6), and is calculated in accordance with that section and section 2(7).

Rescission of a designation during course of verification; option to designate another intermediate material

(8) Where a producer of a good designates a self-produced material as an intermediate material under subsection (4) and the customs administration of a NAFTA country into which the good is imported determines during a verification of origin of the good that the intermediate material is a non-originating material and notifies the producer of this in writing before the written determination of whether the good qualifies as an originating good, the producer may rescind the designation, and the regional value content of the good shall be calculated as though the self-produced material were not so designated.

(9) A producer of a good who rescinds a designation under subsection (8)

(a) shall retain any rights of review and appeal under Article 510 of the Agreement, as implemented in each NAFTA country, with respect to the determination of the origin of the intermediate material as though the producer did not rescind the designation; and

(b) may, not later than 30 days after the customs administration referred to in subsection (8) notifies the producer in writing that the self-produced material referred to in paragraph (a) is a non-originating material, designate as an intermediate material another self-produced material that is incorporated into the good, subject to the proviso set out in subsection (4).

(10) Where a producer of a good designates another self-produced material as an intermediate material under subsection (9)(b) and the customs administration referred to in subsection (8) determines during the verification of origin of the good that that self-produced material is a non-originating material,

(a) the producer may rescind the designation, and the regional value content of the good shall be calculated as though the self-produced material were not so designated;

(b) the producer shall retain any rights of review and appeal under Article 510 of the Agreement, as implemented in each NAFTA country, with respect to the determination of the origin of the intermediate material as though the producer did not rescind the designation; and

(c) the producer may not designate another self-produced material that is incorporated into the good as an intermediate material.

Indirect Materials; deemed originating; value as recorded on books of producer

(11) For purposes of determining whether a good is an originating good, an indirect material that is used in the production of the good

(a) shall be considered to be an originating material, regardless of where that indirect material is produced; and

(b) if the good is subject to a regional value-content requirement, for purposes of calculating the net cost under the net cost method, the value of the indirect material shall be the costs of that material that are recorded on the books of the producer of the good.

Packaging Materials and Containers; origin disregarded for tariff change rules

(12) Packaging materials and containers, if classified under the Harmonized System with the good that is packaged therein, shall be disregarded for purposes of

(a) determining whether all of the non-originating materials used in the production of the good undergo an applicable change in tariff classification; and

(b) determining under section 5(1) the value of non-originating materials that do not undergo an applicable change in tariff classification.

Actual originating status considered for RVC requirement; valuation of packaging

(13) Where packaging materials and containers are classified under the Harmonized System with the good that is packaged therein and that good is subject to a regional value-content requirement, the value of those packaging materials and containers shall be taken into account as originating materials or non-originating materials, as the case may be, for purposes of calculating the regional value content of the good.

(14) For purposes of subsection (13), where packaging materials and containers are self-produced materials, the producer may choose to designate those materials as intermediate materials under subsection (4).

Packing materials and containers; disregarded for tariff change rule and for RVC requirement; value as recorded on books

(15) For purposes of determining whether a good is an originating good, packing materials and containers in which the good is packed

(a) shall be disregarded for purposes of determining whether

(i) the non-originating materials used in the production of the good undergo an applicable change in tariff classification, and

(ii) the good satisfies a regional value-content requirement; and

(b) if the good is subject to a regional value-content requirement, the value of the packing materials and containers shall be the costs thereof that are recorded on the books of the producer of the good.

Fungible materials; fungible commingled goods; inventory management methods for determining whether originating

(16) For purposes of determining whether a good is an originating good,

(a) where originating materials and non-originating materials that are fungible materials are used in the production of the good, the determination of whether the materials are originating materials may, at the choice of the producer of the good or the person from whom the producer acquired the materials, be made on the basis of any of the applicable inventory management methods set out in Schedule X; and

(b) where originating goods and non-originating goods that are fungible goods are physically combined or mixed in inventory and prior to exportation do not undergo production or any other operation in the territory of the NAFTA country in which they were physically combined or mixed in inventory, other than unloading, reloading or any other operation necessary to preserve the goods in good condition or to transport the goods for exportation to the territory of another NAFTA country, the determination of whether the good is an originating good may, at the choice of the exporter of the good or the person from whom the exporter acquired the good, be made on the basis of any of the applicable inventory management methods set out in Schedule X.

Accessories, spare parts and tools; deemed originating for tariff change rule; actual origin applicable for RVC requirement

(17) Accessories, spare parts or tools that are delivered with a good and form part of the good's standard accessories, spare parts or tools are originating materials if the good is an originating good, and shall be disregarded for purposes of determining whether all the non-originating materials used in the production of the good undergo an applicable change in tariff classification or determining under section 5(1) the value of non-originating materials that do not undergo an applicable change in tariff classification, provided that

(a) the accessories, spare parts or tools are not invoiced separately from the good; and

(b) the quantities and value of the accessories, spare parts or tools are customary for the good, within the industry that produces the good.

(18) Where a good is subject to a regional value-content requirement, the value of accessories, spare parts and tools that are delivered with that good and form part of the good's standard accessories, spare parts or tools shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.

(19) For purposes of subsection (18), where accessories, spare parts and tools are self-produced materials, the producer may choose to designate those materials as intermediate materials under subsection (4).

Examples illustrating the provisions on materials

(20) Each of the following examples is an "Example" as referred to in section 2(4).

Example 1: section 7(2), Customs Value not Determined in a Manner Consistent with Schedule VIII

Producer A, located in NAFTA country A, imports material A into NAFTA country A. Producer A purchased material A from a middleman located in country B. The middleman purchased the material from a manufacturer located in country B. Under the laws in NAFTA country A that implement the *Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade,* the customs value of material A was based on the price actually paid or payable by the middleman to the manufacturer. Producer A uses material A to produce Good C, and exports Good C to NAFTA country D. Good C is subject to a regional value-content requirement.

Under section 4(1) of Schedule VIII, the price actually paid or payable is the total payment made or to be made by the producer to or for the benefit of the seller of the material. Section 1 of that Schedule defines producer and seller for purposes of the Schedule. A producer is the person who uses the material in the production of a good that is subject to a regional value-content requirement. A seller is the person who sells the material being valued to the producer.

The customs value of material A was not determined in a manner consistent with Schedule VIII because it was based on the price actually paid or payable by the middleman to the manufacturer, rather than on the price actually paid or payable by Producer A to the middleman. Thus, section 7(2) applies and material A is valued in accordance with Schedule VIII.

Example 2: section 7(5), Value of Intermediate Materials

A producer located in a NAFTA country produces Good B, which is subject to a regional value-content requirement under section 4(2)(b). The producer also produces Material A, which is used in the production of Good B. Both originating materials and non-originating materials are used in the production of Material A. Material A is subject to a change in tariff classification requirement under section 4(2)(a). The costs to produce Material A are the following:

Product costs:	
Value of originating materials	$1.00
Value of non-originating materials	7.50
Other product costs	1.50
Period costs (including $0.30 in royalties)	0.50
Other costs	0.10
Total cost of Material A	$10.60

The producer designates Material A as an intermediate material and determines that, because all of the non-originating materials that are used in the production of Material A undergo an applicable change in tariff classification set out in Schedule I, Material A would, under paragraph 4(2)(a) qualify as an originating material. The cost of the non-originating materials used in the production of Material A is therefore not included in the value of non-originating materials that are used in the production of Good B for the purpose of determining the regional value content of Good B. Because Material A has been designated as an intermediate material, the total cost of Material A, which is $10.60, is treated as the cost of originating materials for the purpose of calculating the regional value content of Good B. The total cost of Good B is determined in accordance with the following figures:

Product costs:	
Value of originating materials	
—intermediate materials	$10.60
—other materials	3.00
Value of non-originating materials	5.50
Other product costs	6.50
Period costs	2.50
Other costs	0.10
Total cost of Good B	$28.20

Example 3: section 7(5), Effects of the Designation of Self-produced Materials on Net Cost

The ability to designate intermediate materials helps to put the vertically integrated producer who is self-producing materials that are used in the production of a good on par with a producer who is purchasing materials and valuing those materials in accordance with subsection 7(1). The following situations demonstrate how this is achieved:

Situation 1

A producer located in a NAFTA country produces Good B, which is subject to a regional value-content requirement of 50 percent under the net cost method. Good B satisfies all other applicable requirements of these Regulations. The producer purchases Material A, which is used in the production of Good B, from a supplier located in a NAFTA country. The value of Material A determined in accordance with subsection 7(1) is $11.00. Material A is an originating material. All other materials used in the production of Good B are non-originating materials. The net cost of Good B is determined as follows:

Product costs:	
Value of originating materials (Material A)	$11.00
Value of non-originating materials	5.50
Other product costs	6.50
Period costs: (including $0.20 in excluded costs)	0.50
Other costs	0.10
Total cost of Good B	$23.60
Excluded costs: (included in period costs)	−0.20
Net cost of Good B	$23.40

The regional value content of Good B is calculated as follows:

$$\begin{aligned} RVC &= \frac{NC - VNM}{NC} \times 100 \\ &= \frac{\$23.40 - \$5.50}{\$23.40} \times 100 \\ &= 76.5\% \end{aligned}$$

The regional value content of Good B is 76.5 percent, and Good B, therefore, qualifies as an originating good.

Situation 2

A producer located in a NAFTA country produces Good B, which is subject to a regional value-content requirement of 50 percent under the net cost method. Good B satisfies all other applicable requirements of these Regulations. The producer self-produces Material A which is used in the production of Good B. The costs to produce Material A are the following:

Product costs:	
Value of originating materials	$1.00
Value of non-originating materials	7.50
Other product costs	1.50
Period costs: (including $0.20 in excluded costs)	0.50
Other costs	0.10
Total cost of Material A	$10.60

Additional costs to produce Good B are the following:

Product costs:	
Value of originating materials	$0.00
Value of non-originating materials	5.50
Other product costs	6.50
Period costs: (including $0.20 in excluded costs)	0.50
Other costs	0.10
Total additional costs	$12.60

The producer does not designate Material A as an intermediate material under subsection 7(4). The net cost of Good B is calculated as follows:

	Costs of Material A (not designated as an intermediate material)	Additional Costs to Produce Good B	Total
Product costs:			
Value of originating materials	$1.00	$0.00	$1.00
Value of non-originating materials	7.50	5.50	13.00
Other product costs	1.50	6.50	8.00
Period costs (including $0.20 in excluded costs)	0.50	0.50	1.00
Other costs	0.10	0.10	0.20
Total cost of Good B	$10.60	$12.60	$23.20
Excluded costs (in period costs)	0.20	0.20	−0.40
Net cost of Good B (total cost minus excluded costs)			$22.80

The regional value content of Good B is calculated as follows:

$$RVC = \frac{NC - VNM}{NC} \times 100$$

$$= \frac{\$22.80 - \$13.00}{\$22.80} \times 100$$

$$= 42.9\%$$

The regional value content of Good B is 42.9 percent, and Good B, therefore, does not qualify as an originating good.

Situation 3

A producer located in a NAFTA country produces Good B, which is subject to a regional value-content requirement of 50 percent under the net cost method. Good B satisfies all other applicable requirements of these Regulations. The producer self-produces Material A, which is used in the production of Good B. The costs to produce Material A are the following:

Product costs:	
Value of originating materials	$1.00
Value of non-originating materials	7.50
Other product costs	1.50
Period costs: (including $0.20 in excluded costs)	0.50
Other costs	0.10
Total cost of Material A	$10.60

Additional costs to produce Good B are the following:

Product costs:	
Value of originating materials	$0.00
Value of non-originating materials	5.50
Other product costs	6.50
Period costs: (including $0.20 in excluded costs)	0.50
Other costs	0.10
Total additional costs	$12.60

The producer designates Material A as an intermediate material under subsection 7(4). Material A qualifies as an originating material under paragraph 4(2)(a). Therefore, the value of non-originating materials used in the production of Material A is not included in the value of non-originating materials for the purposes of calculating the regional value content of Good B. The net cost of Good B is calculated as follows:

	Costs of Material A (designated as an intermediate material)	Additional Costs to Produce Good B	Total
Product costs:			
Value of originating materials	$10.60	$0.00	$10.60
Value of non-originating materials	....	5.50	5.50
Other product costs	....	6.50	6.50
Period costs (including $0.20 in excluded costs)	....	0.50	0.50
Other costs	....	0.10	0.10
Total cost of Good B	$10.60	$12.60	$23.20
Excluded costs (in period costs)	....	.20	−0.20
Net cost of Good B (total cost minus excluded costs)	....	....	$23.00

The regional value content of Good B is calculated as follows:

$$RVC=\frac{NC-VNM}{NC}\times 100$$

$$=\frac{\$23.00-\$5.50}{\$23.00}\times 100$$

$$=76.1\%$$

The regional value content of Good B is 76.1 percent, and Good B, therefore, qualifies as an originating good.

Example 4: Originating Materials Acquired from a Producer Who Produced Them Using Intermediate Materials

Producer A, located in NAFTA country A, produces switches. In order for the switches to qualify as originating goods, Producer A designates subassemblies of the switches as intermediate materials. The subassemblies are subject to a regional value-content requirement. They satisfy that requirement, and qualify as originating materials. The switches are also subject to a regional value-content requirement, and, with the subassemblies designated as intermediate materials, are determined to have a regional value content of 65 percent.

Producer A sells the switches to Producer B, located in NAFTA country B, who uses them to produce switch assemblies that are used in the production of Good B. The switch assemblies are subject to a regional value-content requirement. Producers A and B are not accumulating their production within the meaning of section 14. Producer B is therefore able, under section 7(4), to designate the switch assemblies as intermediate materials.

If Producers A and B were accumulating their production within the meaning of section 14, Producer B would be unable to designate the switch assemblies as intermediate materials, because the production of both producers would be considered to be the production of one producer.

Example 5: Single Producer and Successive Designations of Materials Subject to a Regional Value-Content Requirement as Intermediate Materials

Producer A, located in NAFTA country, produces Material X and uses Material X in the production of Good B. Material X qualifies as an originating material because it satisfies the applicable regional value-content requirement. Producer A designates Material A as an intermediate material.

Producer A uses Material X in the production of Material Y, which is also used in the production of Good B. Material Y is also subject to a regional value-content requirement. Under the proviso set out in section 7(4), Producer A cannot designate Material Y as an intermediate material, even if Material Y satisfies the applicable regional value-content requirement, because Material X was already designated by Producer A as an intermediate material.

Example 6: Single Producer and Multiple Designations of Materials as Intermediate Materials

Producer X, who is located in NAFTA country X, uses non-originating materials in the production of self-produced materials A, B, and C. None of the self-produced materials are used in the production of any of the other self-produced materials.

Producer X uses the self-produced materials in the production of Good O, which is exported to NAFTA country Y. Materials A, B and C qualify as originating materials because they satisfy the applicable regional value-content requirements.

Because none of the self-produced materials are used in the production of any of the other self-produced materials, then even though each self-produced material is subject to a regional value-content requirement, Producer X may, under section 7(4), designate all of the self-produced materials as intermediate materials. The proviso set out in section 7(4) only applies where self-produced materials are used in the production of other self-produced materials and both are subject to a regional value-content requirement.

Example 7: section 7(17)

The following are examples of accessories, spare parts or tools that are delivered with a good and form part of the good's standard accessories, spare parts or tools:

(a) consumables that must be replaced at regular intervals, such as dust collectors for an air-conditioning system,
(b) a carrying case for equipment,
(c) a dust cover for a machine,
(d) an operational manual for a vehicle,
(e) brackets to attach equipment to a wall,
(f) a bicycle tool kit or a car jack,
(g) a set of wrenches to change the bit on a chuck,
(h) a brush or other tool to clean out a machine, and
(i) electrical cords and power bars for use with electronic goods.

Example 8: Value of Indirect Materials that are Assists

Producer A, located in a NAFTA country, produces Good A that is subject to a regional value-content requirement. The producer chooses that the regional value content of that good be calculated using the net cost method. Producer A buys Material X from Producer B, located in a NAFTA country, and uses it in the production of Good A. Producer A provides to Producer B, at no charge, tools to be used in the production of Material X. The tools have a value of $100 which is expensed in the current year by Producer A.

Material X is subject to a regional value-content requirement which Producer B chooses to calculate using the net cost method. For purposes of determining the value of non-originating materials in order to calculate the regional value content of Material X, the tools are considered to be an originating material because they are an indirect material. However, pursuant to section 7(11) they have a value of nil because the cost of the tools with respect to Material X is not recorded on the books of Producer B.

It is determined that Material X is a non-originating material. The cost of the tools that is recorded on the books of producer A is expensed in the current year. Pursuant to section 5 of Schedule VIII, the value of the tools (see section 5(1)(b)(ii) of Schedule VIII) must be included in the value of Material X by Producer A when calculating the regional value content of Good A. The cost of the tools, although recorded on the books of producer A, cannot be included as a separate cost in the net cost of Good A because it is already included in the value of Material X. The entire cost of Material X, which includes the cost of the tools, is included in the value of non-originating materials for purposes of the regional value content of Good A.

PART V

AUTOMOTIVE GOODS

SECTION 8. DEFINITIONS AND INTERPRETATION

For purposes of this Part,

"after-market parts" means goods that are not for use as original equipment in the production of light-duty vehicles or heavy-duty vehicles and that are
  (a) goods provided for in a tariff provision listed in Schedule IV, or
  (b) automotive component assemblies, automotive components, sub-components or listed materials;

"class of motor vehicles" means any one of the following categories of motor vehicles:
  (a) motor vehicles provided for in any of subheading 8701.20, tariff items 8702.10.30 and 8702.90.30 (vehicles for the transport of 16 or more persons), subheadings 8704.10, 8704.22, 8704.23, 8704.32 and 8704.90 and headings 8705 and 8706,
  (b) motor vehicles provided for in any of subheadings 8701.10 and 8701.30 through 8701.90,
  (c) motor vehicles provided for in any of tariff items 8702.10.60 and 8702.90.60 (vehicles for the transport of 15 or fewer persons) and subheadings 8704.21 and 8704.31, and
  (d) motor vehicles provided for in any of subheadings 8703.21 through 8703.90;

"complete motor vehicle assembly process" means the production of a motor vehicle from separate constituent parts, which parts include the following:
  (a) a structural frame or unibody,
  (b) body panels,
  (c) an engine, a transmission and a drive train,
  (d) brake components,
  (e) steering and suspension components,
  (f) seating and internal trim,
  (g) bumpers and external trim,
  (h) wheels, and
  (i) electrical and lighting components;

"first prototype" means the first motor vehicle that
  (a) is produced using tooling and processes intended for the production of motor vehicles to be offered for sale, and
  (b) follows the complete motor vehicle assembly process in a manner not specifically designed for testing purposes;

"floor pan of a motor vehicle" means a component, comprising a single part or two or more parts joined together, with or without additional stiffening members, that forms the base of a motor vehicle, beginning at the firewall or bulkhead of the motor vehicle and ending
  (a) where there is a luggage floor panel in the motor vehicle, at the place where that luggage floor panel begins, and
  (b) where there is no luggage floor panel in the motor vehicle, at the place where the passenger compartment of the motor vehicle ends;

"heavy-duty automotive good" means a heavy-duty vehicle or a heavy-duty component;

"heavy-duty component" means an automotive component or automotive component assembly that is for use as original equipment in the production of a heavy-duty vehicle;

"marque" means a trade name used by a marketing division of a motor vehicle assembler that is separate from any other marketing division of that motor vehicle assembler;

"model line" means a group of motor vehicles having the same platform or model name;

"model name" means the word, group of words, letter, number or similar designation assigned to a motor vehicle by a marketing division of a motor vehicle assembler
  (a) to differentiate the motor vehicle from other motor vehicles that use the same platform design,
  (b) to associate the motor vehicle with other motor vehicles that use different platform designs, or
  (c) to denote a platform design;

"new building" means a new construction to house a complete motor vehicle assembly process, where that construction includes the pouring or construction of a new foundation and floor, the erection of a new frame and roof, and the installation of new plumbing and electrical and other utilities;

"plant" means a building, or buildings in close proximity but not necessarily contiguous, machinery, apparatus and fixtures that are under the control of a producer and are used in the production of any of the following:
  (a) light-duty vehicles and heavy-duty vehicles,
  (b) goods of a tariff provision listed in Schedule IV, and
  (c) automotive component assemblies, automotive components, sub-components and listed materials;

OL
60
SS
1
7
2
SE
6
995
UMI

"platform" means the primary load-bearing structural assembly of a motor vehicle that determines the basic size of the motor vehicle, and is the structural base that supports the driveline and links the suspension components of the motor vehicle for various types of frames, such as the body-on-frame or space-frame, and monocoques;

"received in the territory of a NAFTA country" means, with respect to section 9(2), the location at which a traced material arrives in the territory of a NAFTA country and is documented for any customs purpose, which, in the case of a traced material imported into

(a) Canada,

(i) where the traced material is imported on a vessel, as defined in section 2 of the *Reporting of Imported Goods Regulations*, is the location at which the traced material is last unloaded from the vessel and reported, under section 12 of the *Customs Act*, to a customs office, including reported for transportation under bond by a conveyance other than that vessel, and

(ii) in any other case, is the location at which the traced material is reported, under section 12 of the *Customs Act*, to a customs office, including reported for transportation under bond,

(b) Mexico,

(i) where the traced material is imported on a vessel, the location at which the traced material is last unloaded from the vessel and reported for any customs purpose, and

(ii) in any other case, the location at which the traced material is reported for any customs purpose, and

(c) the United States, is the location at which the traced material is entered for any customs purpose, including entered for consumption, entered for warehouse or entered for transportation under bond, or admitted into a foreign trade zone;

"refit" means a closure of a plant for a period of at least three consecutive months that is for purposes of plant conversion or retooling;

"size category", with respect to a light-duty vehicle, means that the total of the interior volume for passengers and the interior volume for luggage is

(a) 85 cubic feet (2.38 m^3) or less,

(b) more than 85 cubic feet (2.38 m^3) but less than 100 cubic feet (2.80 m^3),

(c) 100 cubic feet (2.80 m^3) or more but not more than 110 cubic feet (3.08 m^3),

(d) more than 110 cubic feet (3.08 m^3) but less than 120 cubic feet (3.36 m^3), or

(e) 120 cubic feet (3.36 m^3) or more;

"traced material" means a material, produced outside the territories of the NAFTA countries, that is imported from outside the territories of the NAFTA countries and is, when imported, of a tariff provision listed in Schedule IV;

"underbody" means the floor pan of a motor vehicle.

SECTION 9. LIGHT-DUTY AUTOMOTIVE GOODS

VNM determined by tracing of certain non-originating materials

(1) For purposes of calculating the regional value content of a light-duty automotive good under the net cost method, the value of non-originating materials used by the producer in the production of the good shall be the sum of the values of the non-originating materials that are traced materials and are incorporated into the good.

Valuation of traced materials for VNM in the RVC

(2) Except as otherwise provided in subsections (3) and (6) through (8), the value of each of the traced materials that is incorporated into a good shall be

(a) where the producer imports the traced material from outside the territories of the NAFTA countries and has or takes title to it at the time of importation, the sum of

(i) the customs value of the traced material,

(ii) where not included in that customs value, any freight, insurance, packing and other costs that were incurred in transporting the traced material to the first place at which it was received in the territory of a NAFTA country, and

(iii) where not included in that customs value, the costs referred to in subsection (4);

(b) where the producer imports the traced material from outside the territories of the NAFTA countries and does not have or take title to it at the time of importation, the sum of

(i) the customs value of the traced material,

(ii) where not included in that customs value, any freight, insurance, packing and other costs that were incurred in transporting the traced material to the place at which it was when the producer takes title in the territory of a NAFTA country, and

(iii) where not included in that customs value, the costs referred to in subsection (4);

(c) where a person other than the producer imports the traced material from outside the territories of the NAFTA countries and that person has or takes title to the material at the time of importation, if the producer has a statement that

(i) is signed by the person from whom the producer acquired the traced material, whether in the form in which it was imported into the territory of a NAFTA country or incorporated into another material, and

(ii) states

(A) the customs value of the traced material,

(B) where not included in that customs value, any freight, insurance, packing and other costs that were incurred in transporting the traced material to the first place at which it was received in the territory of a NAFTA country, and

(C) where not included in that customs value, the costs referred to in subsection (4),

the sum of the customs value of the traced material, the freight, insurance, packing and other costs referred to in subparagraph (ii)(B) and the costs referred to in subparagraph (ii)(C);

(d) where a person other than the producer imports the traced material from outside the territories of the NAFTA countries and that person does not have or take title to the material at the time of importation, if the producer has a statement that

(i) is signed by the person from whom the producer acquired the traced material, whether in the form in which it was imported into the territory of a NAFTA country or incorporated into another material, and

(ii) states

(A) the customs value of the traced material,

(B) where not included in that customs value, any freight, insurance, packing and other costs that were incurred in transporting the traced material to the place at which it was located when the first person in the territory of a NAFTA country takes title, and

(C) where not included in that customs value, the costs referred to in subsection (4),

the sum of the customs value of the traced material, the freight, insurance, packing and other costs referred to in subparagraph (ii)(B) and the costs referred to in subparagraph (ii)(C);

(e) where a person other than the producer imports the traced material from outside the territories of the NAFTA countries and the producer acquires the traced material or a material that incorporates the traced material from a person in the territory of a NAFTA country who has title to it, if the producer has a statement that

(i) is signed by the person from whom the producer acquired the traced material or the material that incorporates it, and

(ii) states the value of the traced material or a material that incorporates the traced material, determined in accordance with subsection (5), with respect to a transaction that occurs after the customs value of the traced material was determined,

the value of the traced material or the material that incorporates the traced material, determined in accordance with subsection (5), with respect to the transaction referred to in that statement;

(f) where a person other than the producer imports the traced material from outside the territories of the NAFTA countries, and the producer acquires a material that incorporates that traced material and the acquired material was produced in the territory of a NAFTA country and is subject to a regional value-content requirement, if the producer has a statement that

(i) is signed by the person from whom the producer acquired that material, and

(ii) states that the acquired material is an originating material and states the regional value content of the material,

an amount equal to VM × (1 − RVC)

where

VM is the value of the acquired material, determined in accordance with subsection (5), with respect to the transaction in which the producer acquired that material, and

RVC is the regional value content of the acquired material, expressed as a decimal;

(g) where a person other than the producer imports the traced material from outside the territories of the NAFTA countries, and the producer acquires a material that incorporates that traced material and the acquired material was produced in the territory of a NAFTA country and is subject to a regional value-content requirement, if the producer has a statement that

(i) is signed by the person from whom the producer acquired that material, and

(ii) states that the acquired material is an originating material but does not state any value with respect to the traced material,

an amount equal to VM × (1 − RVCR)

where

VM is the value of the acquired material, determined in accordance with subsection (5), with respect to the transaction in which the producer acquired that material, and

RVCR is the regional value-content requirement for the acquired material, expressed as a decimal;

(h) where a person other than the producer imports the traced material from outside the territories of the NAFTA countries and the producer acquires a material that

(i) incorporates that traced material,

(ii) was produced in the territory of a NAFTA country, and

(iii) with respect to which an amount was determined in accordance with paragraph (f) or (g),

if the producer of the good has a statement signed by the person from whom the producer acquired that material that states that amount, the amount as determined in accordance with paragraph (f) or (g), as the case may be; and

(i) where a person other than the producer imports the traced material from outside the territories of the NAFTA countries and the producer does not have a statement described in any of paragraphs (c) through (h), the value of the traced material or any material that incorporates it, determined in accordance with subsection (5) with respect to the transaction in which the producer acquires the traced material or any material that incorporates it.

Value of traced material if customs value is not in accordance with Schedule VIII

(3) For purposes of subsections (2) (a) through (d), where the customs value of the traced material referred to in those paragraphs was not determined in a manner consistent with Schedule VIII, the value of the material shall be the sum of

(a) the value of the material determined in accordance with Schedule VIII with respect to the transaction in which the person who imported the material from outside the territories of the NAFTA countries acquired it; and

(b) where not included in that value, the costs referred to in subsections (2)(a) (ii) and (iii), subsections (2)(b) (ii) and (iii), subsections (2)(c)(ii) (B) and (C) or subsections (2)(d)(ii) (B) and (C), as the case may be.

Additional costs included in traced value if not already included in customs value

(4) The costs referred to in subsections (2) (a) through (d) and subsection (3) are the following:

OL
0
SS
1
7
2
SE
6
995
MI

(a) duties and taxes paid or payable with respect to the material in the territory of one or more of the NAFTA countries, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and

(b) customs brokerage fees, including the cost of in-house customs brokerage services, incurred with respect to the material in the territory of one or more of the NAFTA countries.

Value of traced material determined under Schedule VIII if value is not customs value

(5) For purposes of subsections (2) (e) through (g) and (i) and subsections (6) and (7), the value of a material

(a) shall be the transaction value of the material, determined in accordance with section 2(1) of Schedule VIII with respect to the transaction referred to in that paragraph or subsection, or

(b) shall be determined in accordance with sections 6 through 11 of Schedule VIII, where, with respect to the transaction referred to in that paragraph or subsection, there is no transaction value for the material under section 2(2) of that Schedule, or the transaction value of the material is unacceptable under section 2(3) of that Schedule,

and, where not included under paragraph (a) or (b), shall include taxes, other than duties paid on an importation of a material from a NAFTA country, paid or payable with respect to the material in the territory of one or more of the NAFTA countries, other than taxes that are waived, refunded, refundable or otherwise recoverable, including credit against tax paid or payable.

(6) Where it is determined, during the course of a verification of origin of a light-duty automotive good with respect to which the producer of that good has a statement referred to in subsection (2) (f) or (g), that the acquired material referred to in that statement is not an originating material, the value of the acquired material shall, for purposes of subsection (2), be determined in accordance with subsection (5) with respect to the transaction in which that producer acquired it.

Effect on value of traced material if value on a statement cannot be verified

(7) Where any person who has information with respect to a statement referred to in any of subsections (2)(c) through (h) does not allow a customs administration to verify that information during a verification of origin, the value of the material with respect to which that person did not allow the customs administration to verify the information may be determined by that customs administration in accordance with subsection (5) with respect to the transaction in which that person sells, or otherwise transfers to another person, that material or a material that incorporates that material.

Use of value of VNM as determined under section 12(3) for traced material incorporated into another material

(8) Where a traced material is incorporated into a material produced in the territory of a NAFTA country and that material is incorporated into a light-duty automotive good, the statement referred to in subsection (2)(c), (d) or (e) may state the value of non-originating materials, determined in accordance with section 12(3), with respect to the material that incorporates the traced material.

Interpretations and clarifications for provisions applicable to tracing rules for light-duty automotive goods

(9) For purposes of this section,

(a) where a producer, in accordance with section 7(4), designates as an intermediate material any self-produced material used in the production of a light-duty automotive good,

(i) the designation applies solely to the calculation of the net cost of that good, and

(ii) the value of a traced material that is incorporated into that good shall be determined as though the designation had not been made;

(b) the value of a material not listed in Schedule IV, when imported from outside the territories of the NAFTA countries,

(i) shall not be included in the value of non-originating materials that are used in the production of a light-duty automotive good, and

(ii) shall be included in calculating the net cost of a light-duty automotive good that incorporates that material;

(c) except as otherwise provided in section 12(10), this section does not apply with respect to after-market parts;

(d) the costs referred to in subsections (2)(a)(ii) and (b)(ii), subsections (2)(c)(ii)(B) and (d)(ii)(B) and subsections (4) and (5) shall be the costs referred to in those paragraphs that are recorded on the books of the producer of the light-duty automotive good;

(e) for purposes of calculating the regional value content of a light-duty automotive good, the producer of that good may choose to treat any material used in the production of that good as a non-originating material, and the value of that material shall be determined in accordance with subsection (5) with respect to the transaction in which the producer acquired it; and

(f) any information set out in a statement referred to in subsection (2) that concerns the value of materials or costs shall be in the same currency as the currency of the country in which the person who provided the statement is located.

Examples of application of tracing for light-duty automotive goods

(10) Each of the following examples is an "Example" as referred to in section 2(4).

Example 1:

Nuts and bolts provided for in heading 7318 are imported from outside the territories of the NAFTA countries and are used in the territory of a NAFTA country in the production of a light-duty automotive good referred to in section 9(1). Heading 7318 is not listed in Schedule IV so the nuts and bolts are not traced materials.

Because the nuts and bolts are not traced materials the value, under section 9(1), of the nuts and bolts is not included in the value of non-originating materials used in the light-duty automotive good even though the nuts and bolts are imported from outside the territories of the NAFTA countries.

The value, under section 9(9)(b), of the nuts and bolts is included in the net cost of the light-duty automotive good for the purposes of calculating, under section 9(1), regional value content of the motor vehicle.

Example 2:

A rear view mirror provided for in subheading 7009.10 is imported from outside the territories of the NAFTA countries and is used in the territory of a NAFTA country as original equipment in the production of a light-duty vehicle.

Subheading 7009.10 is listed in Schedule IV. The rear view mirror is a traced material. For purposes of calculating, under section 9(1), regional value content of the light-duty vehicle, the value of the mirror is included in the value of non-originating materials in accordance with sections 9(2) through (9).

Example 3:

Glass provided for in heading 7005 is imported from outside the territories of the NAFTA countries and is used in the territory of NAFTA country A in the production of a rear view mirror. The rear view mirror is a non-originating good because it fails to satisfy the applicable change in tariff classification.

That rear view mirror is exported to NAFTA country B where it is used as original equipment in the production of a light-duty vehicle. Even though the rear view mirror is a non-originating material and is provided for in a tariff item listed in Schedule IV, it is not a traced material because it was not imported from outside the territories of the NAFTA countries.

For purposes of calculating, under section 9(1), the regional value content of a light-duty vehicle in which the rear view mirror is incorporated, the value of the rear view mirror, under section 9(1), is not included in the value of non-originating materials used in the production of the light-duty vehicle.

Even though the glass provided for in heading 7005 that was used in the production of the rear view mirror and incorporated into the light-duty vehicle was imported from outside the territories of the NAFTA countries, the glass is not a traced material because heading 7005 is not listed in Schedule IV. For purposes of calculating, under section 9(1), the regional value content of the light-duty vehicle that incorporates the glass, the value of the glass is not included in the value of non-originating materials used in the production of the light-duty vehicle. The value of the rear view mirror would be included in the net cost of the light-duty vehicle, but the value of the imported glass would not be separately included in the value of non-originating materials of the light-duty vehicle.

Example 4:

An electric motor provided for in subheading 8501.10 is imported from outside the territories of the NAFTA countries and is used in the territory of a NAFTA country in the production of a seat frame provided for in subheading 9401.90. The seat frame, with the electric motor attached, is sold to a producer of seats provided for in subheading 9401.20. The seat producer sells the seat to a producer of light-duty vehicles. The seat is to be used as original equipment in the production of that light-duty vehicle.

Subheadings 8501.10 and 9401.20 are listed in Schedule IV; subheading 9401.90 is not. The electric motor is a traced material; the seat is not a traced material because it was not imported from outside the territories of the NAFTA countries.

The seat is a light-duty automotive good referred to in section 9(1). For purposes of calculating, under section 9(1), the regional value content of the seat, the value of traced materials incorporated into it is included in the value of non-originating materials used in the production of the seat. The value of the electric motor is included in that value. (However, the value of the motor would not be included separately in the net cost of the seat because the value of the motor is included as part of the cost of the seat frame.)

For purposes of calculating, under section 9(1), the regional value content of the light-duty vehicle, the value of the electric motor is included in the value of non-originating materials used in the production of the light-duty vehicle, even if the seat is an originating material.

Example 5:

Cast blocks, cast heads and connecting rod assemblies provided for in heading 8409 are imported from outside the territories of the NAFTA countries by an engine producer, who has title to them at the time of importation, and are used by the producer in the territory of NAFTA country A in the production of an engine provided for in heading 8407. After the regional value content of the engine is calculated, the engine is an originating good. It is not a traced material because it was not imported from outside the territories of the NAFTA countries. The engine is exported to NAFTA country B, to be used as original equipment by a producer of light-duty vehicles.

For purposes of calculating, under section 9(1), the regional value content of the light-duty vehicle that incorporates the engine, because heading 8409 is listed in Schedule IV and because the cast blocks, cast heads and connecting rod assemblies were imported into the territory of a NAFTA country and are incorporated into the light-duty vehicle, the value of those materials, which are traced materials, is included in the value of non-originating materials used in the production of the light-duty vehicle, even though the engine is an originating material.

The producer of the light-duty vehicle did not import the traced materials. However, because that producer has a statement referred to in section 9(2)(c) and that statement states the value of non-originating materials of the traced materials in accordance with section 12(2), the producer of the light-duty vehicle may, in accordance with section 9(8), use that value as the value of non-originating materials of the light-duty vehicle with respect to that engine.

Example 6:

Aluminum ingots provided for in subheading 7601.10 and piston assemblies provided for in heading 8409 are imported from outside the territories of the NAFTA countries by an engine producer and are used by that producer in the territory of NAFTA country A in the production of an engine provided for in heading 8407. The aluminum ingots are used by the producer to produce an engine block; the piston assembly is then incorporated into the engine block and the producer designates, in accordance with section 7(4), a short block provided for in heading 8409 as an intermediate material. The intermediate material qualifies as an originating material. The engine that incorporates the short block is exported to NAFTA country B and used as original equipment in the production of a light-duty vehicle. The piston assemblies provided for in heading 8409 are traced materials; neither the engine nor the short block are traced materials because they were not imported from outside the territories of the NAFTA countries.

For purposes of calculating, under section 9(1), the regional value content of the engine, the value of the piston assemblies is included, under section 9(9)(a)(ii), in the value of non-originating materials, even if the intermediate material is an originating material. However, the value of the aluminum ingots is not included in the value of non-originating materials because subheading 7601.10 is not listed in Schedule IV. The value of the aluminum ingots does not need to be included separately in the net cost of the engine because that value is included in the value of the intermediate material, and the total cost of the intermediate material is included in the net cost of the engine.

For purposes of calculating, under section 9(1), the regional value content of the light-duty vehicle that incorporates the engine (and the piston assemblies), the value of the piston assemblies incorporated into that light-duty vehicle is included in the value of non-originating materials of the light-duty vehicle.

Example 7:

OL
60
SS
172
SE
6
995
UMI

An engine provided for in heading 8407 is imported from outside the territories of the NAFTA countries. The producer of the engine, located in the country from which the engine is imported, used in the production of the engine a piston assembly provided for in heading 8409 that was produced in a NAFTA country and is an originating good. The engine is used in the territory of a NAFTA country as original equipment in the production of a light-duty vehicle. The engine is a traced material.

For purposes of calculating, under section 9(1), the regional value content of a light-duty vehicle that incorporates that engine, the value of the engine is included in the value of non-originating materials of that light-duty vehicle. The value of the piston assembly, which was, before its exportation to outside the territories of the NAFTA countries, an originating good, shall not be deducted from the value of non-originating materials used in the production of the light-duty vehicle. Under section 18 (transshipment), the piston assembly is no longer considered to be an originating good because it was used in the production of a good outside the territories of the NAFTA countries.

Example 8:

A wholesaler, located in City A in the territory of a NAFTA country, imports from outside the territories of the NAFTA countries rubber hoses provided for in heading 4009, which is listed in Schedule IV. The wholesaler takes title to the goods at the wholesaler's place of business in City A. The customs value of the imported goods is $500. All freight, taxes and duties associated with the good to the wholesaler's place of business total $100; the cost of the freight, included in that $100, from the place where it was received in the territory of a NAFTA country to the location of the wholesaler's place of business in City A is $25. The wholesaler sells the rubber hoses for $850 to a producer of light-duty vehicles who uses the goods in the territory of a NAFTA country as original equipment in the production of a light-duty vehicle. The light-duty vehicle producer pays $50 to have the goods shipped from the location of the wholesaler's place of business in City A to the location at which the light-duty vehicle is produced.

The rubber hoses are traced materials and they are incorporated into a light-duty automotive good. For purposes of calculating, under section 9(1), the regional value content of the light-duty vehicle,

(1) if the wholesaler takes title to the goods before the first place at which they were received in the territory of a NAFTA country, then the value of non-originating materials, where the light-duty vehicle producer has a statement referred to in section 9(2)(c), would not include the cost of freight from the place where they were received in the territory of a NAFTA country to the location of the wholesaler's place of business: in this situation, the value of non-originating materials would be $575;

(2) if the producer has a statement referred to in section 9(2)(d) that states the customs value of the traced material and, where not included in that price, the cost of taxes, duties, fees and transporting the goods to the place where title is taken, the light-duty vehicle producer may use those values as the value of non-originating materials with respect to the goods: in this situation, the value of non-originating materials would be $600; or

(3) if the wholesaler is unwilling to provide the light-duty vehicle producer with such a statement, the value of non-originating materials with respect to the traced materials will be the value of the materials with respect to the transaction in which the producer acquired them, as provided for in section 9(2)(i), in this instance $850; the costs of transporting the goods from the location of the wholesaler's place of business to the location of the producer will be included in the net cost of the goods, but not in the value of non-originating materials.

Example 9:

A wholesaler, located in City A in the territory of a NAFTA country, imports from outside the territories of the NAFTA countries rubber hose provided for in heading 4009, which is listed in Schedule IV. The wholesaler sells the good to a producer located in the territory of the NAFTA country who uses the hose to produce a power steering hose assembly, also provided for in heading 4009. The power steering hose assembly is then sold to a producer of light-duty vehicles who uses that good in the production of a light-duty vehicle. The rubber hose is a traced material; the power steering hose assembly is not a traced material because it was not imported from outside the territories of the NAFTA countries.

The wholesaler who imported the rubber hose from outside the territories of the NAFTA countries has title to it at the time of importation. The customs value of the good is $3, including freight and insurance and all other costs incurred in transporting the good to the first place at which it was received in the territory of the NAFTA country. Duties and fees and all other costs referred to in section 9(4), paid by the wholesaler with respect to the good, total an additional $1. The wholesaler sells the good to the producer of the power steering hose assemblies for $5, not including freight to the location of that producer. The power steering hose producer pays $2 to have the good delivered to the location of production. The value of the power steering hose assembly sold to the light-duty vehicle producer is $10, including freight for delivery of the goods to the location of the light-duty vehicle producer.

For purposes of calculating, under section 9(1), the regional value content of the light-duty vehicle:

(1) if the motor vehicle producer has a statement referred to in section 9(2)(c) from the producer of the power steering hose assembly that states the customs value of the imported rubber hose incorporated in the power steering hose assembly, and the value of the duties, fees and other costs referred to in section 9(4), the producer may use those values as the value of non-originating materials with respect to that traced good: in this situation, that value would be the customs value of $3 and the cost of duties and fees of $1, provided that the wholesaler has provided the producer of the power steering hose assembly with the information regarding the customs value of the imported good and the other costs;

(2) if the light-duty vehicle producer has a statement from the producer of the power steering hose assembly that states the value of the imported hose, with respect to the transaction in which the power steering hose assembly producer acquires the imported hose from the wholesaler, the light-duty vehicle producer may include that value as the value of non-originating materials, in accordance with section 9(2)(e): in this situation, that value is $5; and the $2 cost of transporting the good from the location of the wholesaler to the location of the producer, because that cost is separately identified, would not be included in the value of non-originating materials of the light-duty vehicle;

(3) if the light-duty vehicle producer has a statement referred to in section 9(2)(f) signed by the producer of the power steering hose assembly, the light-duty vehicle producer may use the formula set out in section 9(2)(f) to calculate the value of non-originating materials with respect to that acquired material: in this situation, assuming the regional value content is 55 per cent, the value of non-originating materials would be $4.50; and because the cost of transportation from the location of the producer of the power steering hose assembly to the location of the light-duty vehicle producer is included in the purchase price and not separately identified, it may not be deducted from the purchase price, because the formula referred to in section 9(2)(f) does not allow for the deduction of transportation costs that would otherwise not be non-originating;

(4) if the light-duty vehicle producer has a statement referred to in section 9(2)(g) signed by the producer of the power steering hose assembly, the light-duty vehicle producer may use the formula set out in section 9(2)(g) to calculate the value of non-originating materials with respect to that acquired material: in this situation, assuming the regional value-content requirement is 50 per cent, the value of non-originating materials would be $5; and because the cost of transportation from the location of the producer of the power steering hose assembly to the location of the light-duty vehicle producer is included in the purchase price and not separately identified, it may not be deducted from the purchase price, because the formula referred to in section 9(2)(g) does not allow for the deduction of transportation costs that would otherwise not be non-originating; or

(5) if the light-duty vehicle producer does not have a statement referred to in any of sections 9(2)(c) through (h) from the producer of the power steering hose assembly, the light-duty vehicle producer includes in the value of non-originating materials of the vehicles the value, determined in accordance with section 9(2)(i), of the power steering hose assembly: in this situation, that amount would be $10, the cost to the producer of acquiring that material.

Example 10:

A producer of light-duty vehicles located in City C in the territory of a NAFTA country imports from outside the territories of the NAFTA countries rubber hose provided for in heading 4009, which is listed in Schedule IV, and uses that good as original equipment in the production of a light-duty vehicle.

The rubber hose arrives at City A in the NAFTA country, but the producer of the light-duty vehicle does not have title to the good; it is transported under bond to City B, and on its arrival in City B, the producer of the light-duty vehicle takes title to it and the good is received in the territory of a NAFTA country. The good is then transported to the location of the light-duty vehicle producer in City C.

The customs value of the imported good is $4, the transportation and other costs referred to in subparagraph 9(2)(b)(ii) to City A are $3 and to City B are $2, and the cost of duties, taxes and other fees referred to in section 9(4) is $1. The cost of transporting the good from City B to the location of the producer in City C is $1. The rubber hose is traced material.

For purposes of calculating, under section 9(1), the regional value content of the light-duty vehicle, the value, under section 9(2)(b), of non-originating materials of that vehicle is the customs value of the traced material and, where not included in that value, the cost of taxes, duties, fees and the cost of transporting the traced material to the place where title is taken. In this situation, the value of non-originating materials would be the customs value of the traced material, $4, the cost of duties taxes and other fees, $1, the cost of transporting the material to City A, $3, and the cost of transporting that material from City A to City B, $2, for a total of $10. The $1 cost of transporting the good from City B to the location of the producer in City C would not be included in the value of non-originating materials of the light-duty vehicle because a person of a NAFTA country has taken title to the traced material.

Example 11:

A radiator provided for in subheading 8708.91 is imported from outside the territories of the NAFTA countries by a producer of light-duty vehicles and is used in the territory of a NAFTA country as original equipment in the production of a light-duty vehicle.

The radiator is transported by ship from outside the territories of the NAFTA countries and arrives in the territory of the NAFTA country at City A. The radiator is not, however, unloaded at City A and although the radiator is physically present in the territory of the NAFTA country, it has not been received in the territory of a NAFTA country.

The ship sails in territorial waters from City A to City B and the radiator is unloaded there. The light-duty vehicle producer files, from City C in the same country, the entry for the radiator; the radiator enters the territory of the NAFTA country at City B.

Subheading 8708.91 is listed in Schedule IV. The radiator is a traced material.

For purposes of calculating, under section 9(1), the regional value content of the light-duty vehicle, the value of the radiator is included in the value of non-originating materials of the light-duty vehicle. The costs of any freight, insurance, packing and other costs incurred in transporting the radiator to City B are included in the value of non-originating materials of the light-duty vehicle, including the cost of transporting the radiator from City A to City B. The costs of any freight, insurance, packing and other costs that were incurred in transporting the radiator from City B to the location of the producer are not included in the value of non-originating materials of the light-duty vehicle.

Example 12:

Producer X, located in NAFTA country A, produces a car seat of subheading No. 9401.20 that is used in the production of a light-duty vehicle. The only non-originating material used in the production of the car seat is an electric motor of subheading No. 8501.20 that was imported by Producer X from outside the territories of the NAFTA countries. The electric motor is a material of a tariff provision listed in Schedule IV and thus is a traced material.

Producer X sells the car seat as original equipment to Producer Y, a light-duty vehicle producer, located in NAFTA country B. The car seat is an originating good because the non-originating material in the car seat (the electric motor) undergoes the applicable change in tariff classification set out in a rule that specifies only a change in tariff classification. Consequently, Producer X does not choose to calculate the regional value content of the car seat in accordance with section 12(1).

For purposes of determining, under section 9(1), the value of non-originating materials used in the production of the light-duty vehicle that incorporates the car seat, the value of the electric motor is included even though the car seat qualifies as an originating material.

Producer X provides Producer Y with a statement described in section 9(2)(c), with the value of non-originating material used in the production of the car seat determined in accordance with section 12(3), as is permitted by section 9(8). Producer Y uses that value as the value of non-originating materials used in the production of the light-duty vehicle with respect to the car seat.

Example 13:

This example has the same facts as in Example 12, except that the car seat does not qualify as an originating good under the rule that specifies only a change in tariff classification. Instead, it qualifies as an originating good under a rule that specifies a regional value-content requirement and a change in tariff classification. For purposes of that rule, Producer X chose to calculate the regional value content of the car seat in accordance with section 12(1) over a period set out in section 12(5)(a) and using a category set out in section 12(4)(a).

For purposes of the statement described in section 9(2)(c), Producer X determined, as is permitted under section 9(8), the value of non-originating material used in the production of the car seat in accordance with section 12(3) over a period set out in section 12(5)(a) and using a category set out in section 12(4)(e).

SECTION 10. HEAVY-DUTY AUTOMOTIVE GOODS

Determining VNM for the calculation of the RVC for heavy-duty automotive goods

(1) Except as otherwise provided in subsections (3) through (8) and section 12(10)(a), for purposes of calculating the regional value content of a heavy-duty automotive good under the net cost method, the value of non-originating materials used by the producer of the good in the production of the good shall be the sum of

(a) for each listed material that is a non-originating material, is a self-produced material and is used by the producer in the production of the good, at the choice of the producer, either

(i) the total cost incurred with respect to all goods produced by the producer that can be reasonably allocated to that listed material in accordance with Schedule VII,

(ii) the aggregate of each cost that forms part of the total cost incurred with respect to that listed material that can be reasonably allocated to that listed material in accordance with Schedule VII, or

(iii) the sum of

(A) the customs value of each non-originating material imported by the producer and used in the production of the listed material, and, where not included in that customs value, the costs referred to in subsections (2)(c) through (f), and

(B) the value of each non-originating material that is not imported by the producer of the listed material and is used in the production of the listed material, determined in accordance with subsection (2) with respect to the transaction in which the producer of the listed material acquired it;

(b) for each listed material that is a non-originating material, is produced in the territory of a NAFTA country and is acquired and used by the producer in the production of the good, at the choice of the producer, either

(i) the value of that non-originating listed material, determined in accordance with subsection (2), with respect to the transaction in which the producer acquired the listed material, or

(ii) where the producer of the good has a statement described in clause (A) or (B) with respect to each material that is a non-originating material used in the production of that listed material, the sum of

(A) the customs value of each non-originating material imported by the producer of the listed material and used in the production of that listed material, and, where not included in that customs value, the costs referred to in subsections (2)(c) through (f), if the producer of the good has a statement signed by the producer of the listed material that states the customs value of that non-originating material and the costs referred to in subsections (2)(c) through (f) that the producer of the listed material incurred with respect to the non-originating material, and

(B) the value of each non-originating material that is not imported by the producer of the listed material, and is acquired and used in the production of the listed material, determined in accordance with subsection (2) with respect to the transaction in which the producer of the listed material acquired that non-originating material, if the producer of the good has a statement signed by the producer of the listed material that states the value of the acquired material, determined in accordance with subsection (2) with respect to the transaction in which the producer of the listed material acquired the non-originating material;

(c) for each listed material, automotive component assembly, automotive component or sub-component that is imported from outside the territories of the NAFTA countries, and is used by the producer in the production of the good,

(i) where it is imported by the producer, the customs value of that non-originating listed material, automotive component assembly, automotive component or sub-component, and, where not included in that customs value, the costs referred to in subsections (2)(c) through (f), and

(ii) where it is not imported by the producer, the value of that non-originating listed material, automotive component assembly, automotive component or sub-component, determined in accordance with subsection (2) with respect to the transaction in which the producer acquired it;

(d) for each automotive component assembly, automotive component or sub-component that is an originating material and is acquired and used by the producer in the production of the good, at the choice of the producer,

(i) the sum of

(A) the value of each non-originating listed material used in the production of the originating material, determined under paragraphs (a) and (b),

(B) the value of each non-originating material incorporated into the originating material, determined under paragraph (c),

(C) the value of each non-originating listed material used in the production of a material referred to in paragraph (e) that is used in the production of the originating material, determined under paragraphs (a) and (b), and

(D) where the value of a non-originating listed material referred to in clause (C), and used in the production of a non-originating automotive component assembly, automotive component or sub-component that is used in the production of the originating material, is not included under clause (C), the value of that automotive component assembly, automotive component or sub-component, determined under paragraph (e)(ii),

if the producer has a statement, signed by the person from whom the originating material was acquired, that states the sum of the values, as determined by the producer of the originating material under paragraphs (a), (b), (c) and (e) of each non-originating material referred to in any of clauses (A) through (D) that is incorporated into that originating material;

(ii) an amount equal to the number resulting from applying the following formula:

$$VM \times (1 - RVC)$$

where

VM is the value of the acquired material, determined in accordance with subsection (2), with respect to the transaction in which the producer of the good acquired that material, and

RVC is the regional value content of the acquired material, expressed as a decimal,

if the material is subject to a regional value-content requirement and the producer has a statement, signed by the person from whom the producer acquired that material, that states that the acquired material is an originating material and states the regional value content of the material,

(iii) an amount equal to the number resulting from applying the following formula:

$$VM \times (1 - RVCR)$$

where

VM is the value of the acquired material, determined in accordance with subsection (2), with respect to the transaction in which the producer of the good acquired that material, and

RVCR is the regional value-content requirement for the acquired material, expressed as a decimal,

if the material is subject to a regional value-content requirement and the producer has a statement, signed by the person from whom the producer acquired that material, that states that the acquired material is an originating material but does not state the value of non-originating materials with respect to that acquired material; or

(iv) the value of that automotive component assembly, automotive component or sub-component determined in accordance with subsection (2) with respect to the transaction in which the producer acquired the material;

(e) for each automotive component assembly, automotive component or sub-component that is a non-originating material produced in the territory of a NAFTA country and that is acquired by the producer and used by the producer in the production of the good, at the choice of the producer, either

(i) the sum of the values of the non-originating materials incorporated into that non-originating material that is acquired by the producer, determined under paragraphs (a), (b), (c), (d) and (f), if the producer has a statement, signed by the person from whom the non-originating material was acquired, that states the sum of the values of the non-originating materials incorporated into that non-originating material, determined by the producer of the non-originating material in accordance with paragraphs (a), (b), (c), (d) and (f), or

(ii) the value of that non-originating automotive component assembly, automotive component or sub-component, determined in accordance with subsection (2) with respect to the transaction in which the producer acquired the material; and

(f) for each non-originating material that is not referred to in paragraph (a), (b), (c) or (e) and that is used by the producer in the production of the good,

(i) where it is imported by the producer, the customs value of that non-originating material, and, where not included in that customs value, the costs referred to in subsections (2)(c) through (f), and

(ii) where it is not imported by the producer, the value of that non-originating material, determined in accordance with subsection (2) with respect to the transaction in which the producer acquired the material.

Application of Schedule VIII to determine VNM; additional costs to be included

(2) For purposes of subsection (1)(a)(ii)(B), subsection (1)(b)(i), subsection (1)(b)(ii)(B), subsections (1)(c)(ii), (1)(d)(ii) through (iv), (1)(e)(ii) and subsection (1)(f)(ii), the value of a material

(a) shall be the transaction value of the material, determined in accordance with section 2(1) of Schedule VIII with respect to the transaction referred to in that clause, subparagraph or paragraph, or

(b) where, with respect to the transaction referred to in that clause, subparagraph, or paragraph, there is no transaction value for the material under section 2(2) of Schedule VIII or the transaction value of the material is unacceptable under section 2(3) of that Schedule, shall be determined in accordance with sections 6 through 11 of that Schedule,

and shall include the following costs where they are not included under paragraph (a) or (b):

(c) the costs of freight, insurance and packing, and all other costs incurred in transporting the material to the location of the producer,

(d) duties and taxes paid or payable with respect to the material in the territory of one or more of the NAFTA countries, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable,

(e) customs brokerage fees, including the cost of in-house customs brokerage and customs clearance services, incurred with respect to the material in the territory of one or more of the NAFTA countries, and

(f) the cost of waste and spoilage resulting from the use of the material in the production of the good, minus the value of any reusable scrap or by-product.

Value of imported material if customs value is not in accordance with Schedule VIII

(3) For purposes of subsections (1)(a)(ii)(A) and (b)(ii)(A) and subsections (1)(c)(i) and (f)(i), where the customs value of an imported material referred to in those clauses or paragraphs was not determined in a manner consistent with Schedule VIII, the value of the material shall be determined in accordance with Schedule VIII with respect to the importation for which that customs value was determined and, where the costs referred to in sections (2)(c) through (f) are not included in that value, those costs shall be added to the value of the material.

Option to use section 9 tracing rules in certain circumstances

(4) For purposes of calculating the regional value content of a heavy-duty component, where

(a) a heavy-duty component is produced in the same plant as an automotive component assembly or automotive component that is of the same heading or subheading as that heavy-duty component and is for use as original equipment in a light-duty vehicle, and

(b) it is not reasonable for the producer to know which of the production will constitute a heavy-duty component for use in a heavy-duty vehicle,

the value of the non-originating materials used in the production of the heavy-duty component in that plant may, at the choice of the producer, be determined in the manner set out in section 9.

(5) For purposes of calculating the regional value content of a heavy-duty vehicle, where a producer of such a vehicle acquires, for use by that producer in the production of the vehicle, a heavy-duty component with respect to which the value of non-originating materials has been determined in accordance with subsection (4), the value of the non-originating materials used by the producer with respect to that heavy-duty component is the value of non-originating materials determined under that subsection.

VNM may be redetermined for certain acquired materials

(6) Where it is determined, during the course of a verification of origin of a heavy-duty automotive good with respect to which the producer of that good has a statement referred to in subsection (1)(d)(ii) or (iii) that the acquired material referred to in that statement is not an originating material, the value of the acquired material shall, for purposes of subsection (1), be determined in accordance with subsection (2) with respect to the transaction in which that producer acquired it.

Effect on value of traced material if value on a statement cannot be verified

(7) Where any person who has information with respect to a statement referred to in subsection (1)(b)(ii), (d)(i) or (e)(i) does not allow a customs administration to verify that information during a verification of origin, the value of any material with respect to which that person did not allow the customs administration to verify the information may be determined by that customs administration in accordance with subsection (2) with respect to the transaction in which that person sells, or otherwise transfers to another person, that material or a material that incorporates that material.

Use of value of VNM as determined under section 12(3) for traced material incorporated into another material

(8) Where a heavy-duty component, sub-component or listed material is incorporated into a material produced in the territory of a NAFTA country and that material is incorporated into a heavy-duty automotive good, the statement referred to in subsection (1)(b)(ii), (d)(i) or (e)(i) may state the value of non-originating materials, determined in accordance with section 12(3), with respect to the material that incorporates the heavy-duty component, sub-component or listed material.

Interpretations and clarifications for provisions applicable to rules for determining VNM for heavy-duty automotive goods

(9) For purposes of this section,

(a) for purposes of calculating the regional value content of a heavy-duty automotive good, sub-component or listed material, a producer of such a good may, in accordance with section 7(4), designate as an intermediate material any self-produced material, other than a heavy-duty component or sub-component, that is used in the production of that good;

(b) except as otherwise provided in section 12(10), this section does not apply with respect to after-market parts;

(c) this section does not apply to a sub-component for purposes of calculating its regional value content before it is incorporated into a heavy-duty automotive good;

(d) for purposes of calculating the regional value content of a heavy-duty automotive good, the producer of that good may choose to treat any material used in the production of that good as a non-originating material, and the value of that material shall be determined in accordance with subsection (2) with respect to the transaction in which the producer acquired it;

(e) any information set out in a statement referred to in subsections (1)(b)(ii), (d)(i) through (iii) or (e)(i) that concerns the value of materials or costs shall be in the same currency as the currency of the country in which the person who provided the statement is located; and

(f) total cost under subsections (1)(a)(i) and (ii) consists of the costs referred to section 2(6), and is calculated in accordance with that section and section 2(7).

Examples of application of rules for determining VNM for heavy-duty automotive goods

(10) Each of the following examples is an "Example" as referred to in section 2(4).

Example 1: A listed material is imported from outside the territories of the NAFTA countries

A cast head, produced outside the territories of the NAFTA countries, is imported into the territory of a NAFTA country and used in that country in the production of an engine that will be used as original equipment in the production of a heavy-duty vehicle. No other non-originating materials are used in the production of the engine. The cast head is a listed material; the engine is an automotive component.

Situation 1: Use of the listed material in an automotive component

For purposes of calculating the regional value content of the engine, the value of listed materials imported from outside the territories of the NAFTA countries is included in the value of non-originating materials used in the production of the engine. Because the cast head was produced outside the territories of the NAFTA countries, its value, under section 10(1)(c), is included in the value of non-originating materials used in the production of the engine.

Situation 2: Use of an originating automotive component incorporating the listed material

The engine is an originating material acquired by the producer of the heavy-duty vehicle. For purposes of calculating the regional value content of the heavy-duty vehicle that incorporates that engine (and incorporates the cast head), the value of non-originating materials used in the production of the heavy-duty vehicle is determined under section 10(1)(d) with respect to that engine. The producer may choose to include in the value of non-originating materials of the heavy-duty vehicle

(a) the value, determined under section 10(1)(d)(i), of the non-originating materials that are incorporated into the engine, which is the value, determined under sections 10(1) (a) through (c) and paragraph (e)(ii), of the non-originating materials;

(b) the value, determined under section 10(1)(d)(ii), which is an amount equal to the amount determined under section 10(1)(d)(iv) multiplied by the remainder of one minus the regional value content, expressed as a decimal, of the engine;

(c) the value, determined under section 10(1)(d)(iii), which is an amount equal to the amount determined under section 10(1)(d)(iv) multiplied by the remainder of one minus the regional value-content requirement, expressed as a decimal, for the engine; or

(d) the value, determined under section 10(1)(d)(iv), of the engine.

The heavy-duty vehicle producer may only choose the first option if that producer has a statement, referred to in section 10(1)(d)(i), from the person from whom the engine was acquired. In this situation, the value, determined under section 10(1)(c), of the cast head, is included in the value of non-originating materials of the heavy-duty vehicle, with respect to the engine that is used in the production of the heavy-duty vehicle.

The heavy-duty vehicle producer may only choose the second option if that producer has a statement, referred to in section 10(1)(d)(ii), from the person from whom the engine was acquired. In this situation, because of the application of the equation, the value of the cast head will be included in the amount determined under section 10(1)(d)(ii) and is, consequently, included in the value of non-originating materials used in the production of the heavy-duty vehicle.

The heavy-duty vehicle producer may only choose the third option if that producer has a statement, referred to in section 10(1)(d)(iii), from the person from whom the engine was acquired. In this situation, because of the application of the equation, the value of the cast head will be included in the amount determined under section 10(1)(d)(iii) and is, consequently, included in the value of non-originating materials used in the production of the heavy-duty vehicle.

Situation 3: Use of a non-originating automotive component incorporating the listed material

The engine is a non-originating material acquired by the producer of the heavy-duty vehicle. For purposes of calculating the regional value content of the heavy-duty vehicle that incorporates that engine (and incorporates the cast head), the value of non-originating materials used in the production of the heavy-duty vehicle is determined under section 10(1)(e) with respect to that engine. The producer of the heavy-duty vehicle may choose to include in the value of non-originating materials either

(a) the value, as determined under section 10(1)(e)(i), of the non-originating materials that are incorporated into the engine, which is the value of the non-originating materials as determined under sections 10(1)(a) through (d) and (f), or

(b) the value of the engine, determined under section 10(1)(e)(ii).

The heavy-duty vehicle producer may only choose the first option if that producer has a statement, referred to in section 10(1)(e)(i), from the person from whom the engine was acquired. In this situation, the value of the cast head, as determined under section 10(1)(c), is included in the value of non-originating materials used in the production of the heavy-duty vehicle, with respect to the engine that is used in the production of the heavy-duty vehicle.

Example 2: A material is imported from outside the territories of the NAFTA countries

A rocker arm assembly, produced outside the territories of the NAFTA countries, is imported into the territory of a NAFTA country and used in that country in the production of an engine that will be used as original equipment in the production of a heavy-duty vehicle. No other non-originating materials are used in the production of the engine. The rocker arm assembly is neither a listed material nor a sub-component; the engine is an automotive component.

Situation 1: Use of the material in an automotive component

For purposes of calculating the regional value content of the engine, the value of non-originating materials that are not listed materials is included in the value of non-originating materials used in the production of the engine. Because the rocker arm assembly was produced outside the territories of the NAFTA countries, it is a non-originating material and its value, under section 10(1)(f), is included in the value of non-originating materials used in the production of the engine.

Situation 2: Use of an originating automotive component incorporating the material

The engine is an originating material acquired by the producer of the heavy-duty vehicle. For purposes of calculating the regional value content of the heavy-duty vehicle that incorporates that engine (and incorporates the rocker arm assembly), the value of non-originating materials used in the production of the heavy-duty vehicle is determined under section 10(1)(d) with respect to that engine. The producer may choose to include in the value of non-originating materials of the heavy-duty vehicle

(a) the value, determined under section 10(1)(d)(i), of the non-originating materials that are incorporated into the engine, which is the value, determined under sections 10(1) (a) through (c) and paragraph (e)(ii), of the non-originating materials;

(b) the value, determined under section 10(1)(d)(ii), which is an amount equal to the amount determined under section 10(1)(d)(iv) multiplied by the remainder of one minus the regional value content, expressed as a decimal, of the engine;

(c) the value, determined under section 10(1)(d)(iii), which is an amount equal to the amount determined under section 10(1)(d)(iv) multiplied by the remainder of one minus the regional value-content requirement, expressed as a decimal, for the engine; or

(d) the value, determined under section 10(1)(d)(iv), of the engine.

The heavy-duty vehicle producer may only choose the first option if that producer has a statement, referred to in section 10(1)(d)(i), from the person from whom the engine was acquired. In this situation, the value of the rocker arm assembly, as determined under section 10(1)(f), is not included in the value of non-originating materials of the heavy-duty vehicle, with respect to the engine that is used in the production of the heavy-duty vehicle.

The heavy-duty vehicle producer may only choose the second option if that producer has a statement, referred to in section 10(1)(d)(ii), from the person from whom the engine was acquired. In this situation, because of the application of the equation, the value of the rocker arm assembly will be included in the amount determined under section 10(1)(d)(ii) and will, consequently, be included in the value of non-originating materials used in the production of the heavy-duty vehicle.

The heavy-duty vehicle producer may only choose the third option if that producer has a statement, referred to in section 10(1)(d)(iii), from the person from whom the engine was acquired. In this situation, because of the application of the equation, the value of the rocker arm assembly will be included in the amount determined under section 10(1)(d)(iii) and will, consequently, be included in the value of non-originating materials used in the production of the heavy-duty vehicle.

Situation 3: Use of a non-originating automotive component incorporating the material

The engine is a non-originating material acquired by the producer of the heavy-duty vehicle. For purposes of calculating the regional value content of the heavy-duty vehicle that incorporates that engine (and incorporates the rocker arm assembly), the value of non-originating materials used in the production of the heavy-duty vehicle is determined under section 10(1)(e) with respect to that engine. The producer of the heavy-duty vehicle may choose to include in the value of non-originating materials either

(a) the value, as determined under section 10(1)(e)(i), of the non-originating materials that are incorporated into the engine, which is the value of the non-originating materials as determined under sections 10(1) (a) through (d) and (f), or

(b) the value of the engine, determined under section 10(1)(e)(ii).

The heavy-duty vehicle producer may only choose the first option if that producer has a statement, referred to in section 10(1)(e)(i), from the person from whom the engine was acquired. In this situation, the value of the rocker arm assembly, as determined under section 10(1)(f), is included in the value of non-originating materials used in the production of the heavy-duty vehicle, with respect to the engine that is used in the production of the heavy-duty vehicle.

Situation 4: Use of the material in a self-produced automotive component

If the engine is a self-produced material rather than an acquired material, the heavy-duty vehicle producer is using the rocker arm assembly in the production of the heavy-duty vehicle rather than in the production of the engine, because, under section 7(4), the engine cannot be designated as an intermediate material. For purposes of calculating the regional value content of the heavy-duty vehicle, the value, under section 10(1)(f), of the rocker arm assembly is included in the value of non-originating materials used in the production of the heavy-duty vehicle.

Example 3: An automotive component is imported from outside the territories of the NAFTA countries

A transmission, produced outside the territories of the NAFTA countries, is imported into the territory of a NAFTA country and used in that country as original equipment in the production of a heavy-duty vehicle. The transmission is an automotive component.

Situation: Use of the automotive component

For purposes of calculating the regional value content of the heavy-duty vehicle in which the transmission is used, the value of the transmission is included in the value of the non-originating materials under section 10(1)(c), regardless of whether the producer imported the transmission or acquired it from someone else in the territory of a NAFTA country.

Example 4: An automotive component is imported from outside the territories of the NAFTA countries

A transmission, produced outside the territories of the NAFTA countries, is imported into the territory of a NAFTA country and combined with an engine to produce an engine-transmission assembly that will be used as original equipment in the production of a heavy-duty vehicle. The transmission is an automotive component; the engine-transmission assembly is an automotive component assembly.

Situation: Use of the automotive component assembly

The automotive component assembly is acquired by a producer who uses it in the production of a heavy-duty vehicle. If the automotive component assembly that incorporates the imported transmission is an originating material, the value of non-originating materials used in the production of the automotive component assembly is determined, at the choice of the producer, under any of section 10(1)(d) (i), (ii), (iii) and (iv). (See example 1 for more detailed explanations of these provisions.) If the automotive component assembly that incorporates the imported transmission is a non-originating material, the value of non-originating materials used in the production of the automotive component assembly is determined, at the choice of the producer, under section 10(1)(e) (i) or (ii). (See example 1 for more detailed explanations of these provisions.)

Regardless of whether the automotive component assembly is an originating material or a non-originating material, the value of the automotive component that was imported from outside the territories of the NAFTA countries is included in the value of non-originating materials used in the production of the heavy-duty vehicle. The transmission is a non-originating material, and, for purposes of calculating the regional value content of an automotive component assembly or heavy-duty vehicle that incorporates that transmission, the value of the transmission is included in the value of non-originating materials used in the production of the automotive component assembly or heavy-duty vehicle that incorporates it.

Example 5: A material is imported from outside the territories of the NAFTA countries

An aluminum ingot, produced outside the territories of the NAFTA countries, is imported into the territory of a NAFTA country and used in that country in the production of cast block that will be used in an engine that will be used as original equipment in the production of a heavy-duty vehicle. The aluminum ingot is not a listed material; the cast block is a listed material; the engine is an automotive component.

Situation 1: Use of the material in an intermediate material that is a listed material

The engine producer designates the cast block as an intermediate material under section 7(4). For purposes of determining the origin of that cast block, because the aluminum ingot is classified under a different heading than the cast block, the cast block satisfies the applicable change in tariff classification and is an originating material.

Situation 2: Use of the listed material incorporating the material

For purposes of calculating the regional value content of the engine that incorporates that cast block (and thus incorporates the aluminum ingot), the value of non-originating materials is determined under section 10(1). Because none of sections 10(1) (a) through (f) require that a listed material that is an originating material be included in the value of non-originating materials used in the production of a good, the value of the cast block is not included in the value of non-originating materials used in the production of the engine or in the value of non-originating materials used in the production of an automotive component assembly or heavy-duty vehicle that incorporates the engine.

Because section 10(1)(d) does not refer to a listed material that is an originating material, the value of the non-originating aluminum ingot used in the production of the originating cast block is not included in the value of non-originating materials used in the production of any good or material that incorporates the originating cast block.

Example 6: A non-originating listed material is used to produce a sub-component that is used to produce another sub-component

A crankshaft, produced in the territory of NAFTA country A from a forging imported from outside the territories of the NAFTA countries, is a non-originating material. The crankshaft is sold to another producer, located in the same country, who uses it to produce an originating block assembly. That block assembly is sold to another producer, also located in the same country, who uses it to produce a finished block. The finished block is sold to a producer of engines, who is located in NAFTA country B, for use in the production of a heavy-duty vehicle. The crankshaft is a listed material; the block assembly is a sub-component, as is the finished block.

Situation 1: Calculating the regional value content of the finished block

A sub-component is not a heavy-duty automotive good. As referred to in section 10(9)(c), for purposes of calculating the regional value content of the sub-component before it is incorporated into a heavy-duty automotive good, such as when the sub-component is exported from the territory of one NAFTA country to the territory of another NAFTA country, the value of non-originating materials of the sub-component includes only the value of non-originating materials used in the production of that sub-component. Because the block assembly is an originating material, its value is not included in the value of non-originating materials of the finished block, nor is the value of the non-originating crankshaft included in the value of non-originating materials used in the production of the finished block because the crankshaft was used in the production of the block assembly and was not used in the production of the finished block.

Situation 2: Calculating the regional value content of the component that incorporates the finished block

For purposes of calculating the regional value content of the heavy-duty vehicle that incorporates a sub-component, the value of non-originating materials used in the production of the sub-component is determined under section 10(1) (d) or (e) with respect to that sub-component. In this situation, the value, under section 10(1)(b), of the non-originating crankshaft is included in the value of non-originating materials used in the production of the engine. (See examples 1 and 2 for more detailed explanations of sections 10(1) (d) and (e).)

Example 7: A non-listed material is imported from outside the territories of the NAFTA countries and is used in the production of another non-listed material

A bumper part, produced outside the territories of the NAFTA countries, is imported into the territory of a NAFTA country and is used in the production of a bumper. The bumper is used in the territory of a NAFTA country as original equipment in the production of a heavy-duty vehicle. Neither a bumper part nor a bumper is a listed material, sub-component, automotive component or automotive component assembly.

Situation 1: The non-listed material is an originating material

The bumper is an originating material. For purposes of calculating the regional value content of the heavy-duty vehicle, neither the value of the imported bumper part nor the value of the bumper is included in the value of the non-originating materials.

Situation 2: The non-listed material is a non-originating material

The bumper is a non-originating material. For purposes of calculating the regional value content of the heavy-duty vehicle, the value of non-originating materials used in the production of the heavy-duty vehicle is determined under section 10(1)(f) with respect to the bumper. In this situation, the value of the bumper is included in the value of non-originating materials of the heavy-duty vehicle. Because a bumper is not a listed material, the producer of the heavy-duty vehicle does not have the option, under section 10(1)(b)(ii), to include only the value of the imported bumper part in the value of non-originating materials used in the production of the heavy-duty vehicle.

Example 8:

Situation: Transhipment of a listed material

A producer, located in the territory of a NAFTA country, produces, in that country, a cast head that is an originating good. The producer exports the cast head to outside the territories of the NAFTA territories, where valves, springs, valve lifters, a camshaft and gears are added to it to create a cast head assembly. An engine producer, located in the territory of a NAFTA country, imports the cast head assembly into that country and uses it in the production of an engine that will be used as original equipment in the production of a heavy-duty vehicle. A cast head is a listed material; a cast head assembly is a sub-component.

For purposes of calculating the regional value content of the engine, the value of the imported cast head assembly is included in the value of non-originating materials under section 10(1)(c). The value of the cast head cannot be deducted from the value determined under section 10(1)(c). Although the cast head was once an originating good, under section 18 when further production was performed with respect to the cast head outside the territories of the NAFTA countries, it was no longer an originating good.

Example 9: A material is imported from outside the territories of the NAFTA countries and a heavy-duty vehicle producer self-produces a non-originating listed material

A material, produced outside the territories of the NAFTA countries, is imported into the territory of a NAFTA country and used in that country in the production of a water pump that will be used as original equipment by the same producer in the production of a heavy-duty vehicle. Although the producer, under section 7(4), designates the water pump as an intermediate material it is a non-originating material because it fails to satisfy the regional value-content requirement. A water pump is a listed material.

For purposes of calculating the regional value content of the heavy-duty vehicle, the value of non-originating materials includes, at the choice of the producer, either the total cost, determined under section 10(1)(a)(i), of the water pump or the value, determined under section 10(1)(a)(iii)(A), of the material imported from outside the territories of the NAFTA countries.

Example 10: A material is acquired and used to produce a non-originating listed material

A material, produced outside the territories of the NAFTA countries, is acquired in the territory of a NAFTA country and is used in that country in the production of a water pump that will be used as original equipment in the production of a heavy-duty vehicle. The producer of the water pump and the producer of the heavy-duty vehicle are separate, unrelated producers, located in the same country. A water pump is a listed material. The producer of the water pump chose to calculate the regional value content of the water pump in accordance with section 12(1) over a period set out in section 12(5)(a) and using a category set out in section 12(4)(b). The water pump is a non-originating material because it fails to satisfy the regional value-content requirement.

For purposes of calculating the regional value content of the heavy-duty vehicle, the value of non-originating materials includes, at the choice of the producer, either the value, determined under section 10(1)(b)(i), of the water pump or, if the producer has a statement referred to in section 10(1)(b)(ii)(B), the value, determined under that section, of the material imported from outside the territories of the NAFTA countries.

The producer has a statement referred to in section 10(1)(b)(ii)(B) and chooses to use the value of non-originating material determined under that section. The statement states, as is permitted under section 10(8), the value of non-originating material used in the production of the water pump in accordance with section 12(3) over a period set out in section 12(5)(a) and using a category set out in section 12(4)(e).

SECTION 11. MOTOR VEHICLE AVERAGING

NC and VNM for motor vehicles may be averaged over producer's fiscal year

(1) For purposes of calculating the regional value content of light-duty vehicles or heavy-duty vehicles, the producer of those motor vehicles may choose that

(a) the sum of the net costs incurred and the sum of the values of non-originating materials used by the producer be calculated over the producer's fiscal year with respect to the motor vehicles that are in any one of the categories set out in subsection (5) that is chosen by the producer; and

(b) the sums referred to in paragraph (a) be used in the calculation referred to in section 6(3) as the net cost and the value of non-originating materials, respectively.

Information required when producer chooses to average for motor vehicles

(2) A choice made under subsection (1) shall

(a) state the category chosen by the producer, and

(i) where the category referred to in subsection (5)(a) is chosen, state the model line, model name, class of motor vehicle and tariff classification of the motor vehicles in that category, and the location of the plant at which the motor vehicles are produced,

(ii) where the category referred to in subsection (5)(b) is chosen, state the model name, class of motor vehicle and tariff classification of the motor vehicles in that category, and the location of the plant at which the motor vehicles are produced, and

(iii) where the category referred to in subsection (5)(c) is chosen, state the model line, model name, class of motor vehicle and tariff classification of the motor vehicles in that category, and the locations of the plants at which the motor vehicles are produced;

(b) state the basis of the calculation described in subsection (3);

(c) state the producer's name and address;

(d) state the period with respect to which the choice is made, including the starting and ending dates;

(e) state the estimated regional value content of motor vehicles in the category on the basis stated under paragraph (b);

(f) be dated and signed by an authorized officer of the producer; and

(g) be filed with the customs administration of each NAFTA country to which vehicles in that category are to be exported during the period covered by the choice, at least 10 days before the first day of the producer's fiscal year, or such shorter period as that customs administration may accept.

Averaging period

(3) Where the fiscal year of a producer begins after the date of the entry into force of the Agreement but before one year after that date, the producer may choose that the calculation of regional value content referred to in subsection (1) or (6) be made under that subsection over the period beginning on the date of the entry into force of the Agreement and ending at the end of that fiscal year, in which case the choice shall be filed with the customs administration of each NAFTA country to which vehicles are to be exported during the period covered by the choice not later than 10 days after the entry into force of the Agreement, or such longer period as that customs administration may accept.

(4) Where the fiscal year of a producer begins on the date of the entry into force of the Agreement, the producer may make the choice referred to in subsection (1) not later than 10 days after the entry into force of the Agreement, or such longer period as the customs administration referred to in subsection (2)(g) may accept.

Categories of motor vehicles for averaging

(5) The categories referred to in subsection (1) are the following:

(a) the same model line of motor vehicles in the same class of motor vehicles produced in the same plant in the territory of a NAFTA country;

(b) the same class of motor vehicles produced in the same plant in the territory of a NAFTA country; and

(c) the same model line of motor vehicles produced in the territory of a NAFTA country.

(6) Where applicable, a producer may choose that the calculation of the regional value content of motor vehicles referred to in Schedule VI be made in accordance with that schedule.

Timely filing of choice to average

(7) Subject to section 5(4) of Schedule VI, the choice referred to in subsection (6) shall be filed with the customs administration of the NAFTA country to which vehicles referred to in that schedule are to be exported, at least 10 days before the first day of the producer's fiscal year with respect to which that choice is to apply or such shorter period as the customs administration may accept.

Choice to average cannot be rescinded

(8) A choice filed for the period referred to in subsection (1) or (3) may not be

(a) rescinded; or

(b) modified with respect to the category or basis of calculation.

Averaged net cost and VNM included in calculation of RVC on the basis of producer's option to include all vehicles of category or only certain exported vehicles of category

(9) For purposes of this section, where a producer files a choice under subsection (1), (3) or (4), including a choice referred to in section 13(9), the net cost incurred and the values of non-originating materials used by the producer, with respect to

(a) all motor vehicles that fall within the category chosen by the producer and that are produced during the fiscal year or, in the case of a choice filed under subsection (3), during the period with respect to which the choice is made, or

(b) those motor vehicles to be exported to the territory of one or more of the NAFTA countries that fall within the category chosen by the producer and that are produced during the fiscal year or, in the case of a choice filed under subsection (3), during the period with respect to which the choice is made,

shall be included in the calculation of the regional value content under any of the categories set out in subsection (5).

Year-end analysis required if averaging based on estimated costs; obligation to notify of change in status

(10) Where the producer of a motor vehicle has calculated the regional value content of the motor vehicle on the basis of estimated costs, including standard costs, budgeted forecasts or other similar estimating procedures, before or during the producer's fiscal year, the producer shall conduct an analysis at the end of the producer's fiscal year of the actual costs incurred over the period with respect to the production of the motor vehicle, and, if the motor vehicle does not satisfy the regional value content requirement on the basis of the actual costs, immediately inform any person to whom the producer has provided a Certificate of Origin for the motor vehicle, or a written statement that the motor vehicle is an originating good, that the motor vehicle is a non-originating good.

(11) The following example is an "Example" as referred to in section 2(4).

Example:

A motor vehicle producer located in NAFTA country A produces vehicles that fall within a category set out in section 11(5) that is chosen by the producer. The motor vehicles are to be sold in NAFTA countries A, B and C, as well as in country D, which is not a NAFTA country. Under section 11(1), the motor vehicle producer may choose that the sum of the net costs incurred and the sum of the values of non-originating materials used by the producer be calculated over the producer's fiscal year. The producer may state in the choice the basis of the calculation as described in section 11(9)(a), in which case the calculation would be on the basis of all the motor vehicles produced regardless of where they are destined. Alternatively, the producer may state in the choice the basis of the calculation as described in section 11(9)(b). In this case, the producer would also need to state that the calculation is on the basis of

(a) the motor vehicles produced that are for export to NAFTA countries B and C;

(b) the motor vehicles produced that are for export to only NAFTA country B; or

(c) the motor vehicles produced that are for export to only NAFTA country C.

The calculation would be on the basis as described in the choice.

SECTION 12. AUTOMOTIVE PARTS AVERAGING

NC and VNM for automotive parts may be averaged to determine RVC of parts

(1) The regional value content of any or all goods that are of the same tariff provision listed in Schedule IV, or an automotive component assembly, an automotive component, a sub-component or a listed material, produced in the same plant, may, where the producer of those goods chooses to do so, be calculated by

(a) calculating the sum of the net costs incurred and the sum of the values of non-originating materials used by the producer of the goods over the period set out in subsection (5) that is chosen by the producer with respect to any or all of those goods in any one of the categories set out in subsection (4) that is chosen by the producer; and

(b) using the sums referred to in paragraph (a) in the calculation referred to in section 6(3) as the net cost and the value of non-originating materials, respectively.

(2) The calculation of the regional value content made under subsection (1) shall apply with respect to each unit of the goods in the category set out in subsection (4) that is chosen by the producer and produced during the period chosen by the producer under subsection (5).

VNM for each unit in a category of goods for which averaging used

(3) The value of non-originating materials of each unit of the goods

(a) in the category set out in subsection (4) chosen by the producer, and

(b) produced during the period chosen by the producer under subsection (5),

shall be the sum of the values of non-originating materials referred to in subsection (1)(a) divided by the number of units of the goods in that category and produced during that period.

Categories of automotive parts for averaging

(4) The categories referred to in subsection (1)(a) are the following:

(a) original equipment for use in the production of light- duty vehicles;

(b) original equipment for use in the production of heavy-duty vehicles;

(c) after-market parts;

(d) any combination of goods referred to in paragraphs (a) through (c);

(e) goods that are in a category set out in any of paragraphs (a) through (d) and are sold to one or more motor vehicle producers; and

(f) goods that are in a category set out in any of paragraphs (a) through (e) and are exported to the territory of one or more of the NAFTA countries.

Periods for averaging RVC for automotive parts

(5) The period referred to in subsection (1)(a) is,

(a) with respect to goods referred to in subsection (4) (a), (b) or (d), or subsection (4) (e) or (f) where the goods in that category are in a category referred to in subsection (4) (a) or (b), any month, any consecutive three month period that is evenly divisible into the number of months of the producer's fiscal year remaining at the beginning of that period or the fiscal year of the motor vehicle producer to whom those goods are sold; and

(b) with respect to goods referred to in subsection (4)(c), or subsection (4) (e) or (f) where the goods in that category are in a category referred to in subsection (4)(c), any month, any consecutive three month period that is evenly divisible into the number of months of the producer's fiscal year remaining at the beginning of that period, the fiscal year of that producer or the fiscal year of the motor vehicle producer to whom those goods are sold.

Choice to average may not be rescinded

(6) A choice made under subsection (1) may not be rescinded or modified with respect to the goods or the period with respect to which the choice is made.

(7) Where a producer of goods chooses a one or three month period under subsection (5) with respect to the goods referred to in subsection (5)(a), that producer shall be considered to have chosen under that subsection a period or periods of the same duration for

(a) the remainder of the fiscal year of the motor vehicle producer to whom those goods are sold, where the producer chooses under subsection (9)(a) the fiscal year of that motor vehicle producer; and

(b) the remainder of the fiscal year of the producer of those goods, where the producer does not choose under subsection (9)(a) the fiscal year of the motor vehicle producer to whom the goods are sold.

(8) Where a producer of goods chooses a one or three month period under subsection (5) with respect to the goods referred to in subsection (5)(b), that producer shall be considered to have chosen under that subsection a period or periods of the same duration for the remainder of, at the choice of the producer, the producer's fiscal year or the fiscal year of the motor vehicle producer to whom those goods are sold.

(9) Where a producer of goods chooses a one or three month period under subsection (5) with respect to the goods, the producer may,

(a) with respect to goods referred to in subsection (5)(a), at the end of the fiscal year of the motor vehicle producer to whom those goods are sold, choose the fiscal year of that motor vehicle producer; and

(b) with respect to goods referred to in subsection (5)(b), at the end of the producer's fiscal year or the fiscal year of the motor vehicle producer to whom those goods are sold, as the case may be, choose the producer's fiscal year or the fiscal year of that motor vehicle producer.

Applicable method for averaging VNM under different categories

(10) Where a producer chooses that the regional value content of goods be calculated in accordance with subsection (1) and the goods are in any of the categories set out in subsections (4) (d) through (f), the value of non-originating materials

(a) shall be determined in the manner set out in section 9, where any of those goods are light-duty automotive goods;

(b) shall be determined in the manner set out in section 10, where any of those goods are heavy-duty automotive goods but none of the goods are light-duty automotive goods; and

(c) shall be determined in the manner set out in section 7, where none of those goods are light-duty automotive goods or heavy-duty automotive goods.

Year-end analysis required if averaging based on estimated costs; obligation to notify of change in status

(11) Where the producer of a good has calculated the regional value content of the good on the basis of estimated costs, including standard costs, budgeted forecasts or other similar estimating procedures, before or during the period chosen under subsection (1), the producer shall conduct an analysis, at the end of the producer's fiscal year following the end of that period, of the actual costs incurred over the period with respect to the production of the good and, if the good does not satisfy the regional value content requirement on the basis of the actual costs during that period, immediately inform any person to whom the producer has provided a Certificate of Origin for the good, or a written statement that the good is an originating good, that the good is a non-originating good.

SECTION 13. SPECIAL REGIONAL VALUE-CONTENT REQUIREMENTS

Changes in regional value content level for automotive goods

(1) Notwithstanding the regional value-content requirement set out in Schedule I, and except as otherwise provided in subsection (2), the regional value-content requirement for a good referred to in paragraph (a) or (b) is as follows.

(a) for the fiscal year of a producer that begins on the day closest to January 1, 1998 and for the three following fiscal years of that producer, not less than 56 percent, and for the fiscal year of a producer that begins on the day closest to January 1, 2002 and thereafter, not less than 62.5 percent, in the case of

(i) a light-duty vehicle, and

(ii) a good provided for in any of headings 8407 and 8408 and subheading 8708.40, that is for use in a light-duty vehicle; and

(b) for the fiscal year of a producer that begins on the day closest to January 1, 1998 and for the three following fiscal years of that producer, not less than 55 percent, and for the fiscal year of a producer that begins on the day closest to January 1, 2002 and thereafter, not less than 60 percent, in the case of

(i) a heavy-duty vehicle,

(ii) a good provided for in any of headings 8407 and 8408 and subheading 8708.40 that is for use in a heavy-duty vehicle, and

(iii) except in the case of a good referred to in paragraph (a)(ii) or provided for in any of subheadings 8482.10 through 8482.80, 8483.20 and 8483.30, a good of a tariff provision listed in Schedule IV that is subject to a regional value-content requirement and is for use in a light-duty vehicle or a heavy-duty vehicle.

Regional value content level for motor vehicles produced in a new plant or in a refit plant

(2) Notwithstanding the regional value-content requirement set out in Schedule I, the regional value-content requirement for a light-duty vehicle or a heavy-duty vehicle that is produced in a plant is as follows:

(a) not less than 50 percent for five years after the date on which the first prototype of the motor vehicle is produced in the plant by a motor vehicle assembler, if

(i) the motor vehicle is of a class, marque or, except in the case of a heavy-duty vehicle, size category and type of underbody, that was not previously produced by the motor vehicle assembler in the territory of any of the NAFTA countries,

(ii) the plant consists of, or includes, a new building in which the motor vehicle is assembled, and

(iii) the value of machinery that was never previously used for production, and that is used in the new building or buildings for the purposes of the complete motor vehicle assembly process with respect to that motor vehicle, is at least 90 percent of the value of all machinery used for purposes of that process; and

(b) not less than 50 percent for two years after the date on which the first prototype of the motor vehicle is produced in the plant by a motor vehicle assembler following a refit of that plant, if the motor vehicle is of a class, marque or, except in the case of a heavy-duty vehicle, size category and type of underbody, that was not assembled by the motor vehicle assembler in the plant before the refit.

Value of machinery in a new plant

(3) For purposes of subsection (2)(a)(iii), the value of machinery shall be

(a) where the machinery was acquired by the producer of the motor vehicle from another person, the cost of that machinery that is recorded on the books of the producer;

(b) where the machinery was used previously by the producer of the motor vehicle in the production of another good, the cost of the machinery that is recorded on the books of the producer minus accumulated depreciation of that machinery that is recorded on those books; and

(c) where the machinery was produced by the producer of the good, the total cost incurred with respect to that machinery, calculated on the basis of the costs that are recorded on the books of the producer.

Averaging period for calculation of RVC for vehicles of new plant or refit plant

(4) For purposes of calculating the regional value content of a motor vehicle referred to in subsection (2) that is in any one of the categories set out in subsection (7) that is chosen by the producer, the producer may file with the customs administration of the NAFTA country into the territory of which vehicles in that category are to be imported a choice to calculate the regional value content of such vehicles by

(a) calculating the sum of the net costs incurred and the sum of the values of non-originating materials used by the producer with respect to all of such motor vehicles in the category chosen over

(i) the period beginning on the day on which the first prototype of the motor vehicle is produced and ending on the last day of the producer's first fiscal year that begins on or after the beginning of the period,

(ii) a fiscal year of the producer that starts after the period referred to in subparagraph (i) and ends on or before the end of the period referred to in subsection (2)(a) or (b), or

(iii) the period beginning on the first day of the producer's fiscal year that begins before the end of the period referred to in subsection (2)(a) or (b) and ending at the end of that period; and

(b) using the sums referred to in paragraph (a) in the calculation referred to in section 6(3) as the net cost and the value of non-originating materials, respectively.

Information required on document filed when choosing to average; timely filing;

(5) A choice made under subsection (4) shall

(a) state the category chosen by the producer and

(i) where the category referred to in subsection (7)(a) is chosen, the model name, model line, class of motor vehicle and tariff classification of the motor vehicles in that category, and the location of the plant at which the motor vehicles are produced, and

(ii) where the category referred to in subsection (7)(b) is chosen, state the model name, class of motor vehicle and tariff classification of the motor vehicles in that category, and the plant location at which the motor vehicles are produced;

(b) state the basis of the calculation described in subsection (8);

(c) state the producer's name and address;

(d) state the period with respect to which the choice is made, including the starting and ending dates;

(e) state the estimated regional value content of motor vehicles in the category on the basis stated under paragraph (b);

(f) state whether the choice is with respect to a motor vehicle referred to in subsection (2)(a) or (b);

(g) be dated and signed by an authorized officer of the producer; and

(h) be filed with the customs administration of each NAFTA country to which vehicles in that category are to be exported during the period covered by the choice, at least 10 days before the first day of the producer's fiscal year, or such shorter period as that customs administration may accept.

No rescission or modification permitted

(6) A choice filed for the period referred to in subsection (4) may not be

(a) rescinded; or

(b) modified with respect to the category or basis of calculation.

Categories of motor vehicles for averaging

(7) The categories referred to in subsection (4) are the following:

(a) the same model line of motor vehicles in the same class of motor vehicles produced in the same plant in the territory of a NAFTA country; and

(b) the same class of motor vehicles produced in the same plant in the territory of a NAFTA country.

(8) For purposes of subsection (4), the net cost incurred and the values of non-originating materials used by the producer, with respect to

(a) all motor vehicles that fall within the category chosen by the producer and that are produced during the period with respect to which the choice is made, or

(b) those motor vehicles to be exported to the territory of one or more of the NAFTA countries that fall within the category chosen by the producer and that are produced during the period with respect to which the choice is made,

shall be included in the calculation of the regional value content under any of the categories set out in subsection (7).

Period for averaging RVC of motor vehicles of new or refit plant

(9) Where the period referred to in subsection (4) ends on a day other than the last day of the producer's fiscal year, the producer may, for purposes of section 11, make the choice referred to in that section with respect to

(a) the period beginning on the day following the end of that period and ending on the last day of that fiscal year; or

(b) the period beginning on the day following the end of that period and ending on the last day of the following full fiscal year.

Year-end analysis required if averaging based on estimated costs; obligation to notify of change in status

(10) Where the producer of a motor vehicle has calculated the regional value content of the motor vehicle on the basis of estimated costs, including standard costs, budgeted forecasts or other similar estimating procedures, before or during the producer's fiscal year, the producer shall conduct an analysis at the end of the producer's fiscal year of the actual costs incurred over the period with respect to the production of the motor vehicle, and, if the motor vehicle does not satisfy the regional value-content requirement on the basis of the actual costs, immediately inform any person to whom the producer has provided a Certificate of Origin for the motor vehicle, or a written statement that the motor vehicle is an originating good, that the motor vehicle is a non-originating good.

PART VI

GENERAL PROVISIONS

SECTION 14. ACCUMULATION

Option to determine origin of good by accumulating the production of a material with production of the good in which the material is used

(1) Subject to subsections (2) and (4), for purposes of determining whether a good is an originating good, an exporter or producer of a good may choose to accumulate the production, by one or more producers in the territory of one or more of the NAFTA countries, of materials that are incorporated into that good so that the production of the materials shall be considered to have been performed by that exporter or producer.

Statement required; information as to net cost and value of non-originating materials from production of material if accumulating for regional value content requirement

(2) Where a good is subject to a regional value-content requirement and an exporter or producer of the good has a statement signed by a producer of a material that is used in the production of the good that

(a) states the net cost incurred and the value of non-originating materials used by the producer of the material in the production of that material,

(i) the net cost incurred by the producer of the good with respect to the material shall be the net cost incurred by the producer of the material plus, where not included in the net cost incurred by the producer of the material, the costs referred to in sections 7(1)(c) through (e), and

(ii) the value of non-originating materials used by the producer of the good with respect to the material shall be the value of non-originating materials used by the producer of the material; or

(b) states any amount, other than an amount that includes any of the value of non-originating materials, that is part of the net cost incurred by the producer of the material in the production of that material,

(i) the net cost incurred by the producer of the good with respect to the material shall be the value of the material, determined in accordance with section 7(1), and

(ii) the value of non-originating materials used by the producer of the good with respect to the material shall be the value of the material, determined in accordance with section 7(1), minus the amount stated in the statement.

Averaging of costs from accumulated production

(3) Where a good is subject to a regional value-content requirement and an exporter or producer of the good does not have a statement described in subsection (2) but has a statement signed by a producer of a material that is used in the production of the good that

(a) states the sum of the net costs incurred and the sum of the values of non-originating materials used by the producer of the material in the production of that material and identical materials or similar materials, or any combination thereof, produced in a single plant by the producer of the material over a month or any consecutive three, six or twelve month period that falls within the fiscal year of the producer of the good, divided by the number of units of materials with respect to which the statement is made,

(i) the net cost incurred by the producer of the good with respect to the material shall be the sum of the net costs incurred by the producer of the material with respect to that material and the identical materials or similar materials, divided by the number of units of materials with respect to which the statement is made, plus, where not included in the net costs incurred by the producer of the material, the costs referred to in sections 7(1) (c) through (e), and

(ii) the value of non-originating materials used by the producer of the good with respect to the material shall be the sum of the values of non-originating materials used by the producer of the material with respect to that material and the identical materials or similar materials divided by the number of units of materials with respect to which the statement is made; or

(b) states any amount, other than an amount that includes any of the values of non-originating materials, that is part of the sum of the net costs incurred by the producer of the material in the production of that material and identical materials or similar materials, or any combination thereof, produced in a single plant by the producer of the material over a month or any consecutive three, six or twelve month period that falls within the fiscal year of the producer of the good, divided by the number of units of materials with respect to which the statement is made,

(i) the net cost incurred by the producer of the good with respect to the material shall be the value of the material, determined in accordance with section 7(1), and

(ii) the value of non-originating materials used by the producer of the good with respect to the material shall be the value of the material, determined in accordance with section 7(1), minus the amount stated in the statement.

Accumulated production considered to be production of a single producer

(4) For purposes of section 7(4), where a producer of the good chooses to accumulate the production of materials under subsection (1), that production shall be considered to be the production of the producer of the good.

(5) For purposes of this section,

(a) in order to accumulate the production of a material,

(i) where the good is subject to a regional value-content requirement, the producer of the good must have a statement described in subsection (2) or (3) that is signed by the producer of the material, and

(ii) where an applicable change in tariff classification is applied to determine whether the good is an originating good, the producer of the good must have a statement signed by the producer of the material that states the tariff classification of all non-originating materials used by that producer in the production of that material and that the production of the material took place entirely in the territory of one or more of the NAFTA countries;

(b) a producer of a good who chooses to accumulate is not required to accumulate the production of all materials that are incorporated into the good; and

(c) any information set out in a statement referred to in subsection (2) or (3) that concerns the value of materials or costs shall be in the same currency as the currency of the country in which the person who provided the statement is located.

Examples of accumulation of production

(6) Each of the following examples is an "Example" as referred to in section 2(4).

Example 1: section 14(1)

Producer A, located in NAFTA country A, imports unfinished bearing rings provided for in subheading 8482.99 into NAFTA country A from a non-NAFTA territory. Producer A further processes the unfinished bearing rings into finished bearing rings, which are of the same subheading. The finished bearing rings of Producer A do not satisfy an applicable change in tariff classification and therefore do not qualify as originating goods. The net cost of the finished bearing rings (per unit) is calculated as follows:

Product costs:	
Value of originating materials	$0.15
Value of non-originating materials	0.75
Other product costs	0.35
Period costs: (including $0.05 in excluded costs)	0.15
Other costs	0.05
Total cost of the finished bearing rings, per unit	$1.45
Excluded costs: (included in period costs)	0.05
Net cost of the finished bearing rings, per unit	$1.40

Producer A sells the finished bearing rings to Producer B who is located in NAFTA country A for $1.50 each. Producer B further processes them into bearings, and intends to export the bearings to NAFTA country B. Although the bearings satisfy the applicable change in tariff classification, the bearings are subject to a regional value-content requirement.

Situation A:

Producer B does not choose to accumulate costs incurred by Producer A with respect to the bearing rings used in the production of the bearings. The net cost of the bearings (per unit) is calculated as follows:

Product costs:	
Value of originating materials	$0.45
Value of non-originating materials (value, per unit, of the bearing rings purchased from Producer A)	1.50
Other product costs	0.75
Period costs: (including $0.05 in excluded costs)	0.15
Other costs	0.05
Total cost of the bearings, per unit	$2.90
Excluded costs: (included in period costs)	0.05
Net cost of the bearings, per unit	$2.85

Under the net cost method, the regional value content of the bearings is

$$\begin{aligned} RVC &= \frac{NC - VNM}{NC} \times 100 \\ &= \frac{\$2.85 - \$1.50}{\$2.85} \times 100 \\ &= 47.4\% \end{aligned}$$

Therefore, the bearings are non-originating goods.

Situation B:

Producer B chooses to accumulate costs incurred by Producer A with respect to the bearing rings used in the production of the bearings. Producer A provides a statement described in section 14(2)(a) to Producer B. The net cost of the bearings (per unit) is calculated as follows:

Product costs:	
Value of originating materials ($0.45 + $0.15)	$0.60
Value of non-originating materials (value, per unit, of the unfinished bearing rings imported by Producer A)	0.75
Other product costs ($0.75 + $0.35)	1.10
Period costs: (($0.15 + $0.15), including $0.10 in excluded costs)	0.30
Other costs: ($0.05 + $0.05)	0.10
Total cost of the bearings, per unit	$2.85
Excluded costs: (included in period costs)	0.10
Net cost of the bearings, per unit	$2.75

Under the net cost method, the regional value content of the bearings is

$$\begin{aligned} RVC &= \frac{NC-VNM}{NC}\times 100 \\ &= \frac{\$2.75-\$0.75}{\$2.75}\times 100 \\ &= 72.7\% \end{aligned}$$

Therefore, the bearings are originating goods.

Situation C:

Producer B chooses to accumulate costs incurred by Producer A with respect to the bearing rings used in the production of the bearings. Producer A provides to Producer B a statement described in section 14(2)(b) that specifies an amount equal to the net cost minus the value of non-originating materials used to produce the finished bearing rings ($1.40 − $0.75 = $0.65). The net cost of the bearings (per unit) is calculated as follows:

Product costs:	
Value of originating materials ($0.45 + $0.65)	$1.10
Value of non-originating materials ($1.50 − $0.65)	0.85
Other product costs	0.75
Period costs: (including $0.05 in excluded costs)	0.15
Other costs	0.05
Total cost of the bearings, per unit	$2.90
Excluded costs: (included in period costs)	0.05
Net cost of the bearings, per unit	$2.85

Under the net cost method, the regional value content of the bearings is

$$\begin{aligned} RVC &= \frac{NC-VNM}{NC}\times 100 \\ &= \frac{\$2.85-\$0.85}{\$2.85}\times 100 \\ &= 70.2\% \end{aligned}$$

Therefore, the bearings are originating goods.

Situation D:

Producer B chooses to accumulate costs incurred by Producer A with respect to the bearing rings used in the production of the bearings. Producer A provides to Producer B a statement described in section 14(2)(b) that specifies an amount equal to the value of other product costs used in the production of the finished bearing rings ($0.35). The net cost of the bearings (per unit) is calculated as follows:

Product costs:	
Value of originating materials	$0.45
Value of non-originating materials ($1.50 − $0.35)	1.15
Other product costs ($0.75 + $0.35)	1.10
Period costs: (including $0.05 in excluded costs)	0.15
Other costs	0.05
Total cost of the bearings, per unit	$2.90
Excluded costs: (included in period costs)	0.05
Net cost of the bearings, per unit	$2.85

Under the net cost method, the regional value content of the bearings is

$$\begin{aligned} RVC &= \frac{NC-VNM}{NC}\times 100 \\ &= \frac{\$2.85-\$1.15}{\$2.85}\times 100 \\ &= 59.7\% \end{aligned}$$

Therefore, the bearings are originating goods.

Example 2: section 14(1)

Producer A, located in NAFTA country A, imports non-originating cotton, carded or combed, provided for in heading 5203 for use in the production of cotton yarn provided for in heading 5205. Because the change from cotton, carded or combed, to cotton yarn is a change within the same chapter, the cotton does not satisfy the applicable change in tariff classification for heading 5205, which is a change from any other chapter, with certain exceptions. Therefore, the cotton yarn that Producer A produces from non-originating cotton is a non-originating good.

Producer A then sells the non-originating cotton yarn to Producer B, also located in NAFTA country A, who uses the cotton yarn in the production of woven fabric of cotton provided for in heading 5208. The change from non-originating cotton yarn to woven fabric of cotton is insufficient to satisfy the applicable change in tariff classification for heading 5208, which is a change from any heading outside headings 5208 through 5212, except from certain headings, under which various yarns, including cotton yarn provided for in heading 5205, are classified. Therefore, the woven fabric of cotton that Producer B produces from non-originating cotton yarn produced by Producer A is a non-originating good.

However, under section 14(1), if Producer B chooses to accumulate the production of Producer A, the production of Producer A would be considered to have been performed by Producer B. The rule for heading 5208, under which the cotton fabric is classified, does not exclude a change from heading 5203, under which carded or combed cotton is classified. Therefore, under section 15(1), the change from carded or combed cotton provided for in heading 5203 to the woven fabric of cotton provided for in heading 5208 would satisfy the applicable change of tariff classification for heading 5208. The woven fabric of cotton would be considered as an originating good.

Producer B, in order to choose to accumulate Producer A's production, must have a statement described in section 14(4)(a)(ii).

SECTION 15. INABILITY TO PROVIDE SUFFICIENT INFORMATION

Supplier of material unable to provide information; beyond control of supplier; procedure to be followed by Customs

(1) Where, during a verification of origin of a good, the person from whom a producer of the good acquired a material used in the production of that good is unable to provide the customs administration that is conducting the verification with sufficient information to substantiate that the material is an originating material or that the value of the material declared for purpose of calculating the regional value content of the good is accurate, and the inability of that person to provide the information is due to reasons beyond the control of that person, the customs administration shall, before making a determination as to the origin or value of the material, consider, where relevant, the following:

(a) whether the customs administration of the NAFTA country into the territory of which the good was imported issued an advance ruling under Article 509 of the Agreement, as implemented in each NAFTA country, with respect to that material that concluded that the material is an originating material or that the value of the material declared for purposes of calculating the regional value content of the good is accurate;

(b) whether an independent auditor has confirmed the accuracy of

(i) any signed statement referred to in this Appendix with respect to the material,

(ii) the information that was used by the person from whom the producer acquired the material to substantiate whether the material is an originating material, or

(iii) the information submitted by the producer of the material with an application for an advance ruling where, on the basis of that information, the customs administration concluded that the material is an originating material or that the value declared for the purpose of calculating the regional value content of the good is accurate;

(c) whether the customs administration has, before the start of the origin verification of the good, conducted a verification of origin of identical materials or similar materials produced by the producer of the material and determined that

(i) the identical materials or similar materials are originating materials, or

(ii) any signed statement referred to in this Appendix with respect to those identical materials or similar materials is accurate;

(d) whether the producer of the good has exercised due diligence to ensure that any signed statement that is referred to in this Appendix with respect to the material and that was provided by the person from whom the producer acquired the material is accurate;

(e) where the customs administration has access only to partial records of the person from whom the producer acquired the material, whether the records provide sufficient evidence to substantiate that the material is an originating material or that the value of the material declared for purposes of calculating the regional value content of the good is accurate;

(f) whether the customs administration can obtain, subject to Article 507 of the Agreement, as implemented in each NAFTA country, by means other than those referred to in paragraphs (a) through (e), relevant information regarding the determination of the origin or value of the material from the customs administration of the NAFTA country in the territory of which the person from whom the producer acquired the material was located; and

(g) whether the producer of the good, the person from whom the producer acquired the material or a representative of that person or producer agrees to bear the expenses incurred in providing the customs administration with the assistance that it may require for determining the origin or value of the material.

"Reasons beyond control" of supplier

(2) For purposes of subsection (1), "reasons beyond the control" of the person from whom the producer of the good acquired the material includes

(a) the bankruptcy of the person from whom the producer acquired the material or any other financial distress situation or business reorganization that resulted in that person or a related person having lost control of the records containing the information that substantiate that the material is an originating material or the value of the material declared for the purpose of calculating the regional value content of the good;
(b) any other reason that results in partial or complete loss of records of that producer that the producer could not reasonably have been expected to foresee, including loss of records due to fire, flooding or other natural cause.

Exporter or producer of good unable to provide information; reasons beyond control of exporter or producer; procedure to be followed by Customs

(3) Where, during a verification of origin of a good, the exporter or producer of the good is unable to provide the customs administration conducting the verification with sufficient information to substantiate that the good is an originating good, and the inability of that person to provide the information is due to reasons beyond the control of that person, the customs administration shall, before making a determination as to the origin of the good, consider, where relevant, the following:
(a) whether the customs administration of the NAFTA country into the territory of which the good was imported issued an advance ruling under Article 509 of the Agreement, as implemented in each NAFTA country, with respect to that good that concluded that the good is an originating good;
(b) whether an independent auditor has confirmed the accuracy of an origin statement with respect to the good;
(c) whether the customs administration has, before the start of the origin verification of the good, conducted a verification of origin of identical goods or similar goods produced by the producer of the good and determined that the identical goods or similar goods are originating goods;
(d) whether the exporter or producer of the good has exercised due diligence to ensure that the information provided to substantiate that the good is an originating good is sufficient; and
(e) where the customs administration has access only to partial records of the exporter or producer of the good, whether the records provide sufficient evidence to substantiate that the good is an originating good;
(f) whether the customs administration can obtain, subject to Article 507 of the Agreement, as implemented in each NAFTA country, by means other than those referred to in paragraphs (a) through (e), relevant information regarding the determination of the origin of the good from the customs administration of the NAFTA country in the territory of which the exporter or producer of the good was located; and
(g) whether the exporter or producer of the good or a representative of that person agrees to bear the expenses incurred in providing the customs administration with the assistance that it may require for determining the origin or value of the good.

"Reasons beyond control"

(4) For purposes of subsection (3), "reasons beyond the control" of the exporter or producer of the good includes
(a) the bankruptcy of the exporter or producer or any other financial distress situation or business reorganization that resulted in that person or a related person having lost control of the records containing the information that substantiate that the good is an originating good;
(b) any other reason that results in partial or complete loss of records of that exporter or producer that that person could not reasonably have been expected to foresee, including loss of records due to fire, flooding or other natural cause.

SECTION 16. TRANSSHIPMENT

Effect of subsequent processing outside the territory of a NAFTA country; loss of originating good status

(1) A good is not an originating good by reason of having undergone production that occurs entirely in the territory of one or more of the NAFTA countries that would enable the good to qualify as an originating good if subsequent to that production
(a) the good is withdrawn from customs control outside the territories of the NAFTA countries; or
(b) the good undergoes further production or any other operation outside the territories of the NAFTA countries, other than unloading, reloading or any other operation necessary to preserve the good in good condition, such as inspection, removal of dust that accumulates during shipment, ventilation, spreading out or drying, chilling, replacing salt, sulphur dioxide or other aqueous solutions, replacing damaged packing materials and containers and removal of units of the good that are spoiled or damaged and present a danger to the remaining units of the good, or to transport the good to the territory of a NAFTA country.

Transshipped good considered entirely non-originating

(2) A good that is a non-originating good by application of subsection (1) is considered to be entirely non-originating for purposes of this Appendix.

Exceptions for certain goods

(3) Subsection (1) does not apply with respect to a good provided for in any of subheadings 8541.10 through 8541.60 and 8542.11 through 8542.80 where any further production or other operation that that good undergoes outside the territories of the NAFTA countries does not result in a change in the tariff classification of the good to a subheading outside subheadings 8541.10 through 8542.90.

SECTION 17. NON-QUALIFYING OPERATIONS

Mere dilution; production or pricing practice to circumvent the provisions of this Appendix

17. A good is not an originating good merely by reason of
(a) mere dilution with water or another substance that does not materially alter the characteristics of the good; or
(b) any production or pricing practice with respect to which it may be demonstrated, on the basis of a preponderance of evidence, that the object was to circumvent this Appendix.

SCHEDULE I

Schedule I shall be the text of Annex 401 to the Agreement as implemented in General Note 12 of the HTSUS.

SCHEDULE II
VALUE OF GOODS

SECTION 1. Definitions.

For purposes of this Schedule, unless otherwise stated:
"buyer" refers to a person who purchases a good from the producer;
"buying commissions" means fees paid by a buyer to that buyer's agent for the agent's services in representing the buyer in the purchase of a good;
"producer" refers to the producer of the good being valued.

SECTION 2.

For purposes of Article 402(2) of the Agreement, as implemented by section 6(2) of this Appendix, the transaction value of a good shall be the price actually paid or payable for the good, determined in accordance with section 3 and adjusted in accordance with section 4.

SECTION 3.

(1) The price actually paid or payable is the total payment made or to be made by the buyer to or for the benefit of the producer. The payment need not necessarily take the form of a transfer of money; it may be made by letters of credit or negotiable instruments. The payment may be made directly or indirectly to the producer. For an illustration of this, the settlement by the buyer, whether in whole or in part, of a debt owed by the producer is an indirect payment.
(2) Activities undertaken by the buyer on the buyer's own account, other than those for which an adjustment is provided in section 4, shall not be considered to be an indirect payment, even though the activities might be regarded as being for the benefit of the producer. For an illustration of this, the buyer, by agreement with the producer, undertakes activities relating to the marketing of the good. The costs of such activities shall not be added to the price actually paid or payable.
(3) The transaction value shall not include the following charges or costs, provided that they are distinguished from the price actually paid or payable:
(a) charges for construction, erection, assembly, maintenance or technical assistance related to the good undertaken after the good has been sold to the buyer; or
(b) duties and taxes paid in the country in which the buyer is located with respect to the good.
(4) The flow of dividends or other payments from the buyer to the producer that do not relate to the purchase of the good are not part of the transaction value.

SECTION 4.

(1) In determining the transaction value of a good, the following shall be added to the price actually paid or payable:
(a) to the extent that they are incurred by the buyer, or by a related person on behalf of the buyer, with respect to the good being valued and are not included in the price actually paid or payable
(i) commissions and brokerage fees, except buying commissions,
(ii) the costs of transporting the good to the producer's point of direct shipment and the costs of loading, unloading, handling and insurance that are associated with that transportation, and
(iii) where the packaging materials and containers in which the good is packaged for retail sale are classified with the good under the Harmonized System, the value of the packaging materials and containers;
(b) the value, reasonably allocated in accordance with subsection (12), of the following elements where they are supplied directly or indirectly to the producer by the buyer, free of charge or at reduced cost for use in connection with the production and sale of the good, to the extent that the value is not included in the price actually paid or payable:
(i) a material, other than an indirect material, used in the production of the good,
(ii) tools, dies, molds and similar indirect materials used in the production of the good,
(iii) an indirect material, other than those referred to in subparagraph (ii) or in paragraphs (c), (e) or (f) of the definition "indirect material" set out in Article 415 of the Agreement, as implemented by section 2(1) of this Appendix, used in the production of the good, and
(iv) engineering, development, artwork, design work, and plans and sketches necessary for the production of the good, regardless of where performed;
(c) the royalties related to the good, other than charges with respect to the right to reproduce the good in the territory of one or more of the NAFTA countries, that the buyer must pay directly or indirectly as a condition of sale of the good, to the extent that such royalties are not included in the price actually paid or payable; and
(d) the value of any part of the proceeds of any subsequent resale, disposal or use of the good that accrues directly or indirectly to the producer.
(2) The additions referred to in subsection (1) shall be made to the price actually paid or payable under this section only on the basis of objective and quantifiable data.
(3) Where objective and quantifiable data do not exist with regard to the additions required to be made to the price actually paid or payable under subsection (1), the transaction value cannot be determined under section 2.
(4) No additions shall be made to the price actually paid or payable for the purpose of determining the transaction value except as provided in this section.
(5) The amounts to be added under subsections (1)(a) (i) and (ii) shall be
(a) those amounts that are recorded on the books of the buyer, or
(b) where those amounts are costs incurred by a related person on behalf of the buyer and are not recorded on the books of the buyer, those amounts that are recorded on the books of that related person.
(6) The value of the packaging materials and containers referred to in subsection (1)(a)(iii) and the value of the elements referred to in subsection (1)(b)(i) shall be

(a) where the packaging materials and containers or the elements are imported from outside the territory of the NAFTA country in which the producer is located, the customs value of the packaging materials and containers or the elements,

(b) where the buyer, or a related person on behalf of the buyer, purchases the packaging materials and containers or the elements from an unrelated person in the territory of the NAFTA country in which the producer is located, the price actually paid or payable for the packaging materials and containers or the elements,

(c) where the buyer, or a related person on behalf of the buyer, acquires the packaging materials and containers or the elements from an unrelated person in the territory of the NAFTA country in which the producer is located other than through a purchase, the value of the consideration related to the acquisition of the packaging materials and containers or the elements, based on the cost of the consideration that is recorded on the books of the buyer or the related person, or

(d) where the packaging materials and containers or the elements are produced by the buyer, or by a related person, in the territory of the NAFTA country in which the producer is located, the total cost of the packaging materials and containers or the elements, determined in accordance with subsection (7),

and shall include the following costs that are recorded on the books of the buyer or the related person supplying the packaging materials and containers or the elements on behalf of the buyer, to the extent that such costs are not included under paragraphs (a) through (d):

(e) the costs of freight, insurance, packing, and all other costs incurred in transporting the packaging materials and containers or the elements to the location of the producer,

(f) duties and taxes paid or payable with respect to the packaging materials and containers or the elements, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable,

(g) customs brokerage fees, including the cost of in-house customs brokerage services, incurred with respect to the packaging materials and containers or the elements, and

(h) the cost of waste and spoilage resulting from the use of the packaging materials and containers or the elements in the production of the good, less the value of renewable scrap or by-product.

(7) For purposes of subsection (6)(d), the total cost of the packaging materials and containers referred to in subsection (1)(a)(iii) or the elements referred to in subsection (1)(b)(i) shall be

(a) where the packaging materials and containers or the elements are produced by the buyer, at the choice of the buyer,

(i) the total cost incurred with respect to all goods produced by the buyer, calculated on the basis of the costs that are recorded on the books of the buyer, that can be reasonably allocated to the packaging materials and containers or the elements in accordance with Schedule VII, or

(ii) the aggregate of each cost incurred by the buyer that forms part of the total cost incurred with respect to the packaging materials and containers or the elements, calculated on the basis of the costs that are recorded on the books of the buyer, that can be reasonably allocated to the packaging materials and containers or the elements in accordance with Schedule VII; and

(b) where the packaging materials and containers or the elements are produced by a person who is related to the buyer, at the choice of the buyer,

(i) the total cost incurred with respect to all goods produced by that related person, calculated on the basis of the costs that are recorded on the books of that person, that can be reasonably allocated to the packaging materials and containers or the elements in accordance with Schedule VII, or

(ii) the aggregate of each cost incurred by that related person that forms part of the total cost incurred with respect to the packaging materials and containers or the elements, calculated on the basis of the costs that are recorded on the books of that person, that can be reasonably allocated to the packaging materials and containers or the elements in accordance with Schedule VII.

(8) Except as provided in subsections (10) and (11), the value of the elements referred to in subsections (1)(b)(ii) through (iv) shall be

(a) the cost of those elements that is recorded on the books of the buyer, or

(b) where such elements are provided by another person on behalf of the buyer and the cost is not recorded on the books of the buyer, the cost of those elements that is recorded on the books of that other person.

(9) Where the elements referred to in subsections (1)(b)(ii) through (iv) were previously used by or on behalf of the buyer, the value of the elements shall be adjusted downward to reflect that use.

(10) Where the elements referred to in subsections (1)(b)(ii) and (iii) were leased by the buyer or a person related to the buyer, the value of the elements shall be the cost of the lease as recorded on the books of the buyer or that related person.

(11) No addition shall be made to the price actually paid or payable for the elements referred to in subsection (1)(b)(iv) that are available in the public domain, other than the cost of obtaining copies of them.

(12) The producer shall choose the method of allocating to the good the value of the elements referred to in subsections (1)(b)(ii) through (iv), provided that the value is reasonably allocated to the good in a manner appropriate to the circumstances. The methods the producer may choose to allocate the value include allocating the value over the number of units produced up to the time of the first shipment or allocating the value over the entire anticipated production where contracts or firm commitments exist for that production. For an illustration of this, a buyer provides the producer with a mold to be used in the production of the good and contracts with the producer to buy 10,000 units of that good. By the time the first shipment of 1,000 units arrives, the producer has already produced 4,000 units. In these circumstances, the producer may choose to allocate the value of the mold over 4,000 units or 10,000 units but shall not choose to allocate the value of the elements to the first shipment of 1,000 units. The producer may choose to allocate the entire value of the elements to a single shipment of a good only where that single shipment comprises all of the units of the good acquired by the buyer under the contract or commitment for that number of units of the good between the producer and the buyer.

(13) The addition for the royalties referred to in subsection (1)(c) shall be the payment for the royalties that is recorded on the books of the buyer, or where the payment for the royalties is recorded on the books of another person, the payment for the royalties that is recorded on the books of that other person.

(14) The value of the proceeds referred to in subsection (1)(d) shall be the amount that is recorded for such proceeds on the books of the buyer or the producer.

SCHEDULE III

UNACCEPTABLE TRANSACTION VALUE

SECTION 1. Definitions.

For purposes of this Schedule, unless otherwise stated

"buyer" refers to a person who purchases a good from the producer;

"customs administration" refers to the customs administration of the NAFTA country into whose territory the good being valued is imported;

"producer" refers to the producer of the good being valued.

SECTION 2.

(1) There is no transaction value for a good where the good is not the subject of a sale.

(2) The transaction value of a good is unacceptable where

(a) there are restrictions on the disposition or use of the good by the buyer, other than restrictions that

(i) are imposed or required by law or by the public authorities in the territory of the NAFTA country in which the buyer is located,

(ii) limit the geographical area in which the good may be resold, or

(iii) do not substantially affect the value of the good;

(b) the sale or price actually paid or payable is subject to a condition or consideration for which a value cannot be determined with respect to the good;

(c) part of the proceeds of any subsequent resale, disposal or use of the good by the buyer will accrue directly or indirectly to the producer, and an appropriate addition to the price actually paid or payable cannot be made in accordance with section 4(1)(d) of Schedule II; or

(d) except as provided in section 3, the producer and the buyer are related persons and the relationship between them influenced the price actually paid or payable for the good.

(3) The conditions or considerations referred to in subsection (2)(b) include the following circumstances:

(a) the producer establishes the price actually paid or payable for the good on condition that the buyer will also buy other goods in specified quantities;

(b) the price actually paid or payable for the good is dependent on the price or prices at which the buyer sells other goods to the producer of the good; and

(c) the price actually paid or payable is established on the basis of a form of payment extraneous to the good, such as where the good is a semi-finished good that has been provided by the producer to the buyer on condition that the producer will receive a specified quantity of the finished good from the buyer.

(4) For purposes of subsection (2)(b), conditions or considerations relating to the production or marketing of the good shall not render the transaction value unacceptable, such as where the buyer undertakes on the buyer's own account, even though by agreement with the producer, activities relating to the marketing of the good.

(5) Where objective and quantifiable data do not exist with regard to the additions required to be made to the price actually paid or payable under section 4(1) of Schedule II, the transaction value cannot be determined under the provisions of section 2 of that Schedule. For an illustration of this, a royalty is paid on the basis of the price actually paid or payable in a sale of a liter of a particular good that was purchased by the kilogram and made up into a solution. If the royalty is based partially on the purchased good and partially on other factors that have nothing to do with that good, such as when the purchased good is mixed with other ingredients and is no longer separately identifiable, or when the royalty cannot be distinguished from special financial arrangements between the producer and the buyer, it would be inappropriate to add the royalty and the transaction value of the good could not be determined. However, if the amount of the royalty is based only on the purchased good and can be readily quantified, an addition to the price actually paid or payable can be made and the transaction value can be determined.

SECTION 3.

(1) In determining whether the transaction value is unacceptable under section 2(2)(d), the fact that the producer and the buyer are related persons shall not in itself be grounds for the customs administration to render the transaction value unacceptable. In such cases, the circumstances surrounding the sale shall be examined and the transaction value shall be accepted provided that the relationship between the producer and the buyer did not influence the price actually paid or payable. Where the customs administration has reasonable grounds for considering that the relationship between the producer and the buyer influenced the price, the customs administration shall communicate the grounds to the producer, and that producer shall be given a reasonable opportunity to respond to the grounds communicated by the [illegible]ustom[illegible]ministration. If that producer so requests, the customs administration shall communicate in writing the groun[illegible] on [illegible] it considers that the relationship between the producer and the buyer influenced the price actually paid or pay[illegible]

(2) Subsection (1) provides that, where the producer and the buyer are related persons, the circumstances surrounding the sale shall be examined and the transaction value shall be accepted as the value provided that the relationship between the producer and the buyer did not influence the price actually paid or payable. It is not intended under subsection (1) that there should be an examination of the circumstances in all cases where the producer and the buyer are related persons. Such an examination will only be required where the customs administration has doubts that the price actually paid or payable is acceptable because of the relationship between the producer and the buyer. Where the customs administration does not have doubts that the price actually paid or payable is acceptable, it shall accept that price without requesting further information. For an illustration of this, the customs administration may have previously examined the relationship between the producer and the buyer, or it may already have detailed information concerning the relationship between the producer and the buyer, and may already be satisfied from that examination or information that the relationship between them did not influence the price actually paid or payable.

(3) In applying subsection (1), where the producer and the buyer are related persons and the customs administration has doubts that the transaction value is acceptable without further inquiry, the customs administration shall give the producer an opportunity to supply such further information as may be necessary to enable it to examine the circumstances surrounding the sale. In such a case, the customs administration shall examine the relevant aspects of the sale, including the way in which the producer and the buyer organize their commercial relations and the way in which the price actually paid or payable for the good being valued was arrived at, in order to determine whether the relationship between the producer and the buyer influenced that price actually paid or payable. Where it can be shown that the producer and the buyer buy from and sell to each other as if they were not related persons, the price actually paid or payable shall be considered as not having been influenced by the relationship between them. For an illustration of this, if the price actually paid or payable for the good had been settled in a manner consistent with the normal pricing practices of the industry in question or with the way in which the producer settles prices for sales to unrelated buyers, the price actually paid or payable shall be considered as not having been influenced by the relationship between the buyer and the producer. As another illustration, where it is shown that the price actually paid or payable for the good is adequate to ensure recovery of the total cost of producing the good plus a profit that is representative of the producer's overall profit realized over a representative period of time, such as on an annual basis, in sales of goods of the same class or kind, the price actually paid or payable shall be considered as not having been influenced by the relationship between the producer and the buyer.

(4) In a sale between a producer and a buyer who are related persons, the transaction value shall be accepted and determined in accordance with section 2 of Schedule II wherever the producer demonstrates that the transaction value of the good in that sale closely approximates a test value referred to in subsection (5).

(5) The value to be used as a test value shall be the transaction value of identical goods or similar goods sold at or about the same time as the good being valued is sold to an unrelated buyer who is located in the territory of the NAFTA country in which the buyer is located.

(6) In applying a test value referred to in subsection (4), due account shall be taken of demonstrated differences in commercial levels, quantity levels, the value of the elements specified in section 4(1)(b) of Schedule II and the costs incurred by the producer in sales to unrelated buyers that are not incurred by the producer in sales to a related person.

(7) The application of the test value referred to in subsection (4) shall be used at the initiative of the producer and shall be used only for comparison purposes to determine whether the transaction value of the good is acceptable. The test value shall not be used as the transaction value of that good.

(8) Subsection (4) provides an opportunity for the producer to demonstrate that the transaction value closely approximates a test value previously accepted by the customs administration, and is therefore acceptable under subsections (1) and (4). Where the application of a test value under subsection (4) demonstrates that the transaction value of the good being valued is acceptable, the customs administration shall not examine the question of influence in regard to the relationship between the producer and the buyer under subsection (1). Where the customs administration already has sufficient information available, without further inquiries, that the transaction value closely approximates a test value referred to in subsection (4), the producer is not required to apply a test value to demonstrate that the transaction value is acceptable under that subsection.

(9) A number of factors must be taken into consideration for the purpose of determining whether the transaction value of the identical goods or similar goods closely approximates the transaction value of the good being valued. These factors include the nature of the good, the nature of the industry itself, the season in which the good is sold, and whether the difference in values is commercially significant. Since these factors may vary from case to case, it would be impossible to apply an acceptable standardized difference such as a fixed amount or fixed percentage difference in each case. For an illustration of this, a small difference in value in a case involving one type of good could be unacceptable, while a large difference in a case involving another type of good might be acceptable for the purposes of determining whether the transaction value closely approximates a test value set out in subsection (4).

SCHEDULE V

LIST OF AUTOMOTIVE COMPONENTS AND MATERIALS FOR THE PURPOSES OF SECTION 10 OF THE APPENDIX

Item	Column I automotive components	Column II listed materials
1.	Engines provided for in heading 8407 or 8408	Cast blocks, cast heads, fuel nozzles, fuel injector pumps, glow plugs, turbochargers, superchargers, electronic engine controls, intake manifolds, exhaust manifolds, intake valves, exhaust valves, crankshafts, camshafts, alternators, starters, air cleaner assemblies, pistons, connecting rods and assemblies made therefrom, rotor assemblies for rotary engines, flywheels (for manual transmissions), flexplates (for automatic transmissions), oil pans, oil pumps, pressure regulators, water pumps, crankshaft gears, camshaft gears, radiator assemblies, charge-air coolers.
2.	Gear boxes (transmissions) provided for in subheading 8708.40.	(a) For manual transmissions: transmission cases and clutch housings; clutches; internal shifting mechanisms; gear sets, synchronizers and shafts; and (b) For torque convertor type transmissions: transmission cases and convertor housings; torque convertor assemblies; gear sets and clutches; electronic transmission controls.

SCHEDULE VI
REGIONAL VALUE-CONTENT CALCULATION FOR CAMI

SECTION 1. Definitions.

In this Schedule,

"closed" means, with respect to a plant, a closure

(a) for purposes of re-tooling for a change in model line, or

(b) as a result of any event or circumstance (other than the imposition of antidumping duties or countervailing duties, or an interruption of operations resulting from a labor strike, lock-out, labor dispute, picketing or boycott of or by employees of CAMI Automotive, Inc. or General Motors of Canada Limited) that CAMI Automotive, Inc. or General Motors of Canada Limited could not reasonably have been expected to avert by corrective action or by exercise of due care and diligence, including a shortage of materials, failure of utilities, or inability to obtain or a delay in obtaining raw materials, parts, fuel or utilities;

"GM" means General Motors of Canada Limited, General Motors Corporation, General Motors de Mexico, S.A. de C.V., and any subsidiary directly or indirectly owned by any of them, or by any combination thereof;

"producer" means CAMI Automotive, Inc.

SECTION 2.

For purposes of section 11 of this Appendix, for purposes of determining the regional value content, in a fiscal year, of a motor vehicle of a class of motor vehicles or a model line produced by the producer in the territory of Canada and imported into the territory of the United States, the producer may choose to calculate the regional value content by

(a) calculating

(i) the sum of

(A) the net cost incurred by the producer, during that fiscal year, in the production in the territory of Canada of motor vehicles of a category referred to in section 3 that is chosen by the producer, and

(B) the net cost incurred by General Motors of Canada Limited, during the fiscal year that corresponds most closely to the producer's fiscal year, in the production in the territory of Canada of a corresponding class of motor vehicles or model line, and

(ii) the sum of

(A) the value, determined in accordance with section 9 of this Appendix for light-duty vehicles and section 10 of this Appendix for heavy-duty vehicles, of the non-originating materials that are used by the producer, during that fiscal year, in the production in the territory of Canada of motor vehicles of a category referred to in section 2.1 that is chosen by the producer, and

(B) the value, determined in accordance with section 9 of this Appendix for light-duty vehicles and section 10 of this Appendix for heavy-duty vehicles, of the non-originating materials that are used by General Motors of Canada Limited, during the fiscal year that corresponds most closely to the producer's fiscal year, in the production in the territory of Canada of a corresponding class of motor vehicles or model line, and

(b) using the sums referred to in paragraphs (a)(i) and (ii) as the net cost and the value of non-originating materials, respectively, in the calculation referred to in section 6(3) of this Appendix,

provided that

(c) at the beginning of the producer's fiscal year, General Motors of Canada Limited owns 50 percent or more of the voting common stock of the producer, and

(d) GM acquires 75 percent or more by unit of quantity of the class of motor vehicles or model line, as the case may be, that the producer produced in the territory of Canada in the producer's fiscal year for sale in the territory of one or more of the NAFTA countries.

SECTION 3.

The categories referred to in clauses 2(a)(i)(A) and (ii)(A) are the following:

(a) the class of motor vehicles that the producer produced in the territory of Canada in the producer's fiscal year for sale in the territory of one or more of the NAFTA countries; and

(b) the model line that the producer produced in the territory of Canada in the producer's fiscal year for sale in the territory of one or more of the NAFTA countries.

SECTION 4.

Where GM does not satisfy the requirement set out in section 2(d), the producer may choose that the regional value content be calculated in accordance with section 2 only for those motor vehicles that are acquired by GM for distribution under the GEO marque or another GM marque.

SECTION 5.

(1) The producer may choose that the calculation referred to in section 2 be made over a period of two fiscal years where

(a) any plant operated by the producer or by General Motors of Canada Limited is closed for more than two consecutive months; and

(b) the motor vehicles of a category referred to in section 3, with respect to which the producer chooses that the regional value content be calculated in accordance with section 2, are produced in that plant.

(2) Subject to subsection (3), the period of two fiscal years referred to in subsection (1) corresponds to the fiscal year in which the plant is closed and, at the choice of the producer, the preceding or the subsequent fiscal year.

(3) Where the plant is closed for a period that spans two fiscal years, the calculation referred to in section 2 may be made only over those two fiscal years.

(4) Where the producer has chosen that the regional value content be calculated over two fiscal years under this section, the choice referred to in section 11(6) of this Appendix shall be filed not later than 10 days after the end of the period during which the plant is closed, or at such later time as the customs administration may accept.

SECTION 6.

For purposes of this Schedule, a motor vehicle producer shall be deemed to be GM where, as a result of an amalgamation, reorganization, division or similar transaction, that motor vehicle producer

(a) acquires all or substantially all of the assets used by GM, and

(b) directly or indirectly controls, or is controlled by, GM, or both that motor vehicle producer and GM are controlled by the same person.

SCHEDULE VII
REASONABLE ALLOCATION OF COSTS

SECTION 1. Definitions.

For purposes of this Schedule,

"costs" means any costs that are included in total cost and that need to be allocated pursuant to sections 5(9), 6(11) and 7(6) and sections 10(1)(a)(i) and (ii) of these Regulations, section 4(7) of Schedule II and sections 5(7) and 10(2) of Schedule VIII;

"discontinued operations", in the case of a producer located in a NAFTA country, has the meaning set out in that NAFTA country's Generally Accepted Accounting Principles;

"indirect overhead" means period costs and other costs;

"internal management purpose" means any purpose relating to tax reporting, financial reporting, financial planning, decision-making, pricing, cost recovery, cost control management or performance measurement; and

"overhead" means costs, other than direct material costs and direct labor costs.

SECTION 2. Interpretation.

(1) In this Schedule, reference to "producer" shall, for purposes of section 4(7) of Schedule II, be read as a reference to "buyer".

(2) In this Schedule, reference to "good" shall,

(a) for purposes of section 6(14) of this Appendix, be read as a reference to "identical goods or similar goods, or any combination thereof";

(b) for purposes of section 7(6) of this Appendix, be read as a reference to "intermediate material";

(c) for purposes of section 11 of this Appendix, be read as a reference to "category of vehicles that is chosen pursuant to section 11(1) of this Appendix";

(d) for purposes of section 12 of this Appendix, be read as a reference to "category of goods chosen pursuant to section 12(1) of this Appendix";

(e) for purposes of section 13(4) of this Appendix, be read as a reference to "category of vehicles chosen pursuant to section 13(4) of this Appendix";

(f) for purposes of section 4(7) of Schedule II, be read as a reference to "packaging materials and containers or the elements"; and

(g) for purposes of section 5(7) of Schedule VIII, be read as a reference to "elements".

Methods to Reasonably Allocate Costs

SECTION 3.

(1) Where a producer of a good is using, for an internal management purpose, a cost allocation method to allocate to the good direct material costs, or part thereof, and that method reasonably reflects the direct material used in the production of the good based on the criterion of benefit, cause or ability to bear, that method shall be used to reasonably allocate the costs to the good.

(2) Where a producer of a good is using, for an internal management purpose, a cost allocation method to allocate to the good direct labor costs, or part thereof, and that method reasonably reflects the direct labor used in the production of the good based on the criterion of benefit, cause or ability to bear, that method shall be used to reasonably allocate the costs to the good.

(3) Where a producer of a good is using, for an internal management purpose, a cost allocation method to allocate to the good overhead, or part thereof, and that method is based on the criterion of benefit, cause or ability to bear, that method shall be used to reasonably allocate the costs to the good.

SECTION 4.

Where costs are not reasonably allocated to a good under section 3, those costs are reasonably allocated to the good if they are allocated,

(a) with respect to direct material costs, on the basis of any method that reasonably reflects the direct material used in the production of the good based on the criterion of benefit, cause or ability to bear;

(b) with respect to direct labor costs, on the basis of any method that reasonably reflects the direct labor used in the production of the good based on the criterion of benefit, cause or ability to bear; and

(c) with respect to overhead, on the basis of any of the following methods:

(i) the method set out in Addendum A, Addendum B or Addendum C,

(ii) a method based on a combination of the methods set out in Addenda A and B or Addenda A and C, and

(iii) a cost allocation method based on the criterion of benefit, cause or ability to bear.

SECTION 5.

Any cost allocation method referred to in section 3 or 4 that is used by a producer for the purposes of this Appendix shall be used throughout the producer's fiscal year.

Costs Not Reasonably Allocated

SECTION 6.

The allocation to a good of any of the following is considered not to be reasonably allocated to the good:

(a) costs of a service provided by a producer of a good to another person where the service is not related to the good;

(b) gains or losses resulting from the disposition of a discontinued operation;

(c) cumulative effects of accounting changes reported in accordance with a specific requirement of the applicable Generally Accepted Accounting Principles; and".

(d) gains or losses resulting from the sale of a capital asset of the producer.

SECTION 7.

Any costs allocated under section 3 on the basis of a cost allocation method that is used for an internal management purpose that is solely for the purpose of qualifying a good as an originating good are considered not to be reasonably allocated.

ADDENDUM A
COST RATIO METHOD

Calculation of Cost Ratio

For the overhead to be allocated, the producer may choose one or more allocation bases that reflect a relationship between the overhead and the good based on the criterion of benefit, cause or ability to bear.

With respect to each allocation base that is chosen by the producer for allocating overhead, a cost ratio is calculated for each good produced by the producer in accordance with the following formula:

$$CR = \frac{AB}{TAB}$$

where

CR is the cost ratio with respect to the good;

AB is the allocation base for the good; and

TAB is the total allocation base for all the goods produced by the producer.

Allocation to a Good of Costs Included in Overhead

The costs with respect to which an allocation base is chosen are allocated to a good in accordance with the following formula:

$$CAG = CA \times CR$$

where

CAG is the costs allocated to the good;

CA is the costs to be allocated; and

CR is the cost ratio with respect to the good.

Excluded Costs

Under section 6(11)(b) of this Appendix, where excluded costs are included in costs to be allocated to a good, the cost ratio used to allocate that cost to the good is used to determine the amount of excluded costs to be subtracted from the costs allocated to the good.

Allocation Bases for Costs

The following is a non-exhaustive list of allocation bases that may be used by the producer to calculate cost ratios:

Direct Labor Hours
Direct Labor Costs
Units Produced
Machine-hours
Sales Dollars or Pesos
Floor Space

"Examples"

The following examples illustrate the application of the cost ratio method to costs included in overhead.

Example 1: Direct Labor Hours

A producer who produces Good A and Good B may allocate overhead on the basis of direct labor hours spent to produce Good A and Good B. A total of 8,000 direct labor hours have been spent to produce Good A and Good B: 5,000 hours with respect to Good A and 3,000 hours with respect to Good B. The amount of overhead to be allocated is $6,000,000.

Calculation of the Ratios:

Good A: 5,000 hours/8,000 hours = .625
Good B: 3,000 hours/8,000 hours = .375

Allocation of overhead to Good A and Good B:

Good A: $6,000,000 × .625 = $3,750,000
Good B: $6,000,000 × .375 = $2,250,000

Example 2: Direct Labor Costs

A producer who produces Good A and Good B may allocate overhead on the basis of direct labor costs incurred in the production of Good A and Good B. The total direct labor costs incurred in the production of Good A and Good B is $60,000: $50,000 with respect to Good A and $10,000 with respect to Good B. The amount of overhead to be allocated is $6,000,000.

Calculation of the Ratios:

Good A: $50,000/$60,000 = .833
Good B: $10,000/$60,000 = .167

Allocation of Overhead to Good A and Good B:

Good A: $6,000,000 × .833 = $4,998,000
Good B: $6,000,000 × .167 = $1,002,000

Example 3: Units Produced

A producer of Good A and Good B may allocate overhead on the basis of units produced. The total units of Good A and Good B produced is 150,000: 100,000 units of Good A and 50,000 units of Good B. The amount of overhead to be allocated is $6,000,000.

Calculation of the Ratios:

Good A: 100,000 units/150,000 units = .667
Good B: 50,000 units/150,000 units = .333

Allocation of Overhead to Good A and Good B:

Good A: $6,000,000 x .667 = $4,002,000
Good B: $6,000,000 x .333 = $1,998,000

Example 4: Machine-hours

A producer who produces Good A and Good B may allocate machine-related overhead on the basis of machine-hours utilized in the production of Good A and Good B. The total machine-hours utilized for the production of Good A and Good B is 3,000 hours: 1,200 hours with respect to Good A and 1,800 hours with respect to Good B. The amount of machine-related overhead to be allocated is $6,000,000.

Calculation of the Ratios:

Good A: 1,200 machine-hours/3,000 machine-hours = .40
Good B: 1,800 machine-hours/3,000 machine-hours = .60

Allocation of Machine-Related Overhead to Good A and Good B:

Good A: $6,000,000 × .40 = $2,400,000
Good B: $6,000,000 × .60 = $3,600,000

Example 5: Sales Dollars or Pesos

A producer who produces Good A and Good B may allocate overhead on the basis of sales dollars. The producer sold 2,000 units of Good A at $4,000 and 200 units of Good B at $3,000. The amount of overhead to be allocated is $6,000,000.

Total Sales Dollars for Good A and Good B:

Good A: $4,000 × 2,000 = $8,000,000
Good B: $3,000 × 200 = $600,000
Total Sales Dollars: $8,000,000 + $600,000 = $8,600,000

Calculation of the Ratios:

Good A: $8,000,000/$8,600,000 = .93
Good B: $600,000/$8,600,000 = .07
Allocation of Overhead to Good A and Good B:
Good A: $6,000,000 × .93 = $5,580,000
Good B: $6,000,000 × .07 = $420,000

Example 6: Floor Space

A producer who produces Good A and Good B may allocate overhead relating to utilities (heat, water and electricity) on the basis of floor space used in the production and storage of Good A and Good B. The total floor space used in the production and storage of Good A and Good B is 100,000 square feet: 40,000 square feet with respect to Good A and 60,000 square feet with respect to Good B. The amount of overhead to be allocated is $6,000,000.

Calculation of the Ratios:
Good A: 40,000 square feet/100,000 square feet = .40
Good B: 60,000 square feet/100,000 square feet = .60
Allocation of Overhead (Utilities) to Good A and Good B:
Good A: $6,000,000 × .40 = $2,400,000
Good B: $6,000,000 × .60 = $3,600,000

ADDENDUM B
DIRECT LABOR AND DIRECT MATERIAL RATIO METHOD

Calculation of Direct Labor and Direct Material Ratio

For each good produced by the producer, a direct labor and direct material ratio is calculated in accordance with the following formula:

$$\mathrm{DLDMR} = \frac{\mathrm{DLC} + \mathrm{DMC}}{\mathrm{TDLC} + \mathrm{TDMC}}$$

where
DLDMR is the direct labor and direct material ratio for the good;
DLC is the direct labor costs of the good;
DMC is the direct material costs of the good;
TDLC is the total direct labor costs of all goods produced by the producer; and
TDMC is the total direct material costs of all goods produced by the producer.

Allocation of Overhead to a Good

Overhead is allocated to a good in accordance with the following formula:

$$\mathrm{OAG} = \mathrm{O} \times \mathrm{DLDMR}$$

where
OAG is the overhead allocated to the good;
O is the overhead to be allocated; and
DLDMR is the direct labor and direct material ratio for the good.

Excluded Costs

Under section 6(11)(b) of this Appendix, where excluded costs are included in overhead to be allocated to a good, the direct labor and direct material ratio used to allocate overhead to the good is used to determine the amount of excluded costs to be subtracted from the overhead allocated to the good.

"Examples"

Example 1:

The following example illustrates the application of the direct labor and direct material ratio method used by a producer of a good to allocate overhead where the producer chooses to calculate the net cost of the good in accordance with section 6(11)(a) of this Appendix.

A producer produces Good A and Good B. Overhead (O) minus excluded costs (EC) is $30 and the other relevant costs are set out in the following table:

	Good A	Good B	Total
Direct labor costs (DLC)	$5	$5	$10
Direct material costs (DMC)	10	5	15
Totals	$15	$10	$25

Overhead Allocated to Good A
OAG (Good A) = O ($30) × DLDMR ($15/$25)
OAG (Good A) = $18.00
Overhead Allocated to Good B
OAG (Good B) = O ($30) × DLDMR ($10/$25)
OAG (Good B) = $12.00

Example 2:

The following example illustrates the application of the direct labor and direct material ratio method used by a producer of a good to allocate overhead where the producer chooses to calculate the net cost of the good in accordance with section 6(11)(b) of this Appendix and where excluded costs are included in overhead.

A producer produces Good A and Good B. Overhead (O) is $50 (including excluded costs (EC) of $20). The other relevant costs are set out in the table of Example 1.

Overhead Allocated to Good A

OAG (Good A) = [O ($50) × DLDMR ($15/$25)] − [EC ($20) × DLDMR ($15/$25)]
OAG (Good A) = $18.00
Overhead Allocated to Good B
OAG (Good B) = [O ($50) × DLDMR ($10/$25)] − [EC ($20) × DLDMR ($10/$25)]
OAG (Good B) = $12.00

ADDENDUM C
DIRECT COST RATIO METHOD

Direct Overhead

Direct overhead is allocated to a good on the basis of a method based on the criterion of benefit, cause or ability to bear.

Indirect Overhead

Indirect overhead is allocated on the basis of a direct cost ratio.

Calculation of Direct Cost Ratio

For each good produced by the producer, a direct cost ratio is calculated in accordance with the following formula:

$$\mathrm{DCR} = \frac{\mathrm{DLC} + \mathrm{DMC} + \mathrm{DO}}{\mathrm{TDLC} + \mathrm{TDMC} + \mathrm{TDO}}$$

where
DCR is the direct cost ratio for the good;
DLC is the direct labor costs of the good;
DMC is the direct material costs of the good;
DO is the direct overhead of the good;
TDLC is the total direct labor costs of all goods produced by the producer;
TDMC is the total direct material costs of all goods produced by the producer; and
TDO is the total direct overhead of all goods produced by the producer;

Allocation of Indirect Overhead to a Good

Indirect overhead is allocated to a good in accordance with the following formula:

$$\mathrm{IOAG} = \mathrm{IO} \times \mathrm{DCR}$$

where
IOAG is the indirect overhead allocated to the good;
IO is the indirect overhead of all goods produced by the producer; and
DCR is the direct cost ratio of the good.

Excluded Costs

Under section 6(11)(b) of this Appendix, where excluded costs are included in
(a) direct overhead to be allocated to a good, those excluded costs are subtracted from the direct overhead allocated to the good; and
(b) indirect overhead to be allocated to a good, the direct cost ratio used to allocate indirect overhead to the good is used to determine the amount of excluded costs to be subtracted from the indirect overhead allocated to the good.

"Examples"

Example 1:

The following example illustrates the application of the direct cost ratio method used by a producer of a good to allocate indirect overhead where the producer chooses to calculate the net cost of the good in accordance with section 6(11)(a) of this Appendix.

A producer produces Good A and Good B. Indirect overhead (IO) minus excluded costs (EC) is $30. The other relevant costs are set out in the following table:

	Good A	Good B	Total
Direct labor costs (DLC)	$5	$5	$10
Direct material costs (DMC)	10	5	15
Direct overhead (DO)	8	2	10
Totals	$23	$12	$35

Indirect Overhead Allocated to Good A
IOAG (Good A) = IO ($30) × DCR ($23/$35)
IOAG (Good A) = $19.71
Indirect Overhead Allocated to Good B
IOAG (Good B) = IO ($30) × DCR ($12/$35)
IOAG (Good B) = $10.29

Example 2:

The following example illustrates the application of the direct cost ratio method used by a producer of a good to allocate indirect overhead where the producer has chosen to calculate the net cost of the good in accordance with section 6(11)(b) of this Appendix and where excluded costs are included in indirect overhead.

A producer produces Good A and Good B. The indirect overhead (IO) is $50 (including excluded costs (EC) of $20). The other relevant costs are set out in the table to Example 1.

Indirect Overhead Allocated to Good A
IOAG (Good A) = [IO ($50) × DCR ($23/$35)] − [EC ($20) × DCR ($23/$35)]

OL

IOAG (Good A) = $19.72

Indirect Overhead Allocated to Good B

IOAG (Good B) = [IO ($50) × DCR ($12/$35)] − [EC ($20) × DCR ($12/$35)]

IOAG (Good B) = $10.28

SCHEDULE VIII
VALUE OF MATERIALS

SECTION 1. Definitions.

(1) For purposes of this Schedule, unless otherwise stated,

"buying commissions" means fees paid by a producer to that producer's agent for the agent's services in representing the producer in the purchase of a material;

"customs administration" refers to the customs administration of the NAFTA country into whose territory the good, in the production of which the material being valued is used, is imported;

"materials of the same class or kind" means, with respect to materials being valued, materials that are within a group or range of materials that

- (a) is produced by a particular industry or industry sector, and
- (b) includes identical materials or similar materials;

"producer" refers to

- (a) in the case of section 10(1)(b)(i) of these Regulations, the producer of the listed material, and
- (b) in any other case, the producer who used the material in the production of a good that is subject to a regional value-content requirement;

"seller" refers to a person who sells the material being valued to the producer.

Interpretation

(2) Where it is to be determined under section 9(3) of these Regulations whether the customs value of a material was determined in a manner consistent with this Schedule for purposes of section 9(2) (c) or (d) of these Regulations, a reference in this Schedule to "producer" shall be read as a reference to "person other than the producer who imports the traced material from outside the territories of the NAFTA countries.

SECTION 2.

(1) Except as provided under subsections (2) and (3), the transaction value of a material under Article 402(9)(a) of the Agreement, as implemented by section 7(1)(b) and sections 9(5) and 10(2) of this Appendix, shall be the price actually paid or payable for the material determined in accordance with section 4 and adjusted in accordance with section 5.

(2) There is no transaction value for a material where the material is not the subject of a sale.

(3) The transaction value of a material is unacceptable where

- (a) there are restrictions on the disposition or use of the material by the producer, other than restrictions that
  - (i) are imposed or required by law or by the public authorities in the territory of the NAFTA country in which the producer of the good or the seller of the material is located,
  - (ii) limit the geographical area in which the material may be used, or
  - (iii) do not substantially affect the value of the material;
- (b) the sale or price actually paid or payable is subject to a condition or consideration for which a value cannot be determined with respect to the material;
- (c) part of the proceeds of any subsequent disposal or use of the material by the producer will accrue directly or indirectly to the seller, and an appropriate addition to the price actually paid or payable cannot be made in accordance with section 5(1)(d); and
- (d) except as provided in section 3, the producer and the seller are related persons and the relationship between them influenced the price actually paid or payable for the material.

(4) The conditions or considerations referred to in subsection (3)(b) include the following circumstances:

- (a) the seller establishes the price actually paid or payable for the material on condition that the producer will also buy other materials or goods in specified quantities;
- (b) the price actually paid or payable for the material is dependent on the price or prices at which the producer sells other materials or goods to the seller of the material; and
- (c) the price actually paid or payable is established on the basis of a form of payment extraneous to the material, such as where the material is a semi-finished material that has been provided by the seller to the producer on condition that the seller will receive a specified quantity of the finished material from the producer.

(5) For purposes of subsection (3)(b), conditions or considerations relating to the use of the material shall not render the transaction value unacceptable, such as where the producer undertakes on the producer's own account, even though by agreement with the seller, activities relating to the warranty of the material used in the production of a good.

(6) Where objective and quantifiable data do not exist with regard to the additions required to be made to the price actually paid or payable under section 5(1), the transaction value cannot be determined under the provisions of section 2(1). For an illustration of this, a royalty is paid on the basis of the price actually paid or payable in a sale of a liter of a particular good that is produced by using a material that was purchased by the kilogram and made up into a solution. If the royalty is based partially on the purchased material and partially on other factors that have nothing to do with that material, such as when the purchased material is mixed with other ingredients and is no longer separately identifiable, or when the royalty cannot be distinguished from special financial arrangements between the seller and the producer, it would be inappropriate to add the royalty and the transaction value of the material could not be determined. However, if the amount of the royalty is based only on the purchased material and can be readily quantified, an addition to the price actually paid or payable can be made and the transaction value can be determined.

SECTION 3.

(1) In determining whether the transaction value is unacceptable under section 2(3)(d), the fact that the seller and the producer are related persons shall not in itself be grounds for the customs administration to render the transaction value unacceptable. In such cases, the circumstances surrounding the sale shall be examined and the transaction value shall be accepted provided that the relationship between the seller and the producer did not influence the price actually paid or payable. Where the customs administration has reasonable grounds for considering that the relationship between the seller and the producer influenced the price, the customs administration shall communicate the grounds to the producer, and that producer shall be given a reasonable opportunity to respond to the grounds communicated by the customs administration. If that producer so requests, the customs administration shall communicate in writing the grounds on which it considers that the relationship between the seller and the producer influenced the price actually paid or payable.

(2) Subsection (1) provides that, where the seller and the producer are related persons, the circumstances surrounding the sale shall be examined and the transaction value shall be accepted as the value provided that the relationship between the seller and the producer did not influence the price actually paid or payable. It is not intended under subsection (1) that there should be an examination of the circumstances in all cases where the seller and the producer are related persons. Such an examination will only be required where the customs administration has doubts that the price actually paid or payable is acceptable because of the relationship between the seller and the producer. Where the customs administration does not have doubts that the price actually paid or payable is acceptable, it shall accept that price without requesting further information. For an illustration of this, the customs administration may have previously examined the relationship between the seller and the producer, or it may already have detailed information concerning the relationship between the seller and the producer, and may already be satisfied from that examination or information that the relationship between them did not influence the price actually paid or payable.

(3) In applying subsection (1), where the seller and the producer are related persons and the customs administration has doubts that the transaction value is acceptable without further inquiry, the customs administration shall give the producer an opportunity to supply such further information as may be necessary to enable it to examine the circumstances surrounding the sale. In such a case, the customs administration shall examine the relevant aspects of the sale, including the way in which the seller and the producer organize their commercial relations and the way in which the price actually paid or payable by that producer for the material being valued was arrived at, in order to determine whether the relationship between the seller and the producer influenced that price actually paid or payable. Where it can be shown that the seller and the producer buy from and sell to each other as if they were not related persons, the price actually paid or payable shall be considered as not having been influenced by the relationship between them. For an illustration of this, if the price actually paid or payable for the material had been settled in a manner consistent with the normal pricing practices of the industry in question or with the way in which the seller settles prices for sales to unrelated buyers, the price actually paid or payable shall be considered as not having been influenced by the relationship between the producer and the seller. For another illustration of this, where it is shown that the price actually paid or payable for the material is adequate to ensure recovery of the total cost of producing the material plus a profit that is representative of the seller's overall profit realized over a representative period of time, such as on an annual basis, in sales of materials of the same class or kind, the price actually paid or payable shall be considered as not having been influenced by the relationship between the seller and the producer.

(4) In a sale between a seller and a producer who are related persons, the transaction value shall be accepted and determined in accordance with section 2(1), wherever the seller or the producer demonstrates that the transaction value of the material in that sale closely approximates one of the following test values that occurs at or about the same time as the sale and is chosen by the seller or the producer:

- (a) the transaction value in sales to unrelated buyers of identical materials or similar materials, as determined in accordance with section 2(1);
- (b) the value of identical materials or similar materials, as determined in accordance with section 9; or
- (c) the value of identical materials or similar materials, as determined in accordance with section 10.

(5) In applying a test value referred to in subsection (4), due account shall be taken of demonstrated differences in commercial levels, quantity levels, the value of the elements specified in section 5(1)(b) and the costs incurred by the seller in sales to unrelated buyers that are not incurred by the seller in sales by the seller to a related person.

(6) The application of a test value referred to in subsection (4) shall be used at the initiative of the seller, or at the initiative of the producer with the consent of the seller, and shall be used only for comparison purposes to determine whether the transaction value of the material is acceptable. The test value shall not be used as the transaction value of that material.

(7) Subsection (4) provides an opportunity for the seller or the producer to demonstrate that the transaction value closely approximates a test value previously accepted by the customs administration of the NAFTA country in which the producer is located, and is therefore acceptable under subsection (1). Where the application of a test value under subsection (4) demonstrates that the transaction value of the material being valued is acceptable, the customs administration shall not examine the question of influence in regard to the relationship between the seller and the producer under subsection (1). Where the customs administration already has sufficient information available, without further inquiries, that the transaction value closely approximates one of the test values determined under subsection (4), the seller or the producer is not required to apply a test value to demonstrate that the transaction value is acceptable under that subsection.

(8) A number of factors must be taken into consideration for the purpose of determining whether the transaction value of the identical materials or similar materials closely approximates the transaction value of the material being valued. These factors include the nature of the material, the nature of the industry itself, the season in which the material is sold, and whether the difference in values is commercially significant. Since these factors may vary from case to case, it would be impossible to apply an acceptable standardized difference such as a fixed amount or fixed percentage difference in each case. For an illustration of this, a small difference in value in a case involving one type of material could be unacceptable, while a large difference in a case involving another type of material might be acceptable for the purposes of determining whether the transaction value closely approximates a test value set out in subsection (4).

SECTION 4.

(1) The price actually paid or payable is the total payment made or to be made by the producer to or for the benefit of the seller of the material. The payment need not necessarily take the form of a transfer of money: it may be made by letters of credit or negotiable instruments. Payment may be made directly or indirectly to the seller. For an illustration of this, the settlement by the producer, whether in whole or in part, of a debt owed by the seller, is an indirect payment.

(2) Activities undertaken by the producer on the producer's own account, other than those for which an adjustment is provided in section 5, shall not be considered to be an indirect payment, even though the activities might be regarded as being for the benefit of the seller.

(3) The transaction value shall not include charges for construction, erection, assembly, maintenance or technical assistance related to the use of the material by the producer, provided that they are distinguished from the price actually paid or payable.

(4) The flow of dividends or other payments from the producer to the seller that do not relate to the purchase of the material are not part of the transaction value.

SECTION 5.

(1) In determining the transaction value of the material, the following shall be added to the price actually paid or payable:

(a) to the extent that they are incurred by the producer with respect to the material being valued and are not included in the price actually paid or payable,

(i) commissions and brokerage fees, except buying commissions, and

(ii) the costs of containers which, for customs purposes, are classified with the material under the Harmonized System;

(b) the value, reasonably allocated in accordance with subsection (12), of the following elements where they are supplied directly or indirectly to the seller by the producer free of charge or at reduced cost for use in connection with the production and sale of the material, to the extent that the value is not included in the price actually paid or payable:

(i) a material, other than an indirect material, used in the production of the material being valued,

(ii) tools, dies, molds and similar indirect materials used in the production of the material being valued,

(iii) an indirect material, other than those referred to in subparagraph (ii) or in paragraphs (c), (e) or (f) of the definition "indirect material" set out in Article 415 of the Agreement, as implemented by section 2(1) of this Appendix, used in the production of the material being valued, and

(iv) engineering, development, artwork, design work, and plans and sketches performed outside the territory of the NAFTA country in which the producer is located that are necessary for the production of the material being valued;

(c) the royalties related to the material, other than charges with respect to the right to reproduce the material in the territory of the NAFTA country in which the producer is located that the producer must pay directly or indirectly as a condition of sale of the material, to the extent that such royalties are not included in the price actually paid or payable; and

(d) the value of any part of the proceeds of any subsequent disposal or use of the material that accrues directly or indirectly to the seller.

(2) The additions referred to in subsection (1) shall be made to the price actually paid or payable under this section only on the basis of objective and quantifiable data.

(3) Where objective and quantifiable data do not exist with regard to the additions required to be made to the price actually paid or payable under subsection (1), the transaction value cannot be determined under section 2(1).

(4) No additions shall be made to the price actually paid or payable for the purpose of determining the transaction value except as provided in this section.

(5) The amounts to be added under subsection (1)(a) shall be those amounts that are recorded on the books of the producer.

(6) The value of the elements referred to in subsection (1)(b)(i) shall be

(a) where the elements are imported from outside the territory of the NAFTA country in which the seller is located, the customs value of the elements,

(b) where the producer, or a related person on behalf of the producer, purchases the elements from an unrelated person in the territory of the NAFTA country in which the seller is located, the price actually paid or payable for the elements,

(c) where the producer, or a related person on behalf of the producer, acquires the elements from an unrelated person in the territory of the NAFTA country in which the seller is located other than through a purchase, the value of the consideration related to the acquisition of the elements, based on the cost of the consideration that is recorded on the books of the producer or the related person, or

(d) where the elements are produced by the producer, or by a related person, in the territory of the NAFTA country in which the seller is located, the total cost of the elements, determined in accordance with subsection (7),

and shall include the following costs, that are recorded on the books of the producer or the related person supplying the elements on behalf of the producer, to the extent that such costs are not included under paragraph (a) through (d):

(e) the costs of freight, insurance, packing, and all other costs incurred in transporting the elements to the location of the seller,

(f) duties and taxes paid or payable with respect to the elements, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable,

(g) customs brokerage fees, including the cost of in-house customs brokerage services, incurred with respect to the elements, and

(h) the cost of waste and spoilage resulting from the use of the elements in the production of the material, minus the value of reusable scrap or by-product.

(7) For the purposes of subsection (6)(d), the total cost of the elements referred to in subsection (1)(b)(i) shall be

(a) where the elements are produced by the producer, at the choice of the producer,

(i) the total cost incurred with respect to all goods produced by the producer, calculated on the basis of the costs that are recorded on the books of the producer, that can be reasonably allocated to the elements in accordance with Schedule VII, or

(ii) the aggregate of each cost incurred by the producer that forms part of the total cost incurred with respect to the elements, calculated on the basis of the costs that are recorded on the books of the producer, that can be reasonably allocated to the elements in accordance with Schedule VII; and

(b) where the elements are produced by a person who is related to the producer, at the choice of the producer,

(i) the total cost incurred with respect to all goods produced by that related person, calculated on the basis of the costs that are recorded on the books of that person, that can be reasonably allocated to the elements in accordance with Schedule VII, or

(ii) the aggregate of each cost incurred by that related person that forms part of the total cost incurred with respect to the elements, calculated on the basis of the costs that are recorded on the books of that person, that can be reasonably allocated to the elements in accordance with Schedule VII.

(8) Except as provided in subsections (10) and (11), the value of the elements referred to in subsections (1)(b)(ii) through (iv) shall be

(a) the cost of those elements that is recorded on the books of the producer; or

(b) where such elements are provided by another person on behalf of the producer and the cost is not recorded on the books of the producer, the cost of those elements that is recorded on the books of that other person.

(9) Where the elements referred to in subsections (1)(b)(ii) through (iv) were previously used by or on behalf of the producer, the value of the elements shall be adjusted downward to reflect that use.

(10) Where the elements referred to in subsections (1)(b)(ii) and (iii) were leased by the producer or a person related to the producer, the value of the elements shall be the cost of the lease that is recorded on the books of the producer or that related person.

(11) No addition shall be made to the price actually paid or payable for the elements referred to in subsection (1)(b)(iv) that are available in the public domain, other than the cost of obtaining copies of them.

(12) The producer shall choose the method of allocating to the material the value of the elements referred to in subsections (1)(b)(ii) through (iv), provided that the value is reasonably allocated to the material in a manner appropriate to the circumstances. The methods the producer may choose to allocate the value include allocating the value over the number of units produced up to the time of the first shipment or allocating the value over the entire anticipated production where contracts or firm commitments exist for that production. For an illustration of this, a producer provides the seller with a mold to be used in the production of the material and contracts with the seller to buy 10,000 units of that material. By the time the first shipment of 1,000 units arrives, the seller has already produced 4,000 units. In these circumstances, the producer may choose to allocate the value of the mold over 4,000 units or 10,000 units but shall not choose to allocate the value of the elements to the first shipment of 1,000 units. The producer may choose to allocate the entire value of the elements to a single shipment of material only where that single shipment comprises all of the units of the material acquired by the producer under the contract or commitment for that number of units of the material between the seller and the producer.

(13) The addition for the royalties referred to in subsection (1)(c) shall be the payment for the royalties that is recorded on the books of the producer, or where the payment for the royalties is recorded on the books of another person, the payment for the royalties that is recorded on the books of that other person.

(14) The value of the proceeds referred to in subsection (1)(d) shall be the amount that is recorded for such proceeds on the books of the producer or the seller.

SECTION 6.

(1) If there is no transaction value under section 2(2) or the transaction value is unacceptable under section 2(3), the value of the material, referred to in Article 402(9)(b) of the Agreement, as implemented by section 7(1)(b)(ii) of Part IV of this Appendix, shall be the transaction value of identical materials sold, at or about the same time as the material being valued was shipped to the producer, to a buyer located in the same country as the producer.

(2) In applying this section, the transaction value of identical materials in a sale at the same commercial level and in substantially the same quantity of materials as the material being valued shall be used to determine the value of the material. Where no such sale is found, the transaction value of identical materials sold at a different commercial level or in different quantities, adjusted to take into account the differences attributable to the commercial level or quantity, shall be used, provided that such adjustments can be made on the basis of evidence that clearly establishes that the adjustment is reasonable and accurate, whether the adjustment leads to an increase or a decrease in the value.

(3) A condition for adjustment under subsection (2) because of different commercial levels or different quantities is that such adjustment be made only on the basis of evidence that clearly establishes that an adjustment is reasonable and accurate. For an illustration of this, a bona fide price list contains prices for different quantities. If the material being valued consists of a shipment of 10 units and the only identical materials for which a transaction value exists involved a sale of 500 units, and it is recognized that the seller grants quantity discounts, the required adjustment may be accomplished by resorting to the seller's bona fide price list and using the price applicable to a sale of 10 units. This does not require that sales had to have been made in quantities of 10 as long as the price list has been established as being bona fide through sales at other quantities. In the absence of such an objective measure, however, the determination of a value under this section is not appropriate.

(4) If more than one transaction value of identical materials is found, the lowest such value shall be used to determine the value of the material under this section.

SECTION 7.

OL
60
SS
1
7
2
SE
6
995
UMI

(1) If there is no transaction value under section 2(2) or the transaction value is unacceptable under section 2(3), and the value of the material cannot be determined under section 6, the value of the material, referred to in Article 402(9)(b) of the Agreement, as implemented by section 7(1)(b)(ii) of Part IV of this Appendix, shall be the transaction value of similar materials sold, at or about the same time as the material being valued was shipped to the producer, to a buyer located in the same country as the producer.

(2) In applying this section, the transaction value of similar materials in a sale at the same commercial level and in substantially the same quantity of materials as the material being valued shall be used to determine the value of the material. Where no such sale is found, the transaction value of similar materials sold at a different commercial level or in different quantities, adjusted to take into account the differences attributable to the commercial level or quantity, shall be used, provided that such adjustments can be made on the basis of evidence that clearly establishes that the adjustment is reasonable and accurate, whether the adjustment leads to an increase or a decrease in the value.

(3) A condition for adjustment under subsection (2) because of different commercial levels or different quantities is that such adjustment be made only on the basis of evidence that clearly establishes that an adjustment is reasonable and accurate. For an illustration of this, a bona fide price list contains prices for different quantities. If the material being valued consists of a shipment of 10 units and the only similar materials for which a transaction value exists involved a sale of 500 units, and it is recognized that the seller grants quantity discounts, the required adjustment may be accomplished by resorting to the seller's bona fide price list and using the price applicable to a sale of 10 units. This does not require that sales had to have been made in quantities of 10 as long as the price list has been established as being bona fide through sales at other quantities. In the absence of such an objective measure, however, the determination of a value under this section is not appropriate.

(4) If more than one transaction value of similar materials is found, the lowest such value shall be used to determine the value of the material under this section.

SECTION 8.

If there is no transaction value under section 2(2) or the transaction value is unacceptable under section 2(3), and the value of the material cannot be determined under section 6 or 7, the value of the material, referred to in Article 402(9)(b) of the Agreement, as implemented by section 7(1)(b)(ii) of Part IV of this Appendix, shall be determined under section 9 or, when the value cannot be determined under that section, under section 10 except that, at the request of the producer, the order of application of sections 9 and 10 shall be reversed.

SECTION 9.

(1) Under this section, if identical materials or similar materials are sold in the territory of the NAFTA country in which the producer is located, in the same condition as the material was in when received by the producer, the value of the material, referred to in Article 402(9)(b) of the Agreement, as implemented by section 7(1)(b)(ii) of Part IV of this Appendix, shall be based on the unit price at which those identical materials or similar materials are sold, in the greatest aggregate quantity by the producer or, where the producer does not sell those identical materials or similar materials, by a person at the same trade level as the producer, at or about the same time as the material being valued is received by the producer, to persons located in that territory who are not related to the seller, subject to deductions for the following:

- (a) either the amount of commissions usually earned or the amount generally reflected for profit and general expenses, in connection with sales, in the territory of that NAFTA country, of materials of the same class or kind as the material being valued; and
- (b) taxes, if included in the unit price, payable in the territory of that NAFTA country, which are either waived, refunded or recoverable by way of credit against taxes actually paid or payable.

(2) If neither identical materials nor similar materials are sold at or about the same time the material being valued is received by the producer, the value shall, subject to the deductions provided for under subsection (1), be based on the unit price at which identical materials or similar materials are sold in the territory of the NAFTA country in which the producer is located, in the same condition as the material was in when received by the producer, at the earliest date within 90 days after the date the material being valued was received by the producer.

(3) The expression "unit price at which those identical materials or similar materials are sold, in the greatest aggregate quantity" in subsection (1) means the price at which the greatest number of units is sold in sales between unrelated persons. For an illustration of this, materials are sold from a price list which grants favorable unit prices for purchases made in larger quantities.

Sale quantity	Unit price	Number of sales	Total quantity sold at each price
1–10 units	100	10 sales of 5 units	65
		5 sales of 3 units	
11–25 units	95	5 sales of 11 units	55
		1 sale of 20 units	
Over 25 units	90	1 sale of 30 units	80
		1 sale of 50 units	

The greatest number of units sold at a particular price is 80; therefore, the unit price in the greatest aggregate quantity is 90.

As another illustration of this, two sales occur. In the first sale 500 units are sold at a price of 95 currency units each. In the second sale 400 units are sold at a price of 90 currency units each. In this illustration, the greatest number of units sold at a particular price is 500; therefore, the unit price in the greatest aggregate quantity is 95.

(4) Any sale to a person who supplies, directly or indirectly, free of charge or at reduced cost for use in connection with the production of the material, any of the elements specified in section 5(1)(b), shall not be taken into account in establishing the unit price for the purposes of this section.

(5) The amount generally reflected for profit and general expenses referred to in subsection (1)(a) shall be taken as a whole. The figure for the purposes of deducting an amount for profit and general expenses shall be determined on the basis of information supplied by or on behalf of the producer unless the figures provided by the producer are inconsistent with those usually reflected in sales, in the country in which the producer is located, of materials of the same class or kind as the material being valued. Where the figures provided by the producer are inconsistent with those figures, the amount for profit and general expenses shall be based on relevant information other than that supplied by or on behalf of the producer.

(6) For the purposes of this section, general expenses are the direct and indirect costs of marketing the material in question.

(7) In determining either the commissions usually earned or the amount generally reflected for profit and general expenses under this section, the question as to whether certain materials are materials of the same class or kind as the material being valued shall be determined on a case-by-case basis with reference to the circumstances involved. Sales in the country in which the producer is located of the narrowest group or range of materials of the same class or kind as the material being valued, for which the necessary information can be provided, shall be examined. For the purposes of this section, "materials of the same class or kind" includes materials imported from the same country as the material being valued as well as materials imported from other countries or acquired within the territory of the NAFTA country in which the producer is located.

(8) For the purposes of subsection (2), the earliest date shall be the date by which sales of identical materials or similar materials are made, in sufficient quantity to establish the unit price, to other persons in the territory of the NAFTA country in which the producer is located.

SECTION 10.

(1) Under this section, the value of a material, referred to in Article 402(9)(b) of the Agreement, as implemented by section 7(1)(b)(ii) of Part IV of this Appendix, shall be the sum of

- (a) the cost or value of the materials used in the production of the material being valued, as determined on the basis of the costs that are recorded on the books of the producer of the material,
- (b) the cost of producing the material being valued, as determined on the basis of the costs that are recorded on the books of the producer of the material, and
- (c) an amount for profit and general expenses equal to that usually reflected in sales
  - (i) where the material being valued is imported by the producer into the territory of the NAFTA country in which the producer is located, to persons located in the territory of the NAFTA country in which the producer is located by producers of materials of the same class or kind as the material being valued who are located in the country in which the material is produced, and
  - (ii) where the material being valued is acquired by the producer from another person located in the territory of the NAFTA country in which the producer is located, to persons located in the territory of the NAFTA country in which the producer is located by producers of materials of the same class or kind as the material being valued who are located in the country in which the producer is located,
- (d) the value of elements referred to in section 5(1)(b)(i), determined in accordance with section 5(6), and
- (e) the value of elements referred to in sections 5(1)(b)(ii) through (iv), determined in accordance with section 5(8) and reasonably allocated to the material in accordance with section 5(12).

(2) For purposes of subsections (1)(a) and (b), where the costs recorded on the books of the producer of the material relate to the production of other goods and materials as well as to the production of the material being valued, the costs referred to in subsections (1)(a) and (b) with respect to the material being valued shall be those costs recorded on the books of the producer of the material that can be reasonably allocated to that material in accordance with Schedule VII.

(3) The amount for profit and general expenses referred to in subsection (1)(c) shall be determined on the basis of information supplied by or on behalf of the producer of the material being valued unless the profit and general expenses figures that are supplied with that information are inconsistent with those usually reflected in sales by producers of materials of the same class or kind as the material being valued who are located in the country in which the material is produced or the producer is located, as the case may be. The information supplied shall be prepared in a manner consistent with generally accepted accounting principles of the country in which the material being valued is produced. Where the material is produced in the territory of a NAFTA country, the information shall be prepared in accordance with the Generally Accepted Accounting Principles set out in the authorities listed for that NAFTA country in Schedule XII.

(4) For purposes of subsection (1)(c) and subsection (3), general expenses means the direct and indirect costs of producing and selling the material that are not included under subsections (1)(a) and (b).

(5) For purposes of subsection (3), the amount for profit and general expenses shall be taken as a whole. Where, in the information supplied by or on behalf of the producer of a material, the profit figure is low and the general expenses figure is high, the profit and general expense figures taken together may nevertheless be consistent with those usually reflected in sales of materials of the same class or kind as the material being valued. Where the producer of a material can demonstrate that it is taking a nil or low profit on its sales of the material because of particular commercial circumstances, its actual profit and general expense figures shall be taken into account, provided that the producer of the material has valid commercial reasons to justify them and its pricing policy reflects usual pricing policies in the branch of industry concerned. For an illustration of this, such a situation might occur where producers have been forced to lower prices temporarily because of an unforeseeable drop in demand, or where the producers sell the material to complement a range of materials and goods being produced in the country in which the material is sold and accept a low profit to maintain competitiveness. A further illustration is where a material was being launched and the producer accepted a nil or low profit to offset high general expenses associated with the launch.

(6) Where the figures for the profit and general expenses supplied by or on behalf of the producer of the material are not consistent with those usually reflected in sales of materials of the same class or kind as the material being valued that are made by other producers in the country in which that material is sold, the amount for profit and general expenses may be based on relevant information other than that supplied by or on behalf of the producer of the material.

(7) Where a customs administration uses information other than that supplied by or on behalf of the producer of the material for the purposes of determining the value of a material under this section, the customs administration shall communicate to the producer, if that producer so requests, the source of such information, the data used and the calculations based upon such data, subject to the provisions on confidentiality under Article 507 of the Agreement, as implemented in each NAFTA country.

(8) Whether certain materials are of the same class or kind as the material being valued shall be determined on a case-by-case basis with reference to the circumstances involved. For purposes of determining the amount for profit and general expenses usually reflected under the provisions of this section, sales of the narrowest group or range of materials of the same class or kind, which includes the material being valued, for which the necessary information can be provided, shall be examined. For the purposes of this section, the materials of the same class or kind must be from the same country as the material being valued.

SECTION 11.

(1) Where there is no transaction value under section 2(2) or the transaction value is unacceptable under section 2(3), and the value of the materials cannot be determined under sections 6 through 10, the value of the material, referred to in Article 402(9)(b) of the Agreement, as implemented by section 7(1)(b)(ii) of Part IV of this Appendix, shall be determined under this section using reasonable means consistent with the principles and general provisions of this Schedule and on the basis of data available in the country in which the producer is located.

(2) The value of the material determined under this section shall not be determined on the basis of

- (a) a valuation system which provides for the acceptance of the higher of two alternative values;
- (b) a cost of production other than the value determined in accordance with section 10;
- (c) minimum values;
- (d) arbitrary or fictitious values;
- (e) where the material is produced in the territory of the NAFTA country in which the producer is located, the price of the material for export from that territory; or
- (f) where the material is imported, the price of the material for export to a country other than to the territory of the NAFTA country in which the producer is located.

(3) To the greatest extent possible, the value of the material determined under this section shall be based on the methods of valuation set out in sections 2 through 10, but a reasonable flexibility in the application of such methods would be in conformity with the aims and provisions of this section. For an illustration of this, under section 6, the requirement that the identical materials should be sold at or about the same time as the time the material being valued is shipped to the producer could be flexibly interpreted. Similarly, identical materials produced in a country other than the country in which the material is produced could be the basis for determining the value of the material, or the value of identical materials already determined under section 9 could be used. For another illustration, under section 7, the requirement that the similar materials should be sold at or about the same time as the material being valued are shipped to the producer could be flexibly interpreted. Likewise, similar materials produced in a country other than the country in which the material is produced could be the basis for determining the value of the material, or the value of similar materials already determined under the provisions of section 9 could be used. For a further illustration, under section 9, the ninety days requirement could be administered flexibly.

SCHEDULE IX

METHODS FOR DETERMINING THE VALUE OF NON-ORIGINATING MATERIALS THAT ARE IDENTICAL MATERIALS AND THAT ARE USED IN THE PRODUCTION OF A GOOD

Definitions and Interpretation

SECTION 1. Definitions.

For purposes of this Schedule,

"FIFO method" means the method by which the value of non-originating materials first received in materials inventory, determined in accordance with section 7 of this Appendix, is considered to be the value of non-originating materials used in the production of the good first shipped to the buyer of the good;

"identical materials" means, with respect to a material, materials that are the same as that material in all respects, including physical characteristics, quality and reputation but excluding minor differences in appearance;

"LIFO method" means the method by which the value of non-originating materials last received in materials inventory, determined in accordance with section 7 of this Appendix, is considered to be the value of non-originating materials used in the production of the good first shipped to the buyer of the good;

"materials inventory" means, with respect to a single plant of the producer of a good, an inventory of non-originating materials that are identical materials and that are used in the production of the good; and

"rolling average method" means the method by which the value of non-originating materials used in the production of a good that is shipped to the buyer of the good is based on the average value, calculated in accordance with section 4, of the non-originating materials in materials inventory.

General

SECTION 2.

For purposes of sections 5(11) and (12) and 6(10) of this Appendix, the following are the methods for determining the value of non-originating materials that are identical materials and are used in the production of a good:

- (a) FIFO method;
- (b) LIFO method; and

- (c) rolling average method.

SECTION 3.

(1) Where a producer of a good chooses, with respect to non-originating materials that are identical materials, any of the methods referred to in section 2, the producer may not use another of those methods with respect to any other non-originating materials that are identical materials and that are used in the production of that good or in the production of any other good.

(2) Where a producer of a good produces the good in more than one plant, the method chosen by the producer shall be used with respect to all plants of the producer in which the good is produced.

(3) The method chosen by the producer to determine the value of non-originating materials may be chosen at any time during the producer's fiscal year and may not be changed during that fiscal year.

Average Value for Rolling Average Method

SECTION 4.

(1) The average value of non-originating materials that are identical materials and that are used in the production of a good that is shipped to the buyer of the good is calculated by dividing

(a) the total value of non-originating materials that are identical materials in materials inventory prior to the shipment of the good, determined in accordance with section 7 of this Appendix,

by

(b) the total units of those non-originating materials in materials inventory prior to the shipment of the good.

(2) The average value calculated under subsection (1) is applied to the remaining units of non-originating materials in materials inventory.

ADDENDUM

"EXAMPLES" ILLUSTRATING THE APPLICATION OF THE METHODS FOR DETERMINING THE VALUE OF NON-ORIGINATING MATERIALS THAT ARE IDENTICAL MATERIALS AND THAT ARE USED IN THE PRODUCTION OF A GOOD

The following "examples" are based on the figures set out in the table below and on the following assumptions:

- (a) Materials A are non-originating materials that are identical materials that are used in the production of Good A;
- (b) one unit of Materials A is used to produce one unit of Good A;
- (c) all other materials used in the production of Good A are originating materials; and
- (d) Good A is produced in a single plant.

Date (M/D/Y)	Materials inventory (Receipts of materials A)		Sales (Shipments of good A)
	Quantity (units)	Unit cost *	Quantity (units)
01/01/94	200	$1.05	
01/03/94	1,000	1.00	
01/05/94	1,000	1.10	
01/08/94			500
01/09/94			500
01/10/94	1,000	1.05	
01/14/94			1,500
01/16/94	2,000	1.10	
01/18/94			1,500

* Unit cost is determined in accordance with section 7 of this Appendix.

Example 1: FIFO method

By applying the FIFO method:

(1) the 200 units of Materials A received on 01/01/94 and valued at $1.05 per unit and 300 units of the 1,000 units of Material A received on 01/03/94 and valued at $1.00 per unit are considered to have been used in the production of the 500 units of Good A shipped on 01/08/94; therefore, the value of the non-originating materials used in the production of those goods is considered to be $510 [(200 unit × $1.05) + ($300 units × $1.00)];

(2) 500 units of the remaining 700 units of Materials A received on 01/03/94 and valued at $1.00 per unit are considered to have been used in the production of the 500 units of Good A shipped on 01/09/94; therefore, the value of the non-originating materials used in the production of those goods is considered to be $500 (500 units × $1.00);

(3) the remaining 200 units of the 1,000 of Materials A received on 01/03/94 and valued at $1.00 per unit, the 1,000 units of Materials A received on 01/05/94 and valued at $1.10 per unit, and 300 units of the 1,000 Materials A received on 01/10/94 and valued at $1.05 per unit are considered to have been used in the production of the 1,500 units of Good A shipped on 01/14/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $1,615 [(200 units × $1.00) + (1,000 units × $1.10) + (300 units × $1.05)]; and

(4) the remaining 700 units of the 1,000 units of Materials A received on 01/10/94 and valued at $1.05 per unit and 800 units of the 2,000 units of Materials A received on 01/16/94 and valued at $1.10 per unit are considered to have been used in the production of the 1,500 units of Good A shipped on 01/18/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $1,615 [(700 × $1.05) + (800 × $1.10)].

Example 2: LIFO method

By applying the LIFO method:

(1) 500 units of the 1,000 units of Materials A received on 01/05/94 and valued at $1.10 per unit are considered to have been used in the production of the 500 units of Good A shipped on 01/08/94; therefore, the value of the non-originating materials used in the production of those goods is considered to be $550 (500 units × $1.10);

(2) the remaining 500 units of the 1,000 units of Materials A received on 01/05/94 and valued at $1.10 per unit are considered to have been used in the production of the 500 units of Good A shipped on 01/09/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $550 (500 units × $1.10);
(3) the 1,000 units of Materials A received on 01/10/94 and valued at $1.05 per unit and 500 units of the 1,000 units of Material A received on 01/03/94 and valued at $1.00 per unit are considered to have been used in the production of the 1,500 units of Good A shipped on 01/14/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $1,550 [(1,000 units × $1.05) + (500 units × $1.00)]; and
(4) 1,500 units of the 2,000 units of Materials A received on 01/16/94 and valued at $1.10 per unit are considered to have been used in the production of the 1,500 units of Good A shipped on 01/18/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $1,650 (1,500 units × $1.10).

Example 3: Rolling average method

The following table identifies the average value of non-originating Materials A as determined under the rolling average method. For purposes of this example, a new average value of non-originating Materials A is calculated after each receipt.

Materials inventory

	Date (M/D/Y)	Quantity (units)	Unit cost*	Total value
Beginning Inventory	1/1/94	200	$1.05	$210
Receipt	1/3/94	1,000	1.00	1,000
AVERAGE VALUE		1,200	1.008	1,210
Receipt	1/5/94	1,000	1.10	1,100
AVERAGE VALUE		2,200	1.05	2,310
Shipment	1/8/94	500	1.05	525
AVERAGE VALUE		1,700	1.05	1,785
Shipment	1/9/94	500	1.05	525
AVERAGE VALUE		1,200	1.05	1,260
Receipt	1/16/94	2,000	1.10	2,200
AVERAGE VALUE		3,200	1.08	3,460

* Unit cost is determined in accordance with section 7 of this Appendix.

By applying the rolling average method:
(1) the value of non-originating materials used in the production of the 500 units of Good A shipped on 01/08/94 is considered to be $525 (500 units × $1.05); and
(2) the value of non-originating materials used in the production of the 500 units of Good A shipped on 01/09/94 is considered to be $525 (500 units × $1.05).

SCHEDULE X
INVENTORY MANAGEMENT METHODS

PART I
FUNGIBLE MATERIALS

Definitions and Interpretation

SECTION 1. Definitions.

For purposes of this Part,
"average method" means the method by which the origin of fungible materials withdrawn from materials inventory is based on the ratio, calculated under section 5, of originating materials and non-originating materials in materials inventory;
"FIFO method" means the method by which the origin of fungible materials first received in materials inventory is considered to be the origin of fungible materials first withdrawn from materials inventory;
"LIFO method" means the method by which the origin of fungible materials last received in materials inventory is considered to be the origin of fungible materials first withdrawn from materials inventory;
"materials inventory" means,
  (a) with respect to a producer of a good, an inventory of fungible materials that are used in the production of the good, and
  (b) with respect to a person from whom the producer of the good acquired those fungible materials, an inventory from which fungible materials are sold or otherwise transferred to the producer of the good;
"opening inventory" means the materials inventory at the time an inventory management method is chosen;
"origin identifier" means any mark that identifies fungible materials as originating materials or non-originating materials.

General

SECTION 2.

The inventory management methods for determining whether fungible materials referred to in section 7(16)(a) of this Appendix are originating materials are the following:
  (a) specific identification method;
  (b) FIFO method;
  (c) LIFO method; and
  (d) average method.

SECTION 3.

Where a producer of a good or a person from whom the producer acquired the materials that are used in the production of the good chooses an inventory management method referred to in section 2, that method, including the averaging period chosen in the case of the average method, shall be used from the time the choice is made until the end of the fiscal year of the producer or person.

Specific Identification Method

SECTION 4.

(1) Except as otherwise provided under subsection (2), where the producer or person referred to in section 3 chooses the specific identification method, the producer or person shall physically segregate, in materials inventory, originating materials that are fungible materials from non-originating materials that are fungible materials.
(2) Where originating materials or non-originating materials that are fungible materials are marked with an origin identifier, the producer or person need not physically segregate those materials under subsection (1) if the origin identifier remains visible throughout the production of the good.

Average Method

SECTION 5.

Where the producer or person referred to in section 3 chooses the average method, the origin of fungible materials withdrawn from materials inventory is determined on the basis of the ratio of originating materials and non-originating materials in materials inventory that is calculated under sections 6 through 8.

SECTION 6.

(1) Except as otherwise provided in sections 7 and 8, the ratio is calculated with respect to a month or three-month period, at the choice of the producer or person, by dividing
  (a) the sum of
    (i) the total units of originating materials or non-originating materials that are fungible materials and that were in materials inventory at the beginning of the preceding one-month or three-month period, and
    (ii) the total units of originating materials or non-originating materials that are fungible materials and that were received in materials inventory during that preceding one-month or three-month period,
by
  (b) the sum of
    (i) the total units of originating materials and non-originating materials that are fungible materials and that were in materials inventory at the beginning of the preceding one-month or three-month period, and
    (ii) the total units of originating materials and non-originating materials that are fungible materials and that were received in materials inventory during that preceding one-month or three-month period.
(2) The ratio calculated with respect to a preceding month or three-month period under subsection (1) is applied to the fungible materials remaining in materials inventory at the end of the preceding month or three-month period.

SECTION 7.

(1) Where the good is subject to a regional value-content requirement and the regional value content is calculated under the net cost method and the producer or person chooses to average over a period under sections 6(15), 11(1), (3) or (6), 12(1) or 13(4) of this Appendix, the ratio is calculated with respect to that period by dividing
  (a) the sum of
    (i) the total units of originating materials or non-originating materials that are fungible materials and that were in materials inventory at the beginning of the period, and
    (ii) the total units of originating materials or non-originating materials that are fungible materials and that were received in materials inventory during that period,
by
  (b) the sum of
    (i) the total units of originating materials and non-originating materials that are fungible materials and that were in materials inventory at the beginning of the period, and
    (ii) the total units of originating materials and non-originating materials that are fungible materials and that were received in materials inventory during that period.
(2) The ratio calculated with respect to a period under subsection (1) is applied to the fungible materials remaining in materials inventory at the end of the period.

SECTION 8.

(1) Where the good is subject to a regional value-content requirement and the regional value content of that good is calculated under the transaction value method or the net cost method, the ratio is calculated with respect to each shipment of the good by dividing
  (a) the total units of originating materials or non-originating materials that are fungible materials and that were in materials inventory prior to the shipment,
by
  (b) the total units of originating materials and non-originating materials that are fungible materials and that were in materials inventory prior to the shipment.
(2) The ratio calculated with respect to a shipment of a good under subsection (1) is applied to the fungible materials remaining in materials inventory after the shipment.

Manner of Dealing With Opening Inventory

SECTION 9.

(1) Except as otherwise provided under subsections (2) and (3), where the producer or person referred to in section 3 has fungible materials in opening inventory, the origin of those fungible materials is determined by
  (a) identifying, in the books of the producer or person, the latest receipts of fungible materials that add up to the amount of fungible materials in opening inventory;

(b) determining the origin of the fungible materials that make up those receipts; and

(c) considering the origin of those fungible materials to be the origin of the fungible materials in opening inventory.

(2) Where the producer or person chooses the specific identification method and has, in opening inventory, originating materials or non-originating materials that are fungible materials and that are marked with an origin identifier, the origin of those fungible materials is determined on the basis of the origin identifier.

(3) The producer or person may consider all fungible materials in opening inventory to be non-originating materials.

PART II
FUNGIBLE GOODS

Definitions and Interpretation

SECTION 10. Definitions.

For purposes of this Part,

"average method" means the method by which the origin of fungible goods withdrawn from finished goods inventory is based on the ratio, calculated under section 12, of originating goods and non-originating goods in finished goods inventory;

"FIFO method" means the method by which the origin of fungible goods first received in finished goods inventory is considered to be the origin of fungible goods first withdrawn from finished goods inventory;

"finished goods inventory" means an inventory from which fungible goods are sold or otherwise transferred to another person;

"LIFO method" means the method by which the origin of fungible goods last received in finished goods inventory is considered to be the origin of fungible goods first withdrawn from finished goods inventory;

"opening inventory" means the finished goods inventory at the time an inventory management method is chosen; and

"origin identifier" means any mark that identifies fungible goods as originating goods or non-originating goods.

General

SECTION 11.

The inventory management methods for determining whether fungible goods referred to in section 7(16)(b) of this Appendix are originating goods are the following:

(a) specific identification method;
(b) FIFO method;
(c) LIFO method; and
(d) average method.

SECTION 12.

Where an exporter of a good or a person from whom the exporter acquired the good chooses an inventory management method referred to in section 11, that method, including the averaging period chosen in the case of the average method, shall be used from the time the choice is made until the end of the fiscal year of the exporter or person.

Specific Identification Method

SECTION 13.

(1) Except as provided under subsection (2), where the exporter or person referred to in section 12 chooses the specific identification method, the exporter or person shall physically segregate, in finished goods inventory, originating goods that are fungible goods from non-originating goods that are fungible goods.

(2) Where originating goods or non-originating goods that are fungible goods are marked with an origin identifier, the exporter or person need not physically segregate those goods under subsection (1) if the origin identifier is visible on the fungible goods.

Average Method

SECTION 14.

(1) Where the exporter or person referred to in section 12 chooses the average method, the origin of each shipment of fungible goods withdrawn from finished goods inventory during a month or three-month period, at the choice of the exporter or person, is determined on the basis of the ratio of originating goods and non-originating goods in finished goods inventory for the preceding one-month or three-month period that is calculated by dividing

(a) the sum of
  (i) the total units of originating goods or non-originating goods that are fungible goods and that were in finished goods inventory at the beginning of the preceding one-month or three-month period, and
  (ii) the total units of originating goods or non-originating goods that are fungible goods and that were received in finished goods inventory during that preceding one-month or three-month period,

by

(b) the sum of
  (i) the total units of originating goods and non-originating goods that are fungible goods and that were in finished goods inventory at the beginning of the preceding one-month or three-month period, and
  (ii) the total units of originating goods and non-originating goods that are fungible goods and that were received in finished goods inventory during that preceding one-month or three-month period.

(2) The calculation with respect to a preceding month or three-month period under subsection (1) is applied to the fungible goods remaining in finished goods inventory at the end of the preceding month or three-month period.

Manner of Dealing with Opening Inventory

SECTION 15.

(1) Except as otherwise provided under subsections (2) and (3), where the exporter or person referred to in section 12 has fungible goods in opening inventory, the origin of those fungible goods is determined by

---

(a) identifying, in the books of the exporter or person, the latest receipts of fungible goods that add up to the amount of fungible goods in opening inventory;

(b) determining the origin of the fungible goods that make up those receipts; and

(c) considering the origin of those fungible goods to be the origin of the fungible goods in opening inventory.

(2) Where the exporter or person chooses the specific identification method and has, in opening inventory, originating goods or non-originating goods that are fungible goods and that are marked with an origin identifier, the origin of those fungible goods is determined on the basis of the origin identifier.

(3) The exporter or person may consider all fungible goods in opening inventory to be non-originating goods.

ADDENDUM A
"EXAMPLES" ILLUSTRATING THE APPLICATION OF THE INVENTORY MANAGEMENT METHODS TO DETERMINE THE ORIGIN OF FUNGIBLE MATERIALS

The following "examples" are based on the figures set out in the table below and on the following assumptions:

(a) originating Material A and non-originating Material A that are fungible materials are used in the production of Good A;
(b) one unit of Material A is used to produce one unit of Good A;
(c) Material A is only used in the production of Good A;
(d) all other materials used in the production of Good A are originating materials; and
(e) the producer of Good A exports all shipments of Good A to the territory of a NAFTA country.

Date (M/D/Y)	Materials inventory (Receipts of material A)			Sales (Shipments of good A)
	Quantity (units)	Unit cost*	Total value	Quantity (units)
12/18/93	100 (O[1])	$1.00	$100	
12/27/93	100 (N[2])	1.10	110	
01/01/94	200 (OI[3])			
01/01/94	1,000 (O)	1.00	1,000	
01/05/94	1,000 (N)	1.10	1,100	
01/10/94				100
01/10/94	1,000 (O)	1.05	1,050	
01/15/94				700
01/16/94	2,000 (N)	1.10	2,200	
01/20/94				1,000
01/23/94				900

* Unit cost is determined in accordance with section 7 of this Appendix.

[1] "O" denotes originating materials.

[2] "N" denotes non-originating materials.

[3] "OI" denotes opening inventory.

Example 1: FIFO method

Good A is subject to a regional value-content requirement. Producer A is using the transaction value method to determine the regional value content of Good A.

By applying the FIFO method:

(1) the 100 units of originating Material A in opening inventory that were received in materials inventory on 12/18/93 are considered to have been used in the production of the 100 units of Good A shipped on 01/10/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $0;

(2) the 100 units of non-originating Material A in opening inventory that were received in materials inventory on 12/27/93 and 600 units of the 1,000 units of originating Material A that were received in materials inventory on 01/01/94 are considered to have been used in the production of the 700 units of Good A shipped on 01/15/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $110 (100 units x $1.10);

(3) the remaining 400 units of the 1,000 units of originating Material A that were received in materials inventory on 01/01/94 and 600 units of the 1,000 units of non-originating Material A that were received in materials inventory on 01/05/94 are considered to have been used in the production of the 1,000 units of Good A shipped on 01/20/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $660 (600 units x $1.10); and

(4) the remaining 400 units of the 1,000 units of non-originating Material A that were received in materials inventory on 01/05/94 and 500 units of the 1,000 units of originating Material A that were received in materials inventory on 01/10/94 are considered to have been used in the production of the 900 units of Good A shipped on 01/23/94; therefore, the value of non-originating materials used in the production of those goods is considered to be $440 (400 units x $1.10).

Example 2: LIFO method

Good A is subject to a change in tariff classification requirement and the non-originating Material A used in the production of Good A does not undergo the applicable change in tariff classification. Therefore, where originating Material A is used in the production of Good A, Good A is an originating good and, where non-originating Material A is used in the production of Good A, Good A is a non-originating good.

By applying the LIFO method:

(1) 100 units of the 1,000 units of non-originating Material A that were received in materials inventory on 01/05/94 are considered to have been used in the production of the 100 units of Good A shipped on 01/10/94;

(2) 700 units of the 1,000 units of originating Material A that were received in materials inventory on 01/10/94 are considered to have been used in the production of the 700 units of Good A shipped on 01/15/94;

(3) 1,000 units of the 2,000 units of non-originating Material A that were received in materials inventory on 01/16/94 are considered to have been used in the production of the 1,000 units of Good A shipped on 01/20/94; and

(4) 900 units of the remaining 1,000 units of non-originating Material A that were received in materials inventory on 01/16/94 are considered to have been used in the production of the 900 units of Good A shipped on 01/23/94.

Example 3: Average method

Good A is subject to an applicable regional value-content requirement. Producer A is using the transaction value method to determine the regional value content of Good A. Producer A determines the average value of non-originating Material A and the ratio of originating Material A to total value of originating Material A and non-originating Material A in the following table.

	Date (M/D/Y)	Materials inventory						Sales (Shipments of good A)
		(Receipts of material A)			(Non-originating material)			
		Quantity (units)	Total value	Unit cost *	Quantity (units)	Total value	Ratio	Quantity (units)
Receipt	12/18/93	100 (O[1])	$100	$1.00				
Receipt	12/27/93	*100 (N[2])*	*110*	*1.10*	*100*	*$110.00*		
NEW AVERAGE INV. VALUE.		200 (OI[3])	210	1.05	100	105.00	0.50	
Receipt	01/01/94	*1,000 (O)*	*1,000*	*1.00*				
NEW AVERAGE INV. VALUE.		1,200	1,210	1.01	100	101.00	0.08	
Receipt	01/05/94	*1,000 (N)*	*1,100*	*1.10*	*1,000*	*1,100.00*		
NEW AVERAGE INV. VALUE.		2,200	2,310	1.06	1,100	1,155.00	0.50	
Shipment	01/10/94	(100)	(105)	1.05	(50)	(52.50)		100
Receipt	01/10/94	*1,000 (O)*	*1,050*	*1.05*				
NEW AVERAGE INV. VALUE.		3,100	3,255	1.05	1,050	1,102.50	0.34	
Shipment	01/15/94	(700)	(735)	1.05	(238)	(249.90)		700
Receipt	01/16/94	*2,000 (N)*	*2,200*	*1.10*	*2,000*	*2,000.00*		
NEW AVERAGE INV. VALUE.		4,400	4,720	1.07	2,816	3,013.20	0.64	
Shipment	01/20/94	(1,000)	(1,070)	1.07	(640)	(648.80)		1,000
Shipment	01/23/94	*(900)*	*(963)*	*1.07*	*(576)*	*(616.32)*		900
NEW AVERAGE INV. VALUE.		2,500	2,687	1.07	1,596	1,707.24	0.64	

* Unit cost is determined in accordance with section 7 of this Appendix.

[1] "O" denotes originating materials.

[2] "N" denotes non-originating materials.

[3] "OI" denotes opening inventory.

By applying the average method:

(1) before the shipment of the 100 units of Material A on 01/10/94, the ratio of units of originating Material A to total units of Material A in materials inventory was .50 (1,100 units/2,200 units) and the ratio of units of non-originating Material A to total units of Material A in materials inventory was .50 (1,100 units/2,200 units); based on those ratios, 50 units (100 units × .50) of originating Material A and 50 units (100 units × .50) of non-originating Material A are considered to have been used in the production of the 100 units of Good A shipped on 01/10/94; therefore, the value of non-originating Material A used in the production of those goods is considered to be $52.50 [100 units × $1.05 (average unit value) × .50]; the ratios are applied to the units of Material A remaining in materials inventory after the shipment: 1,050 units (2,100 units × .50) are considered to be originating materials and 1,050 units (2,100 units × .50) are considered to be non-originating materials;

(2) before the shipment of the 700 units of Good A on 01/15/94, the ratio of units of originating Material A to total units of Material A in materials inventory was 66% (2,050 units/3,100 units) and the ratio of units of non-originating Material A to total units of Material A in materials inventory was 34% (1,050 units/3,100 units); based on those ratios, 462 units (700 units × .66) of originating Material A and 238 units (700 units × .34) of non-originating Material A are considered to have been used in the production of the 700 units of Good A shipped on 01/15/94; therefore, the value of non-originating Material A used in the production of those goods is considered to be $249.90 [700 units × $1.05 (average unit value) × 34%]; the ratios are applied to the units of Material A remaining in materials inventory after the shipment: 1,584 units (2,400 units × .66) are considered to be originating materials and 816 units (2,400 units × .34) are considered to be non-originating materials;

(3) before the shipment of the 1,000 units of Material A on 01/20/94, the ratio of units of originating Material A to total units of Material A in materials inventory was 36% (1,584 units/4,400 units) and the ratio of units of non-originating Material A to total units of Material A in materials inventory was 64% (2,816 units/4,400 units); based on those ratios, 360 units (1,000 units × .36) of originating Material A and 640 units (1,000 units × .64) of non-originating Material A are considered to have been used in the production of the 1,000 units of Good A shipped on 01/20/94; therefore, the value of non-originiating Material A used in the production of those goods is considered to be $684.80 [1,000 units × $1.07 (average unit value) × 64%]; those ratios are applied to the units of Material A remaining in materials inventory after the shipment: 1,224 units (3,400 units × .36) are considered to be originating materials and 2,176 units (3,400 units × .64) are considered to be non-originating materials;

(4) before the shipment of the 900 units of Good A on 01/23/94, the ratio of units of originating Material A to total units of Material A in materials inventory was 36% (1,224 units/3,400 units) and the ratio of units of non-originating Material A to total units of Material A in materials inventory was 64% (2,176 units/3,400 units; based on those ratios, 324 units (900 units × .36) of originating Material A and 576 units (900 units × .64) of non-originating Material A are considered to have been used in the production of the 900 units of Good A shipped on 01/23/94; therefore, the value of non-originating Material A used in the production of those goods is considered to be $616.32 [900 units × $1.07 (average unit value) × 64%]; those ratios are applied to the units of Material A remaining in materials inventory after the shipment: 900 units (2,500 units × .36) are considered to be originating materials and 1,600 units (2,500 units × .64) are considered to be non-originating materials.

Example 4: Average method

Good A is subject to an applicable regional value-content requirement. Producer A is using the net cost method and is averaging over a period of one month under section 6(15)(a) of this Appendix to determine the regional value content of Good A.

By applying the average method:

the ratio of units of originating Material A to total units of Material A in materials inventory for January 1994 is 40.4% (2,100 units/ 5,200 units);

based on that ratio, 1,091 units (2,700 units × .404) of originating Material A and 1,609 units (2,700 units-1,091 units) of non-originating Material A are considered to have been used in the production of the 2,700 units of Good A shipped in January 1994; therefore, the value of non-originating materials used in the production of those goods is considered to be $0.64 per unit [$5,560 (total value of Material A in materials inventory)/ $5,200 (units of Material A in materials inventory) = $1.07 (average unit value) × (1-.404)] or $1,728 ($0.64 × 2,700 units); and

that ratio is applied to the units of Material A remaining in materials inventory on January 31, 1994: 1,010 units (2,500 units × .404) are considered to be originating materials and 1,490 units (2,500 units-1,010 units) are considered to be non-originating materials.

ADDENDUM B

"EXAMPLES" ILLUSTRATING THE APPLICATION OF THE INVENTORY MANAGEMENT METHODS TO DETERMINE THE ORIGIN OF FUNGIBLE GOODS

The following "examples" are based on the figures set out in the table below and on the assumption that Exporter A acquires originating Good A and non-originating Good A that are fungible goods and physically combines or mixes Good A before exporting those goods to the buyer of those goods.

Date (M/D/Y)	Finished goods inventory (receipts of good A)	Sales (shipments of good A)
	Quantity (units)	Quantity (units)
12/18/93	100 (O[1])	
12/27/93	100 (N[2])	
01/01/94	200 (OI[3])	
01/01/94	1,000 (O)	
01/05/94	1,000 (N)	
01/10/94		100
01/15/94	1,000 (O)	
01/16/94		700
01/20/94	2,000 (N)	
01/20/94		1,000
01/23/94		900

[1] "O" denotes originating goods.

[2] "N" denotes non-originating goods.

[3] "OI" denotes opening inventory.

Example 1: FIFO method

By applying the FIFO method:

(1) the 100 units of originating Good A in opening inventory that were received in finished goods inventory on 12/18/93 are considered to be the 100 units of Good A shipped on 01/10/94;

(2) the 100 units of non-originating Good A in opening inventory that were received in finished goods inventory on 12/27/93 and 600 units of the 1,000 units of originating Good A that were received in finished goods inventory on 01/01/94 are considered to be the 700 units of Good A shipped on 01/15/94;

(3) the remaining 400 units of the 1,000 units of originating Good A that were received in finished goods inventory on 01/01/94 and 600 units of the 1,000 units of non-originating Good A that were received in finished goods inventory on 01/05/94 are considered to be the 1,000 units of Good A shipped on 01/20/94; and

(4) the remaining 400 units of the 1,000 units of non-originating Good A that were received in finished goods inventory on 01/05/94 and 500 units of the 1,000 units of originating Good A that were received in finished goods inventory on 01/10/94 are considered to be the 900 units of Good A shipped on 01/23/94.

Example 2: LIFO method

By applying the LIFO method:

(1) 100 units of the 1,000 units of non-originating Good A that were received in finished goods inventory on 01/05/94 are considered to be the 100 units of Good A shipped on 01/10/94;

(2) 700 units of the 1,000 units of originating Good A that were received in finished goods inventory on 01/10/94 are considered to be the 700 units of Good A shipped on 01/15/94;

(3) 1,000 units of the 2,000 units of non-originating Good A that were received in finished goods inventory on 01/16/94 are considered to be the 1,000 units of Good A shipped on 01/20/94; and

(4) 900 units of the remaining 1,000 units of non-originating Good A that were received in finished goods inventory on 01/16/94 are considered to be the 900 units of Good A shipped on 01/23/94.

Example 3: Average method

Exporter A chooses to determine the origin of Good A on a monthly basis. Exporter A exported 3,000 units of Good A during the month of February 1994. The origin of the units of Good A exported during that month is determined on the basis of the preceding month, that is January 1994.

By applying the average method:

the ratio of originating goods to all goods in finished goods inventory for the month of January 1994 is 40.4% (2,100 units/5,200 units);

based on that ratio, 1,212 units (3,000 units × .404) of Good A shipped in February 1994 are considered to be originating goods and 1,788 units (3,000 units − 1,212 units) of Good A are considered to be non-originating goods; and

that ratio is applied to the units of Good A remaining in finished goods inventory on January 31, 1994: 1,010 units (2,500 units × .404) are considered to be originating goods and 1,490 units (2,500 units − 1,010 units) are considered to be non-originating goods.

SCHEDULE XI

METHOD FOR CALCULATING NON-ALLOWABLE INTEREST COSTS

Definitions and Interpretation

SECTION 1. Definitions.

For purposes of this Schedule,

"fixed-rate contract" means a loan contract, installment purchase contract or other financing agreement in which the interest rate remains constant throughout the life of the contract or agreement;

"linear interpolation" means, with respect to the yield on federal government debt obligations, the application of the following mathematical formula:

$$A+[((B-A)\times(E-D))/(C-D)]$$

where

A is the yield on federal government debt obligations that are nearest in maturity but of shorter maturity than the weighted average principal maturity of the payment schedule under the fixed-rate contract or variable-rate contract to which they are being compared,

B is the yield on federal government debt obligations that are nearest in maturity but of greater maturity than the weighted average principal maturity of that payment schedule,

C is the maturity of federal government debt obligations that are nearest in maturity but of greater maturity than the weighted average principal maturity of that payment schedule,

D is the maturity of federal government debt obligations that are nearest in maturity but of shorter maturity than the weighted average principal maturity of that payment schedule, and

E is the weighted average principal maturity of that payment schedule; "payment schedule" means the schedule of payments, whether on a weekly, bi-weekly, monthly, yearly or other basis, of principal and interest, or any combination thereof, made by a producer to a lender in accordance with the terms of a fixed-rate contract or variable-rate contract;

"variable-rate contract" means a loan contract, installment purchase contract or other financing agreement in which the interest rate is adjusted at intervals during the life of the contract or agreement in accordance with its terms;

"weighted average principal maturity" means, with respect to fixed-rate contracts and variable-rate contracts, the number of years, or portion thereof, that is equal to the number obtained by

(a) dividing the sum of the weighted principal payments,

(i) in the case of a fixed-rate contract, by the original amount of the loan, and

(ii) in the case of a variable-rate contract, by the principal balance at the beginning of the interest rate period for which the weighted principal payments were calculated, and

(b) rounding the amount determined under paragraph (a) to the nearest single decimal place and, where that amount is the midpoint between two such numbers, to the greater of those two numbers;

"weighted principal payment" means,

(a) with respect to fixed-rate contracts, the amount determined by multiplying each principal payment under the contract by the number of years, or portion thereof, between the date the producer entered into the contract and the date of that principal payment, and

(b) with respect to variable-rate contracts

(i) the amount determined by multiplying each principal payment made during the current interest rate period by the number of years, or portion thereof, between the beginning of that interest rate period and the date of that payment, and

(ii) the amount equal to the outstanding principal owing, but not necessarily due, at the end of the current interest rate period, multiplied by the number of years, or portion thereof, between the beginning and the end of that interest rate period;

"yield on federal government debt obligations" means

(a) in the case of a producer located in Canada, the yield for federal government debt obligations set out in the Bank of Canada's *Weekly Financial Statistics*

(i) where the interest rate is adjusted at intervals of less than one year, under the title "Treasury Bills", and

(ii) in any other case, under the title "Selected Government of Canada benchmark bond yields",

for the week that the producer entered into the contract or the week of the most recent interest rate adjustment date, if any, under the contract,

(b) in the case of a producer located in Mexico, the yield for federal government debt obligations set out in *La Seccion de Indicadores Monetarios, Financieros, y de Finanzas Publicas, de los Indicadores Economicos,* published by the Banco de Mexico under the title *"Certificados de la Tesoreria de la Federacion"* for the week that the producer entered into the contract or the week of the most recent interest rate adjustment date, if any, under the contract, and

(c) in the case of a producer located in the United States, the yield for federal government debt obligations set out in the Federal Reserve statistical release (H.15) *Selected Interest Rates*

(i) where the interest rate is adjusted at intervals of less than one year, under the title "U.S. government securities, Treasury bills, Secondary market", and

(ii) in any other case, under the title "U.S. Government Securities, Treasury constant maturities",

for the week that the producer entered into the contract or the week of the most recent interest rate adjustment date, if any, under the contract.

General

SECTION 2.

For purposes of calculating non-allowable interest costs

(a) with respect to a fixed-rate contract, the interest rate under that contract shall be compared with the yield on federal government debt obligations that have maturities of the same length as the weighted average principal maturity of the payment schedule under the contract (that yield determined by linear interpolation, where necessary);

(b) with respect to a variable-rate contract

(i) in which the interest rate is adjusted at intervals of less than or equal to one year, the interest rate under that contract shall be compared with the yield on federal government debt obligations that have maturities closest in length to the interest rate adjustment period of the contract, and

(ii) in which the interest rate is adjusted at intervals of greater than one year, the interest rate under the contract shall be compared with the yield on federal government debt obligations that have maturities of the same length as the weighted average principal maturity of the payment schedule under the contract (that yield determined by linear interpolation, where necessary); and

(c) with respect to a fixed-rate or variable-rate contract in which the weighted average principal maturity of the payment schedule under the contract is greater than the maturities offered on federal government debt obligations, the interest rate under the contract shall be compared to the yield on federal government debt obligations that have maturities closest in length to the weighted average principal maturity of the payment schedule under the contract.

ADDENDUM

"EXAMPLE" ILLUSTRATING THE APPLICATION OF THE METHOD FOR CALCULATING NON-ALLOWABLE INTEREST COSTS IN THE CASE OF A FIXED-RATE CONTRACT

The following example is based on the figures set out in the table below and on the following assumptions:

(a) a producer in a NAFTA country borrows $1,000,000 from a person of the same NAFTA country under a fixed-rate contract;

(b) under the terms of the contract, the loan is payable in 10 years with interest paid at the rate of 6 percent per year on the declining principal balance;

(c) the payment schedule calculated by the lender based on the terms of the contract requires the producer to make annual payments of principal and interest of $135,867.36 over the life of the contract;

(d) there are no federal government debt obligations that have maturities equal to the 6-year weighted average principal maturity of the contract; and

(e) the federal government debt obligations that are nearest in maturity to the weighted average principal maturity of the contract are of 5- and 7-year maturities, and the yields on them are 4.7 percent and 5.0 percent, respectively.

Years of loan	Principal balance [1]	Interest payment [2]	Principal payment [3]	Payment schedule	Weighted principal payment [4]
1	$924,132.04	$60,000.00	$75,867.96	$135,867.96	$75,867.96
2	843,712.00	55,447.92	80,420.04	135,867.96	160,840.08
3	758,466.76	50,622.72	85,245.24	135,867.96	255,735.72
4	668,106.81	45,508.01	90,359.95	135,867.96	361,439.82
5	572,325.26	40,086.41	95,781.55	135,867.96	478,907.76
6	470,796.81	34,339.52	101,528.44	135,867.96	609,170.67
7	363,176.66	28,247.81	107,620.15	135,867.96	753,341.06
8	249,099.30	21,790.60	114,077.36	135,867.96	912,618.88
9	128,177.30	14,945.96	120,922.00	135,867.96	1,088,298.02
10	(0.00)	7,690.66	128,177.32	135,867.96	1,281,773.22
					$5,977,993.19

[1] The principal balance represents the loan balance at the end of each full year the loan is in effect and is calculated by subtracting the current year's principal payment from the prior year's ending loan balance.

[2] Interest payments are calculated by multiplying the prior year's ending loan balance by the contract interest rate of 6 percent.

[3] Principal payments are calculated by subtracting the current year's interest payments from the annual payment schedule amount.

[4] The weighted principal payment is determined by, for each year of the loan, multiplying that year's principal payment by the number of years the loan had been in effect at the end of that year.

[5] The weighted average principal maturity of the contract is calculated by dividing the sum of the weighted principal payments by the original loan amount and rounding the amount determined to the nearest decimal place.

Weighted Average Principal Maturity

$5,977,993.19/$1,000,000=5.977993 or 6 years[5]

By applying the above method:

(1) the weighted average principal maturity of the payment schedule under the 6 percent contract is 6 years;

(2) the yields on the closest maturities for comparable federal government debt obligations of 5 years and 7 years are 4.7 percent and 5.0 percent, respectively; therefore, using linear interpolation, the yield on a federal government debt obligation that has a maturity equal to the weighted average principal maturity of the contract is 4.85 percent. This number is calculated as follows:

4.7+[((5.0−4.7)×(6−5))/(7−5)]
=4.7+0.15
=4.85%; and

(3) the producer's contract interest rate of 6 percent is within 700 basis points of the 4.85 percent yield on the comparable federal government debt obligation; therefore, none of the producer's interest costs are considered to be non-allowable interest costs for purposes of the definition "non-allowable interest costs."

"EXAMPLE" ILLUSTRATING THE APPLICATION OF THE METHOD FOR CALCULATING NON-ALLOWABLE INTEREST COSTS IN THE CASE OF A VARIABLE-RATE CONTRACT

The following example is based on the figures set out in the tables below and on the following assumptions:

(a) a producer in a NAFTA country borrows $1,000,000 from a person of the same NAFTA country under a variable-rate contract;

(b) under the terms of the contract, the loan is payable in 10 years with interest paid at the rate of 6 percent per year for the first two years and 8 percent per year for the next two years on the principal balance, with rates adjusted each two years after that;

(c) the payment schedule calculated by the lender based on the terms of the contract requires the producer to make annual payments of principal and interest of $135,867.96 for the first two years of the loan, and of $146,818.34 for the next two years of the loan;

(d) there are no federal government debt obligations that have maturities equal to the 1.9-year weighted average principal maturity of the first two years of the contract;

(e) there are no federal government debt obligations that have maturities equal to the 1.9-year weighted average principal maturity of the third and fourth years of the contract; and

(f) the federal government debt obligations that are nearest in maturity to the weighted average principal maturity of the contract are 1- and 2-year maturities, and the yields on them are 3.0 percent and 3.5 percent respectively.

Beginning of year	Principal balance	Interest rate (%)	Interest payment	Principal payment	Payment schedule	Weighted principal payment
1	$1,000,000.00	6.00	$60,000.00	$75,867.96	$135,867.96	$75,867.96
2	924,132.04	6.00	55,447.92	80,420.04	135,867.96	1,848,264.08
						$1,924,132.04

Weighted Average Principal Maturity

$1,924,132.04/$1,000,000=1.92413204 or 1.9 years

By applying the above method:

(1) the weighted average principal maturity of the payment schedule of the first two years of the contract is 1.9 years;

(2) the yield on the closest maturities of federal government debt obligations of 1 year and 2 years are 3.0 and 3.5 percent, respectively; therefore, using linear interpolation, the yield on a federal government debt obligation that has a maturity equal to the weighted average principal maturity of the payment schedule of the first two years of the contract is 3.45 percent. This amount is calculated as follows:

3.0+[((3.5−3.0)×(1.9−1.0))/(2.0−1.0)]
=3.0+0.45
=3.45%; and

(3) the producer's contract rate of 6 percent for the first two years of the loan is within 700 basis points of the 3.45 percent yield on federal government debt obligations that have maturities equal to the 1.9-year weighted average principal maturity of the payment schedule of the first two years of the producer's loan contract; therefore, none of the producer's interest costs are considered to be non-allowable interest costs for purposes of the definition "non-allowable interest costs".

Beginning of year	Principal balance	Interest rate (%)	Interest payment	Principal payment	Payment schedule	Weighted principal payment
1	$1,000,000.00	6.00	$60,000.00	$75,867.96	$135,867.96	
2	924,132.04	6.00	55,447.92	80,420.04	135,867.96	
3	843,712.01	8.00	67,496.96	79,321.38	146,818.34	$79,321.38
4	764,390.62	8.00	61,151.25	85,667.09	146,818.34	1,528,781.24
						$1,608,102.62

Weighted Average Principal Maturity

$1,608,102.62/$843,712.01=1.905985 or 1.9 years

By applying the above method:

(1) the weighted average principal maturity of the payment schedule under the first two years of the contract is 1.9 years;

(2) the federal government debt obligations that are nearest in maturities to the weighted average principal maturity of the contract are 1- and 2-year maturities, and the yields on them are 3.0 and 3.5 percent, respectively; therefore, using linear interpolation, the yield on a federal government debt obligation that has a maturity equal to the weighted average principal maturity of the payment schedule of the first two years of the contract is 3.45 percent. This amount is calculated as follows:

3.0+[((3.5−3.0)×(1.9−1.0))/(2.0−1.0)]
=3.0+0.45
=3.45%

(3) the producer's contract interest rate, for the third and fourth years of the loan, of 8 percent is within 700 basis points of the 3.45 percent yield on federal government debt obligations that have maturities equal to the 1.9-year weighted average principal maturity of the payment schedule under the third and fourth years of the producer's loan contract; therefore, none of the producer's interest costs are considered to be non-allowable interest costs for purposes of the definition "non-allowable interest costs".

SCHEDULE XII
GENERALLY ACCEPTED ACCOUNTING PRINCIPLES

SECTION 1.

Generally Accepted Accounting Principles means the recognized consensus or substantial authoritative support in the territory of a NAFTA country with respect to the recording of revenues, expenses, costs, assets and liabilities, disclosure of information and preparation of financial statements. These standards may be broad guidelines of general application as well as detailed standards, practices and procedures.

SECTION 2.

For purposes of Generally Accepted Accounting Principles, the recognized consensus or authoritative support are referred to or set out in the following publications:

(a) with respect to the territory of Canada, *The Canadian Institute of Chartered Accountants Handbook*, as updated from time to time;

(b) with respect to the territory of Mexico, *Los Principios de Contabilidad Generalmente Aceptados*, issued by the *Instituto Mexicano de Contadores Públicos A.C. (IMCP)*, including the *boletines complementarios*, as updated from time to time; and

(c) with respect to the territory of the United States,
  (i) the following publications of the American Institute of Certified Public Accountants (AICPA), as updated from time to time:
    (A) AICPA Professional Standards,
    (B) Committee on Accounting Procedure Accounting Research Bulletins,
    (C) Accounting Principles Board Opinions and Statements,
    (D) APB Accounting and Auditing Guides,
    (E) AICPA Statements of Position, and
    (F) AICPA Issues Papers and Practice Bulletins,
  (ii) the following publications of the Financial Accounting Standards Board (FASB), as updated from time to time:
    (A) FASB Accounting Standards and Interpretations,
    (B) FASB Technical Bulletins, and
    (C) FASB Concepts Statements.

PART 191—DRAWBACK

1. The general authority citation for Part 191 is revised to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1202 (General Note 20, Harmonized Tariff Schedule of the United States), 1313, 1624.

* * * * *

2. The last sentence of § 191.0 is republished to read as follows:

§ 191.0 Scope.

* * * Additional drawback provisions relating to the North American Free Trade Agreement are contained in subpart E of part 181 of this chapter.

Dated: August 16, 1995.

George J. Weise,
Commissioner of Customs.

Approved:

John P. Simpson,
Deputy Assistant Secretary of the Treasury.

BILLING CODE 4820-02-P

DEPARTMENT OF THE TREASURY

Customs Service

Regulatory Standards for Implementation of the North American Free Trade Agreement

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: This document publishes for the information of the general public the text of a document setting forth uniform regulatory standards adopted by the United States, Canada and Mexico for purposes of implementing the preferential tariff treatment and other Customs-related provisions of the North American Free Trade Agreement (NAFTA). The final Customs Regulations implementing the NAFTA, which are based in part on the standards set forth herein, also appear in this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Myles Harmon, Office of Regulations and Rulings (202–482–7000).

SUPPLEMENTARY INFORMATION:

Background

On December 17, 1992, the United States, Canada and Mexico (the "Parties") entered into an agreement, the North American Free Trade Agreement (NAFTA). The stated objectives of the NAFTA included elimination of barriers to trade in, and facilitation of the cross-border movement of, goods and services between the territories of the Parties. The provisions of the NAFTA were adopted by the United States with the enactment of the North American Free Trade Agreement Implementation Act, Pub. L. 103–182, 107 Stat. 2057.

Prior to the entry into force of the NAFTA on January 1, 1994, representatives of the Parties engaged in a series of trilateral discussions pursuant to Article 511 of the NAFTA for the purpose of formulating uniform regulatory texts or principles in respect of Chapters Four and Five of the NAFTA and in respect of certain provisions within Chapter Three of the NAFTA. As concerns Chapter Four which sets forth the rules of origin and related provisions for purposes of preferential duty treatment under the NAFTA, the Parties agreed, by an exchange of letters dated December 30, 1993, to implement substantively verbatim texts covering all of the provisions of that Chapter. However, in recognition of the different existing customs legal and procedural requirements in the three countries, in the case of Chapter Five and some provisions of Chapter Three the Parties agreed, by an exchange of letters dated December 30, 1993, to use a standards approach whereby agreement was reached on certain minimum principles to be reflected in each Party's regulations, with each Party being left free to implement those principles, and any other requirements not inconsistent therewith, in accordance with the needs of the Party's particular statutory and regulatory framework.

On December 30, 1993, Customs published T.D. 94–1 in the **Federal Register** (58 FR 69460) setting forth interim amendments to the Customs Regulations to implement the preferential tariff treatment and other Customs-related provisions of the NAFTA in accordance with the implementation principles agreed to by the Parties as discussed above. Subsequent to the publication of T.D. 94–1, the Parties engaged in additional trilateral discussions with a view to modifying the Chapter Four substantively verbatim texts and the standards adopted for purposes of Chapters Three and Five, and those modifications were formally agreed to by the Parties through an exchange of letters in June 1995. The substantively verbatim texts relating to Chapter Four and the standards adopted for purposes of Chapters Three and Five, as so modified, have been incorporated in the provisions of the Customs Regulations implementing the NAFTA that are published as a final rule also in this issue of the **Federal Register**.

The purpose of this document is to set forth for the information of the general public the current text of the NAFTA Chapter Three and Chapter Five regulatory standards document as agreed to by the Parties.

Dated: August 24, 1995.

Stuart P. Seidel,

Assistant Commissioner, Office of Regulations and Rulings.

Accordingly, the document containing the regulatory standards relating to Chapters Three and Five of the NAFTA, as discussed above, is reproduced below:

Uniform Regulations for the Interpretation, Application, and Administration of Chapters Three (National Treatment and Market Access for Goods) and Five (Customs Procedures) of the North American Free Trade Agreement

The Government of Canada, the Government of the United Mexican States and the Government of the United States of America, pursuant to Article 511(1) of the North American Free Trade Agreement, adopt the following Uniform Regulations regarding the interpretation, application and administration of Chapters Three and Five of the North American Free Trade Agreement:

Section A—Certification of Origin

1. The Certificate of Origin referred to in Article 501(1) of the North American Free Trade Agreement (hereinafter "the Agreement") shall be:

(a) equivalent in substance to the Certificate of Origin set out in Annex I.1a;

(b) in a printed format or in such other medium or format as may be approved by the customs administration of the Party into whose territory the good is imported;

(c) completed by the exporter in accordance with these Uniform Regulations, including any instructions contained in the Certificate of Origin set out in Annex I.1a; and

(d) at the option of the exporter, completed in either the language of the Party into whose territory the good is imported or the language of the Party from whose territory the good is exported in accordance with Annex I.1d.

2. For purposes of Article 501(5)(a) of the Agreement, a single Certificate of Origin may be used for:

(a) a single shipment of goods that results in the filing of one or more entries on the importation of the goods into the territory of a Party; or

(b) more than one shipment of goods that result in the filing of one entry on the importation of the goods into the territory of a Party.

Article II: Obligations Regarding Importations

1. For purposes of Article 502(1)(a) of the Agreement, "valid Certificate of Origin" means a Certificate of Origin that the exporter of the good in a territory of a Party completes in accordance with the requirements set out in Article I of these Uniform Regulations.

2. For purposes of Article 502(1)(c) of the Agreement:

(a) the importer shall, upon the request of the customs administration of the Party into whose territory the good is imported, provide a written translation of the Certificate of Origin in the language of that Party; and

(b) where the customs administration of the Party into whose territory the good is imported determines that a Certificate of Origin is illegible, defective on its face or has not been completed in accordance with Article I of these Uniform Regulations, the importer shall be granted a period of not less than five working days to provide the customs administration with a copy of the corrected Certificate.

3. An importer that makes a corrected declaration of origin pursuant to Article 502(1)(d) and (2)(b) of the Agreement and pays any duties owing shall not, in accordance with Article 502(2)(b), be subject to penalties, as set out in Annex II.3.

4. Where as a result of an origin verification conducted under Article 506 of the Agreement, the customs administration of a Party determines that a good that is covered by a Certificate of Origin that is applicable to multiple importations of identical goods in accordance with Article 501(5)(b) does not qualify as an originating good, such Certificate may not be used to claim preferential tariff treatment for those identical goods after the date that the written determination is provided under Article 506(9).

Article III: Exceptions

1. The statement referred to in Article 503(a) of the Agreement shall, where required by the customs administration of the Party into whose territory the good is imported, be attached to, or handwritten, stamped or typed on, the commercial invoice covering the good.

2. For purposes of Article 503 of the Agreement, "series of importations" is defined in Annex III.2.

Article IV: Obligations Regarding Exportations

1. For purposes of Article 504(1)(b) of the Agreement, "promptly" is defined in Annex IV.1.

2. For purposes of Article 504(3) of the Agreement, no Party may impose civil or administrative penalties on an exporter or producer of a good in its territory where the exporter or producer, prior to the commencement of an investigation by officials of that Party with authority to conduct a criminal investigation regarding the Certificate of Origin, provides the written notification referred to in Article 504(1)(b).

3. For purposes of Article 504(1)(b) of the Agreement, where the customs administration of a Party provides an exporter or producer of a good with a determination under Article 506(9) that the good is a non-originating good, the exporter or producer shall notify all persons to whom it gave a Certificate of Origin in respect of that good of the determination.

Section B—Administration and Enforcement

Article V: Records

1. The documentation and records required to be maintained under Article 505 of the Agreement shall be kept in such a manner as to enable an officer of the customs administration of a Party, in conducting a verification of origin under Article 506, to perform detailed verifications of the documentation and records to verify the information on the basis of which:

(a) in the case of an importer, a claim for preferential tariff treatment was made with respect to a good imported into its territory; and

(b) in the case of an exporter or producer, a Certificate of Origin was completed with respect to a good exported to the territory of another Party.

2. Importers, exporters and producers in the territory of a Party that are required to maintain documentation or records under Article 505 of the Agreement shall be permitted, in accordance with that Party's law, to maintain such documentation and records in machine-readable form, provided that the documentation or records can be retrieved and printed.

3. Exporters and producers that are required to maintain records pursuant to Article 505(a) of the Agreement shall, subject to the notification and consent requirements provided for in Article 506(2), make those records available for inspection by an officer of the customs administration of a Party conducting a verification visit and provide facilities for inspection thereof.

4. A Party may deny preferential tariff treatment to a good that is the subject of an origin verification where the exporter, producer or importer of the good that is required to maintain records or documentation under Article 505 of the Agreement:

(a) subject to paragraph 5, fails to maintain records or documentation relevant to determine the origin of the good in accordance with the requirements of the Agreement, these Uniform Regulations or the Uniform Regulations under Chapter Four of the Agreement; or

(b) denies access to the records or documentation.

5. Where the customs administration of a Party finds during the course of an origin verification that a producer of a good in the territory of another Party has failed to maintain its records in accordance with the Generally Accepted Accounting Principles applied in the territory of the Party in which the good is produced as required by Article 413(e) of the Agreement, the producer shall be given an opportunity to record its costs in accordance with those Generally Accepted Accounting Principles within 60 days of being informed in writing by the customs administration that the records have not been maintained in accordance with those Generally Accepted Accounting Principles.

6. For purposes of Article 505 of the Agreement and these Uniform Regulations, "records" include books as referenced in the Uniform Regulations under Chapter Four.

Article VI: Origin Verifications

1. For purposes of Article 506(1)(c) of the Agreement, the customs administration of a Party may conduct a verification of origin with respect to a good that is imported into its territory by means of:

(a) A verification letter that requests information from the exporter or producer of the good in the territory of another Party, provided that it contains specific reference to the good that is the subject of the verification; or

(b) any other method of communication customarily used by the customs administration of the Party in conducting a verification.

2. Subject to paragraph 3, where the customs administration of a Party conducts a verification under paragraph 1(b), it may, on the basis of a response of an exporter or producer to a communication referred to in paragraph 1(b), issue a determination under Article 506(9) of the Agreement:

(a) that the good does not qualify as an originating good, provided that the response is in writing and is signed by that exporter or producer; or

(b) that the good qualifies as an originating good.

3. Where the producer of a good chooses to calculate the regional value content of a good under that net cost method as set out in the Uniform Regulations under Chapter Four of the Agreement, the customs administration of the Party into whose territory the good was imported may not, during the time period over which the net cost has been calculated, verify the regional value content in respect of that good.

4. The customs administration of a Party, in conducting a verification visit under Article 506(1)(b) of the Agreement, shall send the notice referred to in Article 506(2)(a) by certified or registered mail, or any other method that produces a confirmation of receipt by the exporter or producer whose premises are to be visited.

5. When the exporter or producer of a good that is the subject of a proposed

verification visit by the customs administration of a Party has not given its written consent to a visit under Article 506(4) of the Agreement, the customs administration may determine that the good does not qualify as an originating good and may deny preferential tariff treatment to that good.

6. For purposes of Article 506(7) of the Agreement, an exporter or producer of a good shall identify to the customs administration conducting a verification visit any observers designated to be present during such visit.

7. Each Party shall identify to the other Parties, by January 1, 1994, the office to which notice shall be sent under Article 506(2)(a)(ii) of the Agreement.

8. For purposes of Article 506(5) of the Agreement, a notice of postponement of a verification visit shall be made in writing and shall be sent to the address of the customs office that sent the notice of intention to conduct a verification visit.

9. The common standards for the written questionnaires referred to in Article 506(1)(a) of the Agreement are set out in Annex VI.9.

10. Where, pursuant to Article 403(3) of the Agreement, a producer of a motor vehicle identified in Article 403 (1) or (2) elects to average its regional value-content calculation over its fiscal year, the customs administration of the Party into whose territory the motor vehicle was imported may request, in writing, that the producer submit a cost submission reflecting the actual costs incurred in the production of the category of motor vehicles for which the election was made.

11. Where the customs administration of a Party requests that a cost submission be submitted by the producer of a motor vehicle under paragraph 10, such cost submission shall be submitted within 180 days after the close of that producer's fiscal year or within 60 days from the date on which the request was made, whichever is later.

12. Where the customs administration of a Party sends a written request under paragraph 10, such request shall constitute a verification letter under paragraph 1(a).

13. The customs administration of a Party may, for purposes of verifying the origin of a good, request that the importer of the good voluntarily obtain and supply written information voluntarily provided by the exporter or producer of the good in the territory of another Party, provided that the failure or refusal of the importer to obtain and supply such information shall not be considered as a failure of the exporter or producer to supply the information or as a ground for denying preferential tariff treatment.

14. Nothing in this Article shall limit any right accorded under Chapter Five of the Agreement to the exporter or producer of a good in the territory of a Party by virtue of the fact that such exporter or producer is also the importer of the good in the territory of the Party in which preferential tariff treatment is claimed.

15. Where a customs administration conducts a verification of origin of a good under Article 506(1)(a) of the Agreement or paragraph 1(a), it may send the verification letter or questionnaire by:

(a) certified or registered mail, or any other method that produces confirmation of receipt by the exporter or producer; or

(b) any other method, regardless of whether it produces proof of receipt from the exporter or producer of the good.

16. Where the customs administration of a Party has sent a verification letter or questionnaire to an exporter or producer of a good in the territory of another Party and such exporter or producer fails to respond within the period specified therein, which shall be no less than 30 days from the date on which the verification letter or questionnaire was sent, the customs administration:

(a) shall send a subsequent verification letter or questionnaire:

(i) if requested by the Party from whose territory the good was exported, by the method set out in paragraph 15(a), or

(ii) if not requested by the Party from whose territory the good was exported, by the method set out in paragraph 15 (a) or (b); and

(b) may send, with that subsequent verification letter or questionnaire, the written determination referred to in Article 506(9) of the Agreement, including a notice of intent to deny preferential tariff treatment referred to in paragraph 19.

17. Where the customs administration of a Party sends a written determination under paragraph 16(b) and the exporter or producer fails to respond to the subsequent verification letter or questionnaire within 30 days:

(a) from the date of its receipt by the exporter or producer, where it was sent in accordance with paragraph 16(a)(i); or

(b) from the date of its receipt by the exporter or producer or from the date it was sent by the customs administration, as the case may be, in accordance with paragraph 16(a)(ii),

the customs administration may deny preferential tariff treatment to the good.

18. Where the customs administration of a Party does not send a written determination under paragraph 16(b) and the exporter or producer fails to respond to the subsequent verification letter or questionnaire within 30 days:

(a) from the date of its receipt by the exporter or producer, where it was sent in accordance with paragraph 16(a)(i), or

(b) from the date of its receipt by the exporter or producer or from the date it was sent by the customs administration, as the case may be, in accordance with paragraph 16(a)(ii),

the customs administration may deny preferential tariff treatment to the good in accordance with paragraph 19.

19. Where the customs administration of a Party determines, as a result of an origin verification, that a good that is the subject of the verification does not qualify as an originating good, the written determination provided for under Article 506(9) of the Agreement shall:

(a) include a notice of intent to deny preferential tariff treatment with respect to that good that specifies the date after which preferential tariff treatment will be denied and the period during which the exporter or producer of the good may provide written comments or additional information regarding the determination; and

(b) if requested by the Party from whose territory the good is exported, be sent by certified or registered mail or by any other method that produces confirmation of receipt by the exporter or producer of the good.

20. Where the customs administration of a Party determines on the basis of information obtained during a verification that a good does not qualify as an originating good:

(a) the date on which preferential tariff treatment may be denied pursuant to the notice referred to in paragraph 19, shall be no earlier than 30 days from the date on which

(i) receipt of the written determination is confirmed by the exporter or producer, if a request has been made under subparagraph 19(b), and

(ii) the customs administration sends the written determination, if no such request has been made; and

(b) before denying preferential tariff treatment, the customs administration shall take into account any comments or additional information provided by the exporter or producer during the period referred to in subparagraph (a).

21. For purposes of Article 506(10) of the Agreement, "pattern of conduct" means repeated instances of false or unsupported representations by an exporter or producer of a good in the territory of a Party that are established by the customs administration of another Party on the basis of not fewer than two origin verifications of two or more importations of the goods that result in not fewer than two written determinations being sent to that exporter or producer pursuant to Article 506(9) that conclude, as a finding of fact, that Certificates of Origin completed by that exporter or producer with respect to identical goods contain false or unsupported representations.

22. For purposes of Article 506(12) of the Agreement, "consistent treatment" means the established application by the customs administration of a Party that can be substantiated by the continued acceptance by that customs administration of the tariff classification or value of identical materials on importations of the materials into its territory by the same importer over a period of not less than two years immediately prior to the date that the Certificate of Origin for the good that is the subject of the determination under Article 506(11) was completed, provided that with respect to those importations:

(a) such materials had not been accorded a different tariff classification or value by one or more district, regional or local offices of that customs administration on the date of such determination; and

(b) the tariff classification or value of such materials is not the subject of a verification, review or appeal by that customs administration on the date of such determination.

23. For purposes of Article 506(12) of the Agreement, a person shall be entitled to rely on a ruling or advance ruling in accordance with Annex VI.23.

24. A ruling or advance ruling referred to in paragraph 23 that is issued by the customs administration of a Party shall remain in force until modified or revoked.

25. No modification or revocation of a ruling referred to in paragraph 23, other than an advance ruling, may be applied to a good that was the subject of the ruling and that was imported prior to the date of such modification or revocation unless:

(a) the person to whom the ruling was issued has not acted in accordance with its terms and conditions; or

(b) there has been a change in the material facts or circumstances on which the ruling was based.

26. For purposes of Article 506(11) of the Agreement, reference to the phrase, "one or more materials used in the production of the good" means materials that are used in the production of the good or that are used in the production of a material that is used in the production of the good.

27. Article 506(12)(a) of the Agreement in relation to Article 506(11) includes:

(a) a ruling or advance ruling that is issued with respect to a material that is used in the production of the good or that is used in the production of a material that is used in the production of the good; or

(b) the consistent treatment given on the entry of a material that is used in the production of the good or that is used in the production of a material used in the production of the good.

28. Where the customs administration of a Party, in conducting a verification of origin of a good imported into its territory under Article 506 of the Agreement, conducts a verification of the origin of a material that is used in the production of the good, the verification of the material shall be conducted in accordance with the procedures set out in:

(a) Article 506 (1), (2), (3), (5), (7) and (8); and

(b) paragraphs 1, 2, 3, 4, 6, 8, 13, 14, 15 and 16(a).

29. The customs administration of a Party, in conducting a verification of a material that is used in the production of a good pursuant to paragraph 28, may consider the material to be non-originating in determining whether the good is an originating good where the producer or supplier of that material does not allow the customs administration access to information required to make a determination of whether the material is an originating material by the following or other means:

(a) denial of access to its records;

(b) failure to respond to a verification questionnaire or letter; or

(c) refusal to consent to a verification visit within 30 days of receipt of notification under Article 506(2) of the Agreement, as made applicable by paragraph 28.

30. A Party shall not consider a material that is used in the production of a good to be a non-originating material solely on the basis of a postponement of a verification visit under Article 506(5) of the Agreement as made applicable by paragraph 28(a).

31. Where the customs administration of a Party conducts a verification under Article 506 of the Agreement, it may also verify:

(a) the applicable rate of customs duty applied to an originating good in accordance with the rules set out in Annex 302.2 of the Agreement; and

(b) whether a good is a qualifying good for the purposes of Annex 703.2 of the Agreement.

Section C—Advance Rulings

Article VII: Advance Rulings

1. For purposes of Article 509 of the Agreement, the customs administration of a Party shall issue an advance ruling to a producer in the territory of another Party of a material that is used in the production of a good in the territory of another Party, provided that the good is to be subsequently imported into the territory of the Party issuing the ruling, concerning any matter covered by Article 509(1) (a) through (e) and (g) with respect to that material.

2. The common standards regarding the information to be submitted in an application for an advance ruling are set out in Annex VII.2.

3. For purposes of Article 509 of the Agreement, an application to the customs administration of a Party for an advance ruling shall be completed in the language of that Party as set out in Annex I.1d.

4. Subject to paragraph 5 and 6, the customs administration to which the application is made shall issue an advance ruling within 120 days of its receipt of all information reasonably required to process the application, including any supplemental information that may be requested.

5. Each Party may provide that where an application for an advance ruling is made to its customs administration that involves an issue that is the subject of:

(a) a verification of origin,

(b) a review by or appeal to the customs administration, or

(c) judicial or quasi-judicial review in its territory,

the customs administration may decline to issue the ruling.

6. For purposes of Article 509(3) of the Agreement, where the customs administration of a Party determines that an application for an advance ruling is incomplete, it may decline to further process the application provided that:

(a) it has notified the applicant of any supplemental information required and of the period, which shall not be less than 30 days, within which the applicant must provide the information; and

(b) the applicant has failed to provide the information within the period specified.

7. Nothing in paragraph 5 or 6 shall be construed so as to prevent a person from re-applying for an advance ruling.

8. For purposes of Article 509(7) of the Agreement, "importations of a good" is defined in Annex VII.8.

Section D—Review and Appeal

Article VIII: Review and Appeal

1. A denial of preferential tariff treatment to a good by the customs administration of a Party under these Uniform Regulations may be appealed under Article 510 of the Agreement by the exporter or producer of the good who completed the Certificate of Origin for the good in respect of which a claim for preferential tariff treatment was denied, including a denial of preferential tariff treatment under Article 506(4).

2. Where an advance ruling is issued under Article 509 of the Agreement or paragraph 1 of Article VII of these Uniform Regulations, a modification or revocation of the advance ruling shall be subject to review and appeal under Article 510.

3. Where a Party denies preferential tariff treatment to a good on the basis:

(a) that a corrected Certificate of Origin has not been provided within that period set out in Article II(2)(b) of these Uniform Regulations, or

(b) of a failure to comply with a time limit under these Uniform Regulations or under the Agreement, except for the time limit under Article 502(3) of the Agreement, with respect to the furnishing of records or other information to the customs administration of that Party,

the decision rendered on review and appeal under Article 510(2)(a) of that determination shall be on the merits of whether the good qualifies as an originating good, provided that in the case of subparagraph (a) above, a corrected Certificate of Origin is provided to the customs administration of the Party.

Section E—Tariff Elimination

Article IX: Tariff Elimination

1. For purposes of Annex 302.2 and Annex 300–B of the Agreement, Annex 302.2 (4), (5), (6), (8), (10), (11), (12) and (13) and Annex 300–B, Section 2, paragraph 2(b) do not apply where a Party gives duty free treatment to all other Parties in respect of an originating good imported into its territory.

2. For purposes of Annex 302.2 and Annex 300–B of the Agreement, the customs administration of the Party into whose territory an originating good is imported shall determine the applicable preferential tariff rate of duty under Annex 302.2 (8), (10), (11), (12) and (13) and Annex 300–B, Section 2, paragraph 2(b) on the basis of the Marking Rules established under Annex 311 only where:

(a) materials used in the production of the good are obtained from, or

(b) processing of the good occurs in,

the territory of a Party other than the Party from whose territory the good is exported or the Party into whose territory the good is imported, provided that the good has been improved in condition or advanced in value in the territory of the Party from which it is exported. Otherwise, the customs administration shall apply the preferential tariff rate of duty that is applicable to the Party from whose territory the good is exported, provided that the good has been improved in condition or advanced in value in that territory.

3. For purposes of Annex 302.2 of the Agreement, each Party may, notwithstanding that the requirements of Article 502 and any other legal requirements imposed under its law have been satisfied, deny the applicable preferential tariff rate of duty set out in that Annex to an originating good imported into its territory:

(a) if, where contrary to the laws of that Party, the claim for preferential tariff treatment for the good is not supported by documentary evidence such as invoices, bills of lading or waybills that indicate the shipping route and all points of shipment and transshipment prior to the importation of the good into its territory, and

(b) if, where the good is shipped through or transshipped in the territory of a country that is not a Party under the NAFTA, the importer of the good does not provide, on the request of that Party's customs administration, a copy of the customs control documents that indicate, to the satisfaction of the customs administration, that the good remained under customs control while in the territory of such country,

Section F—Drawback and Duty Deferral Programs

Article X: Drawback and Duty Deferral Programs

1. For purposes of Article 303 of the Agreement, "identical or similar" means "identical" and "similar" as defined in Article 15, subsections 2 (a) and (b) of the Customs Valuation Code, and as further defined in Annex IX.1.

2. For purposes of Article 303(1) of the Agreement, "the total amount of customs duties paid to another Party on the good that has been subsequently exported to the territory of that other Party" means the customs duties that are paid in respect of the entry for consumption of the good in the customs territory of a Party, including any change referred to under paragraph 7(b).

3. For purposes of Article 303(1) of the Agreement, where a good is exported from the territory of a Party to the territory of another Party and entered into a duty deferral program in that other Party:

(a) the good shall not be considered to have been exported to the territory of that other Party unless and until such time as the good is withdrawn from the duty deferral program for consumption in the customs territory of that other Party, and

(b) where the good or another good incorporating that good is subsequently exported directly from the duty deferral program to a non-NAFTA country, Article 303 shall not apply to the good, and a refund, waiver or reduction of duties may be granted upon presentation of satisfactory evidence of the exportation of the good or that other good to the non-NAFTA country.

4. In accordance with paragraph (d) of the definition of "satisfactory evidence" under Article 318, "satisfactory evidence" includes an affidavit from the person claiming, subject to Article 303 of the Agreement, a refund, waiver or reduction of customs duties, where such affidavit is based on information received from the importer of the good in the territory of the Party into which the good was subsequently exported.

5. Satisfactory evidence, in the form of one or more of the documents referred to in the definition in Article 318 of the Agreement and paragraph 4, shall contain:

(a) the import entry number,

(b) the date of importation,

(c) the tariff classification number,

(d) the rate of duty, and

(e) the amount of duties paid,

in respect of the importation of the good into the territory of the Party to which the good was subsequently exported.

6. The Party to whom a claim for refund of the amount of customs duties paid, or a waiver or reduction of the amount of customs duties owed, is made may request that the Party to whose territory the good was subsequently exported examine the information referred to under paragraph 5 (a) through (e) that was provided in connection with that claim.

7. The Party to whom a request was made under paragraph 6 shall:

(a) where it determines that the information referred to under paragraph 5 is not correct at the time of the request, provide the requesting Party with the corrected information, and

(b) monitor the importations in respect of the goods that were the

---

subject of a request and notify the requesting Party of any change in respect of the duties paid in connection therewith.

8. For purposes of Article 303.6(b) of the Agreement, the circumstances under which a good shall be considered to be in same condition include the following:

(a) mere dilution with water or another substance;

(b) cleaning, including removal of rust, grease, paint or other coatings;

(c) application of preservative, including lubricants, protective encapsulation, or preservation paint;

(d) trimming, filing, slitting or cutting;

(e) putting up in measured doses, or packing, repacking, packaging ; repackaging; or

(f) testing, marking, labelling, sorting, or grading,

provided that such operations do not materially alter the characteristics of the good.

Section G—Final Provisions

Article XI: Final Provisions

1. For purposes of Chapter Five of the Agreement and these Uniform Regulations, "completed" means completed, signed and dated.

2. Each Party shall ensure that its customs procedures governed by the Agreement are in accordance with Chapter Five of the Agreement and these Uniform Regulations.

3. These Uniform Regulations shall enter into force on the date of the entry into force of the Agreement.

4. For purposes of Chapter Five of the Agreement and these Uniform Regulations, any reference to "materials that are used in the production of the good" or "that are used in the production of a material that is used in the production of the good" shall include materials that are incorporated into a good or material as defined in the Uniform Regulations for Chapter Four.

NORTH AMERICAN FREE TRADE AGREEMENT

CERTIFICATE OF ORIGIN INSTRUCTIONS

For purposes of obtaining preferential tariff treatment, this document must be completed legibly and in full by the exporter and be in the possession of the importer at the time the declaration is made. This document may also be completed voluntarily by the producer for use by the exporter. Please print or type:

Field 1: State the full legal name, address (including country) and legal tax identification number of the exporter. Legal tax identification number is: in Canada, employer number or importer/exporter number assigned by Revenue Canada; in Mexico, federal taxpayer's registry number (RFC); and in the United States, employer's identification number or Social Security number.

Field 2: Complete field if the Certificate covers multiple shipments of identical goods as described in Field #5 that are imported into a NAFTA country for a specified period of up to one year (blanket period). "FROM" is the date upon which the Certificate becomes applicable to the good covered by the blanket Certificate (it may be prior to the date of signing this Certificate). "TO" is the date upon which the blanket period expires. The importation of a good for which preferential tariff treatment is claimed based on this Certificate must occur between these dates.

Field 3: State and full legal name, address (including country) and legal tax identification number, as defined in field #1, of the producer. If more than one producer's good is included on the Certificate, [illegible] a list of the additional producers, including the legal name, address (including country) and legal tax identification number, cross referenced to the good described in field #5. If you wish this information to be confidential, it is acceptable to state "Available to Customs upon request". If the producer and the exporter are the same, complete field with "SAME". If the producer is unknown, it is acceptable to state "UNKNOWN".

Field 4: State the full legal name, address (including country) and legal tax identification number, as defined in field #1, of the importer. If the importer is not known, state "UNKNOWN"; if multiple importers, state "VARIOUS".

Field 5: Provide a full description of each good. The description should be sufficient to relate it to the invoice description and to the Harmonized System (H.S.) description of the good. If the Certificate covers a single shipment of a good, include the invoice number as shown on the commercial invoice. If not known, indicate another unique reference number, such as the shipping order number.

Field 6: For each good described in field #5, identify the H.S. tariff classification to six digits. If the good is subject to a specific rule of origin in Annex 401 that requires eight digits, identify to eight digits, using the H.S. tariff classification of the country into whose territory the good is imported.

Field 7: For each good described in field #5, state which criterion (A through F) is applicable. The rules of origin are contained in Chapter Four and Annex 401. Additional rules are described in Annex 703.2 (certain agricultural goods), Annex 300–B, Appendix 6A (certain textile goods) and Annex 308.1 (certain automatic data processing goods and their parts). NOTE: In order to be entitled to preferential tariff treatment, each good must meet at least one of the criteria below.

Preference Criteria

A—The good is "wholly obtained or produced entirely" in the territory of one or more of the NAFTA countries, as referred to in Article 415. NOTE: The purchase of a good in the territory does not necessarily render it "wholly obtained or produced". If the good is an agricultural good, see also criterion F and Annex 703.2. *(Reference: Article 401(a) and 415)*

B—The good is produced entirely in the territory of one or more of the NAFTA countries and satisfies the specific rule of origin, set out in Annex 401, that applies to its tariff classification. The rule may include a tariff classification change, regional value-content requirement or a combination thereof. The good must also satisfy all other applicable requirements of Chapter Four. If the good is an agricultural good, see also criterion F and Annex 703.2 *(Reference: Article 401(b))*

C—The good is produced entirely in the territory of one or more of the NAFTA countries exclusively from originating materials. Under this criterion, one or more of the materials may not fall within the definition of "wholly produced or obtained", as set out in Article 415. All materials used in the production of the good must qualify as "originating" by meeting the rules of Article 401(a) through (d). If the good is an agricultural good, see also criterion F and Annex 703.2 *(Reference: Article 401(c))*

D—Goods are produced in the territory of one or more of the NAFTA countries but do not meet the applicable rule of origin, set out in Annex 401, because certain non-originating materials do not undergo the required change in tariff classification. The goods do nonetheless meet the regional value-content requirement specified in Article 401(d). This criterion is limited to the following two circumstances:

1. The good was imported into the territory of a NAFTA country in an unassembled or disassembled form but was classified as an assembled good, pursuant to H.S. General Rule of Interpretation 2(a); or
2. The good incorporated one or more non-originating materials, provided for as parts under the H.S., which could not undergo a change in tariff classification because the heading provided for both the good and its parts and was not further subdivided into subheadings, *or* the subheading provided for both the good and its parts and was not further subdivided. NOTE: This criterion does not apply to Chapters 61 through 63 of the H.S. *(Reference: Article 401(d))*

E—Certain automatic data processing goods and their parts, specified in Annex 308.1 that do not originate in the territory are considered originating upon importation into the territory of a NAFTA country from the territory of another NAFTA country when the most-favoured-nation tariff rate of the good conforms to the rate established in Annex 308.1 and is common to all NAFTA countries *(Reference: Annex 308.1)*

F—The good is an originating agricultural good under preference criterion A, B, or C above and is not subject to a quantitative restriction in the importing NAFTA country because it is a "qualifying good" as defined in Annex 703.2, Section A or B (please specify). A good listed in Appendix 703.2.B.7 is also exempt from quantitative restrictions and is eligible for NAFTA preferential tariff treatment if it meets the definition of "qualifying good" in Section A of Annex 703.2. NOTE 1: This criterion does not apply to goods that wholly originate in Canada or the United States and are imported into either country. NOTE 2: A tariff rate quota is not a quantitative restriction.

Field 8: For each good described in field #5, state "YES" if you are the producer of the good. If you are not the producer of the good, state "NO" followed by (1), (2) or (3), depending on whether this certificate was based upon: (1) your knowledge of whether the good qualifies as an originating good; (2) your reliance on the producer's written representation (other than a Certificate of Origin) that the good qualifies as an originating good; or (3) a completed and signed Certificate for the good, voluntarily provided to the exporter by the producer.

Field 9: For each good described in field #5, where the good is subject to a regional value content (RVC) requirement, indicate "NC" if the RVC is calculated according to the net cost method; otherwise, indicate "NO". If the RVC is calculated according to the net cost method over a period of time, further identify the beginning and ending date (DD/MM/YR) of that period. *(Reference: Articles 402.1, and 402.5)*

Field 10: Identify the name of the country ("MX" or "US" for agricultural and textile goods exported to Canada; "US" or "CA" for all goods exported to Mexico; or "CA" or "MX" for all goods exported to the United States) to which the preferential rate of customs duty applies, as set our in Annex 302.2, in accordance with the Marketing Rules or in each Party's schedule of tariff elimination.

For all other originating goods exported to Canada, indicate appropriately "MX" or "US" if the goods originate in that NAFTA country, within the meaning of the NAFTA Rules of Origin Regulations,, and any subsequent processing in the other NAFTA country does not increase the transaction value of the goods by more than seven percent; otherwise indicate "JNT" for joint production. *(Reference: Annex 302.2).*

Field 11: This field must be completed, signed and dated by the exporter. When the Certificate is completed by the producer for use by the exporter, it must be completed, signed and dated by the producer. The date must be the date the Certificate was completed and signed.

Annex I.1d

Language of a Party

For purposes of these Uniform Regulations the language of a Party shall be, in the case of:

(a) Canada, English or French;
(b) Mexico, Spanish; and
(c) the United States, English.

Annex II.3

Corrected Declaration of Origin

An importer shall not be subject to penalties if, in the case of:

(a) Canada, the importer makes the corrected declaration within ninety days from the date on which the importer has reason to believe that the declaration is incorrect;

(b) Mexico, the importer makes the corrected declaration before the customs administration begins an investigation regarding an incorrect declaration or initiates the exercise of its auditing powers on the accuracy of a declaration or an inspection pursuant to the application of the random selection procedures; and

(c) United States, the importer makes the corrected declaration within thirty days from the date on which the importer has reason to believe that the declaration is incorrect and such corrected declaration is make before the commencement of a formal investigation of the incorrect declaration.

Annex III.2

Country-Specific Definitions of "Series of Importations"

For purposes of Article 503 of the Agreement, "series of importations" means, in the case of:

(a) Canada, two or more importations of a good accounted for separately but covered by one commercial invoice issued by the seller of the good to the purchaser of the good;

(b) Mexico, two or more customs entries covering a good arriving the same day or released the same day, and consigned to, or imported by any person, but covered by one commercial invoice; and

(c) the United States, two or more customs entries covering a good arriving the same day from the same exporter and consigned to the same person.

Annex IV.1

Country-Specific Definitions of "Promptly"

For purposes of Article 504(1)(b) of the Agreement, "promptly" means, in the case of:

(a) Canada, immediately;

(b) Mexico, prior to the commencement of an investigation by officials with authority to conduct criminal investigations regarding the Certificate of Origin; and

(c) the United States, within 30 days.

Annex VI.9

Common Standards for Written Questionnaires

1. For purposes of Article VI.9 of these Uniform Regulations, the Parties will seek to agree on uniform questions to be included in a general questionnaire.

2. Subject to paragraph 3, where the customs administration of a Party conducts a verification under Article 506(1)(a) of the Agreement, it shall send the general questionnaire referred to in paragraph 1 of this Annex.

3. For purposes of Article 506(1)(a) of the Agreement, where the customs administration of a Party requires specific information not reflected in the general questionnaire, it may send a more specific questionnaire, according to the information required to determine whether the good that is the subject of the verification is an originating good.

4. For purposes of Article VI of these Uniform Regulations, the verification questionnaires may, at the option of the exporter or producer, be completed in either the language of the Party into whose territory the good is imported, or the language of the Party in the territory in which the exporter or producer is located.

5. Nothing in this Annex shall be interpreted to constrain the customs administration of a Party from requesting additional information in accordance with Article 506(1)(a) of the Agreement and these Uniform Regulations.

Annex VI.23

Rulings and Advance Rulings

A person shall be entitled to rely on a ruling or advance ruling that is issued, in the case of:

(a) Canada, in accordance with Departmental Memorandum 11–11–1 (National Customs Rulings) or pursuant to section 43.1(1) of the Customs Act (Advance Rulings);

(b) Mexico, pursuant to Article 34 of the Código Fiscal de la Federación and to Article 30 of the Ley Aduanera or the applicable provision of Mexican law related to advance rulings under Article 509 of the Agreement; and

(c) the United States, pursuant to 5 U.S.C. 301, 19 U.S.C. 66, or 19 U.S.C. 1624.

Annex VII.2

Common Standards for Information Required in the Application for an Advance Ruling

1. For purposes of Article 509(2) of the Agreement, each Party shall provide that a request for an advance ruling shall contain:

(a) the name and address of the exporter, producer or importer of the good requesting the issuance of the ruling, as the case may be, hereinafter referred to as the applicant,

(b) where the applicant is

(i) the exporter of the good, the name and address of the producer and importer of the good, if known,

(ii) the producer of the good, the name and address of the exporter and importer of the good, if known, or

(iii) the importer of the good, the name and address of the exporter and, if known, the producer of the good.

(c) where the request is made on behalf of an applicant, the name and address of the person requesting the issuance of the advance ruling and either

(i) a written statement from the person requesting the issuance of the advance ruling, or

(ii) upon the request of the customs administration of that Party, such person provide, in accordance with its laws, evidence from the applicant on whose behalf the ruling is being requested,

that indicates that the person is duly authorized to transact business as the agent of the applicant.

(d) a statement, on the basis of the applicant's knowledge, as to whether the issue that is the subject of the request for an advance ruling is, or has been, the subject of

(i) a verification of origin

(ii) an administrative review or appeal

(iii) a judicial or quasi-judicial review, or

(iv) a request for an advance ruling

in the territory of any Party, and if so, a brief statement setting forth the status or disposition of the matter.

(e) a statement, on the basis of the applicant's knowledge, as to whether the good that is the subject of the request for an advance ruling has previously been imported into the territory of the Party to whom the request for the advance ruling has been made.

(f) a statement that the information presented is accurate and complete, and

(g) a complete description of all relevant facts and circumstances relating to the issue that is the subject of the request for the advance ruling, including,

(i) a concise statement, within the scope of Article 509(1) of the Agreement, setting forth the issue on which the advance ruling is sought, and

(ii) a general description of the good.

2. Where relevant to the issue that is the subject of the request for an advance ruling, the request shall include, in addition to the information referred to in paragraph 1,

(a) a copy of any advance ruling or other ruling with respect to the tariff classification of the good that has been issued to the applicant by the Party to whom the request for an advance ruling is made, and

(b) if no previous advance ruling or other ruling with respect to the tariff classification of the good has been issued by the Party to whom the request for the advance ruling is made, sufficient information to enable the customs administration of that Party to classify the good, including,

(i) a full description of the good, including, where relevant, the composition of the good, a description of the process by which the good is manufactured, a description of the packaging in which the good is contained, the anticipated use of the good and its commercial, common or technical designation, product literature, drawings, photographs, or schematics, and

(ii) where practical and useful, a sample of the good.

3. Where the request for the advance ruling involves the application of a rule of origin that requires an assessment of whether materials used in the production of the good undergo an applicable change in tariff classification, the request shall include:

(a) a listing of each material that is used in the production of the good,

(b) with respect to each material referred to in paragraph (a) that is claimed to be an originating material, a complete description of the material, including the basis on which it is considered that the material originates,

(c) with respect to each material referred to in paragraph (a) that is a non-originating material or the origin of which is unknown, a complete description of the material, including its tariff classification, if known, and

(d) a description of all processing operations employed in the production of the good, the location of each operation and the sequence in which the operations occur.

4. Where the request for an advance ruling involves the application of a regional value-content requirement, the applicant shall indicate whether the request is based on the use of the transaction value or the net cost method, or both.

5. Where the request for an advance ruling involves the use of the transaction value method, the request shall include:

(a) information sufficient to calculate the transaction value of the good in accordance with Schedule II of the NAFTA Rules of Origin Regulations with respect to the transaction of the producer of the good, adjusted to a F.O.B. basis,

(b) information sufficient to calculate the value of each material that is a non-originating material or the origin of which is unknown that is used in the production of the good in accordance with Section 7, and, where applicable, section 6(10) of the NAFTA Rules of Origin Regulations, and

(c) with respect to each material that is claimed to be an originating material that is used in the production of the good, a complete description of the material including the basis on which it is considered that the material originates.

6. Where the request for an advance ruling involves the use of the net cost method, the request shall include:

(a) a listing of all product, period and other costs relevant to determining the total cost of the good referred to under the NAFTA Rules of Origin Regulations,

(b) a listing of all excluded costs to be subtracted from the total cost referred to under the NAFTA Rules of Origin Regulations,

(c) information sufficient to calculate the value of each material that is a non-originating material or the origin of which is unknown that is used in the production of the good in accordance with section 7 of the NAFTA Rules of Origin Regulation,

(d) the basis for any allocation of costs in accordance with Schedule VII of the NAFTA Rules of Origin Regulations, and

(e) the period over which the net cost calculation is to be made.

7. Where the request for an advance ruling involves an issue of whether, with respect to a good or a material that is used in the production of a good, the transaction value of the good or the material is acceptable, the request shall include information sufficient to permit an examination of the factors enumerated in Schedules III or VIII of the NAFTA Rules of Origin Regulations, as applicable.

8. Where the request for an advance ruling involves an issue with respect to an intermediate material under Article 402(10) of the Agreement, the request shall contain sufficient information to determine the origin and value of the material in accordance with Article 402(11).

9. Where the request for an advance ruling is limited to the calculation of an element of a regional value content formula, in addition to the information required under paragraph 1, only that information set out under paragraph 4, 5 and 6 which is relevant to the issue that is the subject of the request for an advance ruling need be contained in the request.

10. Where the request for an advance ruling is limited to the origin of a material that is used in the production of a good in accordance with Article VII.1 of these Uniform Regulations, in addition to the information required under paragraph 1, only that information set out under paragraph 2 and 3 which is relevant to the issue that is the subject of the advance ruling need be contained in the request.

Annex VII.8

Country-Specific Definitions of "importations of a good"

For purposes of Article 509(7) of the Agreement, "importations of a good" means importations of a good:

(a) which, in the case of Canada, has been released pursuant to section 31 of the Customs Act;

(b) for which, in the case of Mexico, an entry document has been presented pursuant to Article 25 of the Ley Aduanera (Customs Act); and

(c) which, in the case of the United States, has been entered pursuant to section 1484 of title 19, United States Code.

Annex IX.1

United States Definition of "identical or similar"

For purposes of Article 303 of the Agreement, in the case of the United States "identical or similar" shall have the same meaning as "same kind and quality" as set forth in 19 U.S.C. § 1313(b).

AGENCY: Bureau of Prisons, Justice.

ACTION: Final rule.

SUMMARY: In this document, the Bureau of Prisons is amending its regulations on Control Unit Programs to reflect changes in staffing assignments or the mission of specific institutions, to conform to revisions for Federal Prison Industries work assignments, and to make an editorial amendment.

EFFECTIVE DATE: September 6, 1995.

ADDRESSES: Office of General Counsel, Bureau of Prisons, HOLC room 754, 320 First Street, NW., Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Office of General Counsel, Bureau of Prisons, phone (202) 514–6655.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is amending its regulations on Control Unit Programs. A final rule on this subject was published in the **Federal Register** August 17, 1984 (49 FR 32991) and was amended June 20, 1985 (50 FR 25662).

This document makes the following changes to the Bureau's regulations on control unit programs to reflect changes in staffing assignments or the mission of specific institutions, and changes in the Bureau's regulations on Federal Prison Industries work assignments.

In § 541.46, paragraph (c), obsolete references to Federal Prison Industries industrial good time have been removed. Regulations on Federal Prison Industries work programs (28 CFR part 345) were revised on March 27, 1995 (60 FR 15826). Paragraph (g) is revised for the sake of clarity by dividing the existing text into two sentences. There is no change in the intent of this paragraph.

In § 541.48, paragraph (b) is revised to remove specific reference to the Marion Control Unit, which is currently being deactivated. The procedures in revised paragraph (a) for the inmate's request that an X-ray be taken in lieu of digital search are therefore applicable for any control unit. Revised paragraph (b) now specifies the institution's Clinical Director or Acting Clinical Director (rather than the Chief or Acting Chief of Health Programs) as the official responsible for making a medical determination regarding cumulative X-ray exposure for the requesting inmate. This change is intended to make more efficient use of Bureau staff.

In § 541.49, paragraph (a) is revised to specify additional staff (namely, the officer-in-charge or lieutenant) on the control unit team.

In § 541.50, paragraph (b)(2) is revised for editorial purposes. There is no change in the intent of this section.

Because these changes are administrative in nature and are not more restrictive on inmates, the Bureau finds good cause for exempting the provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for public comment, and delay in effective date. Members of the public may submit comments concerning this rule by writing to the previously cited address. These comments will be considered but will receive no response in the **Federal Register**.

The Bureau of Prisons has determined that this rule is not a significant regulatory action for the purpose of E.O. 12866, and accordingly this rule was not reviewed by the Office of Management and Budget. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 541

Prisoners.

Kathleen M. Hawk,

Director, Bureau of Prisons.

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(p), part 541 in subchapter C of 28 CFR, chapter V is amended as set forth below.

Subchapter C—Institutional Management

PART 541—INMATE DISCIPLINE AND SPECIAL HOUSING UNITS

1. The authority citation for 28 CFR part 541 continues to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 3621, 3622, 3624, 4001, 4042, 4081, 4082 (Repealed in part as to offenses committed on or after November 1, 1987), 4161–4166 (Repealed as to offenses committed on or after November 1, 1987), 5006–5024 (Repealed October 12, 1984 as to offenses committed after that date), 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

2. In § 541.46, paragraph (c) is amended by revising the first sentence (the paragraph heading is republished) and paragraph (g) is revised to read as follows:

§ 541.46 Programs and services.

* * * * *

(c) *Industries (UNICOR).* If an industry program exists in a control unit each inmate participating in this program may earn industrial pay, subject to the regulations of Federal Prison Industries, Inc. (UNICOR). * * *

* * * * *

(g) *Counselor services.* The unit counselor ordinarily handles phone call requests, special concerns and requests of inmates, and requests for administrative remedy forms. The unit counselor is also available for consultation and for counseling as recommended in the mental health evaluation (see paragraph (i) of this section—Mental Health Services).

* * * * *

3. In § 541.48, paragraph (b) is revised to read as follows:

§ 541.48 Search of control unit inmates.

* * * * *

(b) An inmate in a control unit may request in writing that an X-ray be taken in lieu of the digital search discussed in paragraph (a) of this section. The Warden shall approve this request, provided it is determined and stated in writing by the institution's Clinical Director or Acting Clinical Director (may not be further delegated) that the amount of X-ray exposure previously received by the inmate, or anticipated to be given the inmate in the immediate future, does not make the proposed X-ray medically unwise. Staff are to place documentation of the X-ray, and the inmate's signed request for it, in the inmate's central and medical files. The Warden's authority may not be delegated below the level of Acting Warden.

* * * * *

4. In § 541.49, paragraph (a) is amended by revising the second sentence to read as follows:

§ 541.49 Review of control unit placement.

(a) * * * Once every 30 days, the control unit team, comprised of the control unit manager and other members designated by the Warden (ordinarily to include the officer-in-charge or lieutenant, case manager, and education staff member assigned to the unit), shall meet with an inmate in the control unit. * * *

* * * * *

5. In § 541.50, paragraph (b)(2) is revised to read as follows:

§ 541.50 Release from a control unit.

* * * * *

(b) * * *

(2) To another federal or non-federal institution; or

* * * * *

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 548

[BOP 1011–I]

RIN 1120–AA17

Religious Beliefs and Practices

AGENCY: Bureau of Prisons, Justice.

ACTION: Interim rule.

SUMMARY: In this interim rule, the Bureau of Prisons is amending its regulations on Religious Beliefs and Practices in order to provide for the uniform implementation of a common fare religious diet menu and to simplify and update procedures relating to religious beliefs and practices.

DATES: Effective September 6, 1995; comments due by November 6, 1995.

ADDRESSES: Office of General Counsel, Bureau of Prisons, HOLC room 754, 320 First Street, NW., Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Office of General Counsel, Bureau of Prisons, phone (202) 514–6655.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is amending its regulations on Religious Beliefs and Practices. A final rule on this subject was published in the **Federal Register** December 14, 1984 (49 FR 48902).

The Bureau of Prisons is updating its regulations on Religious Beliefs and Practices to include provisions for the implementation of a common fare religious diet. In addition, the regulations have been revised and reorganized for the sake of clarity. A discussion of the specific changes follows.

In § 548.10, paragraph (a) has been revised for the sake of clarity. Paragraph (b) has been revised for the sake of clarity and to provide examples of religious activity or practice. Paragraph (c) has been revised to clarify that an inmate may request at any time to change religious preference by notifying the chaplain in writing. This revision is necessary to provide for adequate documentation (i.e., requiring the notification in writing) of the inmate's request. The change will then be effected in a timely fashion.

The material in §§ 548.12 through 548.15 has been revised and reorganized as §§ 548.12 through 548.20.

New § 548.12 restates material formerly in old § 548.12(a). As revised, this section on chaplains now also specifies that pastoral care and counseling from representatives in the community are available in accordance with the provisions of new §§ 548.14 and 548.19.

New § 548.13 restates material formerly in old §§ 548.12 (b) and 548.15 (b). As revised, new § 548.13 emphasizes that chaplains are responsible for directing the institution's religious activities and that each institution shall have space designated for the conduct of religious activities.

New § 548.14 restates material formerly in old § 548.12 (c) regarding pastoral care and counseling available from representatives in the community. As revised these provisions may require verification of a volunteer's or contractor's religious credentials from a recognized member of the faith group.

New § 548.15 consolidates material from old § 548.12 (d) and (e). As revised, this section now specifies that attendance at religious activities is voluntary and, unless otherwise specifically determined by the Warden, is open to all.

New § 548.16 consolidates material from old § 548.12 (f) and (g). As revised, paragraph (a) of new § 548.16 clarifies that religious items are considered to be part of the inmate's personal property and are subject to normal considerations of safety and security. This paragraph also provides that the chaplain is to verify the religious significance for the Warden's approval. Paragraph (b) restates the provisions of former § 548.12(f) regarding the wearing of religious items during religious services, ceremonies, and meetings in the chapel or within the institution. Paragraph (c) of new § 548.16 restates the provisions of former § 548.12(g). Revised paragraph (c) also requires that the distribution to inmates of religious literature purchased by or donated to the Bureau is contingent upon the approval of the institution's chaplain. This change is intended to ensure that inmates are not coerced or harassed to change religious affiliation.

New § 548.17 restates provisions from former § 548.14 covering work assignments. As revised, this section broadens applicability by covering instances where a religious tenet is jeopardized by a particular work assignment and designates the chaplain as being responsible for verifying the specific religious tenets. The revised section clarifies procedures by specifying that the inmate makes the request in writing.

New § 548.18 restates provisions from former § 548.15(a) regarding religious observances. As revised, this section clarifies procedures for the submission of an inmate's request for time off from work to observe a religious holy day and requires that the chaplain work with requesting inmates to accommodate a proper observance of the holy day celebration.

New § 548.19 derives from an expansion of provisions from former § 548.12(c) regarding pastoral visits. As added, this section requires that the chaplain facilitate arrangements for pastoral visits by a clergyperson or representative of the inmate's faith if requested by an inmate and gives the chaplain the discretion to request an NCIC check and documentation of such person's religious credentials when necessary. The revised section specifies that such visits are not considered social visits, in accordance with existing Bureau policy on visiting regulations (see 28 CFR 540.48), and provides for administrative details on the location of such visits.

New § 548.20 restates provisions contained in former § 548.13 (a) and (b) on dietary practices, including religious diets. In the past, religious diets offered by the Bureau were limited to kosher diets and a pilot program offering a common fare menu (i.e., a diet designed to meet nutritional standards and the basic requirements of religious dietary norms).

As revised, paragraph (a) of new § 548.20 specifies procedures for consideration of requests for a religious diet under a common fare menu. References to nutritional standards have been removed because the Bureau believes it is unnecessary in this regulation to restate its basic policy of providing nutritionally adequate meals. The Bureau initially piloted operation of a common fare menu at institutions in its South Central Region and gradually expanded operation of the program nationwide. Review of the small number of inmate complaints on this subject filed under the Administrative Remedy Program has demonstrated the benefits and practicability of the common fare menu. Documentation requirements for processing a request include a written statement from the inmate articulating the religious motivation for participating in the common fare program. Paragraph (b) specifies procedures for withdrawal or removal from a requested religious diet. The process of reapproving a religious diet ordinarily may extend up to thirty days. Repeated withdrawals may result in longer waiting periods (up to one year). This delay for reinstatement is intended to preserve the integrity and orderly operation of the religious diet program and to prevent fraud. Paragraph (c) contains provisions for accommodations to be made for an annual ceremonial or commemorative meal which specify that such meal is for the members of the particular religious group. The discretionary provisions contained in former § 548.13(b) on the purchase of food to be used for these meals have been removed from the revised regulations because the Bureau believes them to be administrative in nature. Internal staff guidelines specify that Bureau Food Service staff are responsible for procuring such special foods.

Because implementation of a common fare menu provides wider accommodation to the religious needs of inmates and has generally shown its benefits and practicability (based upon the small number of Administrative Remedy filings), the Bureau finds good cause for exempting the provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, and delay in effective date, and is implementing this change as an interim rule. Other regulatory changes in this document are administrative in nature or are restatements or reorganizations made for the sake of clarity. Members of the public may submit comments concerning this rule by writing to the previously cited address. These comments will be considered before the rule is finalized.

The Bureau of Prisons has determined that this rule is not a significant regulatory action for the purpose of E.O. 12866, and accordingly this rule was not reviewed by the Office of Management and Budget. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 548

Prisoners.

Kathleen M. Hawk,
Director, Bureau of Prisons.

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(p), part 548 in subchapter C of 28 CFR, chapter V is amended as set forth below.

Subchapter C—Institutional Management

PART 548—RELIGIOUS PROGRAMS

1. The authority citation for 28 CFR part 548 is revised to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 3621, 3622, 3624, 4001, 4042, 4081, 4082 (Repealed in part as to offenses committed on or after November 1, 1987), 5006–5024 (Repealed October 12, 1984 as to offenses committed after that date), 5039; 28 U.S.C. 509, 510; 42 U.S.C. 1996; 28 CFR 0.95–0.99.

2. Subpart B, consisting of §§ 548.10 through 548.15, is revised to consist of §§ 548.10 through 548.20 as follows:

Subpart B—Religious Beliefs and Practices of Committed Offenders

Sec.
548.10 Purpose and scope.
548.11 Definition.
548.12 Chaplains.
548.13 Schedules and facilities.
548.14 Community involvement (volunteers, contractors).
548.15 Equity.
548.16 Inmate religious property.
548.17 Work assignments.
548.18 Observance of religious holy days.
548.19 Pastoral visits.
548.20 Dietary practices.

Subpart B—Religious Beliefs and Practices of Committed Offenders

§ 548.10 Purpose and scope.

(a) The Bureau of Prisons provides inmates of all faith groups with reasonable and equitable opportunities to pursue religious beliefs and practices, within the constraints of budgetary limitations and consistent with the security and orderly running of the institution and the Bureau of Prisons.

(b) When considered necessary for the security or good order of the institution, the Warden may limit attendance at or discontinue a religious activity. Opportunities for religious activities are open to the entire inmate population, without regard to race, color, nationality, or ordinarily, creed. The Warden, after consulting with the institution chaplain, may limit participation in a particular religious activity or practice to the members of that religious group. Ordinarily, when the nature of the activity or practice (e.g., religious fasts, wearing of headwear, work proscription, ceremonial meals) indicates a need for such a limitation, only those inmates whose files reflect the pertinent religious preference will be included.

(c) The Bureau of Prisons does not require an inmate to profess a religious belief. An inmate may designate any or no religious preference at his/her initial team screening. By notifying the chaplain in writing, an inmate may request to change this designation at any time, and the change will be effected in a timely fashion.

§ 548.11 Definition.

For purposes of this subpart, the term "religious activity" includes religious diets, services, ceremonies, and meetings.

§ 548.12 Chaplains.

Institution chaplains are available upon request to provide pastoral care and counseling to inmates through group programs and individual services. Pastoral care and counseling from representatives in the community are available in accordance with the provisions of §§ 548.14 and 548.19.

§ 548.13 Schedules and facilities.

(a) Under the general supervision of the Warden, chaplains shall schedule and direct the institution's religious activities.

(b) The Warden may relieve an inmate from an institution program or assignment if a religious activity is also scheduled at that time.

(c) Institutions shall have space designated for the conduct of religious activities.

§ 548.14 Community involvement (volunteers, contractors).

(a) The institution's chaplain may contract with representatives of faith groups in the community to provide specific religious services which the chaplain cannot personally deliver due to, ordinarily, religious prescriptions or ecclesiastical constraints to which the chaplain adheres.

(b) The institution's chaplain may secure the services of volunteers to assist inmates in observing their religious beliefs.

(c) The Warden or the Warden's designee (ordinarily the chaplain) may require a recognized representative of the faith group to verify a volunteer's or contractor's religious credentials prior to approving his or her entry into the institution.

§ 548.15 Equity.

No one may disparage the religious beliefs of an inmate, nor coerce or harass an inmate to change religious affiliation. Attendance at all religious activities is voluntary and, unless otherwise specifically determined by the Warden, open to all.

§ 548.16 Inmate religious property.

(a) Inmate religious property includes but is not limited to rosaries and prayer beads, oils, prayer rugs, phylacteries, medicine pouches, and religious medallions. Such items, which become part of an inmate's personal property, are subject to normal considerations of safety and security. If necessary, their religious significance shall be verified by the chaplain prior to the Warden's approval.

(b) An inmate ordinarily shall be allowed to wear or use personal religious items during religious services, ceremonies, and meetings in the chapel, unless the Warden determines that the wearing or use of such items would threaten institution security, safety, or good order. Upon request of the inmate, the Warden may allow the wearing or use of certain religious items throughout the institution, consistent with considerations of security, safety, or good order. The Warden may request the chaplain to obtain direction from representatives of the inmate's faith group or other appropriate sources concerning the religious significance of the items.

(c) An inmate who wishes to have religious books, magazines or periodicals must comply with the general rules of the institution regarding ordering, purchasing, retaining and accumulating personal property. Religious literature is permitted in accordance with the procedures governing incoming publications. Distribution to inmates of religious literature purchased by or donated to the Bureau of Prisons is contingent upon the chaplain's granting his or her approval.

§ 548.17 Work assignments.

When the religious tenets of an inmate's faith are violated or jeopardized by a particular work assignment, a different work assignment ordinarily shall be made after it is requested in writing by the inmate, and the specific religious tenets have been verified by the chaplain. Maintaining security, safety, and good order in the institution are grounds for denial of such request for a different work assignment.

§ 548.18 Observance of religious holy days.

Consistent with maintaining security, safety, and good order in the institution, the Warden shall endeavor to facilitate the observance of important religious holy days which involve special fasts, dietary regulations, worship, or work proscription. The inmate must submit a written request to the chaplain for time off from work to observe a religious holy day. The Warden may request the chaplain to consult with community representatives of the inmate's faith group and/or other appropriate sources to verify the religious significance of the requested observance. The chaplain will work with requesting inmates to accommodate a proper observance of the holy day. The Warden will ordinarily allow an inmate to take earned vacation days, or to make up for missed work, or to change work assignments in order to facilitate the observance of the religious holy day.

§ 548.19 Pastoral visits.

If requested by an inmate, the chaplain shall facilitate arrangements for pastoral visits by a clergyperson or representative of the inmate's faith.

(a) The chaplain may request an NCIC check and documentation of such clergyperson's or faith group representative's credentials.

(b) Pastoral visits may not be counted as social visits. They will ordinarily take place in the visiting room during regular visiting hours.

§ 548.20 Dietary practices.

(a) The Bureau provides inmates requesting a religious diet reasonable and equitable opportunity to observe their religious dietary practice within the constraints of budget limitations and the security and orderly running of the institution and the Bureau through a common fare menu. The inmate will provide a written statement articulating the religious motivation for participation in the common fare program. Any approval of a request for religious diets must be documented in writing by the chaplain, who will forward a copy of the approval form to the food service administrator.

(b) An inmate who has been approved for a common fare menu must notify the chaplain in writing if the inmate wishes to withdraw from the religious diet. Approval for an inmate's religious diet may be withdrawn by the chaplain if the inmate is documented as being in violation of the terms of the religious diet program to which the inmate has agreed to in writing. In order to preserve the integrity and orderly operation of the religious diet program and to prevent fraud, inmates who withdraw (or are removed) may not be immediately reestablished back into the program. The process of reapproving a religious diet for an inmate who voluntarily withdraws or who is removed ordinarily may extend up to thirty days. Repeated withdrawals (voluntary or otherwise), however, may result in inmates being subjected to a waiting period of up to one year.

(c) The chaplain may arrange for inmate religious groups to have one appropriate ceremonial or commemorative meal each year for their members as identified by the religious preference reflected in the inmate's file. An inmate may attend one religious ceremonial meal in a calendar year.

Department of Education

34 CFR Parts 74, 75, 76, and 81

Administration of Grants to Institutions of Higher Education, Hospitals and Nonprofit Organizations; Direct Grant Programs; State-Administered Programs; and General Provisions Act Enforcement: Final Rule

DEPARTMENT OF EDUCATION

34 CFR Parts 74, 75, 76, and 81

RIN 1880–AA64

Administration of Grants to Institutions of Higher Education, Hospitals and Nonprofit Organizations; Direct Grant Programs; State-Administered Programs; and General Provisions Act—Enforcement

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary makes technical amendments to the Education Department General Administrative Regulations (EDGAR) to implement amendments to the General Education Provisions Act (GEPA) made by the Improving America's Schools Act (IASA). The provisions will diminish the paperwork burden for recipients, permit the Secretary to approve State plans for a period longer than three years, authorize the Secretary to take actions other than termination actions if, after a hearing, the Secretary determines that a State plan is not substantially approvable, improve the procedures and requirements governing hearings for the recovery of funds, implement other statutory requirements and make other technical changes to EDGAR.

EFFECTIVE DATE: These regulations take effect October 6, 1995.

FOR FURTHER INFORMATION CONTACT: Ronelle Holloman, U.S. Department of Education, 600 Independence Avenue, SW., Room 3636, ROB–3, Washington, DC 20202–4700. Telephone: (202) 205–3501. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Secretary is amending sections in 34 CFR Parts 74, 75, 76, and 81 to implement the Improving America's Schools Act of 1994 (Pub. L. 103–382), enacted October 20, 1994, and to make other technical changes. The Improving America's Schools Act extends the authorization for programs under the Elementary and Secondary Education Act of 1965 and, as it relates to these amendments, diminishes paperwork burden for educators and clarifies procedures handled by the Office of Administrative Law Judges. Other technical changes to EDGAR are also being made.

Section-by-Section Analysis

Section 74.53 establishes record retention and access requirements for discretionary grants and cooperative agreements awarded on or after October 1, 1994. The section is amended by removing "five" and adding in its place "three" in all appropriate places to reflect IASA removal of the GEPA requirement that recipients under applicable programs maintain records for five years. In addition, the remaining paragraphs are revised by removing "5" wherever it appears and adding in its place "3".

Section 75.125 is amended by revising the heading and authority citation to eliminate reference to the Joint Funding Simplification Act which no longer exists.

Section 75.734 is removed because the IASA amended GEPA to remove the former requirement that recipients under applicable programs maintain records for five years. The removal of § 75.734 allows recipients of discretionary grant programs to rely on the rules in Parts 74 and 80, which require that records be maintained for only three years.

Section 76.101 is amended to reflect the new section number for the section of the General Education provisions Act (GEPA) that specifies the content of the single State application.

Section 76.103 is revised to change the effective period for a state plan from a three-year State plan to give the Secretary the flexibility to establish a multi-year State plan period. Under the amended regulation, the Secretary could establish a State plan period for more than three years.

Section 76.301 is amended to reflect the new section number for the section of GEPA that authorizes the single State application.

Section 76.401 specifies procedures that States must follow in disapproving local applications and specifies actions the Secretary may take if it's determined that a State did not comply with any of the provisions in § 76.401. The section is amended by revising paragraph (d)(8) to include language that will allow the Secretary additional measures to achieve compliance other than immediate termination of assistance to the State.

Section 76.734 is removed because the IASA amended GEPA to remove the former requirement that recipients maintain records for five years. The removal of § 76.734 allows recipients under state administered programs to rely on the rules in Parts 74 and 80, which require that records be maintained for only three years.

Section 81.24 is amended to implement section 250(a)(1) of the IASA by revising § 81.24(b)(1) to require the Secretary, in issuing a notice of a preliminary departmental decision, to establish a prima facie case.

Section 81.27 is amended to implement section 250(a)(1) of the IASA, to allow a recipient 60 days to file an application for review of a preliminary departmental decision in place of the 30 days allowed in the current requirement.

Section 81.33 is amended to implement section 250(a)(3)(B) of the IASA so that, during the Secretary's review of a decision of the Office of Administrative Law Judges, ex parte communication between employees of the Secretary's office and individuals representing the Department or the recipient are prohibited.

Paperwork Reduction Act of 1980

These regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Intergovernmental Review

Some programs affected by these regulations are subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for these programs.

Assessment of Educational Impact

The Secretary has determined that this document does not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Waiver of Proposed Rulemaking

It is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations in accordance with the Administrative Procedure Act (5 U.S.C. 553). However, since these changes merely incorporate statutory amendments into the regulations and do not implement policy changes over which the Secretary has discretion, public comment could have no effect. Therefore, the Secretary has determined pursuant to 5 U.S.C.

553(b)(B) that public comment on these regulations is unnecessary and contrary to the public interest.

Education Department, Grant programs-education, Grant administration, Incorporation by reference.

34 CFR Part 76

Education Department, Grant programs-education, Grant administration, Intergovernmental relations, State-administered programs.

34 CFR Part 81

Enforcement, General Education Provisions Act.

Dated: August 30, 1995.

Richard W. Riley,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number does not apply.)

The Secretary amends Parts 74, 75, 76, and 81 of Title 34 of the Code of Federal Regulations as follows:

PART 74—ADMINISTRATION OF GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS AND OTHER NON-PROFIT ORGANIZATIONS

1. The authority citation for Part 74 is revised to read as follows:

Authority: 20 U.S.C. 1221e–3 and 3474; OMB Circular A–110, unless otherwise noted.

2. In section 74.53, the introduction to paragraph (b) is amended by removing "five" and adding in its place, "three", in paragraph (b) (1) and (3) and (g) (1) and (2) removing "5–" and adding, in its place, "3–"; in paragraph (b)(3) by removing "5" and adding in its place "3"; and by revising the authority citation to read as follows:

§ 74.53 Qualifications and exceptions

* * * * *

(Authority: 20 U.S.C. 1221e–3 and 3474; OMB Circular A–110)

3. The authority citation for sections 74.1, 74.2, 74.3, 74.4, 74.5, 74.10, 74.11, 74.12, 74.13, 74.14, 74.15, 74.16, 74.17, 74.20, 74.21, 74.22, 74.23, 74.24, 74.25, 74.26, 74.27, 74.28, 74.30, 74.31, 74.32, 74.33, 74.34, 74.35, 74.36, 74.37, 74.40, 74.41, 74.42, 74.43, 74.44, 74.45, 74.46, 74.47, 74.48, 74.50, 74.51, 74.52, 74.60, 74.61, 74.62, 74.70, 74.71, 74.72, and 74.73 and Appendix A to Part 74 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 3474; OMB Circular A–110)

PART 75—DIRECT GRANT PROGRAMS

4. The authority citation for Part 75 continues to read as follows:

Authority: 20 U.S.C. 1221e–3 and 3474, unless otherwise noted.

5. Section 75.125 is amended by revising the heading and the authority citation to read as follows:

§ 75.125. Submit a seperate application to each program.

* * * * *

(Authority: 20 U.S.C. 1221e–3 and 3474)

§ 75.734 [Removed]

6. Section 75.734 and the note and cross-reference following the section are removed.

7. Section 75.740 is amended in paragraph (a) by removing the number "438" and adding in its place the number "444" and in paragraph (b) by removing the number "439" and adding in its place the number "445" and revising the authority citation to read as follows:

§ 75.740 Protection of and access to student records; student rights in research, experimental programs, and testing.

* * * * *

(Authority: 20 U.S.C. 1221e–3, 1232g, 1232h, and 3474)

8. The authority citation for sections 75.1, 75.2, 75.4, 75.50, 75.51, 75.60, 75.61, 75.62, 75.100, 75.101, 75.102, 75.103, 75.104, 75.105, 75.109, 75.112, 75.117, 75.119, 75.125, 75.126, 75.127, 75.128, 75.129, 75.155, 75.156, 75.158, 75.159, 75.190, 75.191, 75.192, 75.200, 75.201, 75.210, 75.215, 75.216, 75.217, 75.218, 75.219, 75.220, 75.222, 75.230, 75.231, 75.232, 75.233, 75.234, 75.235, 75.236, 75.250, 75.251, 75.253, 75.260, 75.261, 75.262, 75.500, 75.511, 75.515, 75.516, 75.517, 75.519, 75.524, 75.525, 75.530, 75.531, 75.532, 75.533, 75.534, 75.560, 75.561, 75.562, 75.563, 75.564, 75.590, 75.591, 75.592, 75.600, 75.601, 75.602, 75.603, 75.604, 75.605, 75.606, 75.607. 75.608, 75.609, 75.610, 75.611, 75.612, 75.613, 75.614, 75.615, 75.618, 75.620, 75.621, 75.622, 75.626, 75.650, 75.681, 75.682, 75.683, 75.700, 75.701, 75.702, 75.703, 75.707, 75.708, 75.720, 75.730, 75.731, 75.732, 75.900, 75.901, 75.903, and 75.910 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3 and 3474)

9. The authority citation for section 75.580 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 2890, and 3474)

10. The authority citation for section 75.616 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3 and 3474, 42 U.S.C. 8373(b), and E.O. 12185)

11. The authority citation for section 75.617 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3 and 3474, 31 U.S.C. 3504, 3505)

PART 76—STATE-ADMINISTERED PROGRAMS

12. The authority citation for part 76 continues to read as follows:

Authority: 20 U.S.C. 1221e–3, 3474, and 6511(a) unless otherwise noted.

13. Section 76.101 is amended by removing "Section 435" and adding, in its place, "Section 441" and the authority citation is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1232d, and 3474)

14. Section 76.103 is amended by revising the heading and paragraph (a); and by removing "three-year" in paragraph (b) and adding, in its place, "multi-year" to read as follows:

§ 76.103 Multi-year State plans.

(a) Beginning with fiscal year 1996, each State plan will be effective for a period of more than one fiscal year, to be determined by the Secretary or by regulations.

* * * * *

(Authority: 20 U.S.C. 1221e–3, 1231g(a), and 3474)

15. Section 76.301 is amended by removing "Section 436" and adding, in its place, "Section 442" and the authority citation is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1232d, and 3474)

16. Section 76.401 is amended by revising paragraph (d)(8) and the authority citation to read as follows:

§ 76.401 Disapproval of an application—opportunity for a hearing.

* * * * *

(d) * * *

(8) If a State educational agency does not comply with any provision of this section, or with any order of the Secretary under this section, the Secretary terminates all assistance to the State educational agency under the applicable program or issues such other orders as the Secretary deems appropriate to achieve compliance.

* * * * *

(Authority: 20 U.S.C. 1221e–3, 1231b–2, 3474, and 6511(a))

§ 76.734 [Removed]

17. Section 76.734 and the note following the section are removed.

18. The authority citation for § 76.1 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 3474, and 6511(a))

19. The authority citation for §§ 76.2, 76.50, 76.51, 76.500, 76.532, 76.533, 76.534, 76.563, 76.600, 76.703, 76.704, and 76.707 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 3474, and 6511(a))

20. The authority citation for §§ 76.100, 76.102, 76.104, 76.106, 76.125, 76.141, 76.142, 76.201, 76.202, 76.235, 76.261, 76.300, 76.302, 76.303, 76.400, 76.650, 76.651, 76.652, 76.653, 76.654, 76.655, 76.656, 76.657, 76.658, 76.659, 76.660, 76.661, 76.662, and 76.770 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3 and 3474)

21. The authority citation for § 76.140 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1231g(a), and 3474)

22. The authority citation for § 76.304 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1232e, and 3474)

23. The authority citation for §§ 76.530, 76.560, 76.561, 76.681, 76.683, 76.700, 76.701, 76.702, 76.720, 76.722, 76.731, 76.760, 76.761, and 76.902 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 3474, and 6511(a))

24. The authority citation for § 76.580 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 2890, and 3474)

25. The authority citation for § 76.591 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1226c, 1231a, 3474, and 6511(a))

26. The authority citation for § 76.677 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 2727(b)(3)(D), 2972(f), and 3474)

27. The authority citation for § 76.705 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1225(b), and 3474)

28. The authority citation for § 76.740 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1232g, 1232h, 3474, and 6511(a))

PART 81—GENERAL EDUCATION PROVISIONS ACT—ENFORCEMENT

29. The authority citation for part 81 is revised to read as follows:

Authority: 20 U.S.C. 1221e–3, 1234–1234i, and 3474(a), unless otherwise noted.

30. Section 81.24 is amended by revising paragraph (b)(1) and the authority citation to read as follows:

§ 81.34 Notice of a disallowance decision.

* * * * *

(b)(1) The notice must establish a prima facie case for the recovery of funds, including an analysis reflecting the value of the program services actually obtained in a determination of harm to the Federal interest.

* * * * *

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(a), and 3474(a))

31. Section 81.37 is amended by removing "30" in paragraph (b) and adding, in its place, "60" and revising the authority citation to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(b)(1), and 3474(a))

32. Section 81.43 is amended by redesignating paragraph (a) as paragraph (a)(1); adding a new paragraph (a)(2); and revising the authority citation to read as follows:

§ 81.43 Review by the Secretary.

(a)(1) * * *

(2) During the Secretary's review of the initial decision there shall not be any *ex parte* contact between the Secretary and individuals representing the Department or the recipient.

* * * * *

(Authority: 5 U.S.C. 557(b); 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(d), and 3474(a))

33. The authority citation for sections 81.1, 81.7, 81.8, 81.11, 81.12, 81.17, and 81.19 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), and 3474(a))

34. The authority citation for section 81.2 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234 (b), (c), and (f)(1), 1234a(a)(1), 1234i, and 3474(a))

35. The authority citation for section 81.4 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234 (b) and (c), and 3474(a))

36. The authority citation for section 81.5 is revised to read as follows:

(Authority: 5 U.S.C. 556(b); 20 U.S.C. 1221e–3, 1234 (d), (f)(1) and (g)(1), and 3474(a))

37. The authority citation for section 81.6 is revised to read as follows:

(Authority: 5 U.S.C. 556(d); 20 U.S.C. 1221e–3, 1234(f)(1), and 3474)

38. The authority citation for section 81.9 is revised to read as follows:

(Authority: 5 U.S.C. 554(b); 20 U.S.C. 1221e–3, 1234(f)(1), and 3474(a))

39. The authority citation for section 81.10 is revised to read as follows:

(Authority: 5 U.S.C. 554(d)(1), 557(d)(1)(A); 20 U.S.C. 1221e–3, 1234(f)(1), and 3474(a))

40. The authority citation for section 81.13 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234 (f)(1) and (h), and 3474(a))

41. The authority citation for section 81.14 is revised to read as follows:

(Authority: 20 U.S.C. 554(c)(1), 1221e–3, 1234(f)(1), and 3474(a))

42. The authority citation for section 81.15 is revised to read as follows:

(Authority: 5 U.S.C. 556 (d) and (e); 20 U.S.C. 1221e–3, 1234(f)(1), and 3474(a))

43. The authority citation for section 81.21 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(k), 1234b (a) and (b), and 3474(a))

44. The authority citation for section 81.22 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234b(a), and 3474(a))

45. The authority citation for section 81.23 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234b(b), and 3474(a))

46. The authority citation for section 81.24 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(a), and 3474(a))

47. The authority citation for section 81.25 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(j), and 3474(a); 31 U.S.C. 3711)

48. The authority citation for section 81.26 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a (j), and 3474(a))

49. The authority citation for section 81.27 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(b)(1), and 3474(a))

50. The authority citation for section 81.28 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234 (e) and (f)(1), 1234a(b), and 3474(a))

51. The authority citation for section 81.29 is revised to read as follows:

(Authority: 5 U.S.C. 556(d); 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(c), and 3474(a))

52. The authority citation for section 81.30 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(b)(3), 1234b(b)(1), and 3474(a))

53. The authority citation for section 81.31 is revised to read as follows:

(Authority: 5 U.S.C. 557(c); 20 U.S.C. 1221e–3, 1234(f)(1), and 3474(a))

54. The authority citation for section 81.32 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(e), and 3474(a))

55. The authority citation for section 81.33 is revised to read as follows:

(Authority: 5 U.S.C. 557(b); 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(d), and 3474(a))

56. The authority citation for section 81.34 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234a(g), and 3474(a))

57. The authority citation for the appendix to Part 81 is revised to read as follows:

(Authority: 20 U.S.C. 1221e–3, 1234(f)(1), 1234b(a), and 3474(a))

NEW EDITION

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

Revised January 1, 1994

The GUIDE is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 60, No. 173
Thursday, September 7, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 73

RIN 3150–AF36

Changes to Nuclear Power Plant Security Requirements Associated With Containment Access Control

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to delete certain security requirements for controlling the access of personnel and materials into reactor containment during periods of high traffic such as refueling and major maintenance. This action relieves nuclear power plant licensees of the requirement to separately control access to reactor containments during these periods. Deletion of this requirement decreases the regulatory burden for the licensees without degradation of physical security.

EFFECTIVE DATE: October 10, 1995.

FOR FURTHER INFORMATION CONTACT: Dr. Sandra Frattali, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415–6261, e-mail sdf@nrc.gov.

SUPPLEMENTARY INFORMATION:

Background

In 1991, the Commission re-examined the NRC's nuclear power plant security requirements associated with an internal threat contained in 10 CFR Part 73, "Physical Protection of Plants and Materials." In a report to the Commission dated August 4, 1992 (SECY–92–272), the NRC staff identified requirements that were redundant, out of date, or marginal to safety. Following public meetings held to discuss these requirements, the NRC staff submitted a subsequent report to the Commission dated December 12, 1993 (SECY–93–326), with recommended changes to § 73.55. One of the recommended changes was the deletion of § 73.55(d)(8), which contained a requirement for separate access control to reactor containments, which is unneeded, and a requirement for locks and alarms, which is contained elsewhere in 10 CFR Part 73. The Commission has decided to remove this paragraph to provide burden relief to licensees without compromising the physical protection of licensed activities against radiological sabotage. The other recommendations contained in SECY–93–326 will be addressed in another NRC rulemaking action.

Proposed Rule and Public Comments

On May 10, 1995 (60 FR 24803), the NRC published, with a public comment period of 30 days, a proposed rule that would delete § 73.55(d)(8). Twenty-two comments were received: 20 from utilities, 1 from an industry group, and 1 from a labor union. All commenters supported the proposed rule. The commenters agreed that the proposed action would reduce the regulatory burden but would not degrade the physical security of nuclear power plants. The industry group further commented that significant savings could result from this rulemaking. One of the utilities commented that it would enable utilities to make more efficient use of their resources.

One utility questioned whether the same relief would apply when access to containment is from an area provided with access controls and other security features but not formally designated as a vital area. The same relief would not generically apply to these situations because the level of control varies for each area. However, the NRC will consider each situation on a case-by-case basis.

Another utility asked if its approved security plan, which already had requirements for access to containment directly from a protected area, was affected by this rulemaking. This rule affects access controls only from vital areas into containment. This rule does not affect access controls from protected areas into containment, thus, it does not affect any approved security plan for access to containment from a protected area. When access from a protected area into containment is necessary, existing access controls must remain in effect at the entrances to containment.

Final Rule

Based on the public comments, the NRC staff considers that no change to the final rule is necessary. Thus, the final rule remains the same as the proposed rule.

The final rule deletes paragraph (d)(8) of § 73.55. This amendment relieves licensees of an unnecessary burden, without degrading physical security. Moreover, since security personnel are no longer required to be assigned to a radiation control area, there will be a decrease in occupational exposure. NRC notes that this change applies only to access control from vital areas into reactor containment for the purpose of physical security and does not relieve a licensee of requirements established for the purpose of radiological control and emergency planning.

Environmental Impact: Categorical Exclusion

The Commission has determined that this rule is the type of action described as a categorical exclusion in 10 CFR 51.22 (c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

Paperwork Reduction Act Statement

This final rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget, approval number 3150–0002.

Regulatory Analysis

Elimination of § 73.55(d)(8) relieves licensees of the requirement to station security personnel at entrances to containment during periods of high traffic. The potential savings to the licensees from the elimination of this requirement are substantial. Assuming, on the average, two security personnel are needed to control access to containment during the time the reactor is open, and assuming that the containment is open 50 days per major outage, with 2 major outages every 3 years, and a wage of approximately $30 per hour (loaded) for security personnel,

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Atlanta, GA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is $375. Six-month subscriptions are available for $200 and one month of access can be purchased for $35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512–1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the **Federal Register** Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512–1262, or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 60, No. 173
Thursday, September 7, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 73

RIN 3150–AF36

Changes to Nuclear Power Plant Security Requirements Associated With Containment Access Control

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its regulations to delete certain security requirements for controlling the access of personnel and materials into reactor containment during periods of high traffic such as refueling and major maintenance. This action relieves nuclear power plant licensees of the requirement to separately control access to reactor containments during these periods. Deletion of this requirement decreases the regulatory burden for the licensees without degradation of physical security.

EFFECTIVE DATE: October 10, 1995.

FOR FURTHER INFORMATION CONTACT: Dr. Sandra Frattali, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 415–6261, e-mail sdf@nrc.gov.

SUPPLEMENTARY INFORMATION:

Background

In 1991, the Commission re-examined the NRC's nuclear power plant security requirements associated with an internal threat contained in 10 CFR Part 73, "Physical Protection of Plants and Materials." In a report to the Commission dated August 4, 1992 (SECY–92–272), the NRC staff identified requirements that were redundant, out of date, or marginal to safety. Following public meetings held to discuss these requirements, the NRC staff submitted a subsequent report to the Commission dated December 12, 1993 (SECY–93–326), with recommended changes to § 73.55. One of the recommended changes was the deletion of § 73.55(d)(8), which contained a requirement for separate access control to reactor containments, which is unneeded, and a requirement for locks and alarms, which is contained elsewhere in 10 CFR Part 73. The Commission has decided to remove this paragraph to provide burden relief to licensees without compromising the physical protection of licensed activities against radiological sabotage. The other recommendations contained in SECY–93–326 will be addressed in another NRC rulemaking action.

Proposed Rule and Public Comments

On May 10, 1995 (60 FR 24803), the NRC published, with a public comment period of 30 days, a proposed rule that would delete § 73.55(d)(8). Twenty-two comments were received: 20 from utilities, 1 from an industry group, and 1 from a labor union. All commenters supported the proposed rule. The commenters agreed that the proposed action would reduce the regulatory burden but would not degrade the physical security of nuclear power plants. The industry group further commented that significant savings could result from this rulemaking. One of the utilities commented that it would enable utilities to make more efficient use of their resources.

One utility questioned whether the same relief would apply when access to containment is from an area provided with access controls and other security features but not formally designated as a vital area. The same relief would not generically apply to these situations because the level of control varies for each area. However, the NRC will consider each situation on a case-by-case basis.

Another utility asked if its approved security plan, which already had requirements for access to containment directly from a protected area, was affected by this rulemaking. This rule affects access controls only from vital areas into containment. This rule does not affect access controls from protected areas into containment, thus, it does not affect any approved security plan for access to containment from a protected area. When access from a protected area into containment is necessary, existing access controls must remain in effect at the entrances to containment.

Final Rule

Based on the public comments, the NRC staff considers that no change to the final rule is necessary. Thus, the final rule remains the same as the proposed rule.

The final rule deletes paragraph (d)(8) of § 73.55. This amendment relieves licensees of an unnecessary burden, without degrading physical security. Moreover, since security personnel are no longer required to be assigned to a radiation control area, there will be a decrease in occupational exposure. NRC notes that this change applies only to access control from vital areas into reactor containment for the purpose of physical security and does not relieve a licensee of requirements established for the purpose of radiological control and emergency planning.

Environmental Impact: Categorical Exclusion

The Commission has determined that this rule is the type of action described as a categorical exclusion in 10 CFR 51.22 (c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

Paperwork Reduction Act Statement

This final rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget, approval number 3150–0002.

Regulatory Analysis

Elimination of § 73.55(d)(8) relieves licensees of the requirement to station security personnel at entrances to containment during periods of high traffic. The potential savings to the licensees from the elimination of this requirement are substantial. Assuming, on the average, two security personnel are needed to control access to containment during the time the reactor is open, and assuming that the containment is open 50 days per major outage, with 2 major outages every 3 years, and a wage of approximately $30 per hour (loaded) for security personnel, the total savings per reactor per year will be:

2 guards/reactor × 50 days/outage × ⅔ outages/year × $30/hr-guard × 24 hrs/day = $48,000/year-reactor.

With 110 operating nuclear power reactors, the total savings for the industry are potentially $5,280,000/year. Moreover, deletion of § 73.55(d)(8) results in a decrease in occupational exposure because security personnel will no longer be required to be within the radiation controlled area directly adjacent to containment.

Reactor containment or adjacent areas that provide access to containment are already vital areas. Thus, access of personnel into containment is already controlled. In addition, having security personnel control access of materials into containment provides no substantial benefit since material access into the protected area is already controlled and the containment is located within the protected area. Furthermore, after reactor containment is secured following periods of heavy traffic, existing NRC requirements for walkdown inspections and security searches apply and assure the security of the containment. Hence, the requirement that access into the reactor containment itself be separately controlled provides little or no additional security.

In addition, because a reactor containment is a vital area, it is subject to the vital area requirements for locks and alarms contained in other sections of § 73.55, as well as all other policies and procedures related to vital areas and equipment. Thus, the requirement for locks and alarms in paragraph (d)(8) is redundant.

Based on the above discussion, the NRC concludes that eliminating § 73.55(d)(8) provides relief to the licensees and lowers occupational exposure without compromising physical protection of licensed activities against radiological sabotage at nuclear power reactors.

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule affects only licensees authorized to operate nuclear power reactors. These licensees do not fall within the scope of the definition of "small entities" set forth in the Regulatory Flexibility Act, or the size standards established by the NRC (10 CFR 2.810).

Backfit Analysis

The Commission has determined that the backfit rule, 10 CFR 50.109, does not apply to this final rule because this amendment does not impose new requirements on existing 10 CFR Part 50 licensees. It is voluntary and should the licensee decide to implement this amendment, it is a reduction in burden to the licensee. Therefore, a backfit analysis has not been prepared for this amendment.

List of Subjects in 10 CFR Part 73

Criminal penalties, Hazardous materials transportation, Export, Import, Nuclear materials, Nuclear power plants and reactors, Reporting and recordkeeping requirements, Security measures.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 552 and 553, the NRC is adopting the following amendments to 10 CFR Part 73.

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIALS

1. The authority citation for Part 73 continues to read as follows:

Authority: Secs. 53, 161, 68 Stat. 930, 948, as amended; sec. 147, 94 Stat. 780 (42 U.S.C. 2073, 2167, 2201); sec. 201, as amended; sec. 204, 88 Stat. 1242, as amended, 1245; sec. 1701, 106 Stat. 2951, 2952, 2953 (42 U.S.C. 5841, 5844, 2297f).

Section 73.1 also issued under secs. 135, 141, Pub. L. 97–425, 96 Stat. 2232, 2241 (42 U.S.C. 10155, 10161). Section 73.37(f) also issued under sec. 301, Pub. L. 96–295, 94 Stat. 789 (42 U.S.C. 5841 note). Section 73.57 is issued under sec. 606, Pub. L. 99–399, 100 Stat. 876 (42 U.S.C. 2169).

§ 73.55 [Amended]

2. In § 73.55, paragraph (d)(8) is removed and paragraph (d)(9) is redesignated as (d)(8).

Dated at Rockville, Maryland, this 21st day of August 1995.

For the Nuclear Regulatory Commission.

James M. Taylor,

Executive Director for Operations.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 201

[Release No. 34–36174; File No. S7–40–92]

RIN 3235–AF91

Rules of Practice; Technical Amendments and Corrections

AGENCY: Securities and Exchange Commission.

ACTION: Technical amendments and corrections to final rules.

SUMMARY: This document contains technical amendments and corrected comments for the Securities and Exchange Commission's Rules of Practice adopted on June 9, 1995 and published Friday, June 23, 1995 (60 FR 32738). The Rules of Practice are the procedural rules that govern Commission administrative proceedings.

EFFECTIVE DATE: September 5, 1995.

FOR FURTHER INFORMATION CONTACT: Andrew Z. Glickman, Office of the General Counsel at (202) 942–0870; U.S. Securities and Exchange Commission; 450 Fifth Street, NW., Stop 6–6; Washington, DC 20549.

SUPPLEMENTARY INFORMATION:

Background

The Commission recently consolidated its inspection and examination functions from the Divisions of Market Regulation and Investment Management into a new office—the Office of Compliance Inspections and Examinations. *See* 60 FR 39643 (Aug. 3, 1995) (establishment of office and delegation of authority). This release contains technical amendments to reflect these changes in the Rules of Practice and corrections to the comments associated with the changed rules. This release also corrects a citation error.

Comments (a) and (b) to Rule 230 (which originally appeared in the Supplementary Information section on page 32762, in the tenth line of the first column) are corrected to read as follows:

Comment (a): A respondent's right to inspect and copy documents under this rule is automatic; the respondent does not need to make a formal request for access through the hearing officer. Generally, the rule requires that the Division of Enforcement make available for inspection and copying documents obtained by the Division from persons not employed by the Commission during the course of its investigation prior to the institution of proceedings.

Final inspection or examination reports prepared by the Office of Compliance Inspections and Examinations, the Division of Market Regulation or the Division of Investment Management, may be attorney work product, and other privileges may apply to such reports. Nonetheless, the Commission has determined as a general matter that these final reports will be made available, but only to named respondents in Commission-initiated adjudicative proceedings. This rule does not restrict the Commission's ability to withhold these reports from public disclosure in other contexts, such as pursuant to a request under the Freedom of Information Act. 5 U.S.C. 552.

Rule 230 is not the exclusive means by which a respondent may obtain access to or production of documents. Production of documents prepared by the staff may be required under the doctrine of *Brady v. Maryland,* 373 U.S. 83 (1963), or pursuant to Jencks Act requirements made applicable to the Commission pursuant to Rule 231, or may be sought by subpoena pursuant to Rule 232 or through other procedures. *See, e.g.*, Freedom of Information Act, 5 U.S.C. 552.

The Rule states that the Division of Enforcement shall (1) make available for inspection and copying (2) documents (3) obtained by the Division (4) in connection with the investigation leading to the institution of proceedings.

(1) The Division of Enforcement is required to make documents available for inspection and copying. It is not required to produce a copy of the documents to each respondent.

(2) The definition of the term "documents" in paragraph (a) is modeled on the definition of documents in Rule 34 of the Federal Rules of Civil Procedure.

(3) The Division of Enforcement's obligation under this rule relates to documents obtained by the Division of Enforcement. Documents located only in the files of other divisions or offices are beyond the scope of the rule.

(4) The "investigation leading to the Division's recommendation to institute proceedings" ordinarily is delineated by the investigation number or numbers under which requests for documents, testimony or other information were made. When an investigation is initiated by the Division of Enforcement it is assigned a number, often referred to as the "case" or "investigation" number. Each request for documents, testimony or other information from persons not employed by the Commission specifies the investigation or preliminary investigation number to which it relates. In turn, each written recommendation by the Division of Enforcement to institute proceedings identifies on its cover page, by investigation number, the source investigation or investigations to which it relates. Accordingly, the identity and content of the appropriate investigation file or files from which documents must be made available can be based on objective criteria.

Comment (b): Under paragraph (b), the Division can withhold documents under four exceptions. Exception (1) shields information subject to a claim of privilege. Exception (2) protects as attorney work product internal documents prepared by Commission employees, which will not be offered in evidence. Work product includes any notes, working papers, memoranda or other similar materials, prepared by an attorney in anticipation of litigation. *See Hickman v. Taylor*, 329 U.S. 495 (1947); *see also* Fed. R. Civ. P. 26 (b)(3) and (b)(5). Except to the limited extent specifically provided in paragraph (a), documents prepared by Commission staff are treated as attorney work product, and do not have to be made available pursuant to this rule. Accountants, paralegals and investigators who work on an investigation do so at the direction of the director, an associate director, an associate regional administrator or another supervisory attorney, and their work product is therefore shielded by the rule. A respondent's claim that work product should be turned over will necessarily be evaluated on a case-by-case basis.

Exception (3) protects the identity of a confidential source. *See* 5 U.S.C. 552(b)(7) (C) and (D). Exception (4) protects any other document or category of documents that the hearing officer determines may be withheld as not relevant to the subject matter of the proceeding, or otherwise for good cause shown. This exception provides a mechanism to address a situation where a single investigation involves a discrete segment or segments that are related only indirectly, or not at all, to the recommendations ultimately made to the Commission with respect to the particular respondents in a specific proceeding. To require that documents not relevant to the subject matter of the proceeding be made available, simply because they were obtained as part of a broad investigation, burdens the respondent as well as the Division of Enforcement with unnecessary costs and delay.

For example, a single investigation may encompass inquiry into an issuer's allegedly false accounting disclosure and an unrelated manipulation of the issuer's securities by a third party. If the recommendation to the Commission and resulting administrative proceeding involve only the accounting disclosures, the Division could seek leave to withhold trading records, transcripts and other documents related to the manipulation investigation.

Comment (a) to Rule 430 (which originally appeared in the Supplementary Information section on page 32777, in the fifth line of the second column) is corrected to read as follows:

Comment (a): Congress granted the Commission explicit authority to delegate certain functions to an individual commissioner, division directors and others in 1962. Pub. L. No. 87–592, 76 Stat. 394. This authority appears in Sections 4A and 4B of the Exchange Act, 15 U.S.C. 78d–1 and 78d–2, and was amended most recently in 1987. *See* Pub. L. No. 100–181, Title III, section 308(a), 101 Stat. 1254. The predecessor rule to Rules 430 and 431, former Rule 26, was adopted in 1963. *See* Securities Act Release No. 4586 (Mar. 8, 1963) (adopting release).

Due to the different nature of matters delegated to hearing officers, senior staff or the duty officer, the Commission's rules provide different mechanisms for review of such actions. *See* Rules 410 and 411 (procedures relating to initial decisions by a hearing officer); 17 CFR 200.42 (procedures relating to duty officer). Rule 430 relates to certain delegations made to staff. It applies only to review of actions taken pursuant to authority delegated in 17 CFR 200.30–1 through 200.30–18. Authority delegated by other provisions—for example, the delegation of authority to issue subpoenas pursuant to a private order directing investigation ("formal order")—is not subject to the Rule.

Correction of Publication

Accordingly, the publication on June 23, 1995 of the final Rules of Practice, which were the subject of FR Doc. 95–14750, is corrected as follows:

§ 201.100 [Corrected]

1. On page 32797, in the eighth line of the first column, in § 201.100(b)(2) "17 CFR 200.42." is corrected to read "17 CFR 200.43."

§ 201.230 [Corrected]

2. On page 32807, in the first column, in § 201.230, paragraph (a)(1)(vi) is corrected to read as follows:

"(vi) Any final examination or inspection reports prepared by the Office of Compliance Inspections and Examinations, the Division of Market

Regulation, or the Division of Investment Management."

§ 201.430 [Corrected]

3. On page 32814, in the first column, last line, in § 201.430(a) the reference to "200.30–17" is corrected to read "200.30–18".

4. On page 32814, in the second column, in § 201.430(c) the reference to "200.30–17" is corrected to read "200.30–18".

§ 201.431 [Corrected]

5. On page 32814, in the second column, in the sixth line of § 201.431(a) "200.30–17" is corrected to read "200.30–18".

Dated: August 31, 1995.

By the Commission.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 95–22110 Filed 9–6–95; 8:45 am]

BILLING CODE 8010–01–P

INTERNATIONAL TRADE COMMISSION

19 CFR Part 206

Implementing Rules for the Uruguay Round Agreements Act

AGENCY: International Trade Commission.

ACTION: Adoption of interim rules as final rules.

SUMMARY: The Commission has adopted as final rules, without change, interim rules that amend part 206 of the Commission's rules to conform its rules of practice and procedure with amendments made to sections 201–204 of the Trade Act of 1974 (19 U.S.C. 2251–2254) by the Uruguay Round Agreements Act (URAA) (Pub. L. 103–465, 108 Stat. 4809 (1994)). The URAA, among other things, amended sections 201–204 of the Trade Act to bring U.S. law into conformity with the Uruguay Round Agreement on Safeguards.

EFFECTIVE DATE: September 7, 1995.

FOR FURTHER INFORMATION CONTACT: William Gearhart (202–205–3091), Office of the General Counsel, U.S. International Trade Commission. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810.

SUPPLEMENTARY INFORMATION:

Background

The interim rules were published in the **Federal Register** on January 3, 1995 (60 FR 10). The interim amendment to section 206.17 was effective January 3, 1995; all other amendments were effective January 1, 1995. Comments on the interim rules were required to be received on or before April 3, 1995. No comments were received.

Accordingly, the Commission has adopted as final rules, without change, the interim rules amending 19 CFR part 206 that were published at 60 FR 10 on January 3, 1995.

List of Subjects in 19 CFR Part 206

Administrative practice and procedure, Investigations, Imports.

Authority: 19 U.S.C. 1335; 19 U.S.C. 2251–2254, 3351–3382; secs. 103, 301–302, Pub. L. 103–465, 108 Stat. 4809.

By order of the Commission.

Issued: August 30, 1995.

Donna R. Koehnke,

Secretary.

[FR Doc. 95–22235 Filed 9–6–95; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1, 4 and 602

[TD 8618]

RIN 1545–AM15

Definition of a Controlled Foreign Corporation, Foreign Base Company Income and Foreign Personal Holding Company Income of a Controlled Foreign Corporation

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final Income Tax Regulations governing the definition of a controlled foreign corporation and the definitions of foreign base company income and foreign personal holding company income of a controlled foreign corporation. These regulations are necessary because of changes made to the prior law by the Tax Reform Act of 1986, the Technical and Miscellaneous Revenue Act of 1988, the Revenue Reconciliation Act of 1989, and the Omnibus Budget Reconciliation Act of 1993. Certain conforming changes in the regulations were necessary because of changes made by the Deficit Reduction Act of 1984. The regulations will provide the public with the guidance to comply with those acts and will affect United States shareholders of controlled foreign corporations.

DATES: These regulations are effective September 7, 1995.

For dates of applicability, see § 1.954–0(a).

FOR FURTHER INFORMATION CONTACT: Valerie Mark of the Office of Associate Chief Counsel (International), within the Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention CC:INTL:2 (INTL–0362–88). Telephone (202) 622–3840 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)) under control number 1545–1068. The estimated average burden per respondent associated with the collection of information in this regulation is one hour.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, PC:FP, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Background

This document contains final regulations amending the Income Tax Regulations (26 CFR Part 1) under sections 954(b), 954(c) and 957(a) of the Internal Revenue Code (Code). Sections 954 and 957 were amended by sections 1201, 1221, 1222 and 1223 of the Tax Reform Act of 1986 (Pub. L. 99–514), by section 1012 of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. 100–647), by section 7811 of the Revenue Reconciliation Act of 1989 (Pub. L. 101–239) and by section 13233 of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66). These regulations are also issued under authority contained in section 7805 of the Code.

Temporary regulations (TD 8216) and a cross-referenced notice of proposed rulemaking (INTL–362–88) under sections 954 and 957 of the Code were published in the **Federal Register** on July 21, 1988 (53 FR 27489 and 53 FR 27532, respectively). Numerous written comments on the proposed and temporary regulations were received from the public. As explained below, the comments were considered in the drafting of the final regulations.

Discussion of Major Comments and Changes to the Regulations

Section 1.954–1: Foreign Base Company Income

Section 1.954–1T(a)(3) and (5) (temporary regulations) apply the de minimis and full inclusion tests of section 954(b)(3) before the high tax exception of section 954(b)(4). Commenters have expressed concern that, in certain cases, the only amounts required to be included in the gross income of the United States shareholders of a controlled foreign corporation may be full inclusion income. This result may occur when subpart F income, other than full inclusion foreign base company income, qualifies for the high tax exception. In response to these comments, § 1.954–1(d)(6) provides that an amount that otherwise would be included as full inclusion foreign base company income, pursuant to the operation of the full inclusion test of section 954(b)(3)(B), will be excluded from full inclusion foreign base company income if more than 90 percent of the adjusted gross foreign base company and adjusted gross insurance income qualifies for the high tax exception described in section 954(b)(4) and the high tax election is actually made.

Section 1.954–1T(a)(4) provides that in computing net foreign base company income, foreign personal holding company income is reduced by related person interest expense before allocating and apportioning other expenses in accordance with § 1.904(d)–5(c)(2). Commenters understood this rule to be at variance with § 1.904(d)–5(c)(2), which requires related person interest expense to be allocated to passive foreign personal holding company income after the allocation of directly related expenses. In response to this comment, the rule regarding allocation of related person interest expense was removed from § 1.954–1T(a)(4) and (c) was amended to clarify that foreign base company income is reduced by directly related expenses before passive foreign personal holding company income is reduced by related person interest expense.

Section 1.954–1T(a)(7) treats amounts recharacterized as foreign base company income or insurance income under section 952(c) as adjusted net foreign base company income or adjusted net insurance income. Thus, these amounts are not included in net foreign base company income or net insurance income for purposes of applying the high tax exception. Commenters argued that the rules of paragraph (a)(7) should be amended to provide that amounts that are recharacterized under section 952(c)(2) should not be treated as adjusted net foreign base company income or adjusted net insurance income if the amounts would have qualified for the high tax exception. This comment was rejected because section 952(c)(2) does not incorporate the exclusions and special rules of section 954(b)(4). Additional rules regarding the coordination of sections 952(c) and 954 are being proposed under section 952 in a separate document published elsewhere in this issue of the **Federal Register.**

Several comments were made concerning the anti-abuse rules of § 1.954–1T(b)(4), which require aggregation of gross income of related controlled foreign corporations for purposes of the de minimis and full inclusion tests. One comment suggested that the aggregation rules of paragraph (b)(4) should be applied only if a purpose of first importance (as opposed to a principal purpose) is to avoid the application of the de minimis or full inclusion tests described in section 954(b)(3). This comment was rejected because the standard suggested is significantly more subjective than that of the regulations and is therefore unadministrable. However, it was determined that it was unnecessary to make the aggregation rules of paragraph (b)(4) applicable to the full inclusion test, for which there is not the same opportunity for tax avoidance.

One commenter suggested that the anti-abuse rules of § 1.954–1T(b)(4) should be amended to provide that the gross income of separate controlled foreign corporations is aggregated only if a substantial portion of the activities of the separate corporations would comprise a single branch, and that the presumptions described in paragraph (b)(4)(ii) should be eliminated. The commenter also suggested that the definition of related person for purposes of these rules should refer to the provisions of section 954(d)(3), rather than the broader provisions of section 267. These comments were rejected because the suggested amendments would unduly restrict the application of the anti-abuse rules. The presumptions described in paragraph (b)(4)(ii) may be rebutted, for example, by establishing reliance on the requirements of foreign law. The anti-abuse rules are necessary to prevent the misuse of the de minimis rule of section 954(b)(3), and do not impose a significant limitation or burden on the activities of controlled foreign corporations.

Section 1.954–1T(c) provides that in computing net foreign base company income, the gross amount in each category of foreign base company income may not be reduced below zero. Section 1.954–2T(e) provides that the excess of losses over gains from the sale or exchange of certain property may not be allocated to any other category of foreign personal holding company income. Section 1.954–2T (f) and (g) contain similar provisions with regard to excess losses from commodities and foreign currency transactions, respectively. Because the categories of foreign base company income described in section 954(a) and the categories of foreign personal holding company income described in section 954(c)(1) (B), (C) and (D) are defined in terms of net income, the temporary regulations interpreted the statutory scheme as generally precluding the allocation of excess losses from categories of foreign personal holding company income described in paragraph (e), (f), or (g) against other foreign personal holding company income categories. Commenters contended that by preventing any category of subpart F income from being reduced below zero, paragraph (c) caused inappropriate tax credit results and failed to harmonize the subpart F provisions with section 904(f)(5). Commentators stated that paragraphs (e), (f) and (g) should be amended to allow excess losses described in those paragraphs to be allocated to other categories of foreign personal holding company income.

Paragraph (c) has been amended to clarify that, in determining net income, if the amount in any category of foreign base company income (including any category of foreign personal holding company income) is less than zero, the loss may not reduce any other categories of foreign base company income (or foreign personal holding company income) except by operation of the earnings and profits limitation. Proposed regulations published elsewhere in this issue of the **Federal Register** will provide rules concerning the application of the earnings and profits limitation.

Section 1.954–1T(d) provides that the effective rate of foreign income tax on an item of income is determined in a manner consistent with the existing foreign tax credit regime under sections 904 and 960. In some cases, the amount of an item of income for foreign law purposes with respect to which foreign income tax is paid will be different from the amount for United States tax purposes. As a result, the effective rate of tax with respect to the item of income may be affected. In addition, because pursuant to section 960 the foreign income taxes of a controlled foreign corporation more than three tiers below a United States shareholder are not considered, the high tax exception will never apply to items of income of such corporations.

Commenters suggested that certain foreign law accounting practices should be considered in determining the effective rate of tax on an item of income, for purposes of applying the high tax exception of section 954(b)(4) and paragraph (d) of the regulations. Commenters also contended that it is inappropriate to use section 960 to determine the effective rate of foreign tax and thus prevent consideration of taxes paid by controlled foreign corporations more than three tiers below the United States shareholder.

The comment that the high tax exception should not be limited to creditable taxes under section 960 was rejected. The high tax exception is not intended to apply to the extent that an item of income would be subject to residual United States tax if such item were included in the gross income of the United States shareholder. The taxes paid with respect to such item of income should be considered for purposes of the high tax exception only to the extent they are otherwise considered for United States taxing purposes. See Joint Committee on Taxation Staff, *General Explanation of the Tax Reform Act of 1986*, 99th Cong., 2d Sess. 970–71 (1986).

The comment that foreign law accounting practices should be considered in determining the effective rate of tax on an item of income, for purposes of applying the high tax exception, was also rejected. Such a rule would impose a significant burden on the IRS. It would require the IRS to monitor and apply foreign tax and accounting principles, and to reconcile their application with United States tax and accounting principles, both in the current tax year and in later tax years to prevent an item of income, deduction, credit, gain or loss from being duplicated or omitted. Further, the IRS would have to consider and identify the particular foreign tax and accounting principles that could be taken into account for purposes of these rules.

Section 1.954–1T(d)(4) defines the term *item of income* for purposes of the high tax exception by reference to the foreign tax credit and subpart F income categories to which the income relates. Thus, it is possible that amounts attributable to separate transactions may be included in the same item of income. If the income from the separate transactions were subject to foreign income tax at different rates, the effective rate of tax for the income item would reflect an average of the two (or more) rates of tax. One commenter has suggested that additional categories of income be created within the existing foreign tax credit and subpart F income groups to limit the effect of this tax rate blending.

The regulations rely on existing guidance under the foreign tax credit and subpart F provisions generally to define *item of income* for purposes of section 954(b)(4). To identify items of income on a transaction-by-transaction basis is inconsistent with the separate limitation categories of income described in section 904, and adds complexity by requiring different computations for purposes of these rules and the rules under the foreign tax credit provisions of the Code. Moreover, there is no bias in the existing rules toward a particular result.

Commenters suggested that the consistency rule of § 1.954–1T(d)(4)(ii)(B) be eliminated, to allow taxpayers to apply the high tax exception on an item-by-item basis. The consistency rule prohibits a taxpayer from selectively applying the high tax exception with respect to foreign personal holding company income that is passive income under section 904(d). Elimination of the consistency rule would provide a result that is incompatible with the foreign tax credit provisions of the Code, and thus the comment was rejected.

The final regulations clarify how the rules of paragraph (d) coordinate with the earnings and profits limitation of section 952(c)(1). Under § 1.954–1(d)(4)(ii), if the amount of income included in subpart F income for the taxable year is reduced by the earnings and profits limitation, the amount of income that is an item of income, for purposes of paragraph (d), is determined after the application of the rules of section 952(c)(1). An example was added to illustrate this rule.

Section 1.954–1T(d)(5) provides that the election to apply the high tax exception must be made by the controlling United States shareholders and is binding on all United States shareholders of the controlled foreign corporation. Commenters argued that the Secretary does not have the authority to bind all United States shareholders to a single election. This comment was rejected because it was determined that section 954(b)(4) provides the authority. Further, allowing each United States shareholder to separately elect the high tax exception would add undue complexity to the operation of the foreign tax credit rules.

Section 1.954–1(f) provides guidance on the definition of related person under section 954(d)(3).

Section 1.954–2: Foreign Personal Holding Company Income

Section 1.954–2T(a)(2)(i) provides that amounts that fall within the definition of income equivalent to interest, under paragraph (h), will be so treated though such amounts may also fall within the definition of gain from certain property transactions under paragraph (e), gain from a commodities transaction under paragraph (f) or foreign currency gain under paragraph (g). Paragraph (a)(2)(i) provides that amounts will be treated as income equivalent to interest even if these amounts are excluded from the computation of foreign personal holding company income under paragraphs (e), (f), or (g) because they are derived from certain qualifying business transactions. A commenter suggested that paragraph (a)(2)(i) should not treat income from qualifying business transactions excluded under paragraphs (e), (f), or (g) as income equivalent to interest. This comment was rejected. The rules regarding qualifying business transactions in paragraphs (e), (f) and (g) do not operate to exclude interest income from characterization as foreign personal holding company income. Income equivalent to interest within the meaning of section 954(c)(1)(E) and paragraph (h) generally should be treated like interest for purposes of subpart F.

Several commenters suggested that the test described in § 1.954–2T(a)(3) to determine the use for which property is held (for purposes of determining the character of the income, gain or loss realized from a disposition of such property) should not focus solely on the use of the property immediately prior to its disposition, but instead should consider the predominant use for which the property was held. This comment was accepted. Section 1.954–2(a)(3) provides that the use for which property is held is the use for which it was held for more than one-half of the period during which the controlled foreign corporation held the property. If there has been a change in use, however, and a principal purpose for such change in use was to avoid characterizing income or gain attributable to the property as foreign personal holding company income, then the change in use will be disregarded.

Section 1.954–2T(a)(3)(ii), *Examples 2* and *3* illustrate the rules regarding change in use for which property is

held. The final regulations delete these examples because *Example 1* sufficiently illustrated the rules of this paragraph. *Examples 4* and *5* of paragraph (a)(3)(ii) illustrate the change in use rules with respect to hedging transactions. The final regulations delete these examples because the rules governing hedging transactions are now generally contained in paragraph (a)(4)(ii).

Section 1.954–2T(a)(4)(i) lists some of the types of income that are included in the term *interest*. To clarify that this list was not meant to be exclusive, paragraph (a)(4)(i) has been amended to provide that the term *interest* includes all amounts that are treated as interest (including tax-exempt interest) under the Code and regulations or any other provision of law. A new sentence illustrates the types of income that would be treated as interest.

Section 1.954–2T(a)(4)(ii) provides that certain hedging transactions that reduce the risk of price changes in the cost of inventory and similar property are included within the definition of *inventory and similar property* if certain requirements are met and if they are so identified by the fifth day after which they are entered into. Paragraphs (f)(4) and (g)(4) of the temporary regulations contain definitions of the term *qualified hedging transaction* that have similar five-day identification requirements. These several definitions of a hedging transaction have been consolidated in § 1.954–2(a)(4)(ii) which contains a definition of *bona fide hedging transaction* and new identification requirements for bona fide hedging transactions that apply for purposes of computing foreign personal holding company income under § 1.954–2.

Section 1.954–2(a)(4)(ii)(A) generally defines a bona fide hedging transaction as a transaction that meets the requirements of § 1.1221–2 (a) through (c) with two exceptions. First, the risk being hedged may be with respect to ordinary property, section 1231 property or a section 988 transaction. Second, a transaction that hedges the liabilities, inventory or other assets of a related person, or that is entered into to assume or reduce risks of a related person, will not be treated as a bona fide hedging transaction. Several commenters had sought to expand the definition of qualified hedging transactions to include hedging transactions conducted by a controlled foreign corporation that is a currency coordination center, i.e., a controlled foreign corporation that aggregates the currency exposures of related controlled foreign corporations and hedges such exposures. The statute provides, however, that a transaction must satisfy the business needs of the particular controlled foreign corporation. See also Joint Committee on Taxation Staff, *General Explanation of the Tax Reform Act of 1986*, 99th Cong., 2d Sess. 976 (1986).

Section 1.954–2(a)(4)(ii)(B) provides identification requirements for a bona fide hedging transaction. The same-day identification and the recordkeeping requirements of § 1.1221–2 apply for transactions entered on or after March 7, 1996. For bona fide hedging transactions entered into prior to this date and after July 22, 1988, the transaction must be identified by the close of the fifth day after the day on which it is entered into. For bona fide hedging transactions entered into prior to July 22, 1988, the transaction must be identified reasonably contemporaneously with the date it is entered into but no later than within the normal period prescribed under the method of accounting of the controlled foreign corporation used for financial reporting purposes.

Section 1.954–2(a)(4)(ii)(C) describes the treatment of transactions that are misidentified as hedging transactions, and hedging transactions that the taxpayer fails to identify as such. Paragraph (a)(4)(ii)(C) also provides relief for taxpayers that have identified, or failed to identify, a hedging transaction due to inadvertent error. These misidentification rules are substantially similar to the rules in § 1.1221–2(f), modified for purposes of the subpart F regime.

Section 1.954–2T(a)(4)(iii) defines regular dealer, and states that, "purchasing and selling property through a regulated exchange or off-exchange market (for example, engaging in futures transactions) is not actively engaging as a merchant" for purposes of these rules. This provision was intended to mean that such purchasing and selling activity alone, in the absence of other activities, will not qualify a controlled foreign corporation as a regular dealer within the meaning of paragraph (a)(4)(iii). Because commenters indicated that this reference to purchasing and selling through a regular exchange or off-exchange market was confusing, this provision was removed. Further, the definition of regular dealer was amended. Section 1.954–2(a)(4)(iv) provides that a controlled foreign corporation will be a regular dealer if it regularly and actively offers to, and in fact does, engage in certain specified activities with customers who are not related persons (as defined in section 954(d)(3)) with respect to the CFC. Examples were added to clarify that a controlled foreign corporation that qualifies as a dealer under § 1.954–2(a)(4)(iv) will not be disqualified from being treated as a regular dealer because it also engages in transactions with related persons.

The temporary regulations define *dealer property* as property held by a controlled foreign corporation that is a regular dealer in property of such kind in its capacity as a dealer. The temporary regulations also state that property held for investment or speculation is not dealer property. A commenter suggested that property should be considered dealer property within the meaning of § 1.954–2T(a)(4)(iv) if the controlled foreign corporation holding the property is a regular dealer in such property. This comment was rejected because it proposes an unduly expansive definition of dealer property. Paragraph (a)(4), therefore, generally continues to define dealer property in the same manner as the temporary regulations.

The final regulations do clarify, however, that if a controlled foreign corporation qualifies as a regular dealer, all of the property held in a dealer capacity by that corporation is treated as dealer property. Thus, dealer property includes property arising from a transaction entered into with a related person, as long as the controlled foreign corporation is a regular dealer and holds the property [illegible] its [illegible] as a dealer, and not for investment or speculation. The examples [illegible]4–2(a)(4)(vi) illustrate this [illegible] rule has been added for licensed securities dealers under which only securities identified as held for investment under section 475(b) or 1236 will be treated as held for investment or speculation. Also, to conform to amendments to section 954(c)(1)(B) made by the Technical and Miscellaneous Revenue Act of 1988, § 1.954–2(a)(4)(v)(C) provides that a bona fide hedging transaction with respect to dealer property is treated as a transaction in dealer property.

Section 954(c)(2)(B) and § 1.954–2T(b)(2) exclude from foreign personal holding company income export financing interest that is derived in the active conduct of a banking business. A commenter suggested that paragraph (b)(2) should treat a controlled foreign corporation as engaged in the conduct of a banking business even if it transfers the servicing of loans to related or unrelated parties. This comment was rejected because servicing of loans is a fundamental element of banking activity that gives rise to export financing interest for which an exception from foreign personal holding company income is intended.

Section 1.954–2T(b)(2) references the definition of export financing interest contained in section 904(d)(2)(G). Under section 904(d)(2)(G), the property that is financed must be manufactured, produced, grown or extracted in the United States by the taxpayer or a related person. Section 1.954–2(b)(2) clarifies that § 1.927(a)–1T(c)(1) applies for purposes of determining whether property is manufactured, produced, grown or extracted in the United States.

Section 1.954–2T(b)(2) also provides that the term *export financing interest* does not include income from related party factoring that is treated as interest under section 864(d)(1) or (6). The final regulations contain examples that clarify that if amounts are not treated as interest under section 864(d)(1) or (6) because the exception under section 864(d)(7) applies, these amounts may be export financing interest under paragraph (b)(2).

Section 954(c)(3)(A) and § 1.954–2T(b) (3) and (4) provide that certain dividend, interest, rent or royalty income received from related corporate payors is not included in foreign personal holding company income. To reflect amendments to section 954(c)(3)(A) by the Revenue Reconciliation Act of 1989, the final regulations provide that if a partnership with one or more corporate partners makes a payment of interest, rent or royalties, the interest, rent or royalty payment will be treated as paid by a corporate partner to the extent the payment gives rise to a partnership item of deduction that is allocable to the corporate partner or to the extent that a partnership item reasonably related to the payment would be allocated to the corporate partner under an existing allocation under the partnership agreement. To the extent the payment is treated as made by the corporate partner, it will be excluded from the foreign personal holding company income of the recipient if the corporate partner otherwise satisfies the conditions of section 954(c)(3)(A).

Under § 1.954–2T(b)(3)(ii), interest may not be excluded from foreign personal holding company income of the recipient to the extent the deduction for interest is allocated to the payor's subpart F income. To clarify how this rule is to be applied when a controlled foreign corporation is both the recipient and payor of interest, § 1.954–2(b)(4)(ii)(B)(*2*) was added, which parallels the rule contained in § 1.904–5(k)(2).

Section 1.954–2T(b)(3) provides that, to exclude dividends and interest received from related corporate payors from foreign personal holding company income, a substantial part of the payor's assets must be used in a trade or business in the payor's country of incorporation. Section 1.954–2T(b)(3)(iv) provides that a substantial part of the payor's assets will be considered to be used in a trade or business in the payor's country of incorporation if, for each quarter of the taxable year, the average value of its assets which are so used is over 50 percent of the average value of all of its assets (determined as of the beginning and end of the quarter). To simplify the application of this rule, § 1.954–2(b)(4)(iv) provides that the average value of assets is to be determined on a yearly rather than a quarterly basis by averaging the values of assets as of the close of each quarter.

Section 1.954–2T(b)(3)(vi)(A) provides that for purposes of the substantial assets test, tangible property (other than inventory) is generally considered located where it is physically located. Paragraph (b)(3)(vi)(B) contains an exception for property temporarily located elsewhere for inspection or repair. A commenter suggested that, in addition to this exception, the regulations should restore the exception contained in prior regulations that treated purchased property located abroad and intended for prompt shipment to the country of incorporation as property located in the country of incorporation. This comment was rejected because this provision would have been inconsistent with the rule that property purchased for use in a trade or business is not considered used in a trade or business until it is placed in service.

Section 1.954–2T(b)(3)(vii)(A) provides that for purposes of the substantial assets test, the location of intangible property is determined based on the site of the activities conducted by the payor during the taxable year in connection with the use or exploitation of the property. The country in which services are performed is determined under the principles of section 954(e) and § 1.954–4(c). This rule was amended to provide more comprehensive guidance to determine the situs of activities in connection with the use or exploitation of intangible property. Section 1.954–2(b)(4)(vii)(B) provides that the country in which the activities connected to the use or exploitation of property are conducted is the country in which the expenses associated with these activities are incurred by the payor or its agent or an independent contractor.

Section 1.954–2T(b)(3)(vii)(A) provides that the intangible property is considered located in the payor's country of incorporation during each quarter of the taxable year if the activities connected with its use or exploitation are conducted in its country of incorporation during the entire taxable year. A commenter argued that this test is inconsistent with the quarterly determination required by the substantial assets test of § 1.954–2T(b)(3)(iv). Changes were made to the location of property rules (§ 1.954–2(b)(4)(vi) through (ix)) so that relevant determinations are made for each quarter separately.

The final regulations continue to reserve on the provision of special rules regarding the location of assets of banks and insurance companies for purposes of the same-country exception. Comments are invited regarding the need for special guidance on this issue.

Several comments questioned the application of the rules of § 1.954–2T(b)(6), pursuant to which interest income of a controlled foreign corporation that is described in section 103 is included in foreign personal holding company income but is characterized as tax-exempt interest when included in the gross income of the United States shareholders. The purpose of this rule was to prevent a person from avoiding the consequences of the alternative minimum tax provisions by investing in tax-exempt obligations described in section 103 through a controlled foreign corporation.

The final regulations reserve on the treatment of tax-exempt interest. The administrative complexity of applying the rule described in the temporary regulations, and the potential for double taxation that it creates, argue against its continued application. Proposed regulations, published elsewhere in this issue of the **Federal Register**, will provide rules regarding the treatment of tax-exempt interest. In the interim, the rules of the temporary regulations continue to apply.

Section 1.954–2T(b)(5) provides that the determination whether rents and royalties are derived from the active conduct of a trade or business is made under the facts and circumstances of each case, and refers to paragraphs (c) and (d) for the application of its provisions. Commenters have asked whether only the facts and circumstances described in paragraphs (c) and (d) may be considered. The final regulations are clarified to reflect that whether rents or royalties are derived in the active conduct of a trade or business is determined solely under the provisions of paragraphs (c) and (d).

Section 1.954–2T(c)(2)(iii) defines *active leasing expenses* for purposes of determining whether rental income is derived in the active conduct of a trade or business. A commenter suggested that paragraph (c)(2)(iii) be amended to state that if a corporation sells property of the same type as the property that is leased, the corporation's expenses that are of the type described in that paragraph may be pro-rated on any reasonable basis between the leasing and the sales function. It was determined that the change requested by this commenter was unnecessary because paragraph (c)(2)(iii) already defines active leasing expenses as deductions properly allocable to rental income.

A commenter suggested that an example be added to § 1.954–2T(c) to illustrate that expenses such as payments to third parties for insurance, utilities and repairs are considered active leasing expenses and not amounts paid to agents or independent contractors. The regulations were amended in response to this comment. Section 1.954–2(c)(2)(iii)(D) provides that the term *active leasing expenses* does not include payments to agents or independent contractors other than payments for insurance, utilities and other expenses for like services or capitalized property. A similar change was made to the definition of the term *adjusted leasing profit*.

Section 954(c)(1)(B) and § 1.954–2T(e) include in foreign personal holding company income the excess of gains over losses from certain property transactions. Section 1.954–2T(e)(1)(i) provides that gain or loss that is treated as capital gain or loss under section 988(a)(1)(B) is not foreign currency gain or loss but rather gain or loss from a property transaction under paragraph (e). A commenter contended that gain or loss from transactions described in section 988(a)(1)(B) should be characterized as gain or loss described in section 954(c)(1)(C) and § 1.954–2T(f) rather than in section 954(c)(1)(B) and paragraph (e). This comment was rejected, because the capital transactions described in section 988(a)(1)(B) are more appropriately subject to the provisions of section 954(c)(1)(B) and paragraph (e). This provision is now contained in § 1.954–2(g)(5).

A commenter asked that gain from a disposition of stock of a subsidiary be excluded from foreign personal holding company income to the extent that gain from the subsidiary's disposition of its assets would be so excluded. There is no statutory authority for the position recommended by the commenter, however. In addition, the look-through treatment proposed by the commenter is inconsistent with the treatment prescribed for dispositions of interests in a partnership or trust under section 954(c)(1)(B)(ii). For these reasons, the comment was rejected.

Pursuant to § 1.954–2T(e)(3)(vi), gain from a disposition of non-depreciable intangible property or goodwill is characterized as foreign personal holding company income unless the intangible property is disposed of in connection with a disposition of the entire trade or business of the controlled foreign corporation. Commenters have argued that the gain should be excluded from foreign personal holding company income if such property is used in the trade or business of the controlled foreign corporation, without regard to whether an entire trade or business of the controlled foreign corporation is sold.

The regulations were modified in response to this comment. Section 1.952–2(e)(3)(iv) excludes from foreign personal holding company income any gain or loss of a controlled foreign corporation from a disposition of intangible property, goodwill or going concern value to the extent used or held for use in the trade or business of the controlled foreign corporation.

Section 1.954–2T(e)(4) provides that gain or loss from the sale, exchange or retirement of a debt instrument is included in the computation of foreign personal holding company income under paragraph (e) with certain exceptions. However, a loss on a debt instrument taken in consideration for the sale or exchange of property is excluded from foreign personal holding company income if the gain or loss from that underlying sale or exchange is not includible in foreign base company income. This rule was eliminated from the final regulations because it was inconsistent to prevent a controlled foreign corporation from using these losses to offset subpart F income when gain from such debt instruments was not excepted from the general inclusion rule.

Section 1.954–2T(e)(5) provides that rights to acquire property, other than certain property that is dealer property or inventory property, are characterized as property that does not give rise to income for purposes of section 954(c)(1)(B). One commenter has suggested that such rights should not be characterized as property that does not give rise to income. This comment was rejected because any gain that may arise upon a disposition of an option, warrant, or other right to acquire property, other than gain from a disposition of inventory or dealer property, is income of the type intended to be characterized as foreign personal holding company income for purposes of section 954(c)(1)(B). The provisions of § 1.954–2T(e)(5) are now incorporated into the definition of property that does not give rise to income under § 1.954–2(e)(3). However, the final regulations clarify that notional principal contracts are excluded from the definition of property that does not give rise to income. (But see § 1.954–2 (f), (g) and (h).)

Section 954(c)(1)(C) and § 1.954–2T(f) provide rules for including the excess of gains over losses from commodities transactions in foreign personal holding company income. Several commenters argued that § 1.954–2T(f)(2)(i) defines *commodity* too broadly, and that, like sections 553 and 864, the regulations should apply only to commodities that are actively traded on a regulated exchange. This comment was rejected because the statute and its legislative history make clear that section 954(c)(1)(C) is intended to apply broadly to any commodity of a kind that is actively traded. Thus, there is no reason to distinguish income from a disposition of a commodity actively traded on a regulated exchange from income from a disposition of a commodity of a kind that is otherwise actively traded.

Although § 1.954–2(f)(2)(i) no longer explicitly provides that nonfunctional currency is a commodity, nonfunctional currency continues to fall within the general definition of *commodity*. Consequently, foreign currency is still treated as a commodity if the currency is actively traded or if contractual interests in the currency are actively traded. Under the ordering rules of paragraph (a)(2), however, paragraph (g) (foreign currency transactions) continues to apply before paragraph (f). Thus, unless an election is made under section 988(c)(1)(D)(ii), a currency futures contract is treated as a commodities transaction, while a currency forward contract is generally treated as a foreign currency transaction.

Section 1.954–2T(f)(1) excludes gains and losses from qualified active sales and qualified hedging transactions from the computation of foreign personal holding company income under paragraph (f). In defining *qualified active sale*, paragraph (f)(3) requires substantially all of the controlled foreign corporation's business to be as an active producer, processor, merchant or handler of commodities of like kind. Commenters argued that by using the phrase "of like kind," § 1.954–2T(f)(3) defines *qualified active sales* too narrowly. The "of like kind" language was not intended to require that all of the commodities be of one kind, but rather that the controlled foreign corporation must be an active producer, etc., with respect to each kind of commodity. To avoid confusion, the "of like kind" language has been eliminated from the definition of the term *qualified active sale*.

Section 1.954–2T(f)(3)(ii) defines the term *sale of commodities*. Commenters questioned the requirement, incorporated in the definition of this term, that the corporation hold the commodity in physical form. This comment was accepted. The final regulations no longer require the controlled foreign corporation to hold the commodity in physical form. Section 1.954–2(f)(2)(iii)(B) requires only that the controlled foreign corporation hold the commodity directly and not through an independent contractor. The retention of this requirement is consistent with the legislative history of section 954(c)(1)(C), which makes clear that the exclusion from foreign personal holding company income was intended to apply only with respect to commodities for which controlled foreign corporations are active producers, processors, handlers or merchants. Section 1.954–2(f)(2)(iii)(D) provides that activities of employees of entities related to the controlled foreign corporation may be treated as activities directly engaged in by the controlled foreign corporation if the employees are paid and supervised by the controlled foreign corporation.

Section 1.954–2(f)(2)(iii)(B) also amends the definition of the term *active conduct of a commodities business* by clarifying that the requirements specified in that paragraph must be satisfied with respect to each commodity and that property may be held either as dealer property or as inventory or similar property.

Section 954(c)(1)(C)(ii) and § 1.954–2T(f) (1) and (3) exclude income attributable to commodities transactions from foreign personal holding company income if substantially all of the business of a controlled foreign corporation is as an active producer, processor, merchant or handler of commodities. Section 1.954–2T(f)(3)(iv) provides that the controlled foreign corporation will satisfy the substantially all requirement if 85 percent of its taxable income for the taxable year is attributable to qualified active sales and qualified hedging transactions. Several commenters argued that this test could fail to reflect the nature of the controlled foreign corporation's business accurately in some years because of the volatility of certain commodities markets.

To accommodate this concern, § 1.954–2(f)(2)(iii)(C) modifies the definition of the term *substantially all* by applying the 85 percent test to gross receipts rather than taxable income. To prevent manipulation of this modified test, a provision was added under which the District Director may disregard any sale or hedging transaction that has as a principal purpose manipulation of the 85 percent test.

Section 1.954–2T(f)(4) defines the term *qualified hedging transaction* as a bona fide hedging transaction that is entered into primarily to reduce the risk of price change with respect to commodities sold or to be sold in qualified active sales. A commenter argued that a bona fide hedging transaction should not be required to relate to a qualified active sale to be treated as a qualified hedging transaction. This comment was rejected because this provision is based on the statutory requirement that qualified hedging transactions must arise out of the business of the controlled foreign corporation as an active producer, processor, merchant or handler of commodities. Thus, the rule of the temporary regulations is retained.

Section 954(c)(1)(D) and § 1.954–2T(g) include in foreign personal holding company income the net foreign currency gains attributable to section 988 transactions. The rules in § 1.954–2T(g)(2)(i) governing the treatment of gain or loss attributable to foreign currency transactions in hyperinflationary currencies have been removed. Section 1.954–2(g)(5)(iii) provides that the applicable rules of section 985 will apply to such transactions.

Section 1.954–2T(g)(2)(ii) excludes from foreign personal holding company income gain or loss from qualified business transactions that are separately identified, and gain or loss from qualified hedging transactions that are identified with, or traced to, a qualified business transaction. Many commenters argued that these rules are too cumbersome to apply. They contended that a controlled foreign corporation that has a large number of qualified business transactions may not hedge such transactions individually, and that it is difficult or impossible in such cases to relate a hedge to one or even several qualified business transactions. The commenters also argued that the alternative election to treat all currency gain (or loss) as foreign personal holding company income (or loss allocable to foreign personal holding company income) does not provide adequate relief for controlled foreign corporations whose hedging activities relate to qualified business transactions on a net basis but give rise to foreign currency gain that is treated as foreign personal holding company income.

The regulations are modified in response to those comments. Section 1.954–2(g)(2)(ii) excludes from foreign personal holding company income foreign currency gain or loss directly related to the business needs of the controlled foreign corporation. Foreign currency gain or loss is directly related to the business needs of the corporation, first, if it can be clearly determined that it arises from a transaction entered into or property used in the normal course of the corporation's trade or business and the transaction or property does not itself give rise to subpart F income (other than foreign currency gain or loss), or, second, if it arises from a bona fide hedging transaction with respect to such a transaction or property. To exclude gain or loss from a hedging transaction from foreign personal holding company income under this rule, corporations need not trace a hedging transaction to a specific transaction or property if all (or all but a de minimis amount) of the aggregate risks being hedged are within the business needs exception and the hedging transaction otherwise satisfies the requirements of section 1221, as modified for this purpose.

Section 1.954–2(g)(2)(ii)(C) provides a specific dealer exception under which transactions described in section 988(c)(1)(B)(iii) and (C) that are entered into by a regular dealer, in its capacity as a dealer, are treated as directly related to its business needs for purposes of the exclusion under § 1.954–2(g)(2)(ii). Because a corporation's borrowings support all of its activities, paragraph (g)(2)(iii) provides that foreign currency gain or loss attributable to an interest-bearing liability that is not covered by paragraph (g)(5)(iv) is characterized as subpart F income and non-subpart F income on the same basis as interest expense is allocated and apportioned. Thus, for example, exchange gain or loss from an unhedged interest-bearing liability may fall under this rule.

Section 1.954–2T(g)(3) provides that a transaction will not be treated as a qualified business transaction if the foreign currency gain or loss from the transaction is attributable to property or an activity of a kind that gives rise to subpart F income. Commenters have argued that this requirement is too restrictive because it may cause the gain or loss from the underlying transaction, and the foreign currency gain or loss attributable to the transaction, to be in

different separate categories for foreign tax credit purposes.

In response to this comment, a new election was added to paragraph (g). Under § 1.954–2(g)(3), the controlling United States shareholders may elect to have the controlled foreign corporation include foreign currency gain or loss that would otherwise be included in foreign personal holding company income under paragraph (g) in the category of subpart F income to which such gain or loss relates. This election works in conjunction with the general rules of paragraph (g)(2). Thus, for example, this election may apply to currency gain or loss that would otherwise be treated as foreign personal holding company income under paragraph (g) even if other currency gain or loss is excluded under the business needs exception of paragraph (g)(2)(ii).

As described above, the temporary regulations permit taxpayers to elect to treat all foreign currency gain or loss as foreign personal holding company income. The final regulations retain this election, with modifications. Under § 1.954–2(g)(4), the controlling United States shareholders of the controlled foreign corporation may elect to include in the computation of foreign personal holding company income net foreign currency gains or losses attributable to any section 988 transaction and any section 1256 contract that would be a section 988 transaction but for section 988(c)(1)(D). Shareholders are not permitted to make separate elections for section 1256 contracts and section 988 transactions. An election under paragraph (g)(4) supersedes an election under paragraph (g)(3).

Section 1.954–2(g)(5)(iv) reserves on the treatment of gain or loss allocated under § 1.861–9. It is anticipated that when § 1.861–9 is finalized, a provision will be added to this paragraph to indicate that gain or loss that is allocated or apportioned under section 861 in the same manner as interest expense is not foreign currency gain or loss under paragraph (g).

Section 954(c)(1)(E) and § 1.954–2T(h) include income equivalent to interest in foreign personal holding company income. A commenter argued that the term *income equivalent to interest* might be read to include income from a wide range of interest rate sensitive transactions entered into by a securities dealer or commodities producer, processor, merchant or handler in the ordinary course of its business. The commenter suggested that the regulations should be modified to confirm that such income is not income equivalent to interest.

The final regulations do not contain a general dealer exception that applies to all income equivalent to interest because income equivalent to interest is generally treated like interest, for which no general dealer exception is provided. However, consistent with Notice 89–90 (1989–2 C.B. 407), § 1.954–2(h)(3)(ii) provides a specific dealer exception for income from notional principal contracts.

Section 1.954–2T(h)(1) provides that income equivalent to interest does not include income attributable to notional principal contracts except to the extent that such contracts are part of an integrated transaction that gives rise to income equivalent to interest. Notice 89–90 stated, however, that final regulations would provide that income equivalent to interest would include income from notional principal contracts regardless of whether the notional principal contract is integrated with an investment, because notional principal contracts generally affect the all-in cost of interest-bearing liabilities or the return on interest-bearing assets. Accordingly, § 1.954–2(h)(3) provides that income from notional principal contracts based solely on interest rates or interest rate indices is income equivalent to interest, and paragraph (h)(1)(ii) provides that income from a notional principal contract covered by § 1.861–9T is not income equivalent to interest. Paragraph (f) continues to apply to notional principal contracts based on commodities (or a commodities index), and paragraph (g) continues to apply to notional principal contracts covered by section 988.

Section 1.954–2T(h)(3) treats factoring income as income equivalent to interest, with certain exceptions. Commenters have argued that income realized by a credit card company from factoring its receivables (which is attributable to the discount at which it acquires the receivables from the business establishments honoring its credit card) does not represent an interest equivalent amount, but instead represents other types of income, such as compensation for services.

This comment was rejected. It is true that the income attributable to the discount at which a controlled foreign corporation acquires a receivable reflects not only the time value of money, but also certain other elements (for example, collection risk and cost). However, the factoring income derived by the controlled foreign corporation is analogous to interest income derived from a loan made by a bank, which reflects not only the time value of money, but also the other elements of the discount income received in the factoring transaction described above. The Tax Reform Act of 1986 repealed the exclusion from foreign personal holding company income of such interest income derived by a bank. The repeal of this provision indicates that interest income is not intended to be excluded from foreign personal holding company income merely because it may reflect more than the time value of money. Income equivalent to interest should not be treated differently.

Some of the rules described in the final regulations are inconsistent with provisions of §§ 1.954–3 through 1.954–8, as well as the regulations under other provisions of subpart F. In such cases, these final regulations are intended to apply instead of the regulations under other provisions of section 954 and of subpart F generally. Section 1.952–3 is removed because the rules of that section are replaced by § 1.954–1. Other conforming changes are being considered in a separate regulations project.

Many nonsubstantive structural and editorial changes were made to these final regulations for clarity.

Drafting Information

The principal authors of these regulations are Valerie Mark and, with respect to financial products, Elissa Shendalman of the Office of the Associate Chief Counsel (International), IRS. However, personnel from other offices of the IRS and Treasury Department participated in developing the regulations.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1, 4 and 602 are amended to read as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority for part 1 is amended by removing the authority citation for "Section 1.954–0T, 1.954–1T, 1.954–2T and 1.957–1T" and adding the following citations in numerical order to read as follows:

Authority: 26 U.S.C. 7805. * * *

Section 1.954–0 also issued under 26 U.S.C. 954 (b) and (c).

Section 1.954–1 also issued under 26 U.S.C. 954 (b) and (c).

Section 1.954–2 also issued under 26 U.S.C. 954 (b) and (c).

* * * * *

Section 1.957–1 also issued under 26 U.S.C. 957. * * *

§ 1.952–3 [Removed]

Par. 2. Section 1.952–3 is removed.

Par. 3. Sections 1.954–0, 1.954–1 and 1.954–2 are added to read as follows:

§ 1.954–0 Introduction.

(a) *Effective dates*—(1) *Final regulations*—(i) *In general.* Except as otherwise specifically provided, the provisions of §§ 1.954–1 and 1.954–2 apply to taxable years of a controlled foreign corporation beginning after November 6, 1995. If any of the rules described in §§ 1.954–1 and 1.954–2 are inconsistent with provisions of other regulations under subpart F, these final regulations are intended to apply instead of such other regulations.

(ii) *Election to apply final regulations retroactively*—(A) *Scope of election.* An election may be made to apply the final regulations retroactively with respect to any taxable year of the controlled foreign corporation beginning on or after January 1, 1987. If such an election is made, these final regulations must be applied in their entirety for such taxable year and all subsequent taxable years. All references to section 11 in the final regulations shall be deemed to include section 15, where applicable.

(B) *Manner of making election.* An election under this paragraph (a)(1)(ii) is binding on all United States shareholders of the controlled foreign corporation and must be made—

(*1*) By the controlling United States shareholders, as defined in § 1.964–1(c)(5), by attaching a statement to such effect with their original or amended income tax returns for the taxable year of such United States shareholders in which or with which the taxable year of the CFC ends, and including any additional information required by applicable administrative pronouncements, or

(*2*) In such other manner as may be prescribed in applicable administrative pronouncements.

(C) *Time for making election.* An election may be made under this paragraph (a)(1)(ii) with respect to a taxable year of the controlled foreign corporation beginning on or after January 1, 1987 only if the time for filing a return or claim for refund has not expired for the taxable year of any United States shareholder of the controlled foreign corporation in which or with which such taxable year of the controlled foreign corporation ends.

(D) *Revocation of election.* An election made under this paragraph (a)(1)(ii) may not be revoked.

(2) *Temporary regulations.* The provisions of §§ 4.954–1 and 4.954–2 of this chapter apply to taxable years of a controlled foreign corporation beginning after December 31, 1986 and on or before November 6, 1995. However, the provisions of § 4.954–2(b)(6) of this chapter continue to apply. For transactions entered into on or before October 10, 1995, taxpayers may rely on Notice 89–90, 1989–2 C.B. 407, in applying the temporary regulations.

(3) *§§ 1.954A–1 and 1.954A–2.* The provisions of §§ 1.954A–1 and 1.954A–2 (as contained in 26 CFR part 1 edition revised April 1, 1995) apply to taxable years of a controlled foreign corporation beginning before January 1, 1987. All references therein to sections of the Code are to the Internal Revenue Code of 1954 prior to the amendments made by the Tax Reform Act of 1986.

(b) *Outline of regulation provisions for sections 954(b)(3), 954(b)(4), 954(b)(5) and 954(c) of the Internal Revenue Code.*

§ 1.954–0 Introduction.
(a) Effective dates.
(1) Final regulations.
(i) In general.
(ii) Election to apply final regulations retroactively.
(A) Scope of election.
(B) Manner of making election.
(C) Time for making election.
(D) Revocation of election.
(2) Temporary regulations.
(3) §§ 1.954A–1 and 1.954A–2.
(b) Outline of regulation provisions for sections 954(b)(3), 954(b)(4), 954(b)(5) and 954(c) of the Internal Revenue Code.

§ 1.954–1 Foreign base company income.
(a) In general.
(1) Purpose and scope.
(2) Gross foreign base company income.
(3) Adjusted gross foreign base company income.
(4) Net foreign base company income.
(5) Adjusted net foreign base company income.
(6) Insurance income.
(7) Additional items of adjusted net foreign base company income or adjusted net insurance income by reason of section 952(c).
(b) Computation of adjusted gross foreign base company income and adjusted gross insurance income.
(1) De minimis and full inclusion tests.
(i) De minimis test.
(A) In general.
(B) Currency translation.
(C) Coordination with sections 864(d) and 881(c).
(ii) Seventy percent full inclusion test.
(2) Character of gross income included in adjusted gross foreign base company income.
(3) Coordination with section 952(c).
(4) Anti-abuse rule.
(i) In general.
(ii) Presumption.
(iii) Related persons.
(iv) Example.
(c) Computation of net foreign base company income.
(1) General rule.
(i) Deductions against gross foreign base company income.
(ii) Losses reduce subpart F income by operation of earnings and profits limitation.
(iii) Items of income.
(A) Income other than passive foreign personal holding company income.
(B) Passive foreign personal holding company income.
(2) Computation of net foreign base company income derived from same country insurance income.
(d) Computation of adjusted net foreign base company income or adjusted net insurance income.
(1) Application of high tax exception.
(2) Effective rate at which taxes are imposed.
(3) Taxes paid or accrued with respect to an item of income.
(i) Income other than passive foreign personal holding company income.
(ii) Passive foreign personal holding company income.
(4) Special rules.
(i) Consistency rule.
(ii) Coordination with earnings and profits limitation.
(iii) Example.
(5) Procedure.
(6) Coordination of full inclusion and high tax exception rules.
(7) Examples.
(e) Character of income.
(1) Substance of the transaction.
(2) Separable character.
(3) Predominant character.
(4) Coordination of categories of gross foreign base company income or gross insurance income.
(i) In general.
(ii) Income excluded from other categories of gross foreign base company income.
(f) Definition of related person.
(1) Persons related to controlled foreign corporation.
(i) Individuals.
(ii) Other persons.
(2) Control.
(i) Corporations.
(ii) Partnerships.
(iii) Trusts and estates.
(iv) Direct or indirect ownership.

§ 1.954–2 Foreign personal holding company income.
(a) Computation of foreign personal holding company income.
(1) Categories of foreign personal holding company income.
(2) Coordination of overlapping categories under foreign personal holding company provisions.
(i) In general.
(ii) Priority of categories.
(3) Changes in the use or purpose for which property is held.
(i) In general.
(ii) Special rules.

(A) Anti-abuse rule.
(B) Hedging transactions.
(iii) Example.
(4) Definitions and special rules.
(i) Interest.
(ii) Bona fide hedging transaction.
(A) Definition.
(B) Identification.
(C) Effect of identification and non-identification.
(*1*) Transactions identified.
(*2*) Inadvertent identification.
(*3*) Transactions not identified.
(*4*) Inadvertent error.
(*5*) Anti-abuse rule.
(iii) Inventory and similar property.
(A) Definition.
(B) Hedging transactions.
(iv) Regular dealer.
(v) Dealer property.
(A) Definition.
(B) Securities dealers.
(C) Hedging transactions.
(vi) Examples.
(vii) Debt instrument.
(b) Dividends, interest, rents, royalties and annuities.
(1) In general.
(2) Exclusion of certain export financing interest.
(i) In general.
(ii) Exceptions.
(iii) Conduct of a banking business.
(iv) Examples.
(3) Treatment of tax-exempt interest. [RESERVED.]
(4) Exclusion of dividends or interest from related persons.
(i) In general.
(A) Corporate payor.
(B) Payment by a partnership.
(ii) Exceptions.
(A) Dividends.
(B) Interest paid out of adjusted foreign base company income or insurance income.
(*1*) In general.
(*2*) Rule for corporations that are both recipients and payors of interest.
(C) Coordination with sections 864(d) and 881(c).
(iii) Trade or business requirement.
(iv) Substantial assets test.
(v) Valuation of assets.
(vi) Location of tangible property.
(A) In general.
(B) Exception.
(vii) Location of intangible property.
(A) In general.
(B) Exception for property located in part in the payor's country of incorporation.
(viii) Location of inventory and dealer property.
(A) In general.
(B) Inventory and dealer property located in part in the payor's country of incorporation.
(ix) Location of debt instruments.
(x) Treatment of certain stock interests.
(xi) Treatment of banks and insurance companies. [Reserved]
(5) Exclusion of rents and royalties derived from related persons.
(i) In general.
(A) Corporate payor.
(B) Payment by a partnership.
(ii) Exceptions.
(A) Rents or royalties paid out of adjusted foreign base company income or insurance income.
(B) Property used in part in the controlled foreign corporation's country of incorporation.
(6) Exclusion of rents and royalties derived in the active conduct of a trade or business.
(c) Excluded rents.
(1) Active conduct of a trade or business.
(2) Special rules.
(i) Adding substantial value.
(ii) Substantiality of foreign organization.
(iii) Active leasing expenses.
(iv) Adjusted leasing profit.
(3) Examples.
(d) Excluded royalties.
(1) Active conduct of a trade or business.
(2) Special rules.
(i) Adding substantial value.
(ii) Substantiality of foreign organization.
(iii) Active licensing expenses.
(iv) Adjusted licensing profit.
(3) Examples.
(e) Certain property transactions.
(1) In general.
(i) Inclusions.
(ii) Exceptions.
(iii) Treatment of losses.
(iv) Dual character property.
(2) Property that gives rise to certain income.
(i) In general.
(ii) Gain or loss from the disposition of a debt instrument.
(3) Property that does not give rise to income.
(f) Commodities transactions.
(1) In general.
(i) Inclusion in foreign personal holding company income.
(ii) Exception.
(iii) Treatment of losses.
(2) Definitions.
(i) Commodity.
(ii) Commodities transaction.
(iii) Qualified active sale.
(A) In general.
(B) Active conduct of a commodities business.
(C) Substantially all.
(D) Activities of employees of a related entity.
(E) Financial activities.
(iv) Qualified hedging transaction.
(A) In general.
(B) Exception.
(g) Foreign currency gain or loss.
(1) Scope and purpose.
(2) In general.
(i) Inclusion.
(ii) Exclusion for business needs.
(A) General rule.
(B) Business needs.
(C) Regular dealers.
(D) Example.
(iii) Special rule for foreign currency gain or loss from an interest-bearing liability.
(3) Election to characterize foreign currency gain or loss that arises from a specific category of subpart F income as gain or loss in that category.
(i) In general.
(ii) Time and manner of election.
(iii) Revocation of election.
(iv) Example.
(4) Election to treat all foreign currency gains or losses as foreign personal holding company income.
(i) In general.
(ii) Time and manner of election.
(iii) Revocation of election.
(5) Gains and losses not subject to this paragraph.
(i) Capital gains and losses.
(ii) Income not subject to section 988.
(iii) Qualified business units using the dollar approximate separate transactions method.
(iv) Gain or loss allocated under § 1.861–9. [Reserved]
(h) Income equivalent to interest.
(1) In general.
(i) Inclusion in foreign personal holding company income.
(ii) Exceptions.
(A) Liability hedging transactions.
(B) Interest.
(2) Definition of income equivalent to interest.
(i) In general.
(ii) Income from the sale of property.
(3) Notional principal contracts.
(i) In general.
(ii) Regular dealers.
(4) Income equivalent to interest from factoring.
(i) General rule.
(ii) Exceptions.
(iii) Factored receivable.
(iv) Examples.
(5) Receivables arising from performance of services.
(6) Examples.

§ 1.954–1 Foreign base company income.

(a) *In general*—(1) *Purpose and scope.* Section 954 and §§ 1.954–1 and 1.954–2 provide rules for computing the foreign base company income of a controlled foreign corporation. Foreign base company income is included in the subpart F income of a controlled foreign corporation under the rules of section 952. Subpart F income is included in the gross income of a United States shareholder of a controlled foreign corporation under the rules of section 951 and thus is subject to current taxation under section 1, 11 or 55 of the Internal Revenue Code. The determination of whether a foreign corporation is a controlled foreign corporation, the subpart F income of which is included currently in the gross income of its United States shareholders, is made under the rules of section 957.

(2) *Gross foreign base company income.* The gross foreign base company income of a controlled foreign corporation consists of the following categories of gross income (determined after the application of section 952(b))—

(i) Foreign personal holding company income, as defined in section 954(c);

(ii) Foreign base company sales income, as defined in section 954(d);

(iii) Foreign base company services income, as defined in section 954(e);

(iv) Foreign base company shipping income, as defined in section 954(f); and

(v) Foreign base company oil related income, as defined in section 954(g).

(3) *Adjusted gross foreign base company income.* The term *adjusted gross foreign base company income* means the gross foreign base company income of a controlled foreign corporation as adjusted by the de minimis and full inclusion rules of paragraph (b) of this section.

(4) *Net foreign base company income.* The term *net foreign base company income* means the adjusted gross foreign base company income of a controlled foreign corporation reduced so as to take account of deductions (including taxes) properly allocable or apportionable to such income under the rules of section 954(b)(5) and paragraph (c) of this section.

(5) *Adjusted net foreign base company income.* The term *adjusted net foreign base company income* means the net foreign base company income of a controlled foreign corporation reduced, first, by any items of net foreign base company income excluded from subpart F income pursuant to section 952(c) and, second, by any items excluded from subpart F income pursuant to the high tax exception of section 954(b). See paragraph (d)(4)(ii) of this section. The term *foreign base company income* as used in the Internal Revenue Code and elsewhere in the Income Tax Regulations means adjusted net foreign base company income, unless otherwise provided.

(6) *Insurance income.* The term *gross insurance income* includes all gross income taken into account in determining insurance income under section 953. The term *adjusted gross insurance income* means gross insurance income as adjusted by the de minimis and full inclusion rules of paragraph (b) of this section. The term *net insurance income* means adjusted gross insurance income reduced under section 953 so as to take into account deductions (including taxes) properly allocable or apportionable to such income. The term *adjusted net insurance income* means net insurance income reduced by any items of net insurance income that are excluded from subpart F income pursuant to section 952(b) or pursuant to the high tax exception of section 954(b). The term *insurance income* as used in subpart F of the Internal Revenue Code and in the regulations under that subpart means adjusted net insurance income, unless otherwise provided.

(7) *Additional items of adjusted net foreign base company income or adjusted net insurance income by reason of section 952(c).* Earnings and profits of the controlled foreign corporation that are recharacterized as foreign base company income or insurance income under section 952(c) are items of adjusted net foreign base company income or adjusted net insurance income, respectively. Amounts subject to recharacterization under section 952(c) are determined after adjusted net foreign base company income and adjusted net insurance income are otherwise determined under subpart F and are not again subject to any exceptions or special rules that would affect the amount of subpart F income. Thus, for example, items of gross foreign base company income or gross insurance income that are excluded from adjusted gross foreign base company income or adjusted gross insurance income because the de minimis test is met are subject to recharacterization under section 952(c). Further, the de minimis and full inclusion tests of paragraph (b) of this section, and the high tax exception of paragraph (d) of this section, for example, do not apply to such amounts.

(b) *Computation of adjusted gross foreign base company income and adjusted gross insurance income*—(1) *De minimis and full inclusion tests*—(i) *De minimis test*—(A) *In general.* Except as provided in paragraph (b)(1)(i)(C) of this section, adjusted gross foreign base company income and adjusted gross insurance income are equal to zero if the sum of the gross foreign base company income and the gross insurance income of a controlled foreign corporation is less than the lesser of—

(*1*) 5 percent of gross income; or

(*2*) $1,000,000.

(B) *Currency translation.* Controlled foreign corporations having a functional currency other than the United States dollar shall translate the $1,000,000 threshold using the exchange rate provided under section 989(b)(3) for amounts included in income under section 951(a).

(C) *Coordination with sections 864(d) and 881(c).* Adjusted gross foreign base company income or adjusted gross insurance income of a controlled foreign corporation always includes income from trade or service receivables described in section 864(d) (1) or (6), and portfolio interest described in section 881(c), even if the de minimis test of this paragraph (b)(1)(i) is otherwise satisfied.

(ii) *Seventy percent full inclusion test.* Except as provided in section 953, adjusted gross foreign base company income consists of all gross income of the controlled foreign corporation other than gross insurance income and amounts described in section 952(b), and adjusted gross insurance income consists of all gross insurance income other than amounts described in section 952(b), if the sum of the gross foreign base company income and the gross insurance income for the taxable year exceeds 70 percent of gross income. See paragraph (d)(6) of this section, under which certain items of full inclusion foreign base company income may nevertheless be excluded from subpart F income.

(2) *Character of gross income included in adjusted gross foreign base company income.* The gross income included in the adjusted gross foreign base company income of a controlled foreign corporation generally retains its character as foreign personal holding company income, foreign base company sales income, foreign base company services income, foreign base company shipping income, or foreign base company oil related income. However, gross income included in adjusted gross foreign base company income because the full inclusion test of paragraph (b)(1)(ii) of this section is met is termed *full inclusion foreign base company income,* and constitutes a separate category of adjusted gross foreign base company income for purposes of allocating and apportioning deductions under paragraph (c) of this section.

(3) *Coordination with section 952(c).* Income that is included in subpart F income because the full inclusion test of paragraph (b)(1)(ii) of this section is met does not reduce amounts that, under section 952(c), are subject to recharacterization.

(4) *Anti-abuse rule*—(i) *In general.* For purposes of applying the de minimis test of paragraph (b)(1)(i) of this section, the income of two or more controlled foreign corporations shall be aggregated and treated as the income of a single corporation if a principal purpose for separately organizing, acquiring, or maintaining such multiple corporations is to prevent income from being treated as foreign base company income or insurance income under the de minimis test. A purpose may be a principal purpose even though it is outweighed by other purposes (taken together or separately).

(ii) *Presumption.* Two or more controlled foreign corporations are presumed to have been organized, acquired or maintained to prevent income from being treated as foreign

base company income or insurance income under the de minimis test of paragraph (b)(1)(i) of this section if the corporations are related persons, as defined in paragraph (b)(4)(iii) of this section, and the corporations are described in paragraph (b)(4)(ii)(A), (B), or (C) of this section. This presumption may be rebutted by proof to the contrary.

(A) The activities carried on by the controlled foreign corporations, or the assets used in those activities, are substantially the same activities that were previously carried on, or assets that were previously held, by a single controlled foreign corporation. Further, the United States shareholders of the controlled foreign corporations or related persons (as determined under paragraph (b)(4)(iii) of this section) are substantially the same as the United States shareholders of the one controlled foreign corporation in a prior taxable year. A presumption made in connection with the requirements of this paragraph (b)(4)(ii)(A) may be rebutted by proof that the activities carried on by each controlled foreign corporation would constitute a separate branch under the principles of § 1.367(a)–6T(g)(2) if carried on directly by a United States person.

(B) The controlled foreign corporations carry on a business, financial operation, or venture as partners directly or indirectly in a partnership (as defined in section 7701(a)(2) and § 301.7701–3 of this chapter) that is a related person (as defined in paragraph (b)(4)(iii) of this section) with respect to each such controlled foreign corporation.

(C) The activities carried on by the controlled foreign corporations would constitute a single branch operation under § 1.367(a)–6T(g)(2) if carried on directly by a United States person.

(iii) *Related persons.* For purposes of this paragraph (b), two or more persons are related persons if they are in a relationship described in section 267(b). In determining for purposes of this paragraph (b) whether two or more corporations are members of the same controlled group under section 267(b)(3), a person is considered to own stock owned directly by such person, stock owned with the application of section 1563(e)(1), and stock owned with the application of section 267(c). In determining for purposes of this paragraph (b) whether a corporation is related to a partnership under section 267(b)(10), a person is considered to own the partnership interest owned directly by such person and the partnership interest owned with the application of section 267(e)(3).

(iv) *Example.* The following example illustrates the application of this paragraph (b)(4).

Example. (i)(1) *USP* is the sole United States shareholder of three controlled foreign corporations: *CFC1, CFC2* and *CFC3.* The three controlled foreign corporations all have the same taxable year. The three controlled foreign corporations are partners in *FP,* a foreign entity classified as a partnership under section 7701(a)(2) and § 301.7701–3 of the regulations. For their current taxable years, each of the controlled foreign corporations derives all of its income other than foreign base company income from activities conducted through *FP,* and its foreign base company income from activities conducted both jointly through *FP* and separately without *FP.* Based on the facts in the table below, the foreign base company income derived by each controlled foreign corporation for its current taxable year, including income derived from *FP,* is less than five percent of the gross income of each controlled foreign corporation and is less than $1,000,000:

	CFC1	CFC2	CFC3
Gross income	$4,000,000	$8,000,000	$12,000,000
Five percent of gross income	200,000	400,000	600,000
Foreign base company income	199,000	398,000	597,000

(2) Thus, without the application of the anti-abuse rule of this paragraph (b)(4), each controlled foreign corporation would be treated as having no foreign base company income after the application of the de minimis test of section 954(b)(3)(A) and paragraph (b)(1)(i) of this section.

(ii) However, under these facts, the requirements of paragraph (b)(4)(i) of this section are met unless the presumption of paragraph (b)(4)(ii) of this section is successfully rebutted. The sum of the foreign base company income of the controlled foreign corporations is $1,194,000. Thus, the amount of gross foreign base company income of each controlled foreign corporation will not be reduced by reason of the de minimis rule of section 954(b)(3)(A) and this paragraph (b).

(c) *Computation of net foreign base company income*—(1) *General rule.* The net foreign base company income of a controlled foreign corporation (as defined in paragraph (a)(4) of this section) is computed under the rules of this paragraph (c)(1). The principles of § 1.904–5(k) shall apply where payments are made between controlled foreign corporations that are related persons (within the meaning of section 954(d)(3)). Consistent with these principles, only payments described in § 1.954–2(b)(4)(ii)(B)(*2*) may be offset as provided in § 1.904–5(k)(2).

(i) *Deductions against gross foreign base company income.* The net foreign base company income of a controlled foreign corporation is computed first by taking into account deductions in the following manner:

(A) First, the gross amount of each item of income described in paragraph (c)(1)(iii) of this section is determined.

(B) Second, any expenses definitely related to less than all gross income as a class shall be allocated and apportioned under the principles of sections 861, 864 and 904(d) to the gross income described in paragraph (c)(1)(i)(A) of this section.

(C) Third, foreign personal holding company income that is passive within the meaning of section 904 (determined before the application of the high-taxed income rule of § 1.904–4(c)) is reduced by related person interest expense allocable to passive income under § 1.904–5(c)(2); such interest must be further allocated and apportioned to items described in paragraph (c)(1)(iii)(B) of this section.

(D) Fourth, the amount of each item of income described in paragraph (c)(1)(iii) of this section is reduced by other expenses allocable and apportionable to such income under the principles of sections 861, 864 and 904(d).

(ii) *Losses reduce subpart F income by operation of earnings and profits limitation.* Except as otherwise provided in § 1.954–2(g)(4), if after applying the rules of paragraph (c)(1)(i) of this section, the amount remaining in any category of foreign base company income or foreign personal holding company income is less than zero, the loss in that category may not reduce any other category of foreign base company income or foreign personal holding company income except by operation of the earnings and profits limitation of section 952(c)(1).

(iii) *Items of income*—(A) *Income other than passive foreign personal holding company income.* A single item of income (other than foreign personal holding company income that is passive) is the aggregate amount from all transactions that falls within a single separate category (as defined in § 1.904–5(a)(1)), and either—

(*1*) Falls within a single category of foreign personal holding company income as—

(*i*) Dividends, interest, rents, royalties and annuities;

(*ii*) Gain from certain property transactions;

(*iii*) Gain from commodities transactions;

(*iv*) Foreign currency gain; or

(*v*) Income equivalent to interest; or

(*2*) Falls within a single category of foreign base company income, other than foreign personal holding company income, as—

(*i*) Foreign base company sales income;

(*ii*) Foreign base company services income;

(*iii*) Foreign base company shipping income;

(*iv*) Foreign base company oil related income; or

(*v*) Full inclusion foreign base company income.

(B) *Passive foreign personal holding company income.* A single item of foreign personal holding company income that is passive is an amount of income that falls within a single group of passive income under the grouping rules of § 1.904–4(c) (3), (4) and (5) and a single category of foreign personal holding company income described in paragraphs (c)(1)(iii)(A)(*1*) (*i*) through (*v*).

(2) *Computation of net foreign base company income derived from same country insurance income.* Deductions relating to foreign base company income attributable to the issuing (or reinsuring) of any insurance or annuity contract in connection with risks located in the country under the laws of which the controlled foreign corporation is created or organized shall be allocated and apportioned in accordance with the rules set forth in section 953.

(d) *Computation of adjusted net foreign base company income or adjusted net insurance income*—(1) *Application of high tax exception.* Adjusted net foreign base company income (or adjusted net insurance income) equals the net foreign base company income (or net insurance income) of a controlled foreign corporation, reduced by any net item of such income that qualifies for the high tax exception provided by section 954(b)(4) and this paragraph (d). Any item of income that is foreign base company oil related income, as defined in section 954(g), or portfolio interest, as described in section 881(c), does not qualify for the high tax exception. See paragraph (c)(1)(iii) of this section for the definition of the term *item of income.* For rules concerning the treatment for foreign tax credit purposes of amounts excluded from subpart F under section 954(b)(4), see § 1.904–4(c). A net item of income qualifies for the high tax exception only if—

(i) An election is made under section 954(b)(4) and paragraph (d)(5) of this section to exclude the income from the computation of subpart F income; and

(ii) It is established that the net item of income was subject to foreign income taxes imposed by a foreign country or countries at an effective rate that is greater than 90 percent of the maximum rate of tax specified in section 11 for the taxable year of the controlled foreign corporation.

(2) *Effective rate at which taxes are imposed.* The effective rate with respect to a net item of income shall be determined separately for each controlled foreign corporation in a chain of corporations through which a distribution is made. The effective rate at which taxes are imposed on a net item of income is—

(i) The United States dollar amount of foreign income taxes paid or accrued (or deemed paid or accrued) with respect to the net item of income, determined under paragraph (d)(3) of this section; divided by

(ii) The United States dollar amount of the net item of foreign base company income or insurance income, described in paragraph (c)(1)(iii) of this section, increased by the amount of foreign income taxes referred to in paragraph (d)(2)(i) of this section.

(3) *Taxes paid or accrued with respect to an item of income—(i) Income other than passive foreign personal holding company income.* The amount of foreign income taxes paid or accrued with respect to a net item of income (other than an item of foreign personal holding company income that is passive) for purposes of section 954(b)(4) and this paragraph (d) is the United States dollar amount of foreign income taxes that would be deemed paid under section 960 with respect to that item if that item were included in the gross income of a United States shareholder under section 951(a)(1)(A) (determined, in the case of a United States shareholder that is an individual, as if an election under section 962 has been made, whether or not such election is actually made). For this purpose, in accordance with the regulations under section 960, the amounts that would be deemed paid under section 960 shall be determined separately with respect to each controlled foreign corporation and without regard to the limitation applicable under section 904(a). The amount of foreign income taxes paid or accrued with respect to a net item of income, determined in the manner provided in this paragraph (d), will not be affected by a subsequent reduction in foreign income taxes attributable to a distribution to shareholders of all or part of such income.

(ii) *Passive foreign personal holding company income.* The amount of income taxes paid or accrued with respect to a net item of foreign personal holding company income that is passive for purposes of section 954(b)(4) and this paragraph (d) is the United States dollar amount of foreign income taxes that would be deemed paid under section 960 and that would be taken into account for purposes applying the provisions of § 1.904–4(c) with respect to that net item of income.

(4) *Special rules*—(i) *Consistency rule.* An election to exclude income from the computation of subpart F income for a taxable year must be made consistently with respect to all items of passive foreign personal holding company income eligible to be excluded for the taxable year. Thus, high-taxed passive foreign personal holding company income of a controlled foreign corporation must either be excluded in its entirety, or remain subject to subpart F in its entirety.

(ii) *Coordination with earnings and profits limitation.* If the amount of income included in subpart F income for the taxable year is reduced by the earnings and profits limitation of section 952(c)(1), the amount of income that is a net item of income, within the meaning of paragraph (c)(1)(iii) of this section, is determined after the application of the rules of section 952(c)(1).

(iii) *Example.* The following example illustrates the provisions of paragraph (d)(4)(ii) of this section. All of the taxes referred to in the following example are foreign income taxes. For simplicity, this example assumes that the amount of taxes that are taken into account as a deduction under section 954(b)(5) and the amount of the gross-up required under sections 960 and 78 are equal. Therefore, this example does not separately illustrate the deduction for taxes and gross-up.

Example. During its 1995 taxable year, *CFC*, a controlled foreign corporation, earns $100 of royalty income that is foreign personal holding company income. *CFC* has no expenses associated with this royalty income. *CFC* pays $20 of foreign income taxes with respect to the royalty income. For 1995, *CFC* has current earnings and profits of $50. *CFC's* subpart F income, as determined

prior to the application of this paragraph (d), exceeds its current earnings and profits. Thus, under paragraph (d)(4)(ii) of this section, the amount of *CFC's* only net item of income, the royalty income, will be limited to $50. The remaining $50 will be subject to recharacterization in a subsequent taxable year under section 952(c)(2). Because the amount of foreign income taxes paid with respect to this net item of income is $20, the effective rate of tax on the item, for purposes of this paragraph (d), is 40 percent. Accordingly, an election under paragraph (d)(5) of this section may be made to exclude the item of income from the computation of subpart F income.

(5) *Procedure.* An election made under the procedure provided by this paragraph (d)(5) is binding on all United States shareholders of the controlled foreign corporation and must be made—

(i) By the controlling United States shareholders, as defined in § 1.964–1(c)(5), by attaching a statement to such effect with their original or amended income tax returns, and including any additional information required by applicable administrative pronouncements; or

(ii) In such other manner as may be prescribed in applicable administrative pronouncements.

(6) *Coordination of full inclusion and high tax exception rules.* Notwithstanding paragraph (b)(1)(ii) of this section, full inclusion foreign base company income will be excluded from subpart F income if more than 90 percent of the adjusted gross foreign base company income and adjusted gross insurance company income of a controlled foreign corporation (determined without regard to the full inclusion test of paragraph (b)(1) of this section) is attributable to net amounts excluded from subpart F income pursuant to an election to have the high tax exception described in section 954(b)(4) and this paragraph (d) apply.

(7) *Examples.* (i) The following examples illustrate the rules of this paragraph (d). All of the taxes referred to in the following examples are foreign income taxes. For simplicity, these examples assume that the amount of taxes that are taken into account as a deduction under section 954(b)(5) and the amount of the gross-up required under sections 960 and 78 are equal. Therefore, these examples do not separately illustrate the deduction for taxes and gross-up. Except as otherwise stated, these examples assume there are no earnings, deficits, or foreign income taxes in the post-1986 pools of earnings and profits or foreign income taxes.

Example 1. (i) *Items of income.* During its 1995 taxable year, controlled foreign corporation *CFC* earns from outside its country of operation portfolio dividend income of $100 and interest income, net of taxes, of $100 (consisting of a gross payment of $150 reduced by a third-country withholding tax of $50). For purposes of illustration, assume that *CFC* incurs no expenses. None of the income is taxed in *CFC's* country of operation. The dividend income was not subject to third-country withholding taxes. Pursuant to the operation of section 904, the interest income is high withholding tax interest and the dividend income is passive income. Accordingly, pursuant to paragraph (c)(1)(iii) of this section, *CFC* has two net items of income—

(1) $100 of foreign personal holding company (FPHC)/passive income (the dividends); and

(2) $100 of FPHC/high withholding tax income (the interest).

(ii) *Effective rates of tax.* No foreign tax would be deemed paid under section 960 with respect to the net item of income described in paragraph (i)(1) of this *Example 1.* Therefore, the effective rate of foreign tax is 0, and the item may not be excluded from subpart F under the rules of this paragraph (d). Foreign tax of $50 would be deemed paid under section 960 with respect to the net item of income described in paragraph (i)(2) of this *Example 1.* Therefore, the effective rate of foreign tax is 33 percent ($50 of creditable taxes paid, divided by $150, consisting of the net item of foreign base company income ($100) plus creditable taxes paid thereon ($50)). The highest rate of tax specified in section 11 for the 1995 taxable year is 34 percent. Accordingly, the net item of income described in paragraph (i)(2) of this *Example 1* may be excluded from subpart F income if an election under paragraph (d)(5) of this section is made, since it is subject to foreign tax at an effective rate that is greater than 30.6 percent (90 percent of 34 percent). However, for purposes of section 904(d), it remains high withholding tax interest.

Example 2. (i) The facts are the same as in *Example 1*, except that *CFC's* country of operation imposes a tax of $50 with respect to *CFC's* dividend income (and thus *CFC* earns portfolio dividend income, net of taxes, of only $50). The interest income is still high withholding tax interest. The dividend income is still passive income (without regard to the possible applicability of the high tax exception of section 904(d)(2)). Accordingly, *CFC* has two items of income for purposes of this paragraph (d)—

(1) $50 of FPHC/passive income (net of the $50 foreign tax); and

(2) $100 of FPHC/high withholding tax interest income.

(ii) Each item is taxed at an effective rate greater than 30.6 percent. The net item of income described in paragraph (i)(1) of this *Example 2*: foreign tax ($50) divided by sum ($100) of net item of income ($50) plus creditable tax thereon ($50) equals 50 percent. The net item of income described in paragraph (i)(2) of this *Example 2*: foreign tax ($50) divided by sum ($150) of income item ($100) plus creditable tax thereon ($50) equals 33 percent. Accordingly, an election may be made under paragraph (d)(5) of this section to exclude either or both of the net items of income described in paragraphs (i) (1) and (2) of this *Example 2* from subpart F income. If no election is made the items would be included in the subpart F income of *CFC.*

Example 3. (i) The facts are the same as in *Example 1*, except that the $100 of portfolio dividend income is subject to a third-country withholding tax of $50, and the $150 of interest income is from sources within *CFC's* country of operation, is subject to a $10 income tax therein, and is not subject to a withholding tax. Although the interest income and the dividend income are both passive income, under paragraph (c)(1)(iii)(B) of this section they constitute separate items of income pursuant to the application of the grouping rules of § 1.904–4(c). Accordingly, *CFC* has two net items of income for purposes of this paragraph (d)—

(1) $50 (net of $50 tax) of FPHC/non-country of operation/greater than 15 percent withholding tax income; and

(2) $140 (net of $10 tax) of FPHC/country of operation income.

(ii) The item described in paragraph (i)(1) of this *Example 3* is taxed at an effective rate greater than 30.6 percent, but Item 2 is not. The net item of income described in paragraph (i)(1) of this *Example 3:* Foreign tax ($50) divided by sum ($100) of net item of income ($50) plus creditable tax thereon ($50) equals 50 percent. The net item of income described in paragraph (i)(2) of this *Example 3:* Foreign tax ($10) divided by sum ($150) of net item of income ($140) plus creditable tax thereon ($10) equals 6.67 percent. Therefore, an election may be made under paragraph (d)(5) of this section to exclude the net item of income described in paragraph (i)(1) of this *Example 3* but not the net item of income described in paragraph (i)(2) of this *Example 3* from subpart F income.

Example 4. The facts are the same as in *Example 3*, except that the $150 of interest income is subject to an income tax of $50 in *CFC's* country of operation. Accordingly, *CFC's* items of income are the same as in Example 3, but both items are taxed at an effective rate greater than 30.6 percent. The net item of income described in paragraph (i)(1) of *Example 3*: Foreign tax ($50) divided by sum ($100) of net item of income ($50) plus creditable tax thereon ($50) equals 50 percent. The net item of income described in paragraph (i)(2) of *Example 3*: Foreign tax ($50) divided by sum ($150) of net item of income ($100) plus creditable tax thereon ($50) equals 33 percent. Pursuant to the consistency rule of paragraph (d)(4)(i) of this section, an election made by *CFC's* controlling United States shareholders must exclude from subpart F income both items of FPHC income under the high tax exception of section 954(b)(4) and this paragraph (d). The election may not be made only with respect to one item.

Example 5. The facts are the same as in *Example 1*, except that *CFC* earns $5 of portfolio dividend income and $150 of interest income. In addition, *CFC* earns $45 for performing consulting services within its country of operation for unrelated persons. *CFC's* gross foreign base company income for 1995 of $155 ($150 of gross interest income and $5 of portfolio dividend income) is greater than 70 percent of its gross income of $200. Therefore, under the full inclusion test of paragraph (b)(1)(ii) of this section, *CFC's* adjusted gross foreign base company income is $200, and under paragraph (b)(2) of this section, the $45 of consulting income is full inclusion foreign base company income. If *CFC* elects, under paragraph (d)(5) of this section, to exclude the interest income from subpart F income pursuant to the high tax exception, the $45 of full inclusion foreign base company income will be excluded from subpart F income under paragraph (d)(6) of this section because the $150 of gross interest income excluded under the high tax exception is more than 90 percent of *CFC's* adjusted gross foreign base company income of $155.

(ii) The following examples generally illustrate the application of paragraph (c) of this section and this paragraph (d). *Example 1* illustrates the order of computations. *Example 2* illustrates the computations required by sections 952 and 954 and this § 1.954–1 if the full inclusion test of paragraph (b)(1)(ii) of this section is met and the income is not excluded from subpart F income under section 952(b). Computations in these examples involving the operation of section 952(c) are included for purposes of illustration only and do not provide substantive rules concerning the operation of that section. For simplicity, these examples assume that the amount of taxes that are taken into account as a deduction under section 954(b)(5) and the amount of the gross-up required under sections 960 and 78 are equal. Therefore, these examples do not separately illustrate the deduction for taxes and gross-up.

Example 1. (i) *Gross income. CFC,* a controlled foreign corporation, has gross income of $1000 for the current taxable year. Of that $1000 of income, $100 is interest income that is included in the definition of foreign personal holding company income under section 954(c)(1)(A) and § 1.954–2(b)(1)(ii), is not income from a trade or service receivable described in section 864(d)(1) or (6), or portfolio interest described in section 881(c), and is not excluded from foreign personal holding company income under any provision of section 952(b) or section 954(c). Another $50 is foreign base company sales income under section 954(d). The remaining $850 of gross income is not included in the definition of foreign base company income or insurance income under sections 954 (c), (d), (e), (f) or (g) or 953, and is foreign source general limitation income described in section 904(d)(1)(I).

(ii) *Expenses.* For the current taxable year, *CFC* has expenses of $500. This amount includes $8 of interest paid to a related person that is allocable to foreign personal holding company income under section 904, and $2 of other expense that is directly related to foreign personal holding company income. Another $20 of expense is directly related to foreign base company sales. The remaining $470 of expenses is allocable to general limitation income that is not foreign base company income or insurance income.

(iii) *Earnings and losses. CFC* has earnings and profits for the current taxable year of $500. In the prior taxable year, *CFC* had losses with respect to income other than gross foreign base company income or gross insurance income. By reason of the limitation provided under section 952(c)(1)(A), those losses reduced the subpart F income (consisting entirely of foreign source general limitation income) of *CFC* by $600 for the prior taxable year.

(iv) *Taxes.* Foreign income tax of $30 is considered imposed on the interest income under the rules of section 954(b)(4), this paragraph (d), and § 1.904–6. Foreign income tax of $14 is considered imposed on the foreign base company sales income under the rules of section 954(b)(4), paragraph (d) of this section, and § 1.904–6. Foreign income tax of $177 is considered imposed on the remaining foreign source general limitation income under the rules of section 954(b)(4), this paragraph (d), and § 1.904–6. For the taxable year of *CFC,* the maximum United States rate of taxation under section 11 is 34 percent.

(v) *Conclusion.* Based on these facts, if CFC elects to exclude all items of income subject to a high foreign tax under section 954(b)(4) and this paragraph (d), it will have $500 of subpart F income as defined in section 952(a) (consisting entirely of foreign source general limitation income) determined as follows:

Step 1—Determine gross income:	
(1) Gross income	$1000
Step 2—Determine gross foreign base company income and gross insurance income:	
(2) Interest income included in gross foreign personal holding company income under section 954(c)	100
(3) Gross foreign base company sales income under section 954(d)	50
(4) Total gross foreign base company income and gross insurance income as defined in sections 954 (c), (d), (e), (f) and (g) and 953 (line (2) plus line (3))	150
Step 3—Compute adjusted gross foreign base company income and adjusted gross insurance income:	
(5) Five percent of gross income (.05 × line (1))	50
(6) Seventy percent of gross income (.70 × line (1))	700
(7) Adjusted gross foreign base company income and adjusted gross insurance income after the application of the de minimis test of paragraph (b) (line (4), or zero if line (4) is less than the lesser of line (5) or $1,000,000) (if the amount on this line 7 is zero, proceed to Step 8)	150
(8) Adjusted gross foreign base company income and adjusted gross insurance income after the application of the full inclusion test of paragraph (b) (line (4), or line (1) if line (4) is greater than line (6))	150
Step 4—Compute net foreign base company income:	
(9) Expenses directly related to adjusted gross foreign base company sales income	20
(10) Expenses (other than related person interest expense) directly related to adjusted gross foreign personal holding company income	2
(11) Related person interest expense allocable to adjusted gross foreign personal holding company income under section 904	8
(12) Net foreign personal holding company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (2) reduced by lines (10) and (11))	90
(13) Net foreign base company sales income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (3) reduced by line (9))	30
(14) Total net foreign base company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (12) plus line (13))	120
Step 5—Compute net insurance income:	
(15) Net insurance income under section 953	0
Step 6—Compute adjusted net foreign base company income:	
(16) Foreign income tax imposed on net foreign personal holding company income (as determined under section 954(b)(4) and this paragraph (d))	30
(17) Foreign income tax imposed on net foreign base company sales income (as determined under section 954(b)(4) and this paragraph (d))	14
(18) Ninety percent of the maximum United States corporate tax rate	30.6%
(19) Effective rate of foreign income tax imposed on net foreign personal holding company income ($90 of interest) under section 954(b)(4) and this paragraph (d) (line (16) divided by line (12))	33%
(20) Effective rate of foreign income tax imposed on $30 of net foreign base company sales income under section 954(b)(4) and this paragraph (d) (line (17) divided by line (13))	47%
(21) Net foreign personal holding company income subject to a high foreign tax under section 954(b)(4) and this paragraph (d) (zero, or line (12) if line (19) is greater than line (18))	90
(22) Net foreign base company sales income subject to a high foreign tax under section 954(b)(4) and this paragraph (d) (zero, or line (13) if line (20) is greater than line (18))	30
(23) Adjusted net foreign base company income after applying section 954(b)(4) and this paragraph (d) (line (14), reduced by the sum of line (21) and line (22))	0
Step 7—Compute adjusted net insurance income:	
(24) Adjusted net insurance income	0
Step 8—Additions to or reduction of adjusted net foreign base company income by reason of section 952(c):	
(25) Earnings and profits for the current year	500
(26) Amount subject to being recharacterized as subpart F income under section 952(c)(2) (excess of line (25) over the sum of lines (23) and (24)); if there is a deficit, then the limitation of section 952(c)(1) may apply for the current year	500
(27) Amount of reduction in subpart F income for prior taxable years by reason of the limitation of section 952(c)(1)	600
(28) Subpart F income as defined in section 952(a), assuming section 952(a)(3), (4), and (5) do not apply (the sum of line (23), line (24), and the lesser of line (26) or line (27))	500
(29) Amount of prior year's deficit to be recharacterized as subpart F income in later years under section 952(c) (excess of line (27) over line (26)	100

Example 2. (i) *Gross income.* CFC, a controlled foreign corporation, has gross income of $1000 for the current taxable year. Of that $1000 of income, $720 is interest income that is included in the definition of foreign personal holding company income under section 954(c) (1)(A) and § 1.954–2(b)(1)(ii), is not income from trade or service receivables described in section 864(d)(1) or (6), or portfolio interest described in section 881(c), and is not excluded from foreign personal holding company income under any provision of section 954(c) and § 1.954–2 or section 952(b). The remaining $280 is services income that is not included in the definition of foreign base company income or insurance income under sections 954 (c), (d), (e), (f), or (g) or 953, and is foreign source general limitation income for purposes of section 904(d)(1)(I).

(ii) *Expenses.* For the current taxable year, *CFC* has expenses of $650. This amount includes $350 of interest paid to related persons that is allocable to foreign personal holding company income under section 904, and $50 of other expense that is directly related to foreign personal holding company income. The remaining $250 of expenses is allocable to services income other than foreign base company income or insurance income.

(iii) *Earnings and losses. CFC* has earnings and profits for the current taxable year of $350. In the prior taxable year, CFC had losses with respect to income other than foreign base company income or insurance income. By reason of the limitation provided under section 952(c)(1)(A), those losses reduced the subpart F income of CFC (consisting entirely of foreign source general limitation income) by $600 for the prior taxable year.

(iv) *Taxes.* Foreign income tax of $120 is considered imposed on the $720 of interest income under the rules of section 954(b)(4), paragraph (d) of this section, and § 1.904–6. Foreign income tax of $2 is considered imposed on the services income under the rules of section 954(b)(4), paragraph (d) of this section, and § 1.904–6. For the taxable year of *CFC,* the maximum United States rate of taxation under section 11 is 34 percent.

(v) *Conclusion.* Based on these facts, if *CFC* elects to exclude all items of income subject to a high foreign tax under section 954(b)(4) and this paragraph (d), it will have $350 of subpart F income as defined in section 952(a), determined as follows.

Step 1—Determine gross income:	
(1) Gross income	$1000
Step 2—Determine gross foreign base company income and gross insurance income:	
(2) Gross foreign base company income and gross insurance income as defined in sections 954 (c), (d), (e), (f) and (g) and 953 (interest income)	720
Step 3—Compute adjusted gross foreign base company income and adjusted gross insurance income:	
(3) Seventy percent of gross income (.70 × line (1))	700
(4) Adjusted gross foreign base company income and adjusted gross insurance income after the application of the full inclusion rule of this paragraph (b)(1) (line (2), or line (1) if line (2) is greater than line (3))	1000
(5) Full inclusion foreign base company income under paragraph (b)(1)(ii) (line (4) minus line (2))	280
Step 4—Compute net foreign base company income:	
(6) Expenses (other than related person interest expense) directly related to adjusted gross foreign personal holding company income	50
(7) Related person interest expense allocable to adjusted gross foreign personal holding company income under section 904	350
(8) Deductions allocable to full inclusion foreign base company income under section 954(b)(5) and paragraph (c) of this section	250
(9) Net foreign personal holding company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (2) reduced by line (6) and line (7))	320
(10) Full inclusion foreign base company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (5) reduced by line (8))	30
(11) Total net foreign base company income after allocating deductions under section 954(b)(5) and paragraph (c) of this section (line (9) plus line (10))	350
Step 5—Compute net insurance income:	
(12) Net insurance income under section 953	0
Step 6—Compute adjusted net foreign base company income:	
(13) Foreign income tax imposed on net foreign personal holding company income (interest)	120
(14) Foreign income tax imposed on net full inclusion foreign base company income	2
(15) Ninety percent of the maximum United States corporate tax rate	30.6%
(16) Effective rate of foreign income tax imposed on $320 of net foreign personal holding company income under section 954(b)(4) and this paragraph (d) (line (13) divided by line (9))	38%
(17) Effective rate of foreign income tax imposed on $30 of net full inclusion foreign base company income under section 954(b)(4) and this paragraph (d) (line (14) divided by line (10))	7%
(18) Net foreign personal holding company income subject to a high foreign tax under section 954(b)(4) and this paragraph (d) (zero, or line (9) if line (16) is greater than line (15))	320
(19) Net full inclusion foreign base company income subject to a high foreign tax under section 954(b)(4) and this paragraph (d) (zero, or line (10) if line (17) is greater than line (15))	0
(20) Adjusted net foreign base company income after applying section 954(b)(4) and this paragraph (d) (line (11) reduced by the sum of line (18) and line (19))	30
Step 7—Compute adjusted net insurance income:	
(21) Adjusted net insurance income	0

Step 8—Reduction of adjusted net foreign base company income or adjusted net insurance income by reason of paragraph (d)(6) of this section:	
(22) Adjusted gross foreign base company income and adjusted gross insurance income (determined without regard to the full inclusion test of paragraph (b)(1) of this section) (line (4) reduced by line (5))	720
(23) Ninety percent of adjusted gross foreign base company income and adjusted gross insurance income (determined without regard to the full inclusion test of paragraph (b)(1)(ii) of this section) (90% of the amount on line (22))	648
(24) Net foreign base company income and net insurance income excluded from subpart F income under section 954(b)(4), increased by the amount of expenses that reduced this income under section 954(b)(5) and paragraph (c) of this section (line (18) increased by the sum of line (6) and line (7))	720
(25) Adjusted net full inclusion foreign base company income excluded from subpart F income under paragraph (d)(6) of this section (zero, or line (10) reduced by line (19) if line (24) is greater than line (23))	30
(26) Adjusted net foreign base company income after application of paragraph (d)(6) of this section (line (20) reduced by line (25))	0
Step 9—Additions to or reduction of subpart F income by reason of section 952(c):	
(27) Earnings and profits for the current year	350
(28) Amount subject to being recharacterized as subpart F income under section 952(c)(2) (excess of line (27) over the sum of line (21) and line (26)); if there is a deficit, then the limitation of 952(c)(1) may apply for the current year	350
(29) Amount of reduction in subpart F income for prior taxable years by reason of the limitation of section 952(c)(1)	600
(30) Subpart F income as defined in section 952(a), assuming section 952(a) (3), (4), and (5) do not apply (the sum of line (21) and line (26) plus the lesser of line (28) or line (29))	350
(31) Amount of prior years' deficit remaining to be recharacterized as subpart F income in later years under section 952(c) (excess of line (29) over line (28))	250

(e) *Character of income*—(1) *Substance of the transaction.* For purposes of section 954, income shall be characterized in accordance with the substance of the transaction, and not in accordance with the designation applied by the parties to the transaction. For example, an amount that is designated as rent by the taxpayer but actually constitutes income from the sale of property, royalties, or income from services shall not be characterized as rent but shall be characterized as income from the sale of property, royalties or income from services, as the case may be. Local law shall not be controlling in characterizing income.

(2) *Separable character.* To the extent the definitional provisions of section 953 or 954 describe the income or gain derived from a transaction, or any portion or portions thereof, that income or gain, or portion or portions thereof, is so characterized for purposes of subpart F. Thus, a single transaction may give rise to income in more than one category of foreign base company income described in paragraph (a)(2) of this section. For example, if a controlled foreign corporation, in its business of purchasing personal property and selling it to related persons outside its country of incorporation, also performs services outside its country of incorporation with respect to the property it sells, the sales income will be treated as foreign base company sales income and the services income will be treated as foreign base company services income for purposes of these rules.

(3) *Predominant character.* The portion of income or gain derived from a transaction that is included in the computation of foreign personal holding company income is always separately determinable and thus must always be segregated from other income and separately classified under paragraph (e)(2) of this section. However, the portion of income or gain derived from a transaction that would meet a particular definitional provision under section 954 or 953 (other than the definition of foreign personal holding company income) in unusual circumstances may not be separately determinable. If such portion is not separately determinable, it must be classified in accordance with the predominant character of the transaction. For example, if a controlled foreign corporation engineers, fabricates, and installs a fixed offshore drilling platform as part of an integrated transaction, and the portion of income that relates to services is not accounted for separately from the portion that relates to sales, and is otherwise not separately determinable, then the classification of income from the transaction shall be made in accordance with the predominant character of the arrangement.

(4) *Coordination of categories of gross foreign base company income or gross insurance income*—(i) *In general.* The computations of gross foreign base company income and gross insurance income are limited by the following rules:

(A) If income is foreign base company shipping income, pursuant to section 954(f), it shall not be considered insurance income or income in any other category of foreign base company income.

(B) If income is foreign base company oil related income, pursuant to section 954(g), it shall not be considered insurance income or income in any other category of foreign base company income, except as provided in paragraph (e)(4)(i)(A) of this section.

(C) If income is insurance income, pursuant to section 953, it shall not be considered income in any category of foreign base company income except as provided in paragraph (e)(4)(i) (A) or (B) of this section.

(D) If income is foreign personal holding company income, pursuant to section 954(c), it shall not be considered income in any other category of foreign base company income, other than as provided in paragraph (e)(4)(i) (A), (B) or (C) of this section.

(ii) Income excluded from other categories of gross foreign base company income. Income shall not be excluded from a category of gross foreign base company income or gross insurance income under this paragraph (e)(4) by reason of being included in another category of gross foreign base company income or gross insurance income, if the income is excluded from that other category by a more specific provision of section 953 or 954. For example, income derived from a commodity transaction that is excluded from foreign personal holding company income under § 1.954–2(f) as income from a qualified active sale may be included in gross foreign base company income if it also meets the definition of foreign base company sales income. See § 1.954–2(a)(2) for the coordination of overlapping categories within the definition of foreign personal holding company income.

(f) *Definition of related person*—(1) *Persons related to controlled foreign corporation.* Unless otherwise provided, for purposes of section 954 and §§ 1.954–1 through 1.954–8 inclusive, the following persons are considered under section 954(d)(3) to be related persons with respect to a controlled foreign corporation:

(i) *Individuals.* An individual, whether or not a citizen or resident of the United States, who controls the controlled foreign corporation.

(ii) *Other persons.* A foreign or domestic corporation, partnership, trust or estate that controls or is controlled by the controlled foreign corporation, or is controlled by the same person or persons that control the controlled foreign corporation.

(2) *Control*—(i) *Corporations.* With respect to a corporation, control means the ownership, directly or indirectly, of stock possessing more than 50 percent of the total voting power of all classes of stock entitled to vote or of the total value of the stock of the corporation.

(ii) *Partnerships.* With respect to a partnership, control means the ownership, directly or indirectly, of more than 50 percent (by value) of the capital or profits interest in the partnership.

(iii) *Trusts and estates.* With respect to a trust or estate, control means the ownership, directly or indirectly, of more than 50 percent (by value) of the beneficial interest in the trust or estate.

(iv) *Direct or indirect ownership.* For purposes of this paragraph (f), to determine direct or indirect ownership, the principles of section 958(a) shall be applied without regard to whether a corporation, partnership, trust or estate is foreign or domestic or whether or not an individual is a citizen or resident of the United States.

§ 1.954–2 Foreign personal holding company income.

(a) *Computation of foreign personal holding company income*—(1) *Categories of foreign personal holding company income.* For purposes of subpart F and the regulations under that subpart, foreign personal holding company income consists of the following categories of income—

(i) Dividends, interest, rents, royalties, and annuities as described in paragraph (b) of this section;

(ii) Gain from certain property transactions as described in paragraph (e) of this section;

(iii) Gain from commodities transactions as described in paragraph (f) of this section;

(iv) Foreign currency gain as described in paragraph (g) of this section; and

(v) Income equivalent to interest as described in paragraph (h) of this section.

(2) *Coordination of overlapping categories under foreign personal holding company provisions*—(i) *In general.* If any portion of income, gain or loss from a transaction is described in more than one category of foreign personal holding company income (as described in paragraph (a)(2)(ii) of this section), that portion of income, gain or loss is treated solely as income, gain or loss from the category of foreign personal holding company income with the highest priority.

(ii) *Priority of categories.* The categories of foreign personal holding company income, listed from highest priority (paragraph (a)(2)(ii)(A) of this section) to lowest priority (paragraph (a)(2)(ii)(E) of this section), are—

(A) Dividends, interest, rents, royalties, and annuities, as described in paragraph (b) of this section;

(B) Income equivalent to interest, as described in paragraph (h) of this section without regard to the exceptions in paragraph (h)(1)(ii)(A) of this section;

(C) Foreign currency gain or loss, as described in paragraph (g) of this section without regard to the exclusion in paragraph (g)(2)(ii) of this section;

(D) Gain or loss from commodities transactions, as described in paragraph (f) of this section without regard to the exclusion in paragraph (f)(1)(ii) of this section; and

(E) Gain or loss from certain property transactions, as described in paragraph (e) of this section without regard to the exceptions in paragraph (e)(1)(ii) of this section.

(3) *Changes in the use or purpose for which property is held*—(i) *In general.* Under paragraphs (e), (f), (g) and (h) of this section, transactions in certain property give rise to gain or loss included in the computation of foreign personal holding company income if the controlled foreign corporation holds that property for a particular use or purpose. The use or purpose for which property is held is that use or purpose for which it was held for more than one-half of the period during which the controlled foreign corporation held the property prior to the disposition.

(ii) *Special rules*—(A) *Anti-abuse rule.* If a principal purpose of a change in use or purpose of property was to avoid including gain or loss in the computation of foreign personal holding company income, all the gain or loss from the disposition of the property is treated as foreign personal holding company income. A purpose may be a principal purpose even though it is outweighed by other purposes (taken together or separately).

(B) *Hedging transactions.* The provisions of paragraph (a)(3)(i) of this section shall not apply to bona fide hedging transactions, as defined in paragraph (a)(4)(ii) of this section. A transaction will be treated as a bona fide hedging transaction only so long as it satisfies the requirements of paragraph (a)(4)(ii) of this section.

(iii) *Example.* The following example illustrates the application of this paragraph (a)(3).

Example. At the beginning of taxable year 1, *CFC*, a controlled foreign corporation, purchases a building for investment. During taxable years 1 and 2, *CFC* derives rents from the building that are included in the computation of foreign personal holding company income under paragraph (b)(1)(iii) of this section. At the beginning of taxable year 3, *CFC* changes the use of the building by terminating all leases and using it in an active trade or business. At the beginning of taxable year 4, *CFC* sells the building at a gain. The building was not used in an active trade or business of *CFC* for more than one-half of the period during which it was held by *CFC*. Therefore, the building is considered to be property that gives rise to rents, as described in paragraph (e)(2) of this section, and gain from the sale is included in the computation of *CFC*'s foreign personal holding company income under paragraph (e) of this section.

(4) *Definitions and special rules.* The following definitions and special rules apply for purposes of computing foreign personal holding company income under this section.

(i) *Interest.* The term *interest* includes all amounts that are treated as interest income (including interest on a tax-exempt obligation) by reason of the Internal Revenue Code or Income Tax Regulations or any other provision of law. For example, interest includes stated interest, acquisition discount, original issue discount, de minimis original issue discount, market discount, de minimis market discount, and unstated interest, as adjusted by any amortizable bond premium or acquisition premium.

(ii) *Bona fide hedging transaction*—(A) *Definition.* The term *bona fide hedging transaction* means a transaction that meets the requirements of § 1.1221–2 (a) through (c) and that is identified in accordance with the requirements of paragraph (a)(4)(ii)(B) of this section, except that in applying § 1.1221–2(b)(1), the risk being hedged may be with respect to ordinary property, section 1231 property, or a section 988 transaction. A transaction that hedges the liabilities, inventory or other assets of a related person (as defined in section 954(d)(3)), that is entered into to assume or reduce risks of a related person, or that is entered into by a person other than a person acting in its capacity as a regular dealer (as defined in paragraph (a)(4)(iv) of this section) to reduce risks assumed from a related person, will not be treated as a bona fide hedging transaction. For an illustration of how this rule applies with respect to foreign currency transactions, see paragraph (g)(2)(ii)(D) of this section.

(B) *Identification.* The identification requirements of this section shall be satisfied if the taxpayer meets the identification and recordkeeping requirements of § 1.1221–2(e). However, for bona fide hedging transactions entered into prior to March 7, 1996 the identification and recordkeeping requirements of § 1.1221–2 shall not apply. Rather, for bona fide hedging transactions entered into on or after July 22, 1988 and prior to March 7, 1996 the identification and recordkeeping requirements shall be satisfied if such transactions are identified by the close of the fifth day after the day on which they are entered into. For bona fide hedging transactions entered into prior to July 22, 1988, the identification and recordkeeping requirements shall be satisfied if such transactions are identified reasonably contemporaneously with the date they are entered into, but no later than within the normal period prescribed under the method of accounting of the controlled foreign corporation used for financial reporting purposes.

(C) *Effect of identification and non-identification*—(*1*) *Transactions identified.* If a taxpayer identifies a transaction as a bona fide hedging transaction for purposes of this section, the identification is binding with respect to any loss arising from such transaction whether or not all of the requirements of paragraph (a)(4)(ii)(A) of this section are satisfied. Accordingly, such loss will be allocated against income that is not subpart F income (or, in the case of an election under paragraph (g)(3) of this section, against the category of subpart F income to which it relates) and apportioned among the categories of income described in section 904(d)(1). If the transaction is not in fact a bona fide hedging transaction described in paragraph (a)(4)(ii)(A) of this section, however, then any gain realized with respect to such transaction shall not be considered as gain from a bona fide hedging transaction. Accordingly, such gain shall be treated as gain from the appropriate category of foreign personal holding company income. Thus, the taxpayer's identification of the transaction as a hedging transaction does not itself operate to exclude gain from the appropriate category of foreign personal holding company income.

(*2*) *Inadvertent identification.* Notwithstanding paragraph (a)(4)(ii)(C)(*1*) of this section, if the taxpayer identifies a transaction as a bona fide hedging transaction for purposes of this section, the characterization of the loss is determined as if the transaction had not been identified as a bona fide hedging transaction if—

(*i*) The transaction is not a bona fide hedging transaction (as defined in paragraph (a)(4)(ii)(A) of this section);

(*ii*) The identification of the transaction as a bona fide hedging transaction was due to inadvertent error; and

(*iii*) All of the taxpayer's transactions in all open years are being treated on either original or, if necessary, amended returns in a manner consistent with the principles of this section.

(*3*) *Transactions not identified.* Except as provided in paragraphs (a)(4)(ii)(C) (*4*) and (*5*) of this section, the absence of an identification that satisfies the requirements of paragraph (a)(4)(ii)(B) of this section is binding and establishes that a transaction is not a bona fide hedging transaction. Thus, subject to the exceptions, the characterization of gain or loss is determined without reference to whether the transaction is a bona fide hedging transaction.

(*4*) *Inadvertent error.* If a taxpayer does not make an identification that satisfies the requirements of paragraph (a)(4)(ii)(B) of this section, the taxpayer may treat gain or loss from the transaction as gain or loss from a bona fide hedging transaction if—

(*i*) The transaction is a bona fide hedging transaction (as defined in paragraph (a)(4)(ii)(A) of this section);

(*ii*) The failure to identify the transaction was due to inadvertent error; and

(*iii*) All of the taxpayer's bona fide hedging transactions in all open years are being treated on either original or, if necessary, amended returns as bona fide hedging transactions in accordance with the rules of this section.

(*5*) *Anti-abuse rule.* If a taxpayer does not make an identification that satisfies all the requirements of paragraph (a)(4)(ii)(B) of this section but the taxpayer has no reasonable grounds for treating the transaction as other than a bona fide hedging transaction, then loss from the transaction shall be treated as realized with respect to a bona fide hedging transaction. Thus, a taxpayer may not elect to exclude loss from its proper characterization as a bona fide hedging transaction. The reasonableness of the taxpayer's failure to identify a transaction is determined by taking into consideration not only the requirements of paragraph (a)(4)(ii)(A) of this section but also the taxpayer's treatment of the transaction for financial accounting or other purposes and the taxpayer's identification of similar transactions as hedging transactions.

(iii) *Inventory and similar property*—(A) *Definition.* The term *inventory and similar property* (or *inventory or similar property*) means property that is stock in trade of the controlled foreign corporation or other property of a kind that would properly be included in the inventory of the controlled foreign corporation if on hand at the close of the taxable year (if the controlled foreign corporation were a domestic corporation), or property held by the controlled foreign corporation primarily for sale to customers in the ordinary course of its trade or business.

(B) *Hedging transactions.* A bona fide hedging transaction with respect to inventory or similar property (other than a transaction described in section 988(c)(1) without regard to section 988(c)(1)(D)(i)) shall be treated as a transaction in inventory or similar property.

(iv) *Regular dealer.* The term *regular dealer* means a controlled foreign corporation that—

(A) Regularly and actively offers to, and in fact does, purchase property from and sell property to customers who are not related persons (as defined in section 954(d)(3)) with respect to the controlled foreign corporation in the ordinary course of a trade or business; or

(B) Regularly and actively offers to, and in fact does, enter into, assume, offset, assign or otherwise terminate positions in property with customers who are not related persons (as defined in section 954(d)(3)) with respect to the controlled foreign corporation in the ordinary course of a trade or business.

(v) *Dealer property*—(A) *Definition.* Property held by a controlled foreign corporation is *dealer property* if—

(*1*) The controlled foreign corporation is a regular dealer in property of such kind (determined under paragraph (a)(4)(iv) of this section); and

(*2*) The property is held by the controlled foreign corporation in its capacity as a dealer in property of such kind without regard to whether the property arises from a transaction with a related person (as defined in section 954(d)(3)) with respect to the controlled foreign corporation. The property is not held by the controlled foreign corporation in its capacity as a dealer if the property is held for investment or speculation on its own behalf or on behalf of a related person (as defined in section 954(d)(3)).

(B) *Securities dealers.* If a controlled foreign corporation is a licensed securities dealer, only the securities that it has identified as held for investment in accordance with the provisions of section 475(b) or section 1236 will be considered to be property held for investment or speculation under this section. A licensed securities dealer is a controlled foreign corporation that is both a securities dealer, as defined in section 475, and a regular dealer, as defined in paragraph (a)(4)(iv) of this section, and that is either—

(*1*) registered as a securities dealer under section 15(a) of the Securities Exchange Act of 1934 or as a Government securities dealer under section 15C(a) of such Act; or

(*2*) licensed or authorized in the country in which it is chartered, incorporated, or organized to purchase and sell securities from or to customers who are residents of that country. The conduct of such securities activities must be subject to bona fide regulation, including appropriate reporting, monitoring, and prudential (including capital adequacy) requirements, by a securities regulatory authority in that country that regularly enforces compliance with such requirements and prudential standards.

(C) *Hedging transactions.* A bona fide hedging transaction with respect to dealer property shall be treated as a transaction in dealer property.

(vi) *Examples.* The following examples illustrate the application of paragraphs (a)(4)(ii), (iv) and (v) of this section.

Example 1. (i) *CFC1* and *CFC2* are related controlled foreign corporations (within the meaning of section 954(d)(3)) located in Countries F and G, respectively. *CFC1* and *CFC2* regularly purchase securities from and sell securities to customers who are not related persons with respect to *CFC1* or *CFC2* (within the meaning of section 954(d)(3)) in the ordinary course of their businesses and regularly and actively hold themselves out as being willing to, and in fact do, enter into either side of options, forward contracts, or other financial instruments. *CFC1* uses securities that are traded in securities markets in Country G to hedge positions that it enters into with customers located in Country F. *CFC1* is not a member of a securities exchange in Country G, so it purchases such securities from *CFC2* and unrelated persons that are registered as securities dealers in Country G and that are members of Country G securities exchanges. Such hedging transactions qualify as bona fide hedging transactions under paragraph (a)(4)(ii) of this section.

(ii) Transactions that *CFC1* and *CFC2* enter into with each other do not affect the determination of whether they are regular dealers. Because *CFC1* and *CFC2* regularly purchase securities from and sell securities to customers who are not related persons within the meaning of section 954(d)(3) in the ordinary course of their businesses and regularly and actively hold themselves out as being willing to, and in fact do, enter into either side of options, forward contracts, or other financial instruments, however, they qualify as regular dealers in such property within the meaning of paragraph (a)(4)(iv) of this section. Moreover, because *CFC1* purchases securities from *CFC2* as bona fide hedging transactions with respect to dealer property, the securities are dealer property under paragraph (a)(4)(v)(C) of this section. Similarly, because *CFC2* sells securities to *CFC1* in the ordinary course of its business as a dealer, the securities are dealer property under paragraph (a)(4)(v)(A) of this section.

Example 2. (i) *CFC* is a controlled foreign corporation located in Country B. *CFC* serves as the currency coordination center for the controlled group, aggregating currency risks incurred by the group and entering into hedging transactions that transfer those risks outside of the group. *CFC* regularly and actively holds itself out as being willing to, and in fact does, enter into either side of options, forward contracts, or other financial instruments with other members of the same controlled group. *CFC* hedges risks arising from such transactions by entering into transactions with persons who are not related persons (within the meaning of section 954(d)(3)) with respect to *CFC*. However, *CFC* does not regularly and actively hold itself out as being willing to, and does not, enter into either side of transactions with unrelated persons.

(ii) *CFC* is not a regular dealer in property under paragraph (a)(4)(iv) of this section and its options, forwards, and other financial instruments are not dealer property within the meaning of paragraph (a)(4)(v) of this section.

(vii) *Debt instrument.* The term *debt instrument* includes bonds, debentures, notes, certificates, accounts receivable, and other evidences of indebtedness.

(b) *Dividends, interest, rents, royalties, and annuities*—(1) *In general.* Foreign personal holding company income includes—

(i) Dividends, except certain dividends from related persons as described in paragraph (b)(4) of this section and distributions of previously taxed income under section 959(b);

(ii) Interest, except export financing interest as defined in paragraph (b)(2) of this section and certain interest received from related persons as described in paragraph (b)(4) of this section;

(iii) Rents and royalties, except certain rents and royalties received from related persons as described in paragraph (b)(5) of this section and rents and royalties derived in the active conduct of a trade or business as defined in paragraph (b)(6) of this section; and

(iv) Annuities.

(2) *Exclusion of certain export financing interest*—(i) *In general.* Foreign personal holding company income does not include interest that is export financing interest. The term *export financing interest* means interest that is derived in the conduct of a banking business and is export financing interest as defined in section 904(d)(2)(G). Solely for purposes of determining whether interest is export financing interest, property is treated as manufactured, produced, grown, or extracted in the United States if it is so treated under § 1.927(a)–1T(c).

(ii) *Exceptions.* Export financing interest does not include income from related party factoring that is treated as interest under section 864(d) (1) or (6) after the application of section 864(d)(7).

(iii) *Conduct of a banking business.* For purposes of this section, export financing interest is considered derived in the conduct of a banking business if, in connection with the financing from which the interest is derived, the corporation, through its own officers or staff of employees, engages in all the activities in which banks customarily engage in issuing and servicing a loan.

(iv) *Examples.* The following examples illustrate the application of this paragraph (b)(2).

Example 1. (i) *DS*, a domestic corporation, manufactures property in the United States. In addition to selling inventory (property described in section 1221(1)), *DS* occasionally sells depreciable equipment it manufactures for use in its trade or business, which is property described in section 1221(2). Less than 50 percent of the fair market value, determined in accordance with section 904(d)(2)(G), of each item of inventory or equipment sold by *DS* is attributable to products imported into the United States. *CFC*, a controlled foreign corporation with respect to which *DS* is a related person (within the meaning of section 954(d)(3)), provides loans described in section 864(d)(6) to unrelated persons for the purchase of property from *DS*. This property is purchased exclusively for use or consumption outside the United States and outside *CFC*'s country of incorporation.

(ii) If, in issuing and servicing loans made with respect to purchases from *DS* of depreciable equipment used in its trade or business, which is property described in section 1221(2) in the hands of *DS*, *CFC* engages in all the activities in which banks customarily engage in issuing and servicing loans, the interest accrued from these loans would be export financing interest meeting the requirements of this paragraph (b)(2) and, thus, not included in foreign personal holding company income. However, interest from the loans made with respect to purchases from *DS* of property that is inventory in the hands of *DS* cannot be export financing interest because it is treated as income from a trade or service receivable under section 864(d)(6) and the exception under section 864(d)(7) does not apply. Thus the interest from loans made with respect to this inventory is included in foreign personal holding company income under paragraph (b)(1)(ii) of this section.

Example 2. (i) *DS*, a domestic corporation manufactures property in the United States. *DS* wholly owns two controlled foreign corporations organized in Country A, *CFC1* and *CFC2*. *CFC1* has a substantial part of its assets used in its trade or business in Country A. *CFC1* purchases the property that *DS* manufactures and sells it without further manufacture for use or consumption within Country A. This property is inventory property, as described in section 1221(1), in the hands of *CFC1*. Less than 50 percent of the fair market value, determined in accordance with section 904(d)(2)(G), of each item of inventory sold by *CFC1* is attributable to products imported into the United States. *CFC2* provides loans described in section 864(d)(6) to unrelated persons in Country A for the purchase of the property from *CFC1*.

(ii) If, in issuing and servicing loans made with respect to purchases from *CFC1* of the inventory property, *CFC2* engages in all the activities in which banks customarily engage in issuing and servicing loans, the interest accrued from these loans would be export financing interest meeting the requirements of paragraph (b)(2) of this section. It is not treated as income from a trade or service receivable under section 864(d)(6) because the exception under section 864(d)(7) applies. Thus the interest is excluded from foreign personal holding company income.

Example 3. The facts are the same as in *Example 2* except that the property sold by *CFC1* is manufactured by *CFC1* in Country A from component parts that were manufactured by *DS* in the United States. The interest accrued from the loans by *CFC2* is not export financing interest as defined in section 904(d)(2)(G) because the property is not manufactured in the United States under § 1.927(a)–1T(c). No portion of the interest is export financing interest as defined in this paragraph (b)(2). The full amount of the interest is, therefore, included in foreign personal holding company income under paragraph (b)(1)(ii) of this section.

(3) *Treatment of tax-exempt interest.* [Reserved] For guidance, see § 4.954–2(b)(6) of this chapter.

(4) *Exclusion of dividends or interest from related persons*—(i) *In general*—(A) *Corporate payor.* Foreign personal holding company income received by a controlled foreign corporation does not include dividends or interest if the payor—

(*1*) Is a corporation that is a related person with respect to the controlled foreign corporation, as defined in section 954(d)(3);

(*2*) Is created or organized under the laws of the same foreign country (the *country of incorporation*) as is the controlled foreign corporation; and

(*3*) Uses a substantial part of its assets in a trade or business in its country of incorporation, as determined under this paragraph (b)(4).

(B) *Payment by a partnership.* For purposes of this paragraph (b)(4), if a partnership with one or more corporate partners makes a payment of interest, a corporate partner will be treated as the payor of the interest—

(*1*) If the interest payment gives rise to a partnership item of deduction under the Internal Revenue Code or Income Tax Regulations, to the extent that the item of deduction is allocable to the corporate partner under section 704(b); or

(*2*) If the interest payment does not give rise to a partnership item of deduction under the Internal Revenue Code or Income Tax Regulations, to the extent that a partnership item reasonably related to the payment would be allocated to that partner under an existing allocation under the partnership agreement (made pursuant to section 704(b)).

(ii) *Exceptions*—(A) *Dividends.* Dividends are excluded from foreign personal holding company income under this paragraph (b)(4) only to the extent that they are paid out of earnings and profits that are earned or accumulated during a period in which—

(*1*) The stock on which dividends are paid with respect to which the exclusion is claimed was owned by the recipient controlled foreign corporation directly, or indirectly through a chain of one or more subsidiaries each of which meets the requirements of paragraph (b)(4)(i)(A) of this section; and

(*2*) Each of the requirements of paragraph (b)(4)(i)(A) of this section is satisfied or, to the extent earned or accumulated during a taxable year of the related foreign corporation ending on or before December 31, 1962, during a period in which the payor was a related corporation as to the controlled foreign corporation and the other requirements of paragraph (b)(4)(i)(A) of this section were substantially satisfied.

(*3*) This paragraph (b)(4)(ii)(A) is illustrated by the following example:

Example. *A*, a domestic corporation, owns all of the stock of *B*, a corporation created and organized under the laws of Country Y, and *C*, a corporation created and organized under the laws of Country X. The taxable year of each of the corporations is the calendar year. In Year 1, *B* earns $100 of income from the sale of products in Country Y that it manufactured in Country Y. *C* had no earnings and profits in Year 1. On January 1 of Year 2, *A* contributes all of the stock of *B* and *C* to Newco, a Country Y corporation, in exchange for all of the stock of Newco. Neither *B* nor *C* earns any income in Year 2, but at the end of Year 2 *B* distributes the $100 accumulated earnings and profits to Newco. Newco's income from the distribution, $100, is foreign personal holding company income because the earnings and profits distributed by *B* were not earned or accumulated during a period in which the stock of *B* was owned by Newco and in which each of the requirements of paragraph (b)(4)(i)(A) of this section was satisfied.

(B) *Interest paid out of adjusted foreign base company income or insurance income*—(*1*) *In general.* Interest may not be excluded from the foreign personal holding company income of the recipient under this paragraph (b)(4) to the extent that the deduction for the interest is allocated under § 1.954–1(a)(4) and (c) to the payor's adjusted gross foreign base company income (as defined in § 1.954–1(a)(3)), adjusted gross insurance income (as defined in § 1.954–1(a)(6)), or any other category of income included in the computation of subpart F income under section 952(a).

(*2*) *Rule for corporations that are both recipients and payors of interest.* If a controlled foreign corporation is both a recipient and payor of interest, the interest that is received will be characterized before the interest that is paid. In addition, the amount of interest paid or accrued, directly or indirectly, by the controlled foreign corporation to a related person (as defined in section 954(d)(3)) shall be offset against and eliminate any interest received or accrued, directly or indirectly, by the controlled foreign corporation from that related person. In a case in which the controlled foreign corporation pays or accrues interest to a related person, as defined in section 954(d)(3), and also receives or accrues interest indirectly from the related person, the smallest interest payment is eliminated and the amounts of all other interest payments are reduced by the amount of the smallest interest payment.

(C) *Coordination with sections 864(d) and 881(c).* Income of a controlled foreign corporation that is treated as interest under section 864(d) (1) or (6), or that is portfolio interest, as defined by section 881(c), is not excluded from foreign personal holding company income under section 954(c)(3)(A)(i) and this paragraph (b)(4).

(iii) *Trade or business requirement.* Except as otherwise provided under this paragraph (b)(4), the principles of section 367(a) apply for purposes of determining whether the payor has a trade or business in its country of incorporation and whether its assets are used in that trade or business. Property purchased or produced for use in a trade or business is not considered used in a trade or business before it is placed in service or after it is retired from service as determined in accordance with the principles of sections 167 and 168.

(iv) *Substantial assets test.* A substantial part of the assets of the payor will be considered to be used in a trade or business located in the payor's country of incorporation for a taxable year only if the average value of the payor's assets for such year that are used in the trade or business and are

located in such country equals more than 50 percent of the average value of all the assets of the payor (including assets not used in a trade or business). The average value of assets for the taxable year is determined by averaging the values of assets at the close of each quarter of the taxable year. The value of assets is determined under paragraph (b)(4)(v) of this section, and the location of assets used in a trade or business of the payor is determined under paragraphs (b)(4) (vi) through (xi) of this section.

(v) *Valuation of assets.* For purposes of determining whether a substantial part of the assets of the payor are used in a trade or business in its country of incorporation, the value of assets shall be their fair market value (not reduced by liabilities), which, in the absence of affirmative evidence to the contrary, shall be deemed to be their adjusted basis.

(vi) *Location of tangible property*—(A) *In general.* Tangible property (other than inventory and similar property as defined in paragraph (a)(4)(iii) of this section, and dealer property as defined in paragraph (a)(4)(v) of this section) used in a trade or business is considered located in the country in which it is physically located.

(B) *Exception.* An item of tangible personal property that is used in the trade or business of a payor in the payor's country of incorporation is considered located within the payor's country of incorporation while it is temporarily located elsewhere for inspection or repair if the property is not placed in service in a country other than the payor's country of incorporation and is not to be so placed in service following the inspection or repair.

(vii) *Location of intangible property*—(A) *In general.* Intangible property (other than inventory and similar property as defined in paragraph (a)(4)(iii) of this section, dealer property as defined in paragraph (a)(4)(v) of this section, and debt instruments) is considered located entirely in the payor's country of incorporation for a quarter of the taxable year only if the payor conducts all of its activities in connection with the use or exploitation of the property in that country during that entire quarter. For this purpose, the country in which the activities connected to the use or exploitation of the property are conducted is the country in which the expenses associated with these activities are incurred. Expenses incurred in connection with the use or exploitation of an item of intangible property are included in the computation provided by this paragraph (b)(4) if they would be deductible under section 162 or includible in inventory costs or the cost of goods sold if the payor were a domestic corporation. If the payor conducts such activities through an agent or independent contractor, then the expenses incurred by the payor with respect to the agent or independent contractor shall be deemed to be incurred by the payor in the country in which the expenses of the agent or independent contractor were incurred by the agent or independent contractor.

(B) *Exception for property located in part in the payor's country of incorporation.* If the payor conducts its activities in connection with the use or exploitation of an item of intangible property, including goodwill (other than inventory and similar property, dealer property and debt instruments) during a quarter of the taxable year both in its country of incorporation and elsewhere, then the value of the intangible considered located in the payor's country of incorporation during that quarter is a percentage of the value of the item as of the close of the quarter. That percentage equals the ratio that the expenses incurred by the payor (described in paragraph (b)(4)(vii)(A) of this section) during the entire quarter by reason of activities that are connected with the use or exploitation of the item of intangible property and are conducted in the payor's country of incorporation bear to all expenses incurred by the payor during the entire quarter by reason of all such activities worldwide.

(viii) *Location of inventory and dealer property*—(A) *In general.* Inventory and similar property, as defined in paragraph (a)(4)(iii) of this section, and dealer property, as defined in paragraph (a)(4)(v) of this section, are considered located entirely in the payor's country of incorporation for a quarter of the taxable year only if the payor conducts all of its activities in connection with the production and sale, or purchase and resale, of such property in its country of incorporation during that entire quarter. If the payor conducts such activities through an agent or independent contractor, then the location of such activities is the place in which they are conducted by the agent or independent contractor.

(B) *Inventory and dealer property located in part in the payor's country of incorporation.* If the payor conducts its activities in connection with the production and sale, or purchase and resale, of inventory or similar property or dealer property during a quarter of the taxable year both in its country of incorporation and elsewhere, then the value of the inventory or similar property or dealer property considered located in the payor's country of incorporation during each quarter is a percentage of the value of the inventory or similar property or dealer property as of the close of the quarter. That percentage equals the ratio that the costs and expenses incurred by the payor during the entire quarter by reason of activities connected with the production and sale, or purchase and resale, of inventory or similar property or dealer property that are conducted in the payor's country of incorporation bear to all costs or expenses incurred by the payor during the entire quarter by reason of all such activities worldwide. A cost incurred in connection with the production and sale or purchase and resale of inventory or similar property or dealer property is included in this computation if it—

(*1*) Would be included in inventory costs or otherwise capitalized with respect to inventory or similar property or dealer property under section 61, 263A, 471, or 472 if the payor were a domestic corporation; or

(*2*) Would be deductible under section 162 if the payor were a domestic corporation and is definitely related to gross income derived from such property (but not to all classes of gross income derived by the payor) under the principles of § 1.861–8.

(ix) *Location of debt instruments.* For purposes of this paragraph (b)(4), debt instruments, other than debt instruments that are inventory or similar property (as defined in paragraph (a)(4)(iii) of this section) or dealer property (as defined in paragraph (a)(4)(v) of this section) are considered to be used in a trade or business only if they arise from the sale of inventory or similar property or dealer property by the payor or from the rendition of services by the payor in the ordinary course of a trade or business of the payor, and only until such time as interest is required to be charged under section 482. Debt instruments that arise from the sale of inventory or similar property or dealer property during a quarter are treated as having the same location, proportionately, as the inventory or similar property or dealer property held during that quarter. Debt instruments arising from the rendition of services in the ordinary course of a trade or business are considered located on a proportionate basis in the countries in which the services to which they relate are performed.

(x) *Treatment of certain stock interests.* Stock in a controlled foreign corporation (lower-tier corporation) that is incorporated in the same country as the payor and related to the payor within the meaning of section 954(d)(3) shall be considered located in the payor's country of incorporation in proportion to the value of the assets of the lower-tier corporation. The location of assets used in a trade or business of the lower-tier corporation shall be determined under the rules of this paragraph (b)(4).

(xi) *Treatment of banks and insurance companies.* [Reserved]

(5) *Exclusion of rents and royalties derived from related persons*—(i) *In general*—(A) *Corporate payor.* Foreign personal holding company income received by a controlled foreign corporation does not include rents or royalties if—

(*1*) The payor is a corporation that is a related person with respect to the controlled foreign corporation, as defined in section 954(d)(3); and

(*2*) The rents or royalties are for the use of, or the privilege of using, property within the country under the laws of which the controlled foreign corporation receiving the payments is created or organized (the country of incorporation).

(B) *Payment by a partnership.* For purposes of this paragraph (b)(5), if a partnership with one or more corporate partners makes a payment of rents or royalties, a corporate partner will be treated as the payor of the rents or royalties—

(*1*) If the rent or royalty payment gives rise to a partnership item of deduction under the Internal Revenue Code or Income Tax Regulations, to the extent the item of deduction is allocable to the corporate partner under section 704(b); or

(*2*) If the rent or royalty payment does not give rise to a partnership item of deduction under the Internal Revenue Code or Income Tax Regulations, to the extent that a partnership item reasonably related to the payment would be allocated to that partner under an existing allocation under the partnership agreement (made pursuant to section 704(b)).

(ii) *Exceptions*—(A) *Rents or royalties paid out of adjusted foreign base company income or insurance income.* Rents or royalties may not be excluded from the foreign personal holding company income of the recipient under this paragraph (b)(5) to the extent that deductions for the payments are allocated under section 954(b)(5) and § 1.954–1(a)(4) and (c) to the payor's adjusted gross foreign base company income (as defined in § 1.954–1(a)(3)), adjusted gross insurance income (as defined in § 1.954–1(a)(6)), or any other category of income included in the computation of subpart F income under section 952(a).

(B) *Property used in part in the controlled foreign corporation's country of incorporation.* If the payor uses the property both in the controlled foreign corporation's country of incorporation and elsewhere, the part of the rent or royalty attributable (determined under the principles of section 482) to the use of, or the privilege of using, the property outside such country of incorporation is included in the computation of foreign personal holding company income under this paragraph (b).

(6) *Exclusion of rents and royalties derived in the active conduct of a trade or business.* Foreign personal holding company income shall not include rents or royalties that are derived in the active conduct of a trade or business and received from a person that is not a related person (as defined in section 954(d)(3)) with respect to the controlled foreign corporation. For purposes of this section, rents or royalties are derived in the active conduct of a trade or business only if the provisions of paragraph (c) or (d) of this section are satisfied.

(c) *Excluded rents*—(1) *Active conduct of a trade or business.* Rents will be considered for purposes of paragraph (b)(6) of this section to be derived in the active conduct of a trade or business if such rents are derived by the controlled foreign corporation (the lessor) from leasing any of the following—

(i) Property that the lessor has manufactured or produced, or has acquired and added substantial value to, but only if the lessor is regularly engaged in the manufacture or production of, or in the acquisition and addition of substantial value to, property of such kind;

(ii) Real property with respect to which the lessor, through its own officers or staff of employees, regularly performs active and substantial management and operational functions while the property is leased;

(iii) Personal property ordinarily used by the lessor in the active conduct of a trade or business, leased temporarily during a period when the property would, but for such leasing, be idle; or

(iv) Property that is leased as a result of the performance of marketing functions by such lessor if the lessor, through its own officers or staff of employees located in a foreign country, maintains and operates an organization in such country that is regularly engaged in the business of marketing, or of marketing and servicing, the leased property and that is substantial in relation to the amount of rents derived from the leasing of such property.

(2) *Special rules*—(i) *Adding substantial value.* For purposes of paragraph (c)(1)(i) of this section, the performance of marketing functions will not be considered to add substantial value to property.

(ii) *Substantiality of foreign organization.* For purposes of paragraph (c)(1)(iv) of this section, whether an organization in a foreign country is substantial in relation to the amount of rents is determined based on all of the facts and circumstances. However, such an organization will be considered substantial in relation to the amount of rents if active leasing expenses, as defined in paragraph (c)(2)(iii) of this section, equal or exceed 25 percent of the adjusted leasing profit, as defined in paragraph (c)(2)(iv) of this section.

(iii) *Active leasing expenses.* The term *active leasing expenses* means the deductions incurred by an organization of the lessor in a foreign country that are properly allocable to rental income and that would be allowable under section 162 to the lessor if it were a domestic corporation, other than—

(A) Deductions for compensation for personal services rendered by shareholders of, or related persons (as defined in section 954(d)(3)) with respect to, the lessor;

(B) Deductions for rents paid or accrued;

(C) Deductions that, although generally allowable under section 162, would be specifically allowable to the lessor (if the lessor were a domestic corporation) under any section of the Internal Revenue Code other than section 162; and

(D) Deductions for payments made to agents or independent contractors with respect to the leased property other than payments for insurance, utilities and other expenses for like services, or for capitalized repairs.

(iv) *Adjusted leasing profit.* The term *adjusted leasing profit* means the gross income of the lessor from rents, reduced by the sum of—

(A) The rents paid or incurred by the lessor with respect to such rental income;

(B) The amounts that would be allowable to such lessor (if the lessor were a domestic corporation) as deductions under sections 167 or 168 with respect to such rental income; and

(C) The amounts paid by the lessor to agents or independent contractors with respect to such rental income other than payments for insurance, utilities and other expenses for like services, or for capitalized repairs.

(3) *Examples.* The application of this paragraph (c) is illustrated by the following examples.

Example 1. Controlled foreign corporation *A* is regularly engaged in the production of office machines which it sells or leases to others and services. Under paragraph (c)(1)(i) of this section, the rental income of Corporation *A* from these leases is derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 2. Controlled foreign corporation *D* purchases motor vehicles which it leases to others. In the conduct of its short-term leasing of such vehicles in foreign country X, Corporation *D* owns a large number of motor vehicles in country X which it services and repairs, leases motor vehicles to customers on an hourly, daily, or weekly basis, maintains offices and service facilities in country X from which to lease and service such vehicles, and maintains therein a sizable staff of its own administrative, sales, and service personnel. Corporation *D* also leases in country X on a long-term basis, generally for a term of one year, motor vehicles that it owns. Under the terms of the long-term leases, Corporation *D* is required to repair and service, during the term of the lease, the leased motor vehicles without cost to the lessee. By the maintenance in country X of office, sales, and service facilities and its complete staff of administrative, sales, and service personnel, Corporation *D* maintains and operates an organization therein that is regularly engaged in the business of marketing and servicing the motor vehicles that are leased. The deductions incurred by such organization satisfy the 25-percent test of paragraph (c)(2)(ii) of this section; thus, such organization is substantial in relation to the rents Corporation *D* receives from leasing the motor vehicles. Therefore, under paragraph (c)(1)(iv) of this section, such rents are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 3. Controlled foreign corporation *E* owns a complex of apartment buildings that it has acquired by purchase. Corporation *E* engages a real estate management firm to lease the apartments, manage the buildings and pay over the net rents to Corporation *E*. The rental income of Corporation *E* from such leases is not derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 4. Controlled foreign corporation *F* acquired by purchase a twenty-story office building in a foreign country, three floors of which it occupies and the rest of which it leases. Corporation *F* acts as rental agent for the leasing of offices in the building and employs a substantial staff to perform other management and maintenance functions. Under paragraph (c)(1)(ii) of this section, the rents received by Corporation *F* from such leasing operations are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 5. Controlled foreign corporation *G* owns equipment that it ordinarily uses to perform contracts in foreign countries to drill oil wells. For occasional brief and irregular periods it is unable to obtain contracts requiring immediate performance sufficient to employ all such equipment. During such a period it sometimes leases such idle equipment temporarily. After the expiration of such temporary leasing of the property, Corporation *G* continues the use of such equipment in the performance of its own drilling contracts. Under paragraph (c)(1)(iii) of this section, rents Corporation *G* receives from such leasing of idle equipment are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

(d) *Excluded royalties*—(1) *Active conduct of a trade or business.* Royalties will be considered for purposes of paragraph (b)(6) of this section to be derived in the active conduct of a trade or business if such royalties are derived by the controlled foreign corporation (the licensor) from licensing—

(i) Property that the licensor has developed, created, or produced, or has acquired and added substantial value to, but only so long as the licensor is regularly engaged in the development, creation, or production of, or in the acquisition of and addition of substantial value to, property of such kind; or

(ii) Property that is licensed as a result of the performance of marketing functions by such licensor if the licensor, through its own officers or staff of employees located in a foreign country, maintains and operates an organization in such country that is regularly engaged in the business of marketing, or of marketing and servicing, the licensed property and that is substantial in relation to the amount of royalties derived from the licensing of such property.

(2) *Special rules*—(i) *Adding substantial value.* For purposes of paragraph (d)(1)(i) of this section, the performance of marketing functions will not be considered to add substantial value to property.

(ii) *Substantiality of foreign organization.* For purposes of paragraph (d)(1)(ii) of this section, whether an organization in a foreign country is substantial in relation to the amount of royalties is determined based on all of the facts and circumstances. However, such an organization will be considered substantial in relation to the amount of royalties if active licensing expenses, as defined in paragraph (d)(2)(iii) of this section, equal or exceed 25 percent of the adjusted licensing profit, as defined in paragraph (d)(2)(iv) of this section.

(iii) *Active licensing expenses.* The term *active licensing expenses* means the deductions incurred by an organization of the licensor in a foreign country that are properly allocable to royalty income and that would be allowable under section 162 to the licensor if it were a domestic corporation, other than—

(A) Deductions for compensation for personal services rendered by shareholders of, or related persons (as defined in section 954(d)(3)) with respect to, the licensor;

(B) Deductions for royalties paid or incurred;

(C) Deductions that, although generally allowable under section 162, would be specifically allowable to the licensor (if the controlled foreign corporation were a domestic corporation) under any section of the Internal Revenue Code other than section 162; and

(D) Deductions for payments made to agents or independent contractors with respect to the licensed property.

(iv) *Adjusted licensing profit.* The term *adjusted licensing profit* means the gross income of the licensor from royalties, reduced by the sum of—

(A) The royalties paid or incurred by the licensor with respect to such royalty income;

(B) The amounts that would be allowable to such licensor as deductions under section 167 or 197 (if the licensor were a domestic corporation) with respect to such royalty income; and

(C) The amounts paid by the licensor to agents or independent contractors with respect to such royalty income.

(3) *Examples.* The application of this paragraph (d) is illustrated by the following examples.

Example 1. Controlled foreign corporation *A*, through its own staff of employees, owns and operates a research facility in foreign country X. At the research facility employees of Corporation *A* who are scientists, engineers, and technicians regularly perform experiments, tests, and other technical activities, that ultimately result in the issuance of patents that it sells or licenses. Under paragraph (d)(1)(i) of this section, royalties received by Corporation *A* for the privilege of using patented rights that it develops as a result of such research activity are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A), but only so long as the licensor is regularly engaged in the development, creation, or production of, or in the acquisition of and addition of substantial value to, property of such kind.

Example 2. Assume that Corporation *A* in *Example 1*, in addition to receiving royalties for the use of patents that it develops, receives royalties for the use of patents that it acquires by purchase and licenses to others without adding any value thereto. Corporation *A* generally consummates royalty agreements on such purchased patents as the result of inquiries received by it from prospective licensees when the fact becomes known in the business community, as a result of the filing of a patent, advertisements in trade journals, announcements, and contacts by employees of Corporation *A*, that Corporation *A* has acquired rights under a patent and is interested in licensing its rights. Corporation *A* does not, however, maintain and operate an organization in a foreign country that is regularly engaged in the business of marketing the purchased patents. The royalties received by Corporation *A* for the use of the purchased patents are not derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 3. Controlled foreign corporation *B* receives royalties for the use of patents that it acquires by purchase. The primary business of Corporation *B*, operated on a regular basis, consists of licensing patents that it has purchased raw from inventors and, through the efforts of a substantial staff of employees consisting of scientists, engineers, and technicians, made susceptible to commercial application. For example, Corporation *B*, after purchasing patent rights covering a chemical process, designs specialized production equipment required for the commercial adaptation of the process and, by so doing, substantially increases the value of the patent. Under paragraph (d)(1)(i) of this section, royalties received by Corporation *B* from the use of such patent are derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 4. Controlled foreign corporation *C* receives royalties for the use of a patent that it developed through its own staff of employees at its facility in country X. Corporation *C* has developed no other patents. It does not regularly employ a staff of scientists, engineers or technicians to create new products to be patented. Further, it does not purchase and license patents developed by others to which it has added substantial value. The royalties received by Corporation *C* are not derived from the active conduct of a trade or business for purposes of section 954(c)(2)(A).

Example 5. Controlled foreign corporation *D* finances independent persons in the development of patented items in return for an ownership interest in such items from which it derives a percentage of royalty income, if any, subsequently derived from the use by others of the protected right. Corporation *D* also attempts to increase its royalty income from such patents by contacting prospective licensees and rendering to licensees advice that is intended to promote the use of the patented property. Corporation *D* does not, however, maintain and operate an organization in a foreign country that is regularly engaged in the business of marketing the patents. Royalties received by Corporation *D* for the use of such patents are not derived in the active conduct of a trade or business for purposes of section 954(c)(2)(A).

(e) *Certain property transactions*—(1) *In general*—(i) *Inclusions*. Gain from certain property transactions described in section 954(c)(1)(B) includes the excess of gains over losses from the sale or exchange of—

(A) Property that gives rise to dividends, interest, rents, royalties or annuities, as described in paragraph (e)(2) of this section;

(B) Property that is an interest in a partnership, trust or REMIC; and

(C) Property that does not give rise to income, as described in paragraph (e)(3) of this section.

(ii) *Exceptions*. Gain or loss from certain property transactions described in section 954(c)(1)(B) and paragraph (e)(1)(i) of this section does not include gain or loss from the sale or exchange of—

(A) Inventory or similar property, as defined in paragraph (a)(4)(iii) of this section;

(B) Dealer property, as defined in paragraph (a)(4)(v) of this section; or

(C) Property that gives rise to rents or royalties described in paragraph (b)(6) of this section that are derived in the active conduct of a trade or business from persons that are not related persons (as defined in section 954(d)(3)) with respect to the controlled foreign corporation.

(iii) *Treatment of losses*. Section 1.954–1(c)(1)(ii) provides for the treatment of losses in excess of gains from the sale or exchange of property described in paragraph (e)(1)(i) of this section.

(iv) *Dual character property*. Property may, in part, constitute property that gives rise to certain income as described in paragraph (e)(2) of this section or, in part, constitute property that does not give rise to any income as described in paragraph (e)(3) of this section. However, property that is described in paragraph (e)(1)(i)(B) of this section cannot be dual character property. Dual character property must be treated as two separate properties for purposes of paragraph (e)(2) or (3) of this section. Accordingly, the sale or exchange of such dual character property will give rise to gain or loss that in part must be included in the computation of foreign personal holding company income under paragraph (e)(2) or (3) of this section, and in part is excluded from such computation. Gain or loss from the disposition of dual character property must be bifurcated under this paragraph (e)(1)(iv) pursuant to the method that most reasonably reflects the relative uses of the property. Reasonable methods may include comparisons in terms of gross income generated or the physical division of the property. In the case of real property, the physical division of the property will in most cases be the most reasonable method available. For example, if a controlled foreign corporation owns an office building, uses 60 percent of the building in its trade or business, and rents out the other 40 percent, then 40 percent of the gain recognized on the disposition of the property would reasonably be treated as gain that is included in the computation of foreign personal holding company income under this paragraph (e)(1). This paragraph (e)(1)(iv) addresses the contemporaneous use of property for dual purposes. For rules concerning changes in the use of property affecting its classification for purposes of this paragraph (e), see paragraph (a)(3) of this section.

(2) *Property that gives rise to certain income*—(i) *In general*. Property the sale or exchange of which gives rise to foreign personal holding company income under this paragraph (e)(2) includes property that gives rise to dividends, interest, rents, royalties or annuities described in paragraph (b) of this section, including—

(A) Property that gives rise to export financing interest described in paragraph (b)(2) of this section; and

(B) Property that gives rise to income from related persons described in paragraph (b) (4) or (5) of this section.

(ii) *Gain or loss from the disposition of a debt instrument*. Gain or loss from the sale, exchange, or retirement of a debt instrument is included in the computation of foreign personal holding company income under this paragraph (e) unless—

(A) In the case of gain—

(*1*) It is interest (as defined in paragraph (a)(4)(i) of this section); or

(*2*) It is income equivalent to interest (as described in paragraph (h) of this section); and

(B) In the case of loss—

(*1*) It is directly allocated to, or treated as an adjustment to, interest income (as described in paragraph (a)(4)(i) of this section) or income equivalent to interest (as defined in paragraph (h) of this section) under any provision of the Internal Revenue Code or Income Tax Regulations; or

(*2*) It is required to be apportioned in the same manner as interest expense under section 864(e) or any other provision of the Internal Revenue Code or Income Tax Regulations.

(3) *Property that does not give rise to income*. Except as otherwise provided in this paragraph (e)(3), for purposes of this section, the term *property that does not give rise to income* includes all rights and interests in property (whether or not a capital asset) including, for example, forwards, futures and options. Property that does not give rise to income shall not include—

(i) Property that gives rise to dividends, interest, rents, royalties or annuities described in paragraph (e)(2) of this section;

(ii) Tangible property (other than real property) used or held for use in the controlled foreign corporation's trade or business that is of a character that would be subject to the allowance for depreciation under section 167 or 168 and the regulations under those sections (including tangible property described in § 1.167(a)–2);

(iii) Real property that does not give rise to rental or similar income, to the extent used or held for use in the controlled foreign corporation's trade or business;

(iv) Intangible property (as defined in section 936(h)(3)(B)), goodwill or going concern value, to the extent used or held for use in the controlled foreign corporation's trade or business;

(v) Notional principal contracts (but see paragraphs (f)(2), (g)(2) and (h)(3) of this section for rules that include income from certain notional principal contracts in gains from commodities transactions, foreign currency gains and income equivalent to interest, respectively); or

(vi) Other property that is excepted from the general rule of this paragraph (e)(3) by the Commissioner in published guidance. See § 601.601(d)(2) of this chapter.

(f) *Commodities transactions*—(1) *In general*—(i) *Inclusion in foreign personal holding company income*. Foreign personal holding company income includes the excess of gains over losses from commodities transactions.

(ii) *Exception*. Gains and losses from qualified active sales and qualified hedging transactions are excluded from the computation of foreign personal holding company income under this paragraph (f).

(iii) *Treatment of losses*. Section 1.954–1(c)(1)(ii) provides for the treatment of losses in excess of gains from commodities transactions.

(2) *Definitions*—(i) *Commodity*. For purposes of this section, the term *commodity* includes tangible personal property of a kind that is actively traded or with respect to which contractual interests are actively traded.

(ii) *Commodities transaction*. The term *commodities transaction* means the purchase or sale of a commodity for immediate (spot) delivery or deferred (forward) delivery, or the right to purchase, sell, receive, or transfer a commodity, or any other right or obligation with respect to a commodity accomplished through a cash or off-exchange market, an interbank market, an organized exchange or board of trade, or an over-the-counter market, or in a transaction effected between private parties outside of any market. Commodities transactions include, but are not limited to—

(A) A futures or forward contract in a commodity;

(B) A leverage contract in a commodity purchased from a leverage transaction merchant;

(C) An exchange of futures for physical transaction;

(D) A transaction, including a notional principal contract, in which the income or loss to the parties is measured by reference to the price of a commodity, a pool of commodities, or an index of commodities;

(E) The purchase or sale of an option or other right to acquire or transfer a commodity, a futures contract in a commodity, or an index of commodities; and

(F) The delivery of one commodity in exchange for the delivery of another commodity, the same commodity at another time, cash, or nonfunctional currency.

(iii) *Qualified active sale*—(A) *In general*. The term *qualified active sale* means the sale of commodities in the active conduct of a commodities business as a producer, processor, merchant, or handler of commodities if substantially all of the controlled foreign corporation's business is as an active producer, processor, merchant or handler of commodities. The sale of commodities held by a controlled foreign corporation other than in its capacity as an active producer, processor, merchant or handler of commodities is not a qualified active sale. For example, the sale by a controlled foreign corporation of commodities that were held for investment or speculation would not be a qualified active sale.

(B) *Active conduct of a commodities business*. For purposes of this paragraph, a controlled foreign corporation is engaged in the active conduct of a commodities business as a producer, processor, merchant, or handler of commodities only with respect to commodities for which each of the following conditions is satisfied—

(*1*) It holds the commodities directly, and not through an agent or independent contractor, as inventory or similar property (as defined in paragraph (a)(4)(iii) of this section) or as dealer property (as defined in paragraph (a)(4)(v) of this section); and

(*2*) With respect to such commodities, it incurs substantial expenses in the ordinary course of a commodities business ffom engaging in one or more of the following activities directly, and not through an independent contractor—

(*i*) Substantial activities in the production of the commodities, including planting, tending or harvesting crops, raising or slaughtering livestock, or extracting minerals;

(*ii*) Substantial processing activities prior to the sale of the commodities, including the blending and drying of agricultural commodities, or the concentrating, refining, mixing, crushing, aerating or milling of commodities; or

(*iii*) Significant activities as described in paragraph (f)(2)(iii)(B)(*3*) of this section.

(*3*) For purposes of paragraph (f)(2)(iii)(B)(*2*)(*iii*) of this section, the significant activities must relate to—

(*i*) The physical movement, handling and storage of the commodities, including preparation of contracts and invoices, arranging freight, insurance and credit, arranging for receipt, transfer or negotiation of shipping documents, arranging storage or warehousing, and dealing with quality claims;

(*ii*) Owning and operating facilities for storage or warehousing; or

(*iii*) Owning or chartering vessels or vehicles for the transportation of the commodities.

(C) *Substantially all*. Substantially all of the controlled foreign corporation's business is as an active producer, processor, merchant, or handler of commodities if the sum of its gross receipts from all of its qualified active sales (as defined in this paragraph (f)(2)(iii) without regard to the substantially all requirement) of commodities and its gross receipts from all of its qualified hedging transactions (as defined in paragraph (f)(2)(iv) of this section, applied without regard to the substantially all requirement of this paragraph (f)(2)(iii)(C)) equals or exceeds 85 percent of its total gross receipts for the taxable year (computed as though the corporation were a domestic corporation). In computing gross receipts, the District Director may disregard any sale or hedging transaction that has as a principal purpose manipulation of the 85 percent gross receipts test. A purpose may be a principal purpose even though it is outweighed by other purposes (taken together or separately).

(D) *Activities of employees of a related entity*. For purposes of this paragraph (f), activities of employees of an entity related to the controlled foreign corporation, who are made available to and supervised on a day-to-day basis by, and whose salaries are paid by (or reimbursed to the related entity by), the controlled foreign corporation, are treated as activities engaged in directly by the controlled foreign corporation.

(E) *Financial activities*. For purposes of this paragraph (f), a corporation is not engaged in a commodities business as a producer, processor, merchant, or handler of commodities if its business is primarily financial. For example, the business of a controlled foreign corporation is primarily financial if its principal business is making a market in notional principal contracts based on a commodities index.

(iv) *Qualified hedging transaction*—(A) *In general*. The term *qualified hedging transaction* means a bona fide hedging transaction, as defined in paragraph (a)(4)(ii) of this section, with respect to qualified active sales (other than transactions described in section 988(c)(1) without regard to section 988(c)(1)(D)(i)).

(B) *Exception*. The term *qualified hedging transaction* does not include transactions that are not reasonably necessary to the conduct of business of the controlled foreign corporation as a producer, processor, merchant or handler of a commodity in the manner in which such business is customarily and usually conducted by others.

(g) *Foreign currency gain or loss*—(1) *Scope and purpose*. This paragraph (g) provides rules for the treatment of foreign currency gains and losses. Paragraph (g)(2) of this section provides the general rule. Paragraph (g)(3) of this section provides an election to include foreign currency gains or losses that would otherwise be treated as foreign personal holding company income under this paragraph (g) in the computation of another category of subpart F income. Paragraph (g)(4) of this section provides an alternative election to treat any net foreign currency gain or loss as foreign personal holding company income. Paragraph (g)(5) of this section provides rules for certain gains and losses not subject to this paragraph (g).

(2) *In general*—(i) *Inclusion*. Except as otherwise provided in this paragraph (g), foreign personal holding company income includes the excess of foreign currency gains over foreign currency losses attributable to any section 988 transactions (foreign currency gain or loss). Section 1.954–1(c)(1)(ii) provides rules for the treatment of foreign currency losses in excess of foreign currency gains. However, if an election is made under paragraph (g)(4) of this section, the excess of foreign currency losses over foreign currency gains to which the election would apply may be apportioned to, and offset, other categories of foreign personal holding company income.

(ii) *Exclusion for business needs*—(A) *General Rule*. Foreign currency gain or loss directly related to the business needs of the controlled foreign corporation is excluded from foreign personal holding company income.

(B) *Business needs*. Foreign currency gain or loss is directly related to the business needs of a controlled foreign corporation if—

(*1*) The foreign currency gain or loss—

(*i*) Arises from a transaction (other than a hedging transaction) entered into, or property used or held for use, in the normal course of the controlled foreign corporation's trade or business;

(*ii*) Arises from a transaction or property that does not itself (and could not reasonably be expected to) give rise to subpart F income other than foreign currency gain or loss;

(*iii*) Does not arise from a transaction described in section 988(c)(1)(B)(iii); and

(*iv*) Is clearly determinable from the records of the controlled foreign corporation as being derived from such transaction or property; or

(*2*) The foreign currency gain or loss arises from a bona fide hedging transaction, as defined in paragraph (a)(4)(ii) of this section, with respect to a transaction or property that satisfies the requirements of paragraph (g)(2)(ii)(B)(*1*)of this section. For purposes of this paragraph (g)(2)(ii)(B)(*2*), a hedging transaction will satisfy the aggregate hedging rules of § 1.1221–2(c)(7) only if all (or all but a de minimis amount) of the aggregate risk being hedged arises in connection with transactions that satisfy the requirements of paragraph (g)(2)(ii)(B)(*1*) of this section.

(C) *Regular dealers*. Transactions in dealer property (as defined in paragraph (a)(4)(v) of this section) described in section 988(c)(1) (B) or (C) that are entered into by a controlled foreign corporation that is a regular dealer (as defined in paragraph (a)(4)(iv) of this section) in such property in its capacity as a dealer will be treated as directly related to the business needs of the controlled foreign corporation under paragraph (g)(2)(ii)(A) of this section.

(D) *Example*. The following example illustrates the provisions of this paragraph (g)(2).

Example. (i) *CFC1* and *CFC2* are controlled foreign corporations located in Country B, and are members of the same controlled group. *CFC1* is engaged in the active conduct of a trade or business that does not produce any subpart F income. *CFC2* serves as the currency coordination center for the controlled group, aggregating currency risks incurred by the group and entering into hedging transactions that transfer those risks outside of the group. Pursuant to this arrangement, and to hedge the currency risk on a non-interest bearing receivable incurred by *CFC1* in the normal course of its business, on Day 1 *CFC1* enters into a forward contract to sell Japanese Yen to CFC2 in 30 days. Also on Day 1, *CFC2* enters into a forward contract to sell Yen to unrelated Bank X on Day 30. *CFC2* is not a regular dealer in Yen spot and forward contracts, and the Yen is not the functional currency for either *CFC1* or *CFC2*.

(ii) Because the forward contract entered into by *CFC1* to sell Yen hedges a transaction entered into in the normal course of *CFC1*'s business that does not give rise to subpart F income, it qualifies as a bona fide hedging transaction as defined in paragraph (a)(4)(ii) of this section. Therefore, *CFC1*'s foreign exchange gain or loss from that forward contract will not be treated as foreign personal holding company income or loss under this paragraph (g).

(iii) Because the forward contract to purchase Yen was entered into by *CFC2* in order to assume currency risks incurred by *CFC1* it does not qualify as a bona fide hedging transaction, as defined in paragraph (a)(4)(ii) of this section. Thus, foreign exchange gain or loss recognized by *CFC2* from that forward contract will be foreign personal holding company income. Because *CFC2* entered into the forward contract to sell Yen in order to hedge currency risks of *CFC1*, that forward contract also does not qualify as a bona fide hedging transaction. Thus, *CFC2*'s foreign currency gain or loss arising from that forward contract will be foreign personal holding company income.

(iii) *Special rule for foreign currency gain or loss from an interest-bearing liability*. Except as provided in paragraph (g)(5)(iv) of this section, foreign currency gain or loss arising from an interest-bearing liability is characterized as subpart F income and non-subpart F income in the same manner that interest expense associated with the liability would be allocated and apportioned between subpart F income and non-subpart F income under §§ 1.861–9T and 1.861–12T.

(3) *Election to characterize foreign currency gain or loss that arises from a specific category of subpart F income as gain or loss in that category*—(i) *In general*. For taxable years of a controlled foreign corporation beginning on or after November 6, 1995, the controlling United States shareholders of the controlled foreign corporation may elect, under this paragraph (g)(3), to exclude foreign currency gain or loss otherwise includible in the computation of foreign personal holding company income under this paragraph (g) from the computation of foreign personal holding company income under this paragraph (g) and include such foreign currency gain or loss in the category (or categories) of subpart F income (described in section 952(a), or, in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*)) to which such gain or loss relates. If an election is made under this paragraph (g)(3) with respect to a category (or categories) of subpart F income described in section 952(a), or,

in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*), the election shall apply to all foreign currency gain or loss that arises from—

(A) A transaction (other than a hedging transaction) entered into, or property used or held for use, in the normal course of the controlled foreign corporation's trade or business that gives rise to income in that category (or categories) and that is clearly determinable from the records of the controlled foreign corporation as being derived from such transaction or property; and

(B) A bona fide hedging transaction, as defined in paragraph (a)(4)(ii) of this section, with respect to a transaction or property described in paragraph (g)(3)(i)(A) of this section. For purposes of this paragraph (g)(3)(i)(B), a hedging transaction will satisfy the aggregate hedging rules of § 1.1221–2(c)(7) only if all (or all but a de minimus amount) of the aggregate risk being hedged arises in connection with transactions or property that generate the same category of subpart F income described in section 952(a), or, in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*).

(ii) *Time and manner of election*. The controlling United States shareholders, as defined in § 1.954–1(c)(5), make the election on behalf of the controlled foreign corporation by filing a statement with their original income tax returns for the taxable year of such United States shareholders ending with or within the taxable year of the controlled foreign corporation for which the election is made, clearly indicating that such election has been made. If the controlling United States shareholders elect to apply these regulations retroactively, under § 1.954–0(a)(1)(ii), the election under this paragraph (g)(3) may be made by the amended return filed pursuant to the election under § 1.954–0(a)(1)(ii). The controlling United States shareholders filing the election statement described in this paragraph (g)(3)(ii) must provide copies of the election statement to all other United States shareholders of the electing controlled foreign corporation. Failure to provide copies of such statement will not cause an election under this paragraph (g)(3) to be voidable by the controlled foreign corporation or the controlling United States shareholders. However, the District Director has discretion to void the election if it is determined that three was no reasonable cause for the failure to provide copies of such statement. The statement shall include the following information—

(A) The name, address, taxpayer identification number, and taxable year of such United States shareholder;

(B) The name, address, and taxable year of the controlled foreign corporation for which the election is effective; and

(C) Any additional information required by the Commission by administrative pronouncement.

(iii) *Revocation of election*. This election is effective for the taxable year of the controlled foreign corporation for which it is made and all subsequent taxable years of such corporation unless revoked by or with the consent of the Commissioner.

(iv) *Example*. The following example illustrates the provisions of this paragraph (g)(3).

Example. (i) *CFC*, a controlled foreign corporation, is a sales company that earns foreign base company sales income under section 954(d). *CFC* makes an election under this paragraph (g)(3) to treat foreign currency gains or losses that arise from a specific category (or categories) of subpart F income (as described in section 952(a), or, in the case of foreign base company income, as described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*)) as that type of income. *CFC* aggregates the currency risk on all of its transactions that generate foreign base company sales income and hedges this net currency exposure.

(ii) Assuming no more than a de minimus amount of risk in the pool of risks being hedged arises from transactions or property that generate income other than foreign base company sales income, pursuant to its election under (g)(3), *CFC*'s net foreign currency gain from the pool and the hedging transactions will be treated as foreign base company sales income under section 954(d), rather than as foreign personal holding company income under section 954(c)(1)(D). If the pool of risks and the hedging transactions generate a net foreign currency loss, however, *CFC* must apply the rules of § 1.954–1(c)(1)(ii).

(4) *Election to treat all foreign currency gains or losses as foreign personal holding company income*—(i) *In general*. If the controlling United States shareholders make an election under this paragraph (g)(4), the controlled foreign corporation shall include in its computation of foreign personal holding company income the excess of foreign currency gains over losses or the excess of foreign currency losses over gains attributable to any section 988 transaction (except those described in paragraph (g)(5) of this section) and any section 1256 contract that would be a section 988 transaction but for section 988(c)(1)(D). Separate elections for section 1256 contracts and section 988 transactions are not permitted. An election under this paragraph (g)(4) supersedes an election under paragraph (g)(3) of this section.

(ii) *Time and manner of election*. The controlling United States shareholders, as defined in § 1.964–1(c)(5), make the election on behalf of the controlled foreign corporation in the same time and manner as provided in paragraph (g)(3)(ii) of this section.

(iii) *Revocation of election*. This election is effective for the taxable year of the controlled foreign corporation for which it is made and all subsequent taxable years of such corporation unless revoked by or with the consent of the Commissioner.

(5) *Gains and losses not subject to this paragraph*—(i) *Capital gains and losses*. Gain or loss that is treated as capital gain or loss under section 988(a)(1)(B) is not foreign currency gain or loss for purposes of this paragraph (g). Such gain or loss is treated as gain or loss from the sale or exchange of property that is included in the computation of foreign personal holding company income under paragraph (e)(1) of this section. Paragraph (a)(2) of this section provides other rules concerning income described in more than one category of foreign personal holding company income.

(ii) *Income not subject to section 988*. Gain or loss that is not treated as foreign currency gain or loss by reason of section 988 (a)(2) or (d) is not foreign currency gain or loss for purposes of this paragraph (g). However, such gain or loss may be included in the computation of other categories of foreign personal holding company income in accordance with its characterization under section 988 (a)(2) or (d) (for example, foreign currency gain that is treated as interest income under section 988(a)(2) will be included in the computation of foreign personal holding company income under paragraph (b)(ii) of this section).

(iii) *Qualified business units using the dollar approximate separate transactions method*. This paragraph (g) does not apply to any DASTM gain or loss computed under § 1.985–3(d). Such gain or loss is allocated under the rules of § 1.985–3 (e)(2)(iv) or (e)(3). However, the provisions of this paragraph (g) do apply to section 988 transactions denominated in a currency other than the United States dollar or the currency that would be the qualified business unit's functional currency were it not hyperinflationary.

(iv) *Gain or loss allocated under § 1.861–9*. [Reserved]

(h) *Income equivalent to interest*—(1) *In general*—(i) *Inclusion in foreign personal holding company income*. Except as provided in this paragraph (h), foreign personal holding company income includes income equivalent to interest as defined in paragraph (h)(2) of this section.

(ii) *Exceptions*—(A) *Liability hedging transactions.* Income, gain, deduction or loss that is allocated and apportioned in the same manner as interest expense under the provisions of § 1.861–9T is not income equivalent to interest for purposes of this paragraph (h).

(B) *Interest.* Amounts treated as interest under section 954(c)(1)(A) and paragraph (b) of this section are not income equivalent to interest for purposes of this paragraph (h).

(2) *Definition of income equivalent to interest*—(i) *In general.* The term *income equivalent to interest* includes income that is derived from—

(A) A transaction or series of related transactions in which the payments, net payments, cash flows, or return predominantly reflect the time value of money;

(B) Transactions in which the payments (or a predominant portion thereof) are, in substance, for the use or forbearance of money;

(C) Notional principal contracts, to the extent provided in paragraph (h)(3) of this section;

(D) Factoring, to the extent provided in paragraph (h)(4) of this section;

(E) Conversion transactions, but only to the extent that gain realized with respect to such a transaction is treated as ordinary income under section 1258;

(F) The performance of services, to the extent provided in paragraph (h)(5) of this section;

(G) The commitment by a lender to provide financing, whether or not such financing actually is provided;

(H) Transfers of debt securities subject to section 1058; and

(I) Other transactions, as provided by the Commissioner in published guidance. See § 601.601(d)(2) of this chapter.

(ii) *Income from the sale of property.* Income from the sale of property will not be treated as income equivalent to interest by reason of paragraph (h)(2)(i) (A) or (B) of this section. Income derived by a controlled foreign corporation will be treated as arising from the sale of property only if the corporation in substance carries out sales activities. Accordingly, an arrangement that is designed to lend the form of a sales transaction to a transaction that in substance constitutes an advance of funds will be disregarded. For example, if a controlled foreign corporation acquires property on 30-day payment terms from one person and sells that property to another person on 90-day payment terms and at prearranged prices and terms such that the foreign corporation bears no substantial economic risk with respect to the purchase and sale other than the risk of non-payment, the foreign corporation has not in substance derived income from the sale of property.

(3) *Notional principal contracts*—(i) *In general.* Income equivalent to interest includes income from notional principal contracts denominated in the functional currency of the taxpayer (or a qualified business unit of the taxpayer, as defined in section 989(a)), the value of which is determined solely by reference to interest rates or interest rate indices, to the extent that the income from such transactions accrues on or after August 14, 1989.

(ii) *Regular dealers.* Income equivalent to interest does not include income earned by a regular dealer (as defined in paragraph (a)(4)(iv) of this section) from notional principal contracts that are dealer property (as defined in paragraph (a)(4)(v) of this section).

(4) *Income equivalent to interest from factoring*—(i) *General rule.* Income equivalent to interest includes factoring income. Except as provided in paragraph (h)(4)(ii) of this section, the term *factoring income* includes any income (including any discount income or service fee, but excluding any stated interest) derived from the acquisition and collection or disposition of a factored receivable. The amount of income equivalent to interest realized with respect to a factored receivable is the difference (if a positive number) between the amount paid for the receivable by the foreign corporation and the amount that it collects on the receivable (or realizes upon its sale of the receivable). The rules of this paragraph (h)(4) apply only with respect to the tax treatment of factoring income derived from the acquisition and collection or disposition of a factored receivable and shall not affect the characterization of an expense or loss of either the person whose goods or services gave rise to a factored receivable or the obligor under a receivable.

(ii) *Exceptions.* Factoring income shall not include—

(A) Income treated as interest under section 864(d) (1) or (6) (relating to income derived from trade or service receivables of related persons), even if such income is treated as not described in section 864(d)(1) by reason of the same-country exception of section 864(d)(7);

(B) Income derived from a factored receivable if payment for the acquisition of the receivable is made on or after the date on which stated interest begins to accrue, but only if the rate of stated interest equals or exceeds 120 percent of the Federal short-term rate (as defined under section 1274) (or the analogous rate for a currency other than the dollar) as of the date on which the receivable is acquired by the foreign corporation; or

(C) Income derived from a factored receivable if payment for the acquisition of the receivable by the foreign corporation is made only on or after the anticipated date of payment of all principal by the obligor (or the anticipated weighted average date of payment of a pool of purchased receivables).

(iii) *Factored receivable.* For purposes of this paragraph (h)(4), the term *factored receivable* includes any account receivable or other evidence of indebtedness, whether or not issued at a discount and whether or not bearing stated interest, arising out of the disposition of property or the performance of services by any person, if such account receivable or evidence of indebtedness is acquired by a person other than the person who disposed of the property or provided the services that gave rise to the account receivable or evidence of indebtedness. For purposes of this paragraph (h)(4), it is immaterial whether the person providing the property or services agrees to transfer the receivable at the time of sale (as by accepting a third-party charge or credit card) or at a later time.

(iv) *Examples.* The following examples illustrate the application of this paragraph (h)(4).

Example 1. *DP*, a domestic corporation, owns all of the outstanding stock of *FS*, a controlled foreign corporation. *FS* acquires accounts receivable arising from the sale of property by unrelated corporation *X*. The receivables have a face amount of $100, and after 30 days bear stated interest equal to at least 120 percent of the applicable Federal short-term rate (determined as of the date the receivable is acquired by *FS*). *FS* purchases the receivables from *X* for $95 on Day 1 and collects $100 plus stated interest from the obligor under the receivable on Day 40. Income (other than stated interest) derived by *FS* from the factored receivables is factoring income within the meaning of paragraph (h)(4)(i) of this section and, therefore, is income equivalent to interest.

Example 2. The facts are the same as in *Example 1*, except that, rather than collecting $100 plus stated interest from the obligor under the factored receivable on Day 40, *FS* sells the receivable to controlled foreign corporation *Y* on Day 15 for $97. Both the income derived by *FS* on the factored receivable and the income derived by *Y* (other than stated interest) on the receivable are factoring income within the meaning of paragraph (h)(4)(i) of this section, and

therefore, constitute income equivalent to interest.

Example 3. The facts are the same as in *Example 1*, except that *FS* purchases the receivables from *X* for $98 on Day 30. Income derived by *FS* from the factored receivables is excluded from factoring income under paragraph (h)(4)(ii)(B) of this section and, therefore, does not give rise to income equivalent to interest.

Example 4. The facts are the same as in *Example 3*, except that it is anticipated that all principal will be paid by the obligor of the receivables by Day 30. Income derived by *FS* from this maturity factoring of the receivables is excluded from factoring income under paragraph (h)(4)(ii)(C) of this section and, therefore, does not give rise to income equivalent to interest.

Example 5. The facts are the same as in *Example 4*, except that *FS* sells the factored receivable to *Y* for $99 on day 45, at which time stated interest is accruing on the unpaid balance of $100. Because interest was accruing at the time *Y* acquired the receivable at a rate equal to at least 120 percent of the applicable Federal short-term rate, income derived by *Y* from the factored receivable is excluded from factoring income under paragraph (h)(4)(ii)(B) of this section and, therefore, does not give rise to income equivalent to interest.

Example 6. *DP*, a domestic corporation engaged in an integrated credit card business, owns all of the outstanding stock of *FS*, a controlled foreign corporation. On Day 1 individual *A* uses a credit card issued by *DP* to purchase shoes priced at $100 from *X*, a foreign corporation unrelated to *DP*, *FS*, or *A*. On Day 7, *X* transfers the receivable (which does not bear stated interest) arising from *A*'s purchase to *FS* in exchange for $95. *FS* collects $100 from *A* on Day 45. Income derived by *FS* on the factored receivable is factoring income within the meaning of paragraph (h)(4)(i) of this section and, therefore, is income equivalent to interest.

(5) *Receivables arising from performance of services.* If payment for services performed by a controlled foreign corporation is not made until more than 120 days after the date on which such services are performed, then the income derived by the controlled foreign corporation constitutes income equivalent to interest to the extent that interest income would be imputed under the principles of section 483 or the original issue discount provisions (sections 1271 through 1275), if—

(i) Such provisions applied to contracts for the performance of services;

(ii) The time period referred to in sections 483(c)(1) and 1274(c)(1)(B) were 120 days rather than six months; and

(iii) The time period referred to in section 483(c)(1)(A) were 120 days rather than one year.

(6) *Examples.* The following examples illustrate the application of this paragraph (h).

Example 1. *CFC*, a controlled foreign corporation, promises that Corporation *A* may borrow up to $500 in principal for one year beginning at any time during the next three months at an interest rate of 10 percent. In exchange, Corporation *A* pays *CFC* a commitment fee of $2. The entire $2 fee is included in the computation of *CFC*'s foreign personal holding company income under paragraph (h)(2)(i)(G) of this section, regardless of whether Corporation *A* actually borrows from *CFC*.

Example 2. (i) At the beginning of its current taxable year, *CFC*, a controlled foreign corporation, purchases at face value a one-year debt instrument issued by Corporation *A* having a $100 principal amount and bearing a floating rate of interest set at the London Interbank Offered Rate (LIBOR) plus one percentage point. Contemporaneously, *CFC* borrows $100 from Corporation *B* for one year at a fixed interest rate of 10 percent, using the debt instrument as security.

(ii) During its current taxable year, *CFC* accrues $11 of interest from Corporation *A* on the bond. Because interest is excluded from the definition of income equivalent to interest under paragraph (h)(1)(ii)(B) of this section, the $11 is not income equivalent to interest.

(iii) During its current taxable year, *CFC* incurs $10 of interest expense with respect to the borrowing from Corporation *B*. That expense is allocated and apportioned to, and reduces, subpart F income to the extent provided in section 954(b)(5) and §§ 1.861–9T through 1.861–12T and 1.954–1(c).

Example 3. (i) On January 1, 1994, *CFC*, a controlled foreign corporation with the United States dollar as its functional currency, purchases at face value a 10-year debt instrument issued by Corporation *A* having a $100 principal amount and bearing a floating rate of interest set at the London Interbank Offered Rate (LIBOR) plus one percentage point payable on December 31st of each year. *CFC* subsequently determines that it would prefer receiving a fixed rate of return. Accordingly, on January 1, 1995, *CFC* enters into a 9-year interest rate swap agreement with Corporation *B* whereby Corporation *B* promises to pay *CFC* on December 31st of each year an amount equal to 10 percent on a notional principal amount of $100. In exchange, *CFC* promises to pay Corporation *B* an amount equal to LIBOR plus one percentage point on the notional principal amount.

(ii) On December 31, 1995, *CFC* receives $9 of interest income from Corporation *A* with respect to the debt instrument. On the same day, *CFC* receives a total of $10 from Corporation *B* and pays $9 to Corporation *B* with respect to the interest rate swap.

(iii) The $9 of interest income is foreign personal holding income under section 954(c)(1). Pursuant to § 1.446–3(d), *CFC* recognizes $1 of swap income for its 1995 taxable year that is also foreign personal holding company income because it is income equivalent to interest under paragraph (h)(2)(i)(C) of this section.

Example 4. (i) *CFC*, a controlled foreign corporation, purchases commodity X on the spot market for $100 and, contemporaneously, enters into a 3 month forward contract to sell commodity X for $104, a price set by the forward market.

(ii) Assuming that substantially all of *CFC*'s expected return is attributable to the time value of the net investment, as described in section 1258(c)(1), the transaction is a conversion transaction under section 1258(c). Accordingly, any gain treated as ordinary income under section 1258(a) will be foreign personal holding company income because it is income equivalent to interest under paragraph (h)(2)(i)(E) of this section.

Par. 4. Section 1.957–1 is amended by adding paragraphs (a), (c) *Examples 8* through *10*, and (d) to read as follows:

§ 1.957–1 Definition of controlled foreign corporation.

(a) *In general.* The term *controlled foreign corporation* means any foreign corporation of which more than 50 percent (or such lesser amount as is provided in section 957(b) or section 953(c)) of either—

(1) The total combined voting power of all classes of stock of the corporation entitled to vote; or

(2) The total value of the stock of the corporation, is owned within the meaning of section 958(a), or (except for purposes of section 953(c)) is considered as owned by applying the rules of section 958(b) and § 1.958–2, by United States shareholders on any day during the taxable year of such foreign corporation. For the definition of the term *United States shareholder*, see sections 951(b) and 953(c)(1)(A). For the definition of the term *foreign corporation*, see § 301.7701–5 of this chapter (Procedure and Administration Regulations). For the treatment of associations as corporations, see section 7701(a)(3) and §§ 301.7701–1 and 301.7701–2 of this chapter. For the definition of the term *stock*, see sections 958(a)(3) and 7701(a)(7). For the classification of a member in an association, joint stock company, or insurance company as a shareholder, see section 7701(a)(8).

* * * * *

(c) * * *

Example 8. For its prior taxable year, *JV*, a foreign corporation, had outstanding 1000 shares of class A stock, which is voting common, and 1000 shares of class B stock, which is nonvoting preferred. *DP*, a domestic corporation, and *FP*, a foreign corporation, each owned precisely 500 shares of both class A and class B stock, and each elected 5 of the 10 members of *JV*'s board of directors. The other facts and circumstances were such that *JV* was not a controlled foreign corporation on any day of the prior taxable year. On the first day of the current taxable year, *DP* purchased one share of class B stock from *FP*. *JV* was a controlled foreign corporation on that day because over 50 percent of the total value in the corporation

OL
60
SS
1
7
3
SE
7
995
UMI

was held by a person that was a United States shareholder under section 951(b).

Example 9. The facts are the same as in *Example 8* except that the stock of *FP* was publicly traded, *FP* had one class of stock, and on the first day of the current taxable year *DP* purchased one share of *FP* stock on the foreign stock exchange instead of purchasing one share of *JV* stock from *FP. JV* became a controlled foreign corporation on that day because over 50 percent of the total value in the corporation was held by a person that was a United States shareholder under section 951(b).

Example 10. *X*, a foreign corporation, is incorporated under the laws of country *Y*. Under the laws of country *Y, X* is considered a mutual insurance company. *X* issues insurance policies that provide the policyholder with the right to vote for directors of the corporation, the right to a share of the assets upon liquidation in proportion to premiums paid, and the right to receive policyholder dividends in proportion to premiums paid. Only policyholders are provided with the right to vote for directors, share in assets upon liquidation, and receive distributions. United States policyholders contribute 25 percent of the premiums and have 25 percent of the outstanding rights to vote for the board of directors. Based on these facts, the United States policyholders are United States shareholders owning the requisite combined voting power and value. Thus, *X* is a controlled foreign corporation for purposes of taking into account related person insurance income under section 953(c).

(d) *Effective date*. Paragraphs (a) and (c) *Examples 8* through *10* of this section are effective for taxable years of a controlled foreign corporation beginning after November 6, 1995.

§ 1.954A–1 and 1.954A–2 [Removed]

Par. 5. Sections 1.954A–1 and 1.954A–2 are removed.

§ 1.957–1T [Removed]

Par. 6. Section 1.957–1T is removed.

PART 4—[ADDED]

Par. 7. 26 CFR part 4 is added to read as follows:

PART 4—TEMPORARY INCOME TAX REGULATIONS UNDER SECTION 954 OF THE INTERNAL REVENUE CODE

Sec.
4.954–0 Introduction.
4.954–1 Foreign base company income; taxable years beginning after December 31, 1986.
4.954–2 Foreign personal holding company income; taxable years beginning after December 31, 1986.

Authority: 26 U.S.C. 7805.

Sec.
4.954–0 also issued under 26 U.S.C. 954 (b) and (c).
4.954–1 also issued under 26 U.S.C. 954 (b) and (c).
4.954–2 also issued under 26 U.S.C. 954 (b) and (c).

§§ 1.954–0T, 1.954–1T and 1.954–2T [Redesignated as §§ 4.954–0, 4.954–1 and 4.954–2]

Par. 8. Sections 1.954–0T, 1.954–1T and 1.954–2T are redesignated as §§ 4.954–0, 4.954–1 and 4.954–2, respectively, and the language "temporary" is removed at the end of each section heading.

Par. 9. Newly designated § 4.954–0 is amended by:

1. Removing the language "§§ 1.954–1T and 1.954–2T" from the first sentence of paragraph (a)(1) and adding "§§ 4.954–1 and 4.954–2" in its place.

2. Adding a sentence at the end of paragraph (a)(1) to read as set forth below.

3. In paragraph (b) by removing the entries numbered (I), (II), and (III) and adding in their places entries for the headings of §§ 4.954–0 through 4.954–2 as follows:

§ 4.954–0 Introduction.

(a) * * * (1) * * * For further guidance, see § 1.954–0(a) of this chapter.

(b) * * *

Sec.
4.954–0 Introduction.

* * * * *

4.954–1 Foreign base company income.

* * * * *

4.954–2 Foreign personal holding company income.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 10. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 11. In § 602.101, paragraph c is amended by:

1. Removing the following entries from the table:

§ 602.101 OMB Control numbers.

* * * * *

(c) * * *

CFR part or section where identified and described	Current OMB control No.
• • • •	•
1.954–1T	1545–1068
1.954–2T	1545–1068
• • • •	•
1.954A–2	1545–0755

2. Adding entries in numerical order to the table to read as follows:

§ 602.101 OMB Control numbers.

* * * * *

(c) * * *

CFR part or section where identified and described	Current OMB control No.
• • • •	•
1.954–1	1545–1068
1.954–2	1545–1068
• • • •	•
4.954–1	1545–1068
4.954–2	1545–1068
• • • •	•

Margaret Milner Richardson,
Commissioner of Internal Revenue.

Approved: August 22, 1995.

Cynthia Gibson Beerbower,
Deputy Assistant Secretary of the Treasury.

BILLING CODE 4830–01–U

DEPARTMENT OF LABOR

Wage and Hour Division

29 CFR Part 801

Application of the Employee Polygraph Protection Act of 1988

AGENCY: Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: The purpose of this document is to change the address which is used to request an administrative hearing on a civil money penalty assessment. This revision is being made in order to streamline the process by which hearing requests are acknowledged by consolidating all aspects of processing hearing requests into the operations of the office which issued the administrative determination upon which the request for a hearing is based.

EFFECTIVE DATE: This rule is effective September 7, 1995.

FOR FURTHER INFORMATION CONTACT: Arthur M. Kerschner Branch of Child Labor and Polygraph Standards, Wage and Hour Division, Employment

Standards Administration, U.S. Department of Labor, Room S–3510, 200 Constitution Avenue NW., Washington, DC 20210. Telephone (202) 219–7640. This is not a toll free number.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

This rule imposes no reporting or recordkeeping requirements on the public.

II. Background

Employers who violate any of the provisions of the Employee Polygraph Protection Act (EPPA) may be assessed civil money penalties up to $10,000. Under § 801.53, any person desiring to request an administrative hearing on a civil money penalty assessment must do so in writing within 30 days after the date of receipt of the notice. Additionally, § 801.53 specifies that the written hearing request shall be made to the Administrator of the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor.

This revision is being made in order to streamline the process by which hearing requests are acknowledged by consolidating all aspects of processing hearing requests into the operations of the office which issued the administrative determination upon which the request for a hearing is based. Accordingly, all such hearing requests are now to be made to the Wage and Hour official that issued the determination in care of the address of the office that originated the determination.

III. Summary of Rule

Section 801.53 of Regulations, 29 CFR part 801, is amended to provide for a new address for purposes of requesting administrative hearings. Hearing requests are now directed to the Administrator of the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor. Under the amended regulation, these requests will be directed to the Wage and Hour Division official who issued the determination, at the address appearing on the determination notice.

Executive Order 12868/Section 202 of the Unfunded Mandates Reform Act of 1995

This rule is not a "significant regulatory action" within the meaning of Executive Order 12866, nor does it require a section 202 statement under the Unfunded Mandates Reform Act of 1995. The rule merely adopts a technical address change, which will facilitate the timeliness and handling of the hearing process. Accordingly, these changes are not expected to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866. Therefore, no regulatory impact analysis has been prepared.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for the rule under 5 U.S.C. 553(b), the requirements of the Regulatory Flexibility Act, Pub. L. 96–354, 94 Stat. 1165, 5 U.S.C. 601 et seq. pertaining to regulatory flexibility analysis, do not apply to this rule. See 5 U.S.C. 601(2). The rule simplifies the handling of hearing requests and will not have a significant economic impact on a substantial number of small entities.

Administrative Procedure Act

This regulation is procedural in nature. Accordingly, the Secretary, for good cause, finds pursuant to 5 U.S.C. 553(b)(3), that prior notice and public comment are unnecessary, impracticable, and contrary to the public interest.

The Secretary also for good cause finds, pursuant to 5 U.S.C. 553(d)(3), that this rule should take effect immediately because it is merely a technical procedural change which does not affect any substantive rights.

Document Preparation

This document was prepared under the direction and control of Maria Echaveste, Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor.

List of Subjects in 29 CFR Part 801

Employment, Investigations, Labor, Law enforcement, Penalties.

For the reasons set forth above, 29 CFR part 801 is amended as set forth below.

Signed at Washington, DC, on this 31st day of August 1995.

Maria Echaveste,
Administrator, Wage and Hour Division.

PART 801—[AMENDED]

1. The authority citation for part 801 continues to read as follows:

Authority: Pub. L. 100–347, 102 Stat. 646, 29 U.S.C. 2001–2009.

2. Paragraph (a) of § 801.53 is revised to read as follows:

§ 801.53 Request for hearing.

(a) Any person desiring to request an administrative hearing on a civil money penalty assessment pursuant to this part shall make such request in writing to the official who issued the determination at the Wage and Hour Division address appearing on the determination notice, no later than 30 days after the date of receipt of the notice referred to in § 801.51 of this part.

BILLING CODE 4510–27–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AG85

Evidence Requirements

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: This document adopts as a final rule, without change, an interim rule that amends Department of Veterans Affairs (VA) adjudication regulations concerning the evidence required to establish birth, death, marriage, or relationship. This amendment was necessary to expedite the payment of benefits by allowing VA to accept photocopies of documents necessary to establish birth, death, marriage, or relationship. The intended effect of this amendment is to improve the efficiency and timeliness of claims processing.

EFFECTIVE DATE: This document is effective September 7, 1995 (The interim rule was effective September 8, 1994).

FOR FURTHER INFORMATION CONTACT: Steven Thornberry, Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, 810 Vermont Avenue, NW., Washington, DC 20420, telephone (202) 273–7210.

SUPPLEMENTARY INFORMATION: On September 8, 1994, VA published in the **Federal Register** an interim rule with request for comments (59 FR 46337). The rule revised VA regulations concerning evidence requirements to permit claimants to use uncertified photocopies of documents to establish birth, death, marriage, and relationship. Previous regulations required that a copy of a document be certified over the signature and official seal of the custodian of the record. We requested that comments to the interim rule be submitted on or before November 7, 1994. We received 11 comments, most from officials of state agencies charged with maintaining and issuing vital records.

The commenters were unanimous in their opinion that by accepting photocopies VA increases the likelihood that it will erroneously award benefits based on altered documents.

We currently have adequate safeguards against erroneously awarding benefits on the basis of altered photocopies. Under 38 CFR 3.216, we require all compensation, pension, or dependency and indemnity compensation recipients or claimants to furnish VA the social security numbers of all dependents on whose behalf benefits are claimed or received. Under the authority of 38 U.S.C. 5317, VA may exchange data with other federal agencies to verify information from VA beneficiaries concerning family members and family income. As an additional safeguard, we have retained in this rule the right to request a certified copy of a document if we are not satisfied that the photocopy submitted is genuine or unaltered. In light of these safeguards, we can, in our judgment, accept uncertified copies without compromising the integrity of our benefit programs.

Several commenters saw no need for VA to accept uncertified copies as a measure to expedite claims processing. Six of these remarked that it is generally not difficult to obtain certified copies, and 8 stated that many states provide copies free of charge if they are to be used to pursue a claim for VA benefits.

Our experience shows that VA's former requirement for certified copies did delay claims processing. Claimants spent additional time trying to satisfy that requirement, partly because many did not understand what VA meant by a certified copy or how to obtain one, especially from a state other than where they live. We realize that some states do provide VA claimants certified copies at no cost. However, if claimants are unaware that certified copies for VA claims are free or fail to indicate that the copies are needed to obtain VA benefits, they may be charged. VA claimants should not incur the delay, expense, or inconvenience of obtaining certified copies of documents if uncertified photocopies will satisfy VA's needs.

Four commenters remarked that, inasmuch as some states have laws that prohibit copying certified copies of vital records, VA's acceptance of uncertified copies could encourage claimants to violate state laws.

This rule does not require that claimants submit photocopies of vital records. It merely provides that option to simplify the proof of claims. Responsibility for obeying state laws lies with the persons subject to those laws. In any event, the fact that some states prohibit copying certified copies is no reason to hold all claimants to higher evidentiary standards.

One commenter suggested that VA request certified copies, photocopy them for the claimants' records, and return them to the claimants, since claimants must have a certified copy to photocopy in the first place.

Many claimants submit original documents in conjunction with benefit claims, which we routinely return after making copies for our records. If a claimant submits a certified copy and requests its return after we have copied it for our records, we honor that request. However, the claimant still has the responsibility of submitting an original document or a certified copy, and, consequently, the procedure does nothing to expedite claims processing. Furthermore, under this procedure, the original document or the certified copy might be lost in the mail and have to be replaced. Under this new rule, the claimant could keep the original or certified copy and submit a photocopy to VA.

One commenter suggested that, if VA's main concern is improving public service without regard to cost, VA eliminate the requirement for any form of documentation other than a signature on a claims form.

In fact, section 301(a) of the "Veterans' Benefits Improvements Act of 1994," Public Law 103–446, approved November 2, 1994, authorizes VA to accept the written statement of a claimant as proof of marriage, dissolution of a marriage, birth of a child, and death of any family member. The statute further provides that VA may require documentation in certain situations. This law was enacted after publication of our interim rule on evidence requirements. Whether VA should accept claimants' statements as proof of relationships is a separate issue that we may address in future rulemaking.

Three commenters expressed concerns that the members of the Blue Ribbon Panel on Claims Processing (the Panel), which made the recommendation implemented by this rulemaking, had little operational experience dealing with vital records. The commenters felt that the Panel would have benefited from the advice and recommendations of other federal agencies that use vital records or of members of the Association for Vital Records and Health Statistics (AVRHS), who are the primary keepers of vital records.

The mandate of the Panel was to develop recommendations to shorten the time it takes VA to make decisions on disability claims and reduce the backlog of claims, which had reached critical levels at many regional offices. Accordingly, the Panel's membership comprised VA officials and representatives from veterans' service organizations with extensive knowledge of VA claims adjudication. The Panel made 43 recommendations covering a broad spectrum of claims-processing procedures, including measures to expedite development of evidence needed for the adjudication of pending claims. The Panel neither included anyone with expertise in vital records nor sought the advice of such experts, but we are unaware of how such expertise would have helped the Panel to develop recommendations to shorten VA's claims processing time and to reduce the claims backlog. Furthermore, although the Panel did not seek advice from vital-records experts, the comment period provided by the interim rule that implemented the Panel's recommendation gave the opportunity for such input.

One commenter stated that many state and county Vital Records offices rely on the revenue obtained from issuing certified copies. Wide-spread acceptance of uncertified photocopies would decrease this revenue and possibly force some of these self-supporting offices to increase the price of certified copies.

Although we understand the commenter's concerns, the purpose of this rule is to improve the efficiency and timeliness of processing claims for VA benefits. We find that the possible decrease in vital records offices' revenue does not warrant imposing on claimants more stringent evidence requirements than are necessary, in our judgment, to establish entitlement.

VA appreciates the interest of the commenters and thanks them for their thoughtful remarks. We are here affirming as a final rule, without change, the interim rule published at 59 FR 46337.

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This final rule would not directly affect small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605 (b), this final rule is exempt from the initial and final regulatory flexibility analysis requirements of §§ 603 and 604.

(The Catalog of Federal Domestic Assistance program numbers are 64.104, 64.105, 64.109, and 64.110).

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Health care, Individuals with disabilities, Pensions, Veterans.

The interim rule published September 8, 1994, in the **Federal Register** (59 FR 46337) amending 38 CFR part 3 is adopted as final without change.

Approved: August 28, 1995.

Jesse Brown,

Secretary of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF DEFENSE

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900–AG98

Veterans Education: Increases in Rates Payable in the Educational Assistance Test Program

AGENCY: Department of Defense and Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The law provides that rates of subsistence allowance and educational assistance payable under the Educational Assistance Test Program shall be adjusted annually by the Secretary of Defense based upon the average actual cost of attendance at public institutions of higher education in the twelve-month period since the rates were last adjusted. After consultation with the Department of Education, the Department of Defense has concluded that the rates for the 1991–92 academic year should be increased by 6% over the rates payable for the 1990–91 academic year; the rates for the 1992–93 academic year should be increased by 8% over the rates payable for the 1991–92 academic year; the rates for the 1993–94 academic year should be increased by 7% over the rates payable for the 1992–93 academic year; and the rates for the 1994–95 academic year should be increased by 8% over the rates payable for the 1993–94 academic year. The regulations dealing with these rates are amended accordingly.

EFFECTIVE DATE: September 7, 1995.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer, Assistant Director for Policy and Program Administration, Education Service, Veterans Benefits Administration, 202–273–7187.

SUPPLEMENTARY INFORMATION: The law (10 U.S.C. 2145) provides that the Secretary of Defense shall adjust the amount of educational assistance which may be provided in any academic year under the Educational Assistance Test Program, and the amount of subsistence allowance authorized under that program. The adjustment is to be based upon the twelve-month increase in the average actual cost of attendance at public institutions of higher education. As required by law, the Department of Defense has consulted with the Department of Education. The Department of Defense has concluded that these costs increased by 6% in the 1990–91 academic year, by 8% in the 1991–92 academic year, by 7% in the 1992–93 academic year, and by 8% in the 1993–94 academic year. Accordingly, this revision changes 38 CFR 21.5820 and 21.5822 to reflect each increase in the rates payable in the subsequent academic year.

Administrative Procedure Act

Pursuant to 5 U.S.C. 553 there is good cause for finding that notice and public procedure are impractical, unnecessary, and contrary to the public interest and there is good cause for dispensing with a 30 day delay of the effective date. The rates of subsistence allowance and educational assistance payable under the Educational Assistance Test program are determined based on a statutory formula and, in essence, the calculation of rates merely constitute a non discretionary ministerial act.

The Secretary of Veterans Affairs and the Secretary of Defense have certified that these amended regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to the 5 U.S.C. 605(b), the amended regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the amended regulations directly affect only individuals. They will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

There is no Catalog of Federal Domestic Assistance number for the program affected by these regulations.

List of Subjects in 38 CFR Part 21

Civil rights, claims, Education, Grant programs-education, Loan programs-education, Reporting and record keeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: December 27, 1994.

Jesse Brown,

Secretary of Veterans Affairs.

Approved: August 28, 1995.

Samuel E. Ebbesen,

Lieutenant General, USA, Deputy Assistant Secretary (Military Personnel Policy), Department of Defense.

For the reasons set out in the preamble, 38 CFR part 21, subpart H is amended as set forth below.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

Subpart H—Educational Assistance Test Program

1. The authority citation for part 21, subpart H continues to read as follows:

Authority: 10 U.S.C. Ch. 107, Pub. L. 96–342.

2. In § 21.5820, paragraph (b) is revised to read as follows:

§ 21.5820 Educational assistance.

* * * * *

(b) *Amount of educational assistance.* (1) The amount of educational assistance shall be adjusted annually by regulation.

(i) For the 1991–92 standard academic year the amount of this assistance may not exceed $2,087.

(ii) For the 1992–93 standard academic year the amount of this assistance may not exceed $2,254.

(iii) For the 1993–94 standard academic year the amount of this assistance may not exceed $2,412.

(iv) For the 1994–95 standard academic year the amount of this assistance may not exceed $2,605.

(2) The amount of educational assistance payable to a servicemember, veteran, spouse or dependent child of a living servicemember or veteran for an

enrollment period shall be the lesser of the following:

(i) The total charges for educational expenses the eligible individual incurs during the enrollment period.

(ii) For the 1991–92 standard academic year an amount determined by:

(A) Multiplying the number of whole months in the enrollment period by $231.89 for a full-time student or by $115.94 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $7.73 for a full-time student or by $115.94 for a part-time student; and

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be decreased by 1¢ for a full-time student and increased by 4¢ for a part-time student.

(iii) For the 1992–93 standard academic year an amount determined by:

(A) Multiplying the number of whole months in the enrollment period by $250.44 for a full-time student or by $125.22 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $8.35 for a full-time student or by $4.17 for a part-time student; and

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be increased by 4¢ for a full-time student and increased by 2¢ for a part-time student.

(iv) For the 1993–94 standard academic year an amount determined by:

(A) Multiplying the number of whole months in the enrollment period by $268.00 for a full-time student or by $134.00 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $8.93 for a full-time student or by $4.47 for a part-time student; and

(C) Adding the two results.

(v) For the 1994–95 standard academic year an amount determined by:

(A) Multiplying the number of whole months in the enrollment period by $289.44 for a full-time student or by $144.72 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $9.65 for a full-time student or by $4.82 for a part-time student; and

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be increased by 4¢ for a full-time student and increased by 2¢ for a part-time student.

(3) The amount of educational assistance payable to each surviving spouse or dependent child of a decreased servicemember or veteran for an enrollment period shall be the lesser of the following:

(i) The total charges for educational expenses the eligible individual incurs during the enrollment period.

(ii) For the 1991–92 standard academic year an amount determined by:

(A) Multiplying the number of whole months in the enrollment period by $231.89 for a full-time student or by $115.94 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $7.73 for a full-time student or by $3.86 for a part-time student;

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be decreased by 1¢ for a full-time student and increased by 4¢ for a part-time student; and

(D) Dividing the amount determined in paragraph (b)(3)(ii)(C) of this section by the number of the deceased veteran's dependents receiving educational assistance for that enrollment period. If one or more dependents is receiving educational assistance for part of the enrollment period, the amount calculated in paragraph (b)(3)(ii)(C) of this section will be prorated on a daily basis. The amount for each day when more than one dependent is receiving educational assistance will be divided by the number of dependents receiving educational assistance on that day. The total amount for the days when only one dependent is receiving educational assistance will not be divided.

(iii) For the 1992–93 standard academic year an amount determined by:

(A) Multiplying the number of whole months in the enrollment period by $250.44 for full-time student or by $125.22 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $8.35 for a full-time student or by $4.17 for a part-time student;

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be increased by 4¢ for a full-time student and increased by 2¢ for a part-time student; and

(D) Dividing the amount determined in paragraph (b)(3)(iii)(C) of this section by the number of the deceased veteran's dependents receiving educational assistance for that enrollment period. If one or more dependents is receiving educational assistance for part of the enrollment period, the amount calculated in paragraph (b)(3)(iii)(C) of this section will be prorated on a daily basis. The amount for each day when more than one dependent is receiving educational assistance will be divided by the number of dependents receiving educational assistance on that day. The total amount for the days when only one dependent is receiving educational assistance will not be divided.

(iv) For the 1993–94 standard academic year an amount determined by:

(A) Multiplying the number of whole months in the enrollment period by $268.00 for a full-time student or by $134.00 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $8.93 for a full-time student or by $4.47 for a part-time student;

(C) Adding the two results; and

(D) Dividing the amount determined in paragraph (b)(3)(iv)(C) of this section by the number of the deceased veteran's dependents receiving educational assistance for that enrollment period. If one or more dependents is receiving educational assistance for part of the enrollment period, the amount calculated in paragraph (b)(3)(iv)(C) of this section will be prorated on a daily basis. The amount for each day when more than one dependent is receiving educational assistance will be divided by the number of dependents receiving educational assistance on that day. The total amount for the days when only one dependent is receiving educational assistance will not be divided.

(v) For the 1994–95 standard academic year an amount determined by:

(A) Multiplying the number of whole months in the enrollment period by $289.44 for a full-time student or by $144.72 for a part-time student;

(B) Multiplying any additional days in the enrollment period by $9.65 for a full-time student or by $4.82 for a part-time student;

(C) Adding the two results. If the enrollment period is as long or longer than a standard academic year, this amount will be increased by 4¢ for a full-time student and increased by 2¢ for a part-time student; and

(D) Dividing the amount determined in paragraph (b)(3)(v)(C) of this section by the number of the deceased veteran's dependents receiving educational assistance for that enrollment period. If one or more dependents is receiving educational assistance for part of the enrollment period, the amount calculated in paragraph (b)(3)(v)(C) of this section will be prorated on a daily basis. The amount for each day when more than one dependent is receiving educational assistance will be divided by the number of dependents receiving educational assistance on that day. The total amount for the days when only one dependent is receiving educational assistance will be divided.

* * * * *

3. In § 21.5822, paragraphs (b)(1)(i), (b)(1)(ii), (b)(2)(i), and (b)(2)(ii) are revised, to read as follows:

§ 21.5822 Subsistence allowance.

* * * * *

(b) *Amount of subsistence allowance.* (1) * * *

(i) If a person is pursuing a course of instruction on a full-time basis, his or her subsistence allowance is:

(A) $520 per month for training pursued during the 1991–92 academic year;

(B) $562 per month for training pursued during the 1992–93 academic year;

(C) $601 per month for training pursued during the 1993–94 academic year; and

(D) $649 per month for training pursued during the 1994–95 academic year.

(ii) If a person is pursuing a course of instruction on other than a full-time basis, his or her subsistence allowance is:

(A) $260 per month for training pursued during the 1991–92 academic year;

(B) $281 per month for training pursued during the 1992–93 academic year;

(C) $300.50 per month for training pursued during the 1993–94 academic year; and

(D) $324.50 per month for training pursued during the 1994–95 academic year.

* * * * *

(2) * * *

(i) VA shall determine the monthly rate of subsistence allowance payable to a person for a day during which he or she is pursuing a course of instruction full-time as follows:

(A) For the 1991–92 academic year VA will divide $520 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day;

(B) For the 1992–93 academic year VA will divide $562 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day;

(C) For the 1993–94 academic year VA will divide $601 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day; and

(D) For the 1994–95 academic year VA will divide $649 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day.

(ii) VA shall determine the monthly rate of subsistence allowance payable to a person for a day during which he or she is pursuing a course of instruction on other than full-time basis as follows:

(A) For the 1991–92 academic year VA will divide $281 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day;

(B) For the 1992–93 academic year VA will divide $281 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day;

(C) For the 1993–94 academic year VA will divide $300.50 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day; and

(D) For the 1994–95 academic year VA will divide $324.50 per month by the number of the deceased veteran's dependents pursuing a course of instruction on that day.

BILLING CODE 8320-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 95–8–7057; FRL–5279–9]

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision, Placer County Air Pollution Control District, San Diego County Air Pollution Control District, San Joaquin Valley Unified Air Pollution Control District, and Ventura County Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is finalizing the approval of revisions to the California State Implementation Plan (SIP) proposed in the **Federal Register** on December 2, 1993 and February 2, 1995. The revisions concern rules from the following: Placer County Air Pollution Control District (PCAPCD), San Diego County Air Pollution Control District (SDCAPCD), San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD), and Ventura County Air Pollution Control District (VCAPCD). This approval action will incorporate these rules into the federally approved SIP. The intended effect of approving these rules is to regulate emissions of volatile organic compounds (VOCs) in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). This final action serves as a final determination that the deficiencies in the rules that started sanctions clocks have been corrected and that any sanctions or Federal Implementation Plan (FIP) obligations triggered by those deficiencies have been permanently stopped. The rules control VOC emissions from marine vessel coating; graphic arts operations; paper, fabric and film coating; and storage of organic liquids. Thus, EPA is finalizing the approval of these rules into the California SIP under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas.

EFFECTIVE DATE: This action is effective on October 10, 1995.

ADDRESSES: Copies of the rules and EPA's evaluation report for each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rules are available for inspection at the following locations:

Rulemaking Section (A–5–3), Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Environmental Protection Agency, Air Docket (6102), 401 "M" Street, S.W., Washington, D.C. 20460.

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95814.

Placer County Air Pollution Control District, 11464 B. Avenue, Auburn, CA 95603.

San Diego County Air Pollution Control District, 9150 Chesapeake Drive, San Diego, CA 92123–1096.

San Joaquin Valley Unified Air Pollution Control District, 1999 Tuolumne Street, Suite 200, Fresno, CA 93721.

Ventura County Air Pollution Control District, 669 County Square Drive, Ventura, CA 93003.

FOR FURTHER INFORMATION CONTACT: Erik H. Beck, Rulemaking Section, Air and Toxics Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901, Telephone: (415) 744–1190. Internet E-mail: beck.erik@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

Background

On December 2, 1993 EPA proposed approval of VCAPCD Rule 74.3, "Paper, Fabric, and Film Coating Operations," 58 FR 63545. On February 2, 1995, 60 FR 6467, EPA proposed approval of the following rules into the California SIP: Rule 4607, "Graphic Arts," as adopted by SJVUAPCD on May 19, 1994; Rule 212, "Storage of Organic Liquids," as adopted by PCAPCD on November 3, 1994; and Rules 67.16 ("Graphic Arts Operations") and 67.18 ("Marine Coating Operations"), as adopted by SDCAPCD on September 20, 1994, and December 13, 1994, respectively. These rules were submitted by the California Air Resources Board to EPA on: June 19, 1992 (VCAPCD Rule 74.3); July 13, 1994 (SJVUAPCD Rule 4607); October 19, 1994 (SDCAPCD Rule 67.16); December 19, 1994 (PCAPCD Rule 212); and December 22, 1994 (SDCAPCD Rule 67.18). These rules were submitted in response to EPA's 1988 SIP-Call and the CAA section 182(a)(2)(A) requirement that nonattainment areas fix their reasonably available control technology (RACT) rules for ozone in accordance with EPA guidance that interpreted the requirements of the pre-amendment Act. A detailed discussion of the background for each of the above rules and nonattainment areas is provided in the Notice of Proposed Rulemaking (NPRM) cited above.

EPA has evaluated all of the above rules for consistency with the requirements of the CAA, and EPA's regulations and interpretation of these requirements as expressed in the various EPA policy guidance documents referenced in the NPRM cited above. EPA has found that the rules meet the applicable EPA requirements. A detailed discussion of the rule provisions and evaluations has been provided in 58 FR 63545 and 60 FR 6467 and in technical support documents (TSDs) available at EPA's Region IX office. These TSDs are dated: September 23, 1993 (VCAPCD 74.3), December 28, 1994 (PCAPCD Rule 212), and January 20, 1995 (SDCAPCD Rules 67.16 and 67.18, and SJVUAPCD Rule 4607).

Response to Public Comments

A 30-day public comment period was provided in 58 FR 63545 and 60 FR 6467. EPA did not receive comments on any of the rules.

EPA Action

EPA is finalizing action to approve the above rules for inclusion into the California SIP. EPA is approving the submittal under section 110(k)(3) as meeting the requirements of section 110(a) and Part D of the CAA. This approval action will incorporate these rules into the federally approved SIP. The intended effect of approving these rules is to regulate emissions of VOCs in accordance with the requirements of the CAA.

In 60 FR 6401, EPA published an Interim Final Rule that served to temporarily defer the imposition of sanctions associated with SJVUAPCD Rule 4607, PCAPCD Rule 212, and SDCAPCD Rules 67.16 and 67.18. As discussed in the Interim Final Rule, two sanctions clocks were started for each of these rules as a result of EPA's limited disapproval of a previous version of the rules. This Final Rule serves to permanently remove both sanctions clocks associated with the above rules. VCAPCD Rule 74.3 does not have any sanctions associated with it.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Unfunded Mandates

Under Sections 202, 203, and 205 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must undertake various actions in association with proposed or final rules that include a Federal mandate that may result in estimated costs of $100 million or more to the private sector or to State, local, or tribal governments in the aggregate.

Through submission of this state implementation plan or plan revision, the State and any affected local or tribal governments have elected to adopt the program provided for under Part D of the Clean Air Act. These rules may bind State, local, and tribal governments to perform certain actions and also require the private sector to perform certain duties. The rules being approved by this action will impose no new requirements because affected sources are already subject to these regulations under State law. Therefore, no additional costs to State, local, or tribal governments or to the private sector result from this action. EPA has also determined that this final action does not include a mandate that may result in estimated costs of $100 million or more to State, local, or tribal governments in the aggregate or to the private sector.

Regulatory Process

The OMB has exempted this action from review under Executive Order 12866.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Note: Incorporation by reference of the State Implementation Plan for the State of California was approved by the Director of the Federal Register on July 1, 1982.

Dated: August 8, 1995.

Felicia Marcus,

Regional Administrator.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

BILLING CODE [illegible]

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 64 and 69

[CC Docket No. 91–141; DA 95–1287]

Expanded Interconnection With Local Telephone Company Facilities; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: This document contains a correction to the final rule [FCC 94–190, 9 FCC Rcd 5154], which was summarized and published in the **Federal Register** on Monday, August 1, 1994 [59 FR 38922]. The rule related to the Commission's policies on expanded interconnection with local telephone company facilities.

EFFECTIVE DATE: December 15, 1994.

FOR FURTHER INFORMATION CONTACT: David Sieradzki (202) 418–1576 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

In the Memorandum Opinion and Order that is the subject of these corrections, the FCC reaffirmed its commitment to its expanded interconnection policy, which creates new opportunities for competitive provision of access services that the local telephone companies traditionally have provided on a monopoly basis, and required certain companies to provide expanded interconnection through virtual collocation.

Need for Correction

As published, the document contains an error which may prove to be misleading and is in need of clarification.

Correction of Publication

In the last sentence of paragraph 62 on page 38929 of the Synopsis of Memorandum Opinion and Order [59 FR 38922, Aug. 1, 1994], FR Doc. 94–18589 is corrected to read as follows:

> We delegate authority to the Chief, Common Carrier Bureau, to modify the threshold point for switched transport volume and term discounts in unusual circumstances where a change in the strict requirements would advance the Commission's objectives.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

Wireless Telecommunications Services; Private Land Mobile Radio Service

AGENCY: Federal Communications Commission.

ACTION: Final rule; petitions for reconsideration.

SUMMARY: In this *Second Memorandum Opinion and Order* portion of the adopted *Second Memorandum Opinion and Order and Third Notice of Proposed Rulemaking*, the Commission denies a Petition for Reconsideration filed by SunCom Mobile & Data, Inc., denies waiver requests filed by Northeast Florida Telephone Company, Wireless Plus, Inc., and the 220 MHz QO Coalition, grants a Petition to Sever filed by SunCom Mobile & Data, Inc., and extends the deadline for non-nationwide 220 MHz licensees authorized within Line A of the Canadian border to construct and operate their stations to a date 12 months after the date that the terms of an agreement with Canada are released. These actions are taken in response to these requests and petitions.

EFFECTIVE DATE: September 7, 1995.

FOR FURTHER INFORMATION CONTACT: Martin Liebman, Wireless Telecommunications Bureau (202) 418–1310, or Rhonda Lien, Wireless Telecommunications Bureau (202) 418–0620.

SUPPLEMENTARY INFORMATION: This is a synopsis of the *Second Memorandum Opinion and Order* portion of the Commission's *Second Memorandum Opinion and Order and Third Notice of Proposed Rulemaking* in PR Docket No. 89–552, GN Docket No. 93–252, and PP Docket No. 93–253, FCC 95–312, adopted July 28, 1995, and released August 28, 1995. The summary of the *Third Notice of Proposed Rulemaking* portion of this decision may be found elsewhere in this edition of the **Federal Register**. The complete text of this decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street NW., Washington, DC, and also may be purchased from the Commission's copy contractor, International Transcription Service, at (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Synopsis of the Second Memorandum Opinion and Order Portion of the Second Memorandum Opinion and Order and Third Notice of Proposed Rulemaking

1. The Commission, in a *Third Report and Order* in GN Docket 93–252 (59 FR 59945, November 21, 1994) denied a Request for Declaratory Ruling filed by SunCom Mobile & Data, Inc. (SunCom) which sought approval to aggregate non-nationwide 220 MHz five-channel blocks on a regional basis to provide multiple-market service on a single system. The Commission denied a concurrently filed waiver request by SunCom to allow an extended period for the construction of its system. SunCom filed a Petition for Reconsideration of these decisions. Wireless Plus, Inc., a manager of 220 MHz stations, filed a waiver request similar to SunCom's Request for Declaratory Ruling. The Commission now denies these three requests.

2. SunCom also filed a Petition to Sever its Requests for Declaratory Ruling and for Waiver from GN Docket No. 93–252, and from other petitions for reconsideration of the *Third Report and Order* in GN Docket 93–252. SunCom asked that the Commission act expeditiously on its Petition for Reconsideration. The Commission is incorporating SunCom's Petition for Reconsideration into this proceeding for disposition, and its Petition to Sever is therefore granted.

3. The Commission received waiver requests from the 220 MHz QO Coalition and Northeast Florida Telephone Company seeking waiver of our rules to permit licensees authorized on Channels 171–180 to operate in the trunked mode. The Commission denies both of these requests.

4. The Commission extends the construction deadline for Phase I non-nationwide 220 MHz licensees located within Line A of the Canadian border until 12 months after the signing of an agreement with Canada on the sharing of 220–222 MHz channels near the border.

5. Authority for issuance of the decision is contained in Sections 4(i), 303(r), and 332 of the Communications Act of 1934, as amended; 47 U.S.C. 154(i), 303(r), and 332.

Ordering Clauses

6. Accordingly, IT IS ORDERED that the Petition to Sever filed by SunCom Mobile & Data, Inc., IS GRANTED.

7. IT IS FURTHER ORDERED that the Petition for Reconsideration filed by SunCom Mobile & Data, Inc., IS DENIED.

8. IT IS FURTHER ORDERED that the Request for Rule Waiver filed by Wireless Plus, Inc., IS DENIED.

9. IT IS FURTHER ORDERED that the Request for Rule Waiver filed by the 220 MHz QO Coalition IS DENIED.

10. IT IS FURTHER ORDERED that the Petition for Rule Waiver filed by Northeast Florida Telephone Company IS DENIED.

11. IT IS FURTHER ORDERED that the deadline for non-nationwide 220 MHz licensees authorized within Line A of the Canadian border to construct and operate their stations is extended to a date 12 months after the date that the terms of an agreement with Canada are released.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 663

[Docket No. 941265–4365; I.D. 083095B]

Pacific Coast Groundfish Fishery; Thornyhead Trip Limits and Nontrawl Sablefish Mop-Up Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Inseason adjustments and nontrawl sablefish mop-up fishery; request for comments.

SUMMARY: NMFS announces adjustments to the management measures for the Pacific coast groundfish fishery off Washington, Oregon, and California. This action will reduce the limited entry trip limits for thornyheads, establish beginning and ending dates and trip limits applicable to the mop-up fishery for nontrawl limited entry sablefish, and set trip limits for the nontrawl limited entry sablefish fishery after the mop-up fishery. These actions are intended to extend the thornyhead fishery as long as possible during the year, and to provide for harvest of the remainder of the limited entry nontrawl allocation for sablefish.

DATES: The thornyhead trip limits are effective from 0001 hours (local time), September 1, 1995, until the effective date of the 1996 annual specifications and management measures for the Pacific coast groundfish fishery, which will be published in the **Federal Register**. The nontrawl sablefish mop-up fishery will begin at 1201 hours (local time), September 1, 1995, and will end at 1200 hours (local time), September 30, 1995, at which time the daily trip limits resume. The daily trip limits for the nontrawl sablefish fishery will remain in effect until the effective date of the 1996 annual specifications and management measures for the Pacific coast groundfish fishery, which will be published in the **Federal Register**. Comments will be accepted until Septemnber 18, 1995.

ADDRESSES: Comments on these actions should be sent to Mr. William Stelle, Jr., Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700, Bldg. 1, Seattle, WA 98115–0070; or Ms. Hilda Diaz-Soltero, Director, Southwest Region, National Marine Fisheries Service, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213. Information relevant to these actions has been compiled in aggregate form and is available for public review during business hours at the office of the Director, Northwest Region, NMFS (Regional Director).

FOR FURTHER INFORMATION CONTACT: William L. Robinson at 206–526–6140; or Rodney R. McInnis at 310–980–4040.

SUPPLEMENTARY INFORMATION:

Thornyheads. The Annual Specifications and Management Measures for the Pacific Coast Groundfish Fishery (60 FR 2331–2344, January 9, 1995), as amended, established management measures for the 1995 limited entry fishery for Dover sole, thornyheads, and trawl-caught sablefish (the DTS complex). At its August 1995 meeting in San Francisco, CA, the Pacific Fishery Management Council (Council) considered the best available scientific information, comments from its advisory committees, and public testimony before recommending adjustments to the management measures for the thornyhead fishery, as explained below.

The DTS complex is managed collectively because the four species often are caught together in the trawl fishery. (Thornyheads include both shortspine and longspine thornyheads.) In 1995, the 1,500 metric ton (mt) harvest guideline for shortspine thornyheads was set higher than the 1,000–mt acceptable biological catch (ABC), largely because of uncertainty in the new stock assessment. The stock assessment indicates that the shortspine thornyhead biomass is below the level consistent with maximum sustainable yield (MSY). The harvest guideline for shortspine thornyheads is near the MSY level, but below its overfishing level of about 1,800 mt. In contrast, longspine thornyheads remain above MSY and are being fished down to the level that would produce MSY. However, the 6,000–mt harvest guideline for longspine thornyheads in 1995 is set below its ABC of 7,000 mt, primarily to protect the fully exploited shortspine thornyheads.

At the beginning of 1995, the cumulative trip limit for thornyheads combined was set at 20,000 lb (9,072 kg) per vessel per month, of which no more than 4,000 lb (1,814 kg) could be shortspine thornyheads (60 FR 2331, January 9, 1995). On April 1, 1995 (60 FR 16811, April 3, 1995), the monthly cumulative trip limit for combined thornyheads was reduced by 25 percent to 15,000 lb (6,804 kg), of which no more than 3,000 lb (1,361 kg) could be shortspine thornyheads. Landings have not slowed significantly.

The best available information at the August 1995 Council meeting indicated that if landing rates are not slowed the harvest guidelines for both thornyhead species, and the overfishing level for shortspine thornyheads, will be exceeded by the end of the year. If landing rates are not slowed, the harvest guideline for shortspine thornyheads will be reached by September 20, 1995, and exceeded by 39 percent by the end of the year. The overfishing level for shortspine thornyheads will be exceeded by 16 percent by the end of the year. The harvest guideline for longspine thornyheads will be reached by November 7, 1995, and exceeded by 19 percent by the end of the year. To stay within the harvest guidelines for both species, landings will need to be reduced by 84 percent for shortspine thornyheads, and 46 percent for longspine thornyheads.

The Council considered several alternatives, including immediate prohibition of landings of shortspine thornyheads or the entire DTS complex, and a reduction in trip limits. The Council recommended that the cumulative monthly trip limits for thornyheads be cut almost in half, from 15,000 lb (6,804 kg) to 8,000 lb (3,629 kg) for thornyheads combined, and from 3,000 lb (1,361 kg) to 1,500 lb (680 kg) for shortspine thornyheads. The level of discards that would result from such a small trip limit on shortspine thornyheads is unknown. It is intended that fishers move their operations to deeper water where shortspine

thornyheads are not as abundant. That way, the catch of shortspine thornyheads and discards in excess of the trip limit would be reduced. Under this option, the shortspine thornyhead harvest guideline would be exceeded by about 10 percent by the end of November, but the overfishing level would not be reached. The Council will again consider thornyhead and DTS management at its October 1995 meeting in Portland, OR, and may recommend additional restrictions at that time, including possible closure of the DTS fishery before the end of the year.

NMFS concurs with the Council's recommendation to avoid reaching the overfishing level for shortspine thornyheads, while extending the fishery as long as possible and providing for achievement of the harvest guideline for longspine thornyheads. This action is intended to minimize trip limit induced discards of shortspine thornyheads by encouraging the use of different fishing strategies. No change is made to the cumulative monthly trip limit for the DTS complex or trawl-caught sablefish. As a result, the amount of Dover sole that may be landed increases, compensating for the reduction in the cumulative limits for thornyheads. A cumulative monthly trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in a calendar month, without a limit on the number of landings or trips.

Nontrawl Sablefish Mop-Up Fishery. The regulations at 50 CFR 663.23(b)(2) established a new season structure for the limited entry nontrawl sablefish fishery in 1995. The beginning of the "regular season," a derby fishery during which the only trip limit is for sablefish smaller than 22 inches (56 cm), was unlinked from the start of the sablefish fishery in the Gulf of Alaska (which could have been as early as late February in 1995) and changed to August 6. Because of expected increases in effort and the difficulty in projecting catch rates during a short, intense season (7 days in 1995), the regular season was designed to harvest only 70 percent of the limited entry nontrawl allocation. The remainder of the nontrawl allocation was set aside as a buffer in case landings were much higher than projected. The Regional Director is authorized to release the buffer, if sufficient amounts remain, about 3 weeks after the end of the regular season, to be taken in a mop-up fishery consisting of one cumulative trip limit for each vessel.

Following the mop-up fishery, daily trip limits are reimposed until the end of the year. A daily trip limit is the maximum amount that may be taken and retained, possessed, or landed per vessel in 24 consecutive hours, starting at 0001 hours local time. Only one landing of groundfish may be made in that 24–hour period. Daily trip limits may not be accumulated. If a trip lasts more than one day, only one daily trip limit is allowed.

The best available information on September 28, 1995, indicated that approximately 2,274 mt of sablefish had been landed through August 19, 1995, and that about 78 percent of the limited entry nontrawl allocation of 2,754 mt was taken during the regular season. (This includes one week under daily trip limits after the end of the regular season.) Therefore, 480 mt remains to be caught after August 19, 1995. The Regional Director, after consulting with the Council's Groundfish Management Team, has determined that the mop-up fishery will occur in September 1995, and that a cumulative monthly trip limit of 5,500 lb (2,495 kg) would provide for approximately 175 participating vessels, leaving enough for small daily trip limits between August 19 and September 1, 1995, and from 1200 hours September 30, 1995, until the end of the year. The trip limit for sablefish smaller than 22 inches (56 cm) total length (or 15.5 inches (39 cm) for sablefish that are headed) that was in effect during the regular season continues during the mop-up season, but not under the daily trip limits. This trip limit is described in the paragraph preceding the Classification section. Once a vessel has landed its 5,500–lb (2,495 kg) cumulative limit, it may not land more sablefish until the daily trip limits resume on September 30, 1995. A cumulative trip limit applies per limited entry vessel. Therefore, acquiring additional limited entry permits does not entitle a vessel to more than one cumulative limit. (See the definition for a cumulative trip limit at the end of the discussion on thornyheads.)

The daily trip limits for the limited entry fishery after the mop-up season are the same as those in effect before the mop-up season. Since the daily trip limits apply to a 24–hour day starting at 0001 hours, but the mop-up fishery begins and ends at 1200 hours, it will be legal for a vessel in the limited entry fishery to land a daily trip limit between 0001 hours and 1200 hours on September 1, 1995, just before the start of the mop-up season, and between 1201 hours and 2400 hours on September 30, 1995 following the mop-up season.

As specified in the annual management measures (60 FR 2331, January 9, 1995) at paragraph IV.I., a vessel operating in the open access fishery must not exceed any trip limit, frequency limit, and/or size limit for the open access fishery or for the same gear and/or subarea in the limited entry fishery.

NMFS Actions

NMFS announces: (1) The following changes to the management measures for the limited entry fishery for thornyheads (60 FR 2331–2344, January 9, 1995) as modified (60 FR 16811, April 3, 1995), and (2) the dates of the nontrawl sablefish limited entry mop-up fishery and the amounts of sablefish that may be taken with nontrawl gear during and after the limited entry mop-up fishery in 1995 (60 FR 34472, July 3, 1995). All other provisions remain in effect.

1. *Thornyheads.* In paragraphs IV.E.(3)(b)(ii)(*A*) and (*B*), the cumulative monthly trip limits for thornyheads are revised as follows:

(*A*) *North of Cape Mendocino.* The cumulative trip limit for the DTS complex taken and retained north of Cape Mendocino is 35,000 lb (15,876 kg) per vessel per month. Within this cumulative trip limit, no more than 7,000 lb (3,175 kg) may be sablefish, and no more than 8,000 lb (3,629 kg) may be thornyheads. No more than 1,500 lb (680 kg) of the thornyheads may be shortspine thornyheads.

(*B*) *South of Cape Mendocino.* The cumulative trip limit for the DTS complex taken and retained south of Cape Mendocino is 50,000 lb (22,680 kg) per vessel per month. Within this cumulative trip limit, no more than 7,000 lb (3,175 kg) may be sablefish, and no more than 8,000 lb (3,629 kg) may be thornyheads. No more than 1,500 lb (680 kg) of the thornyheads may be shortspine thornyheads. (Note: Cape Mendocino, CA, is at 40°30′ N. lat.)

2. *Nontrawl sablefish mop-up season.* In paragraph IV.E.(3)(c), the trip limits for sablefish caught with nontrawl gear in the limited entry fishery are revised as follows:

(i) *Mop-Up Fishery.* Effective 1201 hours September 1, 1995, until 12 noon September 30, 1995, the cumulative trip limit for sablefish caught with nontrawl gear in the limited entry fishery is 5,500 lb (2,495 kg) per vessel.

(Note: The States of Washington, Oregon, and California use a conversion factor of 1.6 to convert dressed sablefish to its round-weight equivalent. Therefore, 5,500 lb (2,495 kg) round weight corresponds to 3,438 lb (1,559 kg) for dressed sablefish.)

(ii) *Daily trip limits.* Effective 1201 hours September 30, 1995, daily trip limits, which apply to sablefish of any size, are reimposed as follows:

(*A*) *North of 36°* N. lat. The daily trip limit for sablefish taken and retained with nontrawl gear north of 36° N. lat. is 300 lb (136 kg).

(*B*) *South of 36°* N. lat. The daily trip limit for sablefish taken and retained with nontrawl gear south of 36° N. lat. is 350 lb (159 kg).

(iii) During the regular and mop-up seasons the trip limit for sablefish smaller than 22 inches (56 cm) total length is 1,500 lb (680 kg) or 3 percent of all legal sablefish on board, whichever is greater, per vessel per fishing trip. (See paragraph IV.A.(6) of the annual management measures at (60 FR 2331, January 9, 1995) regarding length measurement.

Classification

These actions are authorized by the Pacific Coast Groundfish Fishery Management Plan, which governs the harvest of groundfish in the U.S. exclusive economic zone off the coasts of Washington, Oregon, and California. The determination to take these actions is based on the most recent data available. The aggregate data upon which the determinations are based are available for public inspection at the office of the Regional Director (see **ADDRESSES**) during business hours. Because of the need for immediate action to reduce the harvest of shortspine thornyheads and to start the mop-up fishery for sablefish, and because the public had an opportunity to comment on these actions at the August 1995 Council meeting, NMFS has determined that good cause exists for this notice to be published without affording a prior opportunity for public comment or a 30-day delayed effectiveness period. These actions are taken under the authority of 50 CFR 663.(b)(2) and (c)(1)(i)(G), and are exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 31, 1995.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 60, No. 173
Thursday, September 7, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 94–NM–196–AD]

Airworthiness Directives; Airbus Model A310 and A300–600 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Airbus Model A310 and A300–600 series airplanes. This proposal would require a functional flow test and leak test to verify if the pressure reducing valve in the cargo fire extinguishing system is in a serviceable condition, and replacement of any faulty valve with a new valve prior to extended range twin-engine operations of the airplane. This proposal is prompted by a report that, during a scheduled maintenance check, an inoperative pressure reducing valve was found in the cargo fire extinguishing system. The actions specified by the proposed AD are intended to ensure that a faulty pressure reducing valve is not installed, which could result in reduced fire protection of the cargo compartment of the airplane.

DATES: Comments must be received by October 17, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–196–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Airbus Industrie, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Charles Huber, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2589; fax (206) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 94–NM–196–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–196–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, recently notified the FAA that an unsafe condition may exist on certain Model A310 and A300–600 series airplanes. The DGAC advises that it received a report indicating that, during a scheduled maintenance check, an inoperative pressure reducing valve was found in the cargo fire extinguishing system. The valve had accumulated 10,587 total flight hours. The cargo fire extinguishing system is equipped with two fire extinguishing bottles. In a smoke warning incident, bottle number one is manually activated. After 60 minutes, bottle number two is discharged to maintain the required halon concentration for an additional 200 minutes for extended range twin-engine operations (ETOPS), yielding (giving) a total cargo fire protection time of 260 minutes. The discharge of bottle number two is regulated by the pressure reducing valve. A faulty pressure reducing valve, if not corrected, could result in reduced fire protection of the cargo compartment of the airplane from 260 minutes to 60 minutes.

Airbus has issued All Operators Telex AOT 26–13, dated June 28, 1994, which describes procedures for a functional flow test and leak test to verify if the pressure reducing valve in the cargo fire extinguishing system is in a serviceable condition. The DGAC classified this service bulletin as mandatory and issued French airworthiness directive 94–186–164(B), dated August 17, 1994, in order to assure the continued airworthiness of these airplanes in France. In addition, the French airworthiness directive specifies that ETOPS flights are not permitted if a faulty valve is found and not replaced.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design, the proposed AD would require a functional flow test and leak test to verify if the pressure reducing valve in the cargo fire extinguishing system is in a serviceable condition. The tests would be required to be accomplished in accordance with the all operators telex described previously.

The proposed AD would also require that, if a faulty pressure reducing valve is installed, it must be replaced with a new valve prior to further operation of the airplane under ETOPS. The replacement would be required to be accomplished in accordance with the aircraft maintenance manual.

As a result of recent communications with the Air Transport Association (ATA) of America, the FAA has learned that, in general, some operators may misunderstand the legal effect of AD's on airplanes that are identified in the applicability provision of the AD, but that have been altered or repaired in the area addressed by the AD. The FAA points out that all airplanes identified in the applicability provision of an AD are legally subject to the AD. If an airplane has been altered or repaired in the affected area in such a way as to affect compliance with the AD, the owner or operator is required to obtain FAA approval for an alternative method of compliance with the AD, in accordance with the paragraph of each AD that provides for such approvals. A note has been included in this notice to clarify this long-standing requirement.

The FAA estimates that 48 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $2,880, or $60 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Airbus Industrie: Docket 94–NM–196–AD.

Applicability: Model A310 and A300–600 series airplanes on which Airbus Modification 6403 (reference Airbus Service Bulletin A310–26–2010 or A300–600–26–6011) has been installed; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it otherwise has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To ensure that a faulty pressure reducing valve in the cargo fire extinguishing system is not installed, which could result in reduced fire protection of the cargo compartment of the airplane from 260 minutes to 60 minutes, accomplish the following:

(a) Prior to the accumulation of 600 total flight hours after the effective date of this AD, perform a functional flow test and leak test to verify if the pressure reducing valve in the cargo fire extinguishing system is in a serviceable condition, in accordance with paragraph 4.2., Description, of Airbus All Operators Telex AOT 26–13, dated June 28, 1994. If a faulty pressure reducing valve is installed, prior to extended range twin-engine operations (ETOPS), replace it with a new valve, in accordance with the aircraft maintenance manual, reference 26–23–14, Page block 401.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on August 31, 1995.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

---

14 CFR Part 39

[Docket No. 95–NM–53–AD]

Airworthiness Directives; Boeing Model 747–400 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Boeing Model 747–400 series airplanes, that currently requires replacement of electrical wiring to the fuel shutoff valve for each engine. This action would require replacement of the fuel shutoff valve wire and sleeve with a wire in two non-metallic sleeves in the conduit in the struts of each engine. This proposal is prompted by reports of additional occurrences of chafing and shorting of the wiring of the engine fuel shutoff valves. The actions specified by the proposed AD are intended to prevent such chafing and shorting, which could result in the pilot's inability to shut off the supply of fuel in the event of an engine fire.

DATES: Comments must be received by November 1, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 95–NM–53–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Stephen Oshiro, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–2793; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments,

in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 95–NM–53–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 95–NM–53–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

On June 12, 1989, the FAA issued AD 89–14–04, amendment 39–6246 (54 FR 27157, June 28, 1989), applicable to certain Boeing Model 747–400 series airplanes, to require replacement of electrical wiring to the fuel shutoff valve for each engine. That action was prompted by reports of the fuel shutoff valve wiring shorting to the surrounding electrical conduit, which resulted in circuit breaker tripping and inability to operate the associated fuel shutoff valve. The requirements of that AD are intended to preserve the pilot's ability to shut off the supply of fuel in the event of an engine fire.

Since the issuance of that AD, the FAA has received reports of additional occurrences of chafing and shorting of the wiring of the engine fuel shutoff valves on Model 747–400 series airplanes. Subsequently, Boeing developed a new installation consisting of a wire in two sleeves (non-metallic, open weave braided sleeve inside industrial wall thickness teflon) that will improve the protection of the fuel shutoff valve wire.

The FAA has reviewed and approved Boeing Alert Service Bulletin 747–28A2186, dated January 19, 1995, which describes procedures for replacement of the fuel shutoff valve wire and sleeve with a wire in two non-metallic sleeves in the conduit in the struts of each engine.

The FAA has determined that accomplishment of this replacement of the fuel shutoff valve wire and sleeve with a wire with two non-metallic sleeves in the conduit in the struts of each engine will positively address the unsafe condition identified as inability to shut off the supply of fuel to an engine.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 89–14–04 to require replacement of the wire and sleeve with a single wire in two non-metallic sleeves in the conduit in the struts of each engine. The actions would be required to be accomplished in accordance with the alert service bulletin described previously.

The modification that was previously required by AD 89–14–04 will effectively be removed when the modification required by this proposed AD is installed. Additionally, those airplanes on which the previously-required modification had not been accomplished will require no additional work with the installation of the new proposed modification.

As a result of recent communications with the Air Transport Association (ATA) of America, the FAA has learned that, in general, some operators may misunderstand the legal effect of AD's on airplanes that are identified in the applicability provision of the AD, but that have been altered or repaired in the area addressed by the AD. The FAA points out that all airplanes identified in the applicability provision of an AD are legally subject to the AD. If an airplane has been altered or repaired in the affected area in such a way as to affect compliance with the AD, the owner or operator is required to obtain FAA approval for an alternative method of compliance with the AD, in accordance with the paragraph of each AD that provides for such approvals. A note has been included in this notice to clarify this long-standing requirement.

There are approximately 311 Model 747–400 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 38 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 80 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Required parts would cost approximately $673 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $207,974, or $5,473 per airplane.

The total cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–6246 (54 FR 27157, June 28, 1989), and by adding a new airworthiness directive (AD), to read as follows:

Boeing: Docket 95–NM–53–AD. Supersedes AD 89–14–04, Amendment 39–6246.

Applicability: Model 747–400 series airplanes; line positions 696 through 1046 inclusive, except airplane variable numbers RT502 and RU032 (airplane serial numbers 24062 and 25780, respectively); certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent the inability to shut off the supply of fuel in the event of an engine fire, accomplish the following:

(a) Within 12 months after the effective date of this AD, replace the fuel shutoff valve wire and sleeve with a wire in two non-metallic sleeves in the conduit in the struts of each engine, in accordance with Boeing Alert Service Bulletin 747–28A2186, dated January 19, 1995.

Note 2: Replacements accomplished prior to the effective date of this amendment in accordance with Boeing Alert Service Bulletin 747–54A2157, dated January 12, 1995, or Revision 1, dated August 3, 1995; or Boeing Alert Service Bulletin 747–54A2156, dated December 15, 1994, or Revision 1, dated July 20, 1995; are considered acceptable for compliance with the replacements specified in this amendment.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on August 31, 1995.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 94–NM–244–AD]

Airworthiness Directives; McDonnell Douglas Model DC–10 Series Airplanes and KC–10A (Military) Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking; reopening of comment period.

SUMMARY: This document revises an earlier proposed airworthiness directive (AD), which would have superseded an existing AD that is applicable to McDonnell Douglas Model DC–10 series airplanes and KC–10A (military) airplanes. The existing AD currently requires the implementation of a program of structural inspections to detect and correct fatigue cracking in order to ensure the continued airworthiness of these airplanes as they approach the manufacturer's original fatigue design life goal. The previously proposed action would have required, among other things, clarification of some Principle Structural Elements (PSE) and some non-destructive inspection (NDI) procedures. The previously proposed action was prompted by new data submitted by the manufacturer indicating that certain revisions to the program are necessary in order to clarify some PSE's and some NDI procedures. This action revises the proposed rule by deleting the requirement to perform visual inspections of Fleet Leader Operator Sampling (FLOS) PSE's. The actions specified by this proposed AD are intended to prevent fatigue cracking that could compromise the structural integrity of these airplanes.

DATES: Comments must be received by October 2, 1995.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–244–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846–1771, Attention: Business Unit Manager, Contract Data Management C1–255 (35–22) This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California.

FOR FURTHER INFORMATION CONTACT: Maureen Moreland, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (310) 627–5238; fax (310) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 94–NM–244–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 94–NM–244–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to add an airworthiness directive (AD), applicable to McDonnell Douglas Model DC–10 series airplanes and KC–10A (military) airplanes, was published as a notice of proposed rulemaking (NPRM) in the **Federal Register** on April 17, 1995 (60 FR 19185). That NPRM would have required the implementation of a program of structural inspections to detect and correct fatigue cracking in order to ensure the continued airworthiness of these airplanes as they approach the manufacturer's original fatigue design life goal. That NPRM was prompted by new data submitted by the manufacturer indicating that certain revisions to the program are necessary in order to clarify some Principle Structural Elements (PSE) and some non-destructive inspection (NDI) procedures. Fatigue cracking in PSE's could compromise the structural integrity of these airplanes.

Since the issuance of that NPRM, the FAA has received several comments from the manufacturer that have caused the FAA to reconsider its position on certain aspects of the proposed rule.

Changes to the Proposal

McDonnell Douglas requests a revision of paragraph (b)(1) of the proposal for purposes of clarification. The manufacturer notes that the proposal states that operators are required to inspect aircraft before the threshold (N_{th}); however, the proposal does not clearly indicate that operators do not receive credit for these inspections in the Supplemental Inspection Document (SID) program, unless the aircraft has exceeded one-half of that threshold ($N_{th}/2$). The FAA concurs. The FAA has revised proposed paragraph (b)(1) to indicate that the inspections are to be performed prior to reaching the threshold (N_{th}), but no earlier than $N_{th}/2$.

McDonnell Douglas also requests the deletion of the requirement to visually inspect fleet leader-operator sampling (FLOS) PSE's that are proposed in paragraph (b)(3). The manufacturer states that these requirements are redundant to those required by AD 92–22–09 R1, amendment 39–8590 (58 FR 32278, June 9, 1993), which requires the implementation of a corrosion prevention and control program to inspect all primary structures, including all PSE's.

The FAA concurs. Paragraph (b)(3) of this supplemental NPRM [which was designated paragraph (b)(2) in the original NPRM] has been revised to indicate that these visual inspections are not required. However, the visual inspections that are part of the NDI procedures specified in Section 2 of Volume II of the SID are still required by this AD action. Additionally, paragraph (b)(4) from the originally proposed rule, which would have required general visual inspections, has been deleted from this supplemental NPRM since the requirement to perform visual inspections of FLOS PSE's are no longer necessary. Therefore, references to Section 4, "Normal Maintenance Visual Inspections," of Volume II of the SID have been removed since those inspections are no longer required.

Since these changes significantly revise the originally proposed rule, the FAA has determined that it is necessary to reopen the comment period to provide additional opportunity for public comment.

Although other comments were received in response to the original NPRM, those comments, as well as any others received in response to this supplemental NPRM, will be addressed in the final rule.

Cost Impact

There are approximately 419 Model DC–10 series airplanes and KC–10A (military) airplanes of the affected design in the worldwide fleet. The FAA estimates that 249 airplanes of U.S. registry and 13 U.S. operators would be affected by this proposed AD.

Incorporation of the SID program into an operator's maintenance program, as required by AD 93–17–09 is estimated to necessitate 1,270 work hours (per operator), at an average labor rate of $60 per work hour. Based on these figures, the cost to the 13 affected U.S. operators to incorporate the SID program is estimated to be $990,600.

The incorporation of the revised procedures proposed in this AD action would require approximately 20 additional work hours per operator to accomplish, at an average labor rate of $60 per work hour. Based on these figures, the cost to the 13 affected U.S. operators to incorporate these revised procedures into the SID program into an operator's maintenance program is estimated to be $15,600.

The recurring inspection costs, as required by AD 93–17–09, are estimated to be 365 work hours per airplane per year, at an average labor rate of $60 per work hour. Based on these figures, the recurring inspection costs required by AD 93–17–09 are estimated to be $21,900 per airplane, or $5,453,100 for the affected U.S. fleet.

Since no new recurring inspection procedures have been added to the program by this proposed AD action, there would be no additional economic burden on affected operators to perform additional recurrent inspections.

Based on the above figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $5,468,700 for the first year, and $5,453,100 for each year thereafter. These "total cost impact" figures assume that no operator has yet accomplished any of the requirements of this AD. However, it can be reasonably assumed that a majority of the affected operators have already initiated the SID program (as required by AD 93–17–09).

Additionally, the number of required work hours for each proposed inspection (and the SID program), as indicated above, is presented as if the accomplishment of those actions were to be conducted as "stand alone" actions. However, in actual practice, these actions for the most part will be accomplished coincidentally or in combination with normally scheduled airplane inspections and other maintenance program tasks. Therefore, the actual number of necessary additional work hours will be minimal in many instances. Further, any cost associated with special airplane scheduling can be expected to be minimal.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–8680 (58 FR 54949, October 25, 1993), and by adding a new airworthiness directive (AD), to read as follows:

McDonnell Douglas: Docket 94–NM–244–AD. Supersedes AD 93–17–09, Amendment 39–8680.

Applicability: Model DC–10 series airplanes and KC–10A (military) airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To ensure the continuing structural integrity of these airplanes, accomplish the following:

(a) Within 6 months after November 24, 1993 (the effective date of AD 93–17–09, amendment 39–8680), incorporate a revision into the FAA-approved maintenance inspection program which provides for inspection(s) of the Principal Structural Elements (PSE's) defined in Section 2 of Volume I of McDonnell Douglas Report No. L26–012, "DC–10 Supplemental Inspection Document (SID)," Revision 3, dated December 1992, in accordance with Section 2 of Volume III–92, dated October 1992, of the SID. The non-destructive inspection (NDI) techniques set forth in Section 2 and Section 4 of Volume II, Revision 3, dated December 1992, of the SID provide acceptable methods for accomplishing the inspections required by this paragraph. All inspection results (negative or positive) must be reported to McDonnell Douglas, in accordance with the instructions contained in Section 2 of Volume III–92, dated October 1992, of the SID. Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120–0056.

(1) For those Fleet Leader Operator Sampling (FLOS) PSE's that do not have a Normal Maintenance Visual Inspection specified in Section 4 of Volume II, Revision 3, dated December 1992, of the SID, the procedure for general visual inspection is as follows: Perform an inspection of the general PSE area for cleanliness, presence of foreign objects, security of parts, cracks, corrosion, and damage.

(2) For PSE's 53.10.031E/.032E, 53.10.047E/.048E, and 57.10.029E/.030E: The ENDDATE for these PSE's is October 1993. (For these PSE's disregard the June 1993 ENDDATE specified in Section 2 of Volume III–92, dated October 1992, of the SID.)

(b) Within 6 months after the effective date of this AD, replace the revision of the FAA-approved maintenance inspection program required by paragraph (a) of this AD with a revision that provides for inspection(s) of the PSE's defined in Section 2 of Volume I of McDonnell Douglas Report No. L26–012, "DC–10 Supplemental Inspection Document (SID)," Revision 5, dated October 1994, in accordance with Section 2 of Volume III–94, dated November 1994, of the SID. The NDI techniques set forth in Section 2 of Volume II, Revision 5, dated October 1994, of the SID provide acceptable methods for accomplishing the inspections required by this paragraph.

(1) Prior to reaching the threshold (N_{th}), but no earlier than one-half of the threshold ($N_{th}/2$), specified for all PSE's listed in Volume III–94, dated November 1994, of the SID, inspect each PSE sample in accordance with the NDI procedures set forth in Section 2 of Volume II, Revision 5, dated October 1994. Thereafter, repeat the inspection for that PSE at intervals not to exceed DNDI/2 of the NDI procedure that is specified in Volume III–94, dated November 1994, of the SID.

(2) This AD does not require visual inspections of FLOS PSE's on airplanes listed in Volume III–94, dated November 1994, of the SID planning data at least once during the specified inspection interval, in accordance with Section 2 of Volume III–94, dated November 1994, of the SID.

(3) For PSE's 53.10.055/.056E, 55.10.013/.014B, 53.10.005/.006E, 53.10.031/.032E, 53.10.047/.048E, 57.10.029/.030E: The EDATE for these PSE's is June 1998. (For these PSE's, disregard the June 1996 EDATE specified in Section 2, of Volume III–94, dated November 1994, of the SID.)

(4) All inspection results (negative or positive) must be reported to McDonnell Douglas in accordance with the instructions contained in Section 2 of Volume III–94, dated November 1994, of the SID. Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120–0056.

(c) Any cracked structure detected during the inspections required by paragraph (a) or (b) of this AD must be repaired before further flight, in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note 1: Requests for approval of any PSE repair that would affect the FAA-approved maintenance inspection program required by this AD should include a damage tolerance assessment for that PSE repair.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles ACO. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

Note 3: Alternative methods of compliance previously granted for AD 93–17–09, amendment 39–8680, continue to be considered as acceptable alternative methods of compliance with this amendment.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on August 31, 1995.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Airspace Docket No. 95–AAL–2]

Proposed Amendment of G–8 and V–328; Alaska

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the designations of Colored Federal Airway G–8 and Alaskan Federal Airway V–328. The FAA is proposing to realign Colored Federal Airway G–8 to avoid certain restricted areas. Alaskan Federal Airway V–328 would be realigned from Dillingham, AK, and Kipnuk, AK, resulting in a lower minimum en route altitude (MEA) of 9,000 feet. This action would enhance the flow of air traffic.

DATES: Comments must be received on or before September 29, 1995.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Air Traffic Division, AAL–500, Docket No. 95–AAL–2, Federal Aviation Administration, 222 West 7th Avenue, #14, Anchorage, AK 99533.

The official docket may be examined in the Rules Docket, Office of the Chief Counsel, room 916, 800 Independence Avenue, SW., Washington, DC, weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Norman W. Thomas, Airspace and Obstruction Evaluation Branch (ATP–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9230.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 95–AAL–2." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–220, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3485. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to amend the designations of Colored Federal Airway G–8 and Alaskan Federal Airway V–328. This action would realign Colored Federal Airway G–8 to avoid restricted areas R–2203A, R–2203B, and R–2203C. Realigning V–328, as a direct route between Dillingham, AK, and Kipnuk, AK, would result in a lower MEA of 9,000 feet. This proposal would enhance the flow of air traffic. Green Colored Federal airways are published in paragraph 6009(a) and Alaskan Federal airways are published in paragraph 6010(b) of FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The Colored Federal airway and the Alaskan Federal airway listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9B, Airspace Designations and Reporting Points, dated July 18, 1994, and effective September 16, 1994, is amended as follows:

Paragraph 6009(a)—Green Federal Airways

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[INTL–0075–92]

RIN 1545–AR31

Definition of Foreign Base Company Income and Foreign Personal Holding Company Income of a Controlled Foreign Corporation

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed Income Tax Regulations relating to the definitions of subpart F income and foreign personal holding company income of a controlled foreign corporation and the allocation of deficits for purposes of computing the deemed-paid foreign tax credit. These proposed regulations are necessary to provide guidance that coordinates with guidance provided in final regulations under section 954, published elsewhere in this issue of the **Federal Register**. These regulations will affect United States shareholders of controlled foreign corporations. This document also contains a notice of hearing on these regulations.

DATES: Written comments must be received by December 6, 1995. Outlines of topics to be discussed at the public hearing scheduled for January 4, 1996 at 10 a.m. must be received by December 14, 1995.

ADDRESSES: Send submissions to: CC:DOM:CORP:T:R (INTL–0075–92), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington DC 20044. In the alternative, submissions may be hand delivered between the hours of 8 a.m. and 5 p.m. to: CC:DOM:CORP:T:R (INTL–0075–92), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington DC. The public hearing will be held in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Valerie Mark, (202) 622–3840; concerning submissions and the hearing, Michael Slaughter (202) 622–7190 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This notice of proposed rulemaking does not contain collections of information and, therefore, it has not been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act (44 U.S.C. 3504(h)).

Background

This document contains proposed regulations amending the Income Tax Regulations (26 CFR Part 1) under sections 952, 954(c) and 960 of the Internal Revenue Code. These regulations are also issued under authority contained in section 7805 of the Internal Revenue Code. In final regulations under section 954, published elsewhere in this issue of the **Federal Register**, the section relating to the treatment of tax-exempt interest under the foreign personal holding company income rules was reserved. These proposed regulations would provide rules for the treatment of tax-exempt interest and would also provide guidance under sections 952 and 960 to coordinate with the final regulations.

Explanation of Provisions

Sections 1.952–1 (e) and (f) and 1.960–1(i)

Section 1.954–1(c)(1)(ii), published elsewhere in this issue of the **Federal Register**, provides generally that if the amount in any category of foreign base company income or foreign personal holding company income is less than zero, the loss may not reduce any other category of foreign base company income or foreign personal holding company income except by operation of the earnings and profits limitation of section 952(c)(1). The earnings and profits limitation will apply when subpart F income exceeds current earnings and profits. This notice of proposed rulemaking provides rules under section 952(c)(1)(A) to determine how the excess of subpart F income over current earnings and profits will reduce categories of foreign base company income or foreign personal holding company income.

These rules apply both to determine the amount that is included in the U.S. shareholder's gross income in each category of subpart F income under section 951(a)(1)(A) from each section 904(d) separate category, and to determine the subpart F category and the section 904(d) separate category from which an amount will be recharacterized as subpart F income under section 952(c)(2). Separate rules are provided in this notice of proposed rulemaking to compute post-1986 undistributed earnings under section 960.

Section 1.952–1(e) provides that for post-1986 years, when the subpart F income of a controlled foreign corporation exceeds its current earnings and profits, this excess, first, proportionately reduces subpart F income in each separate category in which current earnings and profits are zero or less than zero, second, proportionately reduces subpart F income in each separate category in which subpart F income exceeds current earnings and profits, and third, proportionately reduces subpart F income in other separate categories. If a single separate category contains more than one category of subpart F income, the categories of subpart F income in the separate category will be proportionately reduced.

Section 1.952–1(f) provides that the amount and category of subpart F income in each separate category that is reduced by operation of the earnings and profits limitation, as determined under paragraph (e), constitutes a recapture account. In any year in which earnings and profits exceed subpart F income, the recapture accounts in each separate category of the corporation will be recharacterized, on a proportionate basis, as subpart F income to the extent of this excess. An amount that is recharacterized as subpart F income is treated as income in the same separate category as the recapture account from which it was derived.

Under paragraph (f), a recapture account is reduced either when amounts in the account are recharacterized as subpart F income or when the corporation makes an actual distribution from the separate category containing the recapture account. A distribution out of section 959(c)(3) earnings and profits is treated as made first on a proportionate basis out of the recapture accounts in each separate category. If a distribution from earnings and profits described in section 959(c)(3) occurs in the same year that an amount is recharacterized, the recharacterization rules will apply first. Examples are provided to illustrate the rules of paragraphs (e) and (f).

Regulations are proposed under section 960 that apply the principles of section 902 to determine the portion of the controlled foreign corporation's post-1986 foreign income taxes deemed to be paid by a United States corporate shareholder in connection with a subpart F inclusion. If the corporate shareholder computes an amount under both sections 902 and 960 for a taxable year, section 960 is applied first.

These proposed regulations also provide rules to determine how deficits in post-1986 undistributed earnings are allocated for purposes of sections 902 and 960. In accordance with the approach of Notice 88–70 (1988–2 C.B 369), § 1.960–1(i)(4) provides that a post-1986 accumulated deficit in a separate category is allocated pro rata against post-1986 undistributed earnings in other separate categories to compute post-1986 undistributed earnings. The deficit does not permanently reduce earnings in these other separate categories. Rather, after deemed-paid taxes are computed, it is carried forward in the same separate category in which it was incurred. Paragraph (i)(3) clarifies that the numerator of the deemed-paid credit fraction cannot exceed the denominator because deemed-paid taxes may not exceed taxes paid or accrued by the controlled foreign corporation. Examples are provided to illustrate these rules.

The proposed regulations attempt to coordinate, to the extent possible, the allocation of deficits for purposes of determining the amounts of subpart F inclusions and deemed-paid taxes out of the controlled foreign corporation's separate foreign tax credit limitation categories under sections 952, 954, and 960. Complete coordination is not possible in all cases, because subpart F income and the earnings and profits limitation of section 952(c)(1)(A) are determined on the basis of earnings and profits of only the current year, whereas deemed-paid taxes are calculated under section 960 on the basis of multi-year pools of earnings and profits and taxes. In addition, potential differences in the calculation of income and earnings and profits, cf. section 952(c)(3), complicate the coordination.

The proposed rules attempt to minimize the incidence of subpart F inclusions out of separate categories with no current earnings which, in the absence of sufficient accumulated earnings, may carry no deemed-paid taxes. Comments are requested as to whether the proposed allocation methods or some alternative approach would best achieve appropriate foreign tax credit results.

Section 1.954–2(b)(3)

Under § 1.954–2T(b)(6), interest income that is exempt from tax under section 103 is included in the foreign personal holding company income of the controlled foreign corporation. However, the net foreign base company income that is attributable to tax-exempt interest is treated as tax-exempt interest in the hands of the United States shareholder upon a deemed distribution under subpart F. Therefore, for regular tax purposes, the tax-exempt interest is not currently included in the gross income of the United States shareholder under subpart F. However, the deemed distribution of tax-exempt interest may subject the United States shareholder to the alternative minimum tax.

Section 1.954–2(b)(3) of the proposed regulations would amend the rule in the temporary regulations to provide that foreign personal holding company income includes interest income that is exempt from tax under section 103. The tax-exempt interest would not retain its character as such in the hands of the United States shareholder upon a deemed distribution under subpart F. This proposed rule closely parallels the domestic rule for tax-exempt interest. The controlled foreign corporation realizes the tax benefit associated with the receipt of interest income described in section 103 because no United States withholding tax is collected on the income when it is paid to the controlled foreign corporation. As in the domestic context, however, this tax benefit is limited to the corporate level and is not retained when the tax-exempt interest is distributed to the United States shareholders or included in their gross income under subpart F. This rule simplifies the interaction of the tax-exempt interest and alternative minimum tax provisions, and avoids the double-taxation and administrative problems associated with the current rule.

These regulations are proposed to be effective for taxable years of the foreign corporation beginning after 60 days after the date these regulations are published as final regulations in the **Federal Register**.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedures Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (signed original and eight (8) copies) that are timely submitted to the IRS. All comments will be available for public inspection and copying.

A public hearing has been scheduled for January 4, 1996, at 10 a.m. in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue NW., Washington DC. Because of access restrictions, visitors will not be admitted beyond the building lobby more than 15 minutes before the hearing starts.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons that wish to present oral comments at the hearing must submit written comments by December 6, 1995 and submit an outline of topics to be discussed and time to be devoted to each topic (signed original and eight (8) copies) by December 14, 1995.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information. The principal authors of these regulations are Barbara Felker and Valerie Mark of the Office of the Associate Chief Counsel (International), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority for Part 1 is amended by adding the following citation in numerical order to read as follows:

Authority: 26 U.S.C. 7805. * * *

Section 1.960–1 also issued under 26 U.S.C. 960(a). * * *

Par. 2. Section 1.952–1 is amended by adding paragraphs (e) and (f) to read as follows:

§ 1.952–1 Subpart F income defined.

* * * * *

(e) *Application of current earnings and profits limitation*—(1) *In general.* If the subpart F income (as defined in section 952(a)) of a controlled foreign corporation exceeds the foreign corporation's earnings and profits for the taxable year, the subpart F income includible in the income of the corporation's United States shareholders is reduced under section 952(c)(1)(A) in accordance with the following rules. The excess of subpart F income over current year earnings and profits shall—

(i) First, proportionately reduce subpart F income in each separate category of the controlled foreign corporation, as defined in § 1.904–5(a)(1), in which current earnings and profits are zero or less than zero;

(ii) Second, proportionately reduce subpart F income in each separate category in which subpart F income exceeds current earnings and profits; and

(iii) Third, proportionately reduce subpart F income in other separate categories.

(2) *Allocation to a category of subpart F income.* An excess amount that is allocated under paragraph (e)(1) of this section to a separate category must be further allocated to a category of subpart F income if the separate category contains more than one category of subpart F income described in section 952(a) or, in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*). In such case, the excess amount that is allocated to the separate category must be allocated to the various categories of subpart F income within that separate category on a proportionate basis.

(3) *Recapture of subpart F income reduced by operation of earnings and profits limitation.* Any amount in a category of subpart F income described in section 952(a) or, in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*) that is reduced by operation of the current year earnings and profits limitation of section 952(c)(1)(A) and this paragraph (e) shall be subject to recapture in a subsequent year under the rules of section 952(c)(2) and paragraph (f) of this section.

(4) *Coordination with sections 953 and 954.* The rules of this paragraph (e) shall be applied after the application of sections 953 and 954 and the regulations under those sections, except as provided in § 1.954–1(d)(4)(ii).

(5) *Earnings and deficits retain separate limitation character.* The income reduction rules of paragraph (e)(1) of this section shall apply only for purposes of determining the amount of an inclusion under section 951(a)(1)(A) from each separate category as defined in § 1.904–5(a)(1) and the separate categories in which recapture accounts are established under section 952(c)(2) and paragraph (f) of this section. For rules applicable in computing post-1986 undistributed earnings, see generally section 902 and the regulations under that section. For rules relating to the allocation of deficits for purposes of computing foreign taxes deemed paid under section 960 with respect to an inclusion under section 951(a)(1)(A), see § 1.960–1(i).

(f) *Recapture of subpart F income in subsequent taxable year*—(1) *In general.* If a controlled foreign corporation's subpart F income for a taxable year is reduced under the current year earnings and profits limitation of section 952(c)(1)(A) and paragraph (e) of this section, recapture accounts will be established and subject to recharacterization in any subsequent taxable year to the extent the recapture accounts were not previously recharacterized or distributed, as provided in paragraphs (f) (2) and (3) of this section.

(2) *Rules of recapture*—(i) *Recapture account.* If a category of subpart F income described in section 952(a) or, in the case of foreign base company income, described in § 1.954–1(c)(1)(iii)(A) (*1*) or (*2*) is reduced under the current year earnings and profits limitation of section 952(c)(1)(A) and paragraph (e) of this section for a taxable year, the amount of such reduction shall constitute a recapture account.

(ii) *Recapture.* Each recapture account of the controlled foreign corporation will be recharacterized, on a proportionate basis, as subpart F income in the same separate category (as defined in § 1.904–5(a)(1)) as the recapture account to the extent that current year earnings and profits exceed subpart F income in a taxable year. The United States shareholder must include his pro rata share (determined under the rules of § 1.951–1(e)) of each recharacterized amount in income as subpart F income in such separate category for the taxable year.

(iii) *Reduction of recapture account and corresponding earnings.* Each recapture account, and post-1986 undistributed earnings in the separate category containing the recapture account, will be reduced in any taxable year by the amount which is recharacterized under paragraph (f)(2)(ii) of this section. In addition, each recapture account, and post-1986 undistributed earnings in the separate category containing the recapture account, will be reduced in the amount of any distribution out of that account (as determined under the ordering rules of section 959(c) and paragraph (f)(3)(ii) of this section).

(3) *Distribution ordering rules*—(i) *Coordination of recapture and distribution rules.* If a controlled foreign corporation distributes an amount out of earnings and profits described in section 959(c)(3) in a year in which current year earnings and profits exceed subpart F income and there is an amount in a recapture account for such year, the recapture rules will apply first.

(ii) *Distributions reduce recapture accounts first.* Any distribution made by a controlled foreign corporation out of earnings and profits described in section 959(c)(3) shall be treated as made first on a proportionate basis out of the recapture accounts in each separate category to the extent thereof (even if the amount in the recapture account exceeds post-1986 undistributed earnings in the separate category containing the recapture account). Any remaining distribution shall be treated as made on a proportionate basis out of the remaining earnings and profits of the controlled foreign corporation in each separate category. See section 904(d)(3)(D).

(4) *Examples.* The application of paragraphs (e) and (f) of this section may be illustrated by the following examples:

Example 1. (i) *A*, a U.S. person, is the sole shareholder of *CFC*, a controlled foreign corporation formed on January 1, 1996, whose functional currency is the *u*. In 1996, *CFC* earns 100u of foreign base company sales income that is general limitation income described in section 904(d)(1)(I) and incurs a (200u) loss attributable to activities that would have produced general limitation income that is not subpart F income. In 1996

CFC also earns 100u of foreign personal holding company income that is passive income described in section 904(d)(1)(A), and 100u of foreign personal holding company income that is dividend income subject to a separate limitation described in section 904(d)(1)(E) for dividends from a noncontrolled section 902 corporation. *CFC*'s subpart F income for 1996, 300u, exceeds *CFC*'s current earnings and profits, 100u, by 200u. Under section 952(c)(1)(A) and paragraph (e) of this section, subpart F income is limited to *CFC*'s current earnings and profits of 100u, all of which is included in *A*'s gross income under section 951(a)(1)(A). The 200u of *CFC*'s 1996 subpart F income that is not included in *A*'s income in 1996 by reason of section 952(c)(1)(A) is subject to recapture under section 952(c)(2) and paragraph (f) of this section.

(ii) For purposes of determining the amount and type of income included in *A*'s gross income and the amount and type of income in *CFC*'s recapture account, the rules of paragraphs (e)(1) and (2) of this section apply. Under paragraph (e)(1)(i), the amount by which *CFC*'s subpart F income exceeds its earnings and profits for 1996, 200u, first reduces from 100u to 0 *CFC*'s subpart F income in the general limitation category, which has a current year deficit of (100u) in earnings and profits. Next, under paragraph (e)(1)(iii) of this section, the remaining 100u by which *CFC*'s 1996 subpart F income exceeds earnings and profits is applied proportionately to reduce *CFC*'s subpart F income in the separate categories for passive income (100u) and dividends from the noncontrolled section 902 corporation (100u). Thus, A includes 50u of passive limitation/foreign personal holding company income and 50u of dividends from the noncontrolled section 902 corporation/foreign personal holding company income in gross income in 1996. *CFC* has 100u in its general limitation/foreign base company sales income recapture account attributable to the 100u of foreign base company sales income that is not included in *A*'s income by reason of the earnings and profits limitation of section 952(c)(1)(A). *CFC* also has 50u in its passive limitation recapture account, all of which is attributable to foreign personal holding company income, and 50u in its recapture account for dividends from the noncontrolled section 902 corporation, all of which is attributable to foreign personal holding company income.

(iii) For purposes of computing post-1986 undistributed earnings, the rules of sections 902 and 960, including the rules of § 1.960–1(i), apply. Under § 1.960–1(i), the general limitation deficit of (100u) is allocated proportionately to reduce passive limitation earnings of 100u and noncontrolled section 902 dividend earnings of 100u. Thus, passive limitation earnings are reduced by 50u to 50u (100u passive limitation earnings/200u total earnings in positive separate categories ×(100u) general limitation deficit =50u reduction), and the noncontrolled section 902 corporation earnings are reduced by 50u to 50u (100u noncontrolled section 902 corporation earnings/200u total earnings in positive separate categories ×(100u) general limitation deficit=50u reduction). All of *CFC*'s post-1986 foreign income taxes with respect to passive limitation income and dividends from the noncontrolled section 902 corporation are deemed paid by A under section 960 with respect to the subpart F inclusions (50u inclusion/50u earnings in each separate category). After the inclusion and deemed-paid taxes are computed, at the close of 1996 *CFC* has a (100u) deficit in general limitation earnings (100u subpart F earnings + (200u) nonsubpart F loss), 50u of passive limitation earnings (100u of earnings attributable to foreign personal holding company income − 50u inclusion) with a corresponding passive limitation/foreign personal holding company income recapture account of 50u, and 50u of earnings subject to a separate limitation for dividends from the noncontrolled section 902 corporation (100u earnings − 50u inclusion) with a corresponding noncontrolled section 902 corporation/foreign personal holding company income recapture account of 50u.

Example 2. (i) The facts are the same as in *Example 1* with the addition of the following facts. In 1997, *CFC* earns 100u of foreign base company sales income that is general limitation income and 100u of foreign personal holding company income that is passive limitation income. In addition, *CFC* incurs (10u) of expenses that are allocable to its separate limitation for dividends from the noncontrolled section 902 corporation. Thus, *CFC*'s subpart F income for 1997, 200u, exceeds *CFC*'s current earnings and profits, 190u, by 10u. Under section 952(c)(1)(A) and paragraph (e) of this section, subpart F income is limited to *CFC*'s current earnings and profits of 190u, all of which is included in *A*'s gross income under section 951(a)(1)(A).

(ii) For purposes of determining the amount and type of income included in *A*'s gross income and the amount and type of income in *CFC*'s recapture accounts, the rules of paragraphs (e) (1) and (2) of this section apply. While *CFC*'s general limitation post-1986 undistributed earnings for 1997 are 0 ((100u) opening balance + 100u subpart F income), *CFC*'s general limitation subpart F income (100u) does not exceed its general limitation current earnings and profits (100u) for 1997. Accordingly, under paragraph (e)(1)(iii) of this section, the amount by which *CFC*'s subpart F income exceeds its earnings and profits for 1997, 10u, is applied proportionately to reduce *CFC*'s subpart F income in the separate categories for general limitation income, 100u, and passive income, 100u. Thus, *A* includes 95u of general limitation foreign base company sales income and 95u of passive limitation foreign personal holding company income in gross income in 1997. At the close of 1997 *CFC* has 105u in its general limitation/foreign base company sales income recapture account (100u from 1996 + 5u from 1997), 55u in its passive limitation/foreign personal holding company income recapture account (50u from 1996 + 5u from 1997), and 50u in its dividends from the noncontrolled section 902 corporation/foreign personal holding company income recapture account (all from 1996).

(iii) For purposes of computing post-1986 undistributed earnings in each separate category, the rules of sections 902 and 960, including the rules of § 1.960–1(i), apply. Thus, post-1986 undistributed earnings (or an accumulated deficit) in each separate category are increased (or reduced) by current earnings and profits or current deficits in each separate category. The accumulated deficit in *CFC*'s general limitation earnings and profits (100u) is reduced to 0 by the addition of 100u of 1997 earnings and profits. *CFC*'s passive limitation earnings of 50u are increased by 100u to 150u, and *CFC*'s noncontrolled section 902 corporation earnings of 50u are decreased by (10u) to 40u. After the addition of current year earnings and profits and deficits to the separate categories there are no deficits remaining in any separate category. Thus, the allocation rules of § 1.960–1(i)(4) do not apply in 1997. Accordingly, in determining the post-1986 foreign income taxes deemed paid by *A*, post-1986 undistributed earnings in each separate category are unaffected by earnings in the other categories. Foreign taxes deemed paid under section 960 for 1997 would be determined as follows for each separate category: with respect to the inclusion of 95u of foreign base company sales income out of general limitation earnings, the section 960 fraction is 95u inclusion/0 total earnings; with respect to the inclusion of 95u of passive limitation income the section 960 fraction is 95u inclusion/150u passive earnings. Thus, no general limitation taxes would be associated with the inclusion of the general limitation earnings because there are no accumulated earnings in the general limitation category. After the deemed-paid taxes are computed, at the close of 1997 *CFC* has a (95u) deficit in general limitation earnings and profits ((100u) opening balance + 100u current earnings—95u inclusion), 55u of passive limitation earnings and profits (50u opening balance + 100u current foreign personal holding company income—95u inclusion), and 40u of earnings and profits subject to the separate limitation for dividends from the noncontrolled section 902 corporation (50u opening balance + (10u) expense).

Example 3. (i) *A*, a U.S. person, is the sole shareholder of *CFC*, a controlled foreign corporation whose functional currency is the *u*. At the beginning of 1996, *CFC* has post-1986 undistributed earnings of 275u, all of which are general limitation earnings described in section 904(d)(1)(I). *CFC* has no previously-taxed earnings and profits described in section 959 (c)(1) or (c)(2). In 1996, *CFC* has a (200u) loss in the shipping category described in section 904(d)(1)(D), 100u of foreign personal holding company income that is passive income described in section 904(d)(1)(A), and 125u of general limitation manufacturing earnings that are not subpart F income. *CFC*'s subpart F income for 1996, 100u, exceeds *CFC*'s current earnings and profits, 25u, by 75u. Under section 952(c)(1)(A) and paragraph (e) of this section, subpart F income is limited to *CFC*'s current earnings and profits of 25u, all of which is included in *A*'s gross income under section 951(a)(1)(A). The 75u of *CFC*'s 1996 subpart F income that is not included in *A*'s income in 1996 by reason of section 952(c)(1)(A) is subject to recapture under section 952(c)(2) and paragraph (f) of this section.

(ii) For purposes of determining the amount and type of income included in *A*'s gross income and the amount and type of income in *CFC*'s recapture account, the rules of paragraphs (e) (1) and (2) of this section apply. Under paragraph (e)(1) of this section, the amount of *CFC*'s subpart F income in excess of earnings and profits for 1996, 75u, reduces the 100u of passive limitation foreign personal holding company income. Thus, *A* includes 25u of passive limitation foreign personal holding company income in gross income, and *CFC* has 75u in its passive limitation/foreign personal holding company income recapture account.

(iii) For purposes of computing post-1986 undistributed earnings in each separate category the rules of sections 902 and 960, including the rules of § 1.960–1(i), apply. Under § 1.960–1(i), the shipping limitation deficit of (200u) is allocated proportionately to reduce general limitation earnings of 400u and passive limitation earnings of 100u. Thus, general limitation earnings are reduced by 160u to 240u (400u general limitation earnings/500u total earnings in positive separate categories × (200u) shipping deficit = 160u reduction), and passive limitation earnings are reduced by 40u to 60u (100u passive earnings/500u total earnings in positive separate categories × (200u) shipping deficit = 40u reduction). Five-twelfths of *CFC*'s post-1986 foreign income taxes with respect to passive limitation earnings are deemed paid by *A* under section 960 with respect to the subpart F inclusion (25u inclusion/60u passive earnings). After the inclusion and deemed-paid taxes are computed, at the close of 1996 *CFC* has 400u of general limitation earnings (275u opening balance + 125u current earnings), 75u of passive limitation earnings (100u of foreign personal holding company income − 25u inclusion), and a (200u) deficit in shipping limitation earnings.

Example 4. (i) The facts are the same as in *Example 3* with the addition of the following facts. In 1997, *CFC* earns 50u of general limitation earnings that are not subpart F income and 75u of passive limitation income that is foreign personal holding company income. Thus, *CFC* has 125u of current earnings and profits. *CFC* distributes 200u to *A*. Under paragraph (f)(3)(ii) of this section, the recapture rules are applied first. Thus, the amount by which 1997 current earnings and profits exceed subpart F income, 50u, is recharacterized as passive limitation foreign personal holding company income. *CFC*'s total subpart F income for 1997 is 125u of passive limitation foreign personal holding company income (75u current earnings plus 50u recapture account), and the passive limitation/foreign personal holding company income recapture account is reduced from 75u to 25u.

(ii) *CFC* has 150u of previously-taxed earnings and profits described in section 959(c)(2) (25u attributable to 1996 and 125u attributable to 1997), all of which is passive limitation earnings and profits. Under section 959(c), 150u of the 200u distribution is deemed to be made from earnings and profits described in section 959(c)(2). The remaining 50u is deemed to be made from earnings and profits described in section 959(c)(3). Under paragraph (f)(3)(i) of this section, the dividend distribution is deemed to be made first out of the passive limitation recapture account to the extent thereof (25u). Under paragraph (f)(2)(iii) of this section, the passive limitation recapture account is reduced from 25u to 0. The remaining distribution of 25u is treated as made out of *CFC*'s general limitation earnings and profits.

(iii) For purposes of computing post-1986 undistributed earnings, the rules of section 902 and 960, including the rules of § 1.960–1(i), apply. Thus, the shipping limitation accumulated deficit of (200u) reduces general limitation earnings and profits of 450u and passive limitation earnings and profits of 150u on a proportionate basis. Thus, 100% of *CFC*'s post-1986 foreign income taxes with respect to passive limitation earnings are deemed paid by *A* under section 960 with respect to the 1997 subpart F inclusion of 125u (100u inclusion (numerator limited to denominator)/100u passive earnings). No post-1986 foreign income taxes remain to be deemed paid under section 902 in connection with the 25u distribution from the passive limitation/foreign personal holding company income recapture account. One-twelfth of *CFC*'s post-1986 foreign income taxes with respect to general limitation earnings are deemed paid by *A* under section 902 with respect to the distribution of 25u general limitation earnings and profits described in section 959(c)(3) (25u inclusion/300u general limitation earnings). After the deemed-paid taxes are computed, at the close of 1997 *CFC* has 425u of general limitation earnings and profits (400u opening balance + 50u current earnings − 25u distribution), 0 of passive limitation earnings (75u recapture account +75u current foreign personal holding company income − 125u inclusion − 25u distribution), and a (200u) deficit in shipping limitation earnings.

Par. 3. In § 1.952–2, paragraph (c)(1) is revised to read as follows:

§ 1.952–2 Determination of gross income and taxable income of a foreign corporation.

* * * * *

(c) *Special rules for purposes of this section*—(1) *Nonapplication of certain provisions*. Except where otherwise distinctly expressed, the provisions of section 103 and subchapters F, G, H, L, M, N, S, and T of chapter 1 of the Internal Revenue Code shall not apply.

* * * * *

Par. 4. In § 1.954–2, the text of paragraph (b)(3) is added to read as follows:

§ 1.954–2 Foreign personal holding company income.

* * * * *

(b) * * *

(3) *Treatment of tax exempt interest*. Foreign personal holding company income includes all interest income, including interest that is described in section 103 (see § 1.952–2(c)(1)).

* * * * *

Par. 5. In § 1.960–1, paragraph (i) is added to read as follows:

§ 1.960–1 Foreign tax credit with respect to taxes paid on earnings and profits of controlled foreign corporations.

* * * * *

(i) *Computation of deemed-paid taxes in post-1986 taxable years*—(1) *General rule*. If a domestic corporation is eligible to compute deemed-paid taxes under section 960(a)(1) with respect to an amount included in gross income under section 951(a), then, such domestic corporation shall be deemed to have paid a portion of such foreign corporation's post-1986 foreign income taxes determined under section 902 and the regulations under that section in the same manner as if the amount so included were a dividend paid by such foreign corporation (determined by applying section 902(c) in accordance with section 904(d)(3)(B)).

(2) *Ordering rule for computing deemed-paid taxes under sections 902 and 960*. If a domestic corporation computes deemed-paid taxes under both section 902 and section 960 in the same taxable year, section 960 shall be applied first. After the deemed-paid taxes are computed under section 960 with respect to a deemed income inclusion, post-1986 undistributed earnings and post-1986 foreign income taxes in each separate category shall be reduced by the appropriate amounts before deemed-paid taxes are computed under section 902 with respect to a dividend distribution.

(3) *Computation of post-1986 undistributed earnings*. Post-1986 undistributed earnings (or an accumulated deficit in post-1986 undistributed earnings) are computed under section 902 and the regulations under that section.

(4) *Allocation of accumulated deficits*. For purposes of computing post-1986 undistributed earnings under sections 902 and 960, a post-1986 accumulated deficit in a separate category shall be allocated proportionately to reduce post-1986 undistributed earnings in the other separate categories. However, a deficit in any separate category shall not permanently reduce earnings in other separate categories, but after the deemed-paid taxes are computed the separate limitation deficit shall be carried forward in the same separate category in which it was incurred. In addition, because deemed-paid taxes may not exceed taxes paid or accrued by the controlled foreign corporation, in computing deemed-paid taxes with

respect to an inclusion out of a separate category that exceeds post-1986 undistributed earnings in that separate category, the numerator of the deemed-paid credit fraction (deemed inclusion from the separate category) may not exceed the denominator (post-1986 undistributed earnings in the separate category).

(5) *Examples*. The application of this paragraph (i) may be illustrated by the following examples. See § 1.952–1(f)(4) for additional illustrations of these rules.

Example 1. (i) *A*, a U.S. person, is the sole shareholder of *CFC*, a controlled foreign corporation formed on January 1, 1996, whose functional currency is the *u*. In 1996 *CFC* earns 100u of general limitation income described in section 904(d)(1)(I) that is not subpart F income and 100u of foreign personal holding company income that is passive income described in section 904(d)(1)(A). In 1996 *CFC* also incurs a (50u) loss in the shipping category described in section 904(d)(1)(D). *CFC*'s subpart F income for 1996, 100u, does not exceed *CFC*'s current earnings and profits of 150u. Accordingly, all 100u of *CFC*'s subpart F income is included in A's gross income under section 951(a)(1)(A). Under section 904(d)(3)(B) of the Code and paragraph (i)(1) of this section, *A* includes 100u of passive limitation income in gross income for 1996.

(ii) For purposes of computing post-1986 undistributed earnings under sections 902, 904(d) and 960 with respect to the subpart F inclusion, the shipping limitation deficit of (50u) is allocated proportionately to reduce general limitation earnings of 100u and passive limitation earnings of 100u. Thus, general limitation earnings are reduced by 25u to 75u (100u general limitation earnings/200u total earnings in positive separate categories × (50u) shipping deficit = 25u reduction), and passive limitation earnings are reduced by 25u to 75u (100u passive earnings/200u total earnings in positive separate categories × (50u) shipping deficit = 25u reduction). All of *CFC*'s post-1986 foreign income taxes with respect to passive limitation earnings are deemed paid by *A* under section 960 with respect to the 100u subpart F inclusion of passive income (75u inclusion (numerator limited to denominator under paragraph (i)(4) of this section)/75u passive earnings). After the inclusion and deemed-paid taxes are computed, at the close of 1996 *CFC* has 100u of general limitation earnings, 0 of passive limitation earnings (100u of foreign personal holding company income—100u inclusion), and a (50u) deficit in shipping limitation earnings.

Example 2. (i) The facts are the same as in *Example 1* with the addition of the following facts. In 1997, *CFC* distributes 150u to *A*. *CFC* has 100u of previously-taxed earnings and profits described in section 959(c)(2) attributable to 1996, all of which is passive limitation earnings and profits. Under section 959(c), 100u of the 150u distribution is deemed to be made from earnings and profits described in section 959(c)(2). The remaining 50u is deemed to be made from earnings and profits described in section 959(c)(3). The entire dividend distribution of 50u is treated as made out of *CFC*'s general limitation earnings and profits. See section 904(d)(3)(D).

(ii) For purposes of computing post-1986 undistributed earnings under section 902 with respect to the 1997 dividend of 50u, the shipping limitation accumulated deficit of (50u) reduces general limitation earnings and profits of 100u to 50u. Thus, 100% of *CFC*'s post-1986 foreign income taxes with respect to general limitation earnings are deemed paid by *A* under section 902 with respect to the 1997 dividend of 50u (50u dividend/50u general limitation earnings). After the deemed-paid taxes are computed, at the close of 1997 *CFC* has 50u of general limitation earnings (100u opening balance − 50u distribution), 0 of passive limitation earnings, and a (50u) deficit in shipping limitation earnings.

Margaret Milner Richardson,
Commissioner of Internal Revenue.

RIN 1215–AA96

Amendments to Federal Contract Labor Laws by the Federal Acquisition Streamlining Act of 1994

AGENCY: Wage and Hour Division, Employment Standards Administration, Labor.

ACTION: Notice of proposed rulemaking, request for comments.

SUMMARY: The Federal Acquisition Streamlining Act of 1994 amends the Contract Work Hours and Safety Standards Act (CWHSSA) and the Walsh-Healey Public Contracts Act (PCA). This document proposes to conform applicable regulations to the statutory amendments that raise the coverage threshold of CWHSSA and, among other things, eliminate the eligibility requirements of the PCA.

DATES: Comments are due on or before October 10, 1995.

ADDRESSES: Submit written comments to Maria Echaveste, Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, room S–3502 200 Constitution Avenue NW.; Washington, DC 20210. Commenters who wish to receive notification of receipt of comments are requested to include a self-addressed, stamped postcard, or to submit them by certified mail, return receipt requested. As a convenience to commenters, comments may be transmitted by facsimile ("FAX") machine to (202) 219–5122 (this is not a toll-free number). If transmitted by facsimile and a hard copy is also submitted by mail, please indicate on the hard copy that it is a duplicate copy of the facsimile transmission.

FOR FURTHER INFORMATION CONTACT: Richard M. Brennan, Acting Director, Division of Policy and Analysis, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, room S–3506, 200 Constitution Avenue NW., Washington, DC 20210, (202) 219–8412. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

I. Paperwork Reduction Act

This rule contains no reporting or recordkeeping requirements subject to the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

II. Background

The Federal Acquisition Streamlining Act of 1994 (FASA) (Pub. L. 103–355, 108 Stat. 3243) was enacted into law on October 13, 1994. Section 4104(c) of this Act amends sections 103 and 107 of the Contract Work Hours and Safety Standards Act (CWHSSA), 40 U.S.C. 327 *et seq.*, to establish a threshold of $100,000 or more for contracts subject to CWHSSA's overtime provisions. Prior to this amendment, Federal and Federally assisted construction contracts of $2,000 or less, and purchases and contracts other than construction contracts of $2,500 or less, were exempt from CWHSSA's weekly overtime and related provisions pursuant to the variation in §§ 5.15(b) (1) and (2) of 29 CFR part 5. The new statutory threshold of $100,000 requires conforming revisions to §§ 5.5(b) and 5.15(b) (1) and (2) of 29 CFR part 5 and § 4.181(b) of 29 CFR part 4.

Contracting agencies and contractors should be aware that contractors awarded contracts in amounts less than $100,000 may continue to have obligations to pay certain of their employees weekly overtime, at one and one-half the regular rate for hours worked in excess of forty (40) per week, pursuant to section 7 of the Fair Labor Standards Act, 29 U.S.C. 207.

With respect to amendments affecting the Walsh-Healey Public Contracts Act (PCA), sections 3023 and 7201 of FASA (1) repeal 10 U.S.C. sec. 7299 to eliminate the applicability of the PCA to contracts for the construction, alternation, furnishing, or equipping of naval vessels; (2) repeal section 1(a) of

UMI

the PCA to eliminate the requirement that covered contractors must be either a "regular dealer" or "manufacturer" and renumbers subsections (b), (c), (d) and (e) to (a), (b), (c) and (d) respectively; (3) amend section 10 (b) of the PCA to substitute the term "supplier of" for the terms "regular dealer" and "manufacturer;" (4) amend section 10(c) of the PCA to strike the terms "regular dealer" and "manufacturer;" and (5) adds subsections (a) and (b) to section 11 of the PCA to retain the Secretary's authority to define the terms "regular dealer" and "manufacturer."

This rule proposes to amend applicable PCA regulations to delete a "regular dealer" or "manufacturer" eligibility requirement for bidders on contracts subject to the Act. Under the Act as amended, an eligible bidder includes, in addition to a manufacturer or regular dealer, any supplier or distributor of the materials, supplies, articles, or equipment to be manufactured or supplied under the contract. Specifically, § 50–201.1 of 41 CFR part 50–201 relating to contract stipulations is proposed to be renumbered as § 50–201.3, the paragraph currently designated as § 50–201.1(a) is proposed to be deleted to remove the "manufacturer of or regular dealer in" requirement, and the subsequent paragraphs of this section are proposed to be renumbered. In addition, § 50–201.101 relating to definitions of the terms "manufacturer" and "regular dealer" is proposed to be deleted in its entirety, as is § 50–201.604 relating to partial administrative exemptions from the manufacturer or regular dealer requirement. Also, the entire Part 50–206, which relates primarily to the qualifications of contractors and interpretations of the terms "manufacturer" and "regular dealer," is proposed to be deleted except that §§ 50–206.1 and .2 are proposed to be incorporated into the general regulations at part 50–201 as new §§ 50–201.1 and .2, respectively.

With respect to the amendment concerning contracts for the construction, alteration, furnishing, or equipping of naval vessels, the repeal of 10 U.S.C. sec. 7299 to eliminate PCA coverage of such contracts requires no changes in the regulations. Contracting agencies and contractors should be aware that such contracts may now be subject to the Davis-Bacon Act, which applies to contracts in excess of $2,000 for the construction, alteration, and/or repair, including painting and decorating, of a public building or a public work. Marine vessels have historically been regarded as "public works" for purposes of the Davis-Bacon Act.

While section 7201(a) of FASA repealed the bidder eligibility requirements of PCA, section 7201(b) added a new provision which provided that the Secretary of Labor "* * * *may* (emphasis added) prescribe in regulations the standards for determining whether a contractor is a manufacturer of or a regular dealer in materials, supplies, articles, or equipment to be manufactured or used in the performance of a contract entered into by * * * (the United States)." The new section also provides for judicial review of any legal question regarding the interpretation of manufacturer or regular dealer as promulgated under this new section. According to the legislative history of FASA's section 7201(b), authorizing the Secretary of Labor to define the terms "regular dealer" and "manufacturer" was considered appropriate because the terms have been incorporated by reference into a number of other statutes. (See H.R. Conf. Rep. No. 712, 103d Cong., 2d Sess. 225 (1994).)

In a review of other statutes, however, the Department only found one statute which explicitly incorporates PCA's definition of the term "manufacturer" and/or "regular dealer" by reference. This statute, 15 U.S.C. 637, concerns contracting authority of the Small Business Administration and the awarding of subcontracts to small businesses owned and controlled by socially and economically disadvantaged individuals. It provides at 15 U.S.C. 637(a)(17) that a responsible business concern may be the actual manufacturer or processor of the product to be supplied under a contract or "* * * be a regular dealer, as defined pursuant to section 35(a) of Title 41 (popularly referred to as the Walsh-Healey Public Contracts Act), in the product to be offered the Government * * *." (See 15 U.S.C. 637(a)(17)(B)(iii).) The effect of the proposed deletion of the regulatory definitions on this program is unclear.

A review of the Code of Federal Regulations (CFR) disclosed numerous regulations with references to the "manufacturer" or "regular dealer" provisions of the PCA which, in large part, have the purpose of implementing these requirements through the procurement process. The Department, nevertheless, is concerned that there may be other regulations or programs that may require eligible bidders or contractors to be either manufacturers or regular dealers of products sold to the Federal government as defined in accordance with the PCA, for reasons independent of the PCA requirement.

It is the Department's belief that the promulgation of special rules defining these terms is not necessary, and that the former definitions may be adapted, if appropriate, by other Federal agencies. The definitions will also be used to resolve questions of PCA eligibility in contracts awarded prior to the promulgation of this rule. However, the Department, for the reasons discussed above, is particularly interested in obtaining public comment on the appropriateness and feasibility of its proposal not to issue special rules defining the terms "manufacturer" or "regular dealer," and any adverse effect this might have on any other Federal programs, such as those of the Small Business Administration.

This rule does not address the FASA amendments to certain laws that waive the Davis-Bacon Act's (DBA) prevailing wage requirements for certain volunteers on Federally-assisted construction projects. Subtitle C of Title VII of FASA (sections 7301–7306, cited as the "Community Improvement Volunteer Act of 1994) amends the Library Services and Construction Act, the Indian Self-Determination and Education Act, sections 329 and 330 of the Public Health Services Act, the Indian Health Care Improvement Act, and the Housing and Community Development Act of 1974 to provide an exception from DBA prevailing wage requirements for individuals who volunteer services to State and local public entities and to nonprofit entities. The Department expects to publish a notice of proposed rulemaking which will address the implementation of these provisions during 1995.

As a point of information, contracting agencies and contractors should also be aware that section 4104(b) of FASA amended the Miller Act to establish a threshold of $100,000 for construction contracts covered by its bonding requirements. While this law is often associated with the DBA, the Department has no responsibility for its administration.

Executive Order 12866/Section 202 of the Unfunded Mandate Reform Act of 1995

This proposed rule is not a "significant regulatory action" within the meaning of Executive Order 12866, nor does it require a section 202 statement under the Unfunded Mandates Reform Act of 1995. The rule merely adopts technical changes in regulations mandated by FASA. While the new statutory threshold of $100,000 under the Contract Work Hours and

Safety Standards Act can be expected to reduce procurement burdens on purchases under $100,000, contractors awarded such contracts continue to be obligated to pay weekly overtime under the Fair Labor Standards Act. Likewise, the repeal of the "manufacturer" and "regular dealer" requirements under PCA may be expected to increase competition for certain supply contracts; however, the impact on procurement costs resulting from an enlarged pool of eligible bidders is not clearly apparent, and could be minimal. Accordingly, these changes are not expected to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866 and section 202 of the Unfunded Mandate Reform Act of 1995. Therefore, no regulatory impact analysis has been prepared.

Regulatory Flexibility Act

The Department has determined that the proposed rule will not have a significant economic impact on a substantial number of small entities. The rule implements statutory changes enacted by FASA, and furthers its streamlining objectives. The repeal of the "manufacturer" and "regular dealer" requirements under PCA will likely increase the number of eligible bidders on supply contracts, many of whom would be small entities, which would have beneficial effects consistent with the purpose of the Regulatory Flexibility Act. The elimination of PCA bidder requirements will also simplify the processing of eligibility protests on bidder eligibility and will otherwise streamline the procurement process. While these and other benefits of the rule would be difficult, if not impossible, to quantify, the rule is not expected to have a "significant economic impact on a substantial number of small entities" within the meaning of the Regulatory Flexibility Act, and the Department has certified to this effect to the Chief Counsel for Advocacy of the Small Business Administration. A regulatory flexibility analysis is not required.

Document Preparation

This document was prepared under the direction and control of Maria Echaveste, Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor.

List of Subjects

29 CFR Part 4

Administrative practice and procedure, Employee benefit plans, Government contracts, Investigations, Labor, Law enforcement, Minimum wages, Penalties, Reporting and recordkeeping requirements, Wages.

29 CFR Part 5

Administrative practice and procedures, Government contracts, Investigations, Labor, Minimum wages, penalties, Reporting and recordkeeping requirements, Wages.

41 CFR Parts 50–201 and 50–206

Administrative practice and procedures, Child labor, Government contracts, Government procurement, Minimum wages, Penalties, Reporting and recordkeeping requirements, Wages.

For the reasons set forth above, 29 CFR part 4, 29 CFR part 5, 41 CFR part 50–201, and 41 CFR part 50–206 are proposed to be amended as set forth below.

Signed at Washington, DC., on this 31st day of August, 1995.

Maria Echaveste,

Administrator, Wage and Hour Division.

Accordingly, the following parts of the Code of Federal Regulations are proposed to be amended:

(a) Part 4, Title 29, Code of Federal Regulations (29 CFR part 4);

(b) Part 5, Subpart A, Title 29, Code of Federal Regulations (29 CFR part 5);

(c) Part 50–201, Chapter 50 of Title 41, Code of Federal Regulations (41 CFR part 50–201); and

(d) Part 50–206, Chapter 50 of Title 41, Code of Federal Regulations (41 CFR part 50–206), as set forth below.

Title 29—Labor

SUBTITLE A—OFFICE OF THE SECRETARY

PART 4—LABOR STANDARDS FOR FEDERAL SERVICE CONTRACTS

1. Authority citation for part 4 continues to read as follows:

Authority: 41 U.S.C. 351, *et seq.*, 79 Stat. 1034, as amended in 86 Stat. 789, 90 Stat. 2358; 41 U.S.C. 38 and 39; and 5 U.S.C. 301.

2. In § 4.181, paragraph (b)(1) is proposed to be revised to read as follows:

* * * * *

(b) *Contract Work Hours and Safety Standards Act.* (1) The Contract Work Hours and Safety Standards Act (40 U.S.C. 327–332) applies generally to Government contracts, including services contracts in excess of $100,000, which may require or involve the employment of laborers and mechanics. Guards, watchmen, and many other classes of service employees are laborers or mechanics within the meaning of such Act. However, employees rendering only professional services, seamen, and as a general rule those whose work is only clerical or supervisory or nonmanual in nature, are not deemed laborers or mechanics for purposes of the Act. The wages of every laborer and mechanic for performance of work on such contracts must include compensation at a rate not less than 1½ times the employee's basic rate of pay for all hours worked in any workweek in excess of 40. Exemptions are provided for certain transportation and communications contracts, contracts for the purchase of supplies ordinarily available in the open market, and work, required to be done in accordance with the provisions of the Walsh-Healey Act.

* * * * *

PART 5—LABOR STANDARDS PROVISIONS APPLICABLE TO CONTRACTS COVERING FEDERALLY FINANCED AND ASSISTED CONSTRUCTION (ALSO LABOR STANDARDS PROVISIONS APPLICABLE TO NONCONSTRUCTION CONTRACTS SUBJECT TO THE CONTRACT WORK HOURS AND SAFETY STANDARDS ACT)

Subpart A—Davis-Bacon and Related Acts Provisions and Procedures

3. The authority citation for part 5 continues to read as follows:

Authority: 40 U.S.C. 276a–176a–7; 40 U.S.C. 276c; 40 U.S.C. 327–332; Reorganization Plan No. 14 of 1950, 5 U.S.C. Appendix; 5 U.S.C. 301; 29 U.S.C. 259; and the statutes listed in section 5.1(a) of this part.

4. In § 5.5, paragraph (b) is proposed to be revised to read as follows:

§ 5.5 Contract provisions and related matters.

* * * * *

(b) *Contract Work Hours and Safety Standards Act.* The Agency Head shall cause or require the contracting officer to insert the following clauses set forth in paragraphs (b)(1), (2), (3), and (4) of this section in full in any contract in an amount in excess of $100,000 and subject to the overtime provisions of the Contract Work Hours and Safety Standards Act. These clauses shall be inserted in addition to the clauses required by § 5.5(a) or § 4.6 of part 4 of this title. As used in this paragraph, the terms laborers and mechanics include watchmen and guards.

* * * * *

§ 5.15 [Amended]

5. In § 5.15, paragraph (b) is proposed to be amended by removing paragraphs (b)(1) and (2), and by redesignating paragraphs (b)(3), (4), and (5) as paragraphs (b)(1), (2), and (3), respectively.

Title 41—Public Contracting and Property Management

CHAPTER 50—PUBLIC CONTRACTS, DEPARTMENT OF LABOR

PART 50–201—GENERAL REGULATIONS

6. The authority citation for part 50–201 continues to read as follows:

Authority: Sec. 4, 49 Stat. 2038; 41 U.S.C. 38. Interpret or apply sec. 6, 49 Stat. 2038, as amended; 41 U.S.C. 40.

7. Sections 50–201.1 and 50–201.2 are proposed to be redesignated as §§ 50.201.3 and 50–201.4, respectively, and paragraph (a) of the clause in § 50–201.3, as newly redesignated, is proposed to be removed, and paragraphs (b) through (j) are proposed to be redesignated as paragraphs (a) through (i), respectively, and the title of the clause is proposed to be amended to read as follows:

REPRESENTATIONS AND STIPULATIONS PURSUANT TO PUBLIC LAW 846, 74TH CONGRESS, AS AMENDED

§ 50–201.101 [Removed]

§ 50–201.102 through 50–201.106 [Redesignated as §§ 50–201.101 through 50–201.105]

8. Section 50–201.101 is proposed to be removed, and §§ 50–201.102 through 50–201.106 are proposed to be redesignated as §§ 50–201.101 through 50–201.105, respectively.

§ 50–201.604 [Removed]

9. Section 50–201.604 is proposed to be removed.

PART 50–206—THE WALSH-HEALEY PUBLIC CONTRACTS ACT INTERPRETATIONS

10. The authority citation for part 50–206 continues to read as follows:

Authority: Sec. 4, 49 Stat. 2038, 41 U.S.C. 38, Secretary of Labor's Order No. 16–75, 40 FR 55913, and Employment Standards Order 2–76, 41 FR 9016.

§§ 50–206.1 and 50–206.2 [Redesignated as 50–201.1 and 50–201.2]

§§ 50–206.3 and 50–206.50 through 50–206.56 [Removed]

11. In part 50–206, §§ 50–206.1 and 50–206.2 are proposed to be redesignated as §§ 50–201.1 and 50.201.2 in part 50–201, respectively, and the remainder of part 50–206 is proposed to be removed.

BILLING CODE 4510–27–M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Chapter II

Meetings of the Indian Gas Valuation Negotiated Rulemaking Committee

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of meetings.

SUMMARY: The Secretary of the Department of the Interior (Department) has established an Indian Gas Valuation Negotiated Rulemaking Committee (Committee) to develop specific recommendations with respect to Indian gas valuation under its responsibilities imposed by the Federal Oil and Gas Royalty Management Act of 1982, 30 U.S.C. 1701 *et seq.* (FOGRMA). The Department has determined that the establishment of this Committee is in the public interest and will assist the Agency in performing its duties under FOGRMA.

This notice establishes meeting times and location for October and November 1995.

DATES: The Committee will have meetings on the dates and the times shown below:

Tuesday, October 17, 1995—9:30 a.m. to 5 p.m.
Wednesday, October 18, 1995—8 a.m. to 5 p.m.
Thursday, October 19, 1995—8 a.m. to 5 p.m.
Tuesday, November 7, 1995—9:30 a.m. to 5 p.m.
Wednesday, November 8, 1995—8 a.m. to 5 p.m.
Thursday, November 9, 1995—8 a.m. to 5 p.m.

ADDRESSES: These meetings will be held in the building 85 auditorium, Denver Federal Center, located at West 6th Avenue and Kipling Streets, Lakewood, Colorado.

Written statements may be submitted to Mr. Donald T. Sant, Deputy Associate Director for Valuation and Operations, Minerals Management Service, Royalty Management Program, P.O. Box 25165, MS–3100, Denver, CO 80225–0165.

FOR FURTHER INFORMATION CONTACT: Mr. Donald T. Sant, Deputy Associate Director for Valuation and Operations, Minerals Management Service, Royalty Management Program, P.O. Box 25165, MS–3100, Denver, Colorado, 80225–0165, telephone number (303) 231–3899, fax number (303) 231–3194.

SUPPLEMENTARY INFORMATION: The location and dates of future meetings will be published in the **Federal Register**. The meetings will be open to the public without advanced registration. Public attendance may be limited to the space available. Members of the public may make statements during the meeting, to the extent time permits, and file written statements with the Committee for its consideration.

Written statements should be submitted to the address listed above. Minutes of Committee meetings will be available for public inspection and copying 10 days after each meeting at the same address. In addition, the materials received to date during the input sessions are available for inspection and copying at the same address.

Dated: August 31, 1995.

James W. Shaw,

Associate Director for Royalty Management.

BILLING CODE 4310–MR–P

DEPARTMENT OF THE TREASURY

31 CFR Part 103

RIN 1506–AA13

Proposed Amendment to the Bank Secrecy Act Regulations—Requirement to Report Suspicious Transactions

AGENCY: Financial Crimes Enforcement Network, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Financial Crimes Enforcement Network ("FinCEN") is proposing rules for the centralized filing with it of reports of suspicious transactions under the Bank Secrecy Act. The proposal is a key to the creation of a new method for the reporting, on a uniform "Suspicious Activity Report," of suspicious transactions and known or suspected criminal violations by depository institutions; related rules have been or will be issued by the five federal financial supervisory agencies that examine and regulate the safety and soundness of depository institutions. The new centralized reporting system will eliminate the need for burdensome filing of multiple copies of reports with various federal regulatory and law enforcement agencies and will ensure more effective use of the information reported to such agencies.

DATES: Written comments on all aspects of the proposal are welcome and must be received on or before October 10, 1995.

ADDRESSES: Written comments should be submitted to: Office of Regulatory Policy and Enforcement, Financial Crimes Enforcement Network, Department of the Treasury, 2070 Chain Bridge Road, Vienna, Virginia 22182, *Attention:* NPRM—Suspicious Transaction Reporting.

Submission of Comments: An original and four copies of any comment must be submitted. All comments will be available for public inspection and copying, and no material in any such comments, including the name of any person submitting comments, will be recognized as confidential. Accordingly, material not intended to be disclosed to the public should not be submitted.

Inspection of Comments: Comments may be inspected at the Department of the Treasury between 10:00 a.m. and 4:00 p.m., in the Treasury Library, which is located in room 5030, 1500 Pennsylvania Avenue, N.W., Washington, D.C. 20220. Persons wishing to inspect the comments submitted should request an appointment at the Treasury Library by telephoning (202) 622–0990.

FOR FURTHER INFORMATION CONTACT: Charles Klingman, Office of Financial Institutions Policy, FinCEN, at (703) 905–3920, or Joseph M. Myers, Attorney-Advisor, Office of Legal Counsel, FinCEN, at (703) 905–3590.

SUPPLEMENTARY INFORMATION:

I. Introduction

This document proposes to add a new section 103.21 to 31 CFR Part 103 to require banks and other depository institutions [1] to report to the Department of the Treasury any suspicious transaction relevant to a possible violation of law or regulation. The amendments are proposed by FinCEN, to implement the authority granted to the Secretary of the Treasury by 31 U.S.C. 5318(g), in coordination with the Office of the Comptroller of the Currency (the "OCC"), the Board of Governors of the Federal Reserve System (the "Board"), the Federal Deposit Insurance Corporation (the "FDIC"), the Office of Thrift Supervision (the "OTS"), and the National Credit Union Administration (the "NCUA").

The proposed regulation creates a single coordinated process for the reporting of suspicious transactions under the Bank Secrecy Act and known or suspected criminal violations involving such institutions under the regulations of the regulatory agencies. The new process represents a fundamental change in the manner in which potential violations and suspicious activities are reported by banks and other depository institutions to the federal government.

II. Background

A. Statutory Provisions

The Bank Secrecy Act, Pub. L. 91–508, as amended, codified at 12 U.S.C. 1829b, 12 U.S.C. 1951–1959, and 31 U.S.C. 5311–5330, authorizes the Secretary of the Treasury, *inter alia*, to issue regulations requiring financial institutions to keep records and file reports that are determined to have a high degree of usefulness in criminal, tax, and regulatory matters, and to implement counter-money laundering programs and compliance procedures. Regulations implementing Title II of the Bank Secrecy Act (codified at 31 U.S.C. 5311–5330), appear at 31 CFR Part 103. The authority of the Secretary to administer the Bank Secrecy Act has been delegated to the Director of FinCEN.

The authority to require reporting of suspicious transactions was added to the Bank Secrecy Act by section 1517 of the Annunzio-Wylie Anti-Money Laundering Act ("Annunzio-Wylie"), Title XV of the Housing and Community Development Act of 1992, Pub. L. 102–550; it was expanded by section 403 of the Money Laundering Suppression Act of 1994 (the "Money Laundering Suppression Act"), Title IV of the Riegle Community Development and Regulatory Improvement Act of 1994, Pub. L. 103–325, to require designation of a single government recipient for reports of suspicious transactions.

The provisions of 31 U.S.C. 5318(g) deal with the reporting of suspicious transactions by financial institutions subject to the Bank Secrecy Act and the protection from liability to customers of persons who make such reports. Subsection (g)(1) states generally:

> The Secretary may require any financial institution, and any director, officer, employee, or agent of any financial institution to report any suspicious transaction relevant to a possible violation of law or regulation.

Subsection (g)(2) provides further:

> A financial institution, and a director, officer, employee, or agent of any financial institution, who voluntarily reports a suspicious transaction, or that reports a suspicious transaction pursuant to this section or any other authority, may not notify any person involved in the transaction that the transaction has been reported.

Subsection (g)(3) provides that neither a financial institution, nor any director, officer, employee, or agent

> That makes a disclosure of any possible violation of law or regulation or a disclosure pursuant to this subsection or any other authority . . . shall . . . be liable to any person under any law or regulation of the United States or any constitution, law, or regulation of any State or political subdivision thereof, for such disclosure or for any failure to notify the person involved in the transaction or any other person of such disclosure.

Finally, subsection (g)(4) requires the Secretary of the Treasury, "to the extent practicable and appropriate," to designate "a single officer or agency of the United States to whom such reports shall be made." This designation is not to preclude the authority of supervisory agencies to require financial institutions to submit other reports to the same agency "under any other applicable provision of law." 31 U.S.C. 5318(g)(4)(C). The designated agency is in turn responsible for referring any report of a suspicious transaction to "any appropriate law enforcement agency." *Id.*, at subsection (g)(4)(B).

B. Coordinated Process for Reporting Suspicious Transactions

At present, banks report transactions that indicate the existence of "known or suspected violations of federal law" by filing multiple copies of criminal referral forms with their respective primary federal financial regulator and with federal law enforcement agencies (including in most cases the Federal Bureau of Investigation, the United States Secret Service, and the Criminal Investigation Division of the Internal Revenue Service). The referral forms (each promulgated by a different regulator, under independent but parallel authority) are not uniform, and the requirement for multiple filings imposes a considerable administrative burden on filers. In the absence of a central repository, law enforcement and regulatory agencies—receiving different forms from different filers in different regions of the country—struggle to analyze and correlate the filings and to coordinate investigations.

---

[1] References to "bank" include not only commercial banks, but also thrift institutions, credit unions, and other types of depository institutions. See 31 CFR 103.11(b) (defining "bank" for purposes of 31 CFR Part 103).

At the same time, banks (and other financial institutions) are required under the Bank Secrecy Act to file a Currency Transaction Report (or "CTR") to report transactions in currency of more than $10,000. The CTR form includes a box that can be checked to indicate that the currency transaction is "suspicious."[2] The box on the CTR may also be used to report suspicious currency transactions in amounts less than $10,000. In practice, some financial institutions have also used the CTR form to report non-currency transactions that they believed to be "suspicious" but did not rise to the level of a known or suspected violation of law. Still other financial institutions reported such transactions by telephone to local offices of federal law enforcement or regulatory agencies. In many cases, financial institutions that were uncertain what to do naturally and commendably filed all possibly applicable reports.

As also discussed in proposed regulations issued in connection with the creation of the unified reporting system by the Office of the Comptroller of the Currency, 60 FR 34,476 (July 3, 1995), and the Board of Governors of the Federal Reserve System, 60 FR 34,481 (July 3, 1995), the current criminal referral system is cumbersome and burdensome, for both regulators and depository institutions. Moreover, it does not maximize the amount of usable information available to law enforcement officials and bank regulators. Therefore, beginning in 1991, the regulatory agencies began working on a project to improve the criminal referral process, with the goal of creating a single form and placing all referrals in an automated information system, managed on their behalf by FinCEN, to which all regulators and FinCEN would have access. The purpose of that project, begun under the auspices of the inter-agency Bank Fraud Working Group, was to assure that information generated by referrals of banking crimes would be uniformly available both as a basis for regulatory decisions and for analysis of the effectiveness of the reporting process and banking crime enforcement efforts.

A year later, Annunzio-Wylie vested broad suspicious transaction reporting authority in the Department of the Treasury. Soon thereafter, a "Money Laundering Review Task Force," made up of enforcement and regulatory officials, was established in the Office of the then-Assistant Secretary (Enforcement) to examine the effectiveness of Treasury's anti-money laundering policies. The Task Force's analysis emphasized that identification and reporting of suspicious activity can and should be one of law enforcement's most effective tools against money laundering, so long as the reporting is not burdensome and reflects as much guidance about money laundering transactions and methods as government can provide. The work of the Task Force resulted in a consensus at Treasury that a reasoned implementation of Treasury's expanded suspicious transaction reporting authority (together with the accompanying "know your customer" rule) would increase the effectiveness of counter-money laundering efforts and permit significant reduction in mechanical currency transaction reporting requirements.

The single integrated system of which this proposed rule is a part thus reflects (i) the effect on the pre-existing criminal referral process of the statutory grant of central authority to Treasury, under the Bank Secrecy Act, to require reporting of all suspicious transactions (not merely transactions in currency or its equivalents) involving financial institutions, (ii) the mutual desire of Treasury and the financial regulators to simplify and reduce the burdensomeness of the reporting process, and (iii) the centrality of suspicious transaction reporting to Treasury counter-money laundering policy.

The central feature of the integrated reporting system is the creation of a single reporting form, filing point, and information system for all reports of suspicious activity made by depository institutions. The single form standardizes filing requirements and facilitates the creation of a single, automated data base containing information from all filings. The single filing point not only eliminates the need for multiple copies but also permits magnetic filing of reports by most institutions capable of and accustomed to making such filings with the Internal Revenue Service. (In a related development, as explained more fully below, the requirement that supporting documentation be filed with the report has been eliminated.) Finally, the single data base will permit rapid dissemination to appropriate law enforcement agencies of reports within their jurisdiction, more thorough analysis and tracking of those reports, and, in time, the provision to the financial communities of information about trends and patterns gleaned from the information reported.

Each agency involved has issued or shortly will issue a proposed rule requiring reporting under its respective authority. It is anticipated that those proposed rules will be conformed to one another in their final form and that they will be identical with Treasury's suspicious transaction reporting rules. Thus a financial institution will file a suspicious activity report in satisfaction of both the rules of FinCEN and the rules of the applicable banking regulator or regulators.

The selection of a single term—Suspicious Activity Report ("SAR")—for the new report reflects the overlap and consolidation of the two reporting requirements. There will be a significant group of activities that are required to be reported both under the authority of 31 U.S.C. 5318(g) and under the financial regulatory agencies own administrative requirements. A single filing, however, will suffice to comply with all requirements.

C. Importance of Suspicious Transaction Reporting in Treasury's Anti-Money Laundering Program

The Congressional mandate to require reporting of suspicious transactions recognizes two basic points that have increasingly become central to Treasury's anti-money laundering and anti-financial crime programs. First, it is to financial institutions that money launderers must go. Second, the officials of those institutions are more likely than government officials to have a sense as to what transactions appear to lack commercial justification or otherwise cannot be explained as falling within the usual methods of legitimate commerce. Money laundering transactions are often designed to appear legitimate in order to avoid detection. Under these circumstances, the creation of a meaningful system for detection and prevention of money laundering is impossible without the cooperation of financial institutions.

The provisions of Annunzio-Wylie and the Money Laundering Suppression Act recognize that the traditional reliance of Treasury counter-money laundering programs on the reporting of currency transactions between financial institutions and their customers and the transportation of currency and certain monetary instruments into or out of the United States is neither adequate nor

---

[2] The revised and simplified CTR that goes into effect on October 1, 1995 eliminates the box in anticipation of the adoption of the Suspicious Activity Report for reporting of, *inter alia*, suspicious currency transactions. An advance copy of the revised CTR was issued by FinCEN in early May 1995. *See* "FinCENnews", May 10, 1995.

cost effective. The change in emphasis from routine reporting of all currency transactions above a certain amount to reporting of information most likely to be of use to law enforcement officials and financial regulators is a key component of the flexible and cost-efficient compliance system required to prevent the use of the nation's financial system for illegal purposes.

The placement of illegally-derived currency into the financial system and the smuggling of such currency out of the country remain two of the most serious issues facing financial law enforcement efforts in the United States and around the world. But banks and other depository institutions, in cooperation with law enforcement agencies and federal and state banking regulators, have responded in many positive ways to the challenges posed by money laundering. It is now far more difficult than in the past to pass large amounts of cash directly into the nation's banks unnoticed and far easier to identify and isolate those institutions and officials still willing to assist or ignore money launderers.

Moreover, the placement of currency into the financial system is at most only the first stage in the money laundering process. While many currency transactions are *not* indicative of money laundering or other violations of law, many non-currency transactions *can* indicate illicit activity, especially in light of the breadth of the statutes that make money laundering itself a crime. *See* 18 U.S.C. 1956 and 1957.

No system for the reporting of suspicious transactions can be effective unless information flows *from* as well as *to* the government. Thus, Treasury recognizes its responsibility to issue and update guidelines about patterns of suspicious activity.

The reporting of suspicious transactions is also a key to the emerging international consensus on the prevention of money laundering. One of the central recommendations in the Report of the Financial Action Task Force of the G–7 nations (the United States, The United Kingdom, Germany, France, Italy, Japan, and Canada) is that:

> If financial institutions suspect that funds stem from a criminal activity, they should be permitted or required to report promptly their suspicions to the competent authorities.

Financial Action Task Force Report (April 19, 1990), Section III(B)(3) (Recommendation 16). The European Community's *Directive on prevention of the use of the financial system for the purpose of money laundering* calls for member states to

> Ensure that credit and financial institutions and their directors and employees cooperate fully with the authorities responsible for combating money laundering . . . by [in part] informing those authorities, on their own initiative, of any fact which might be an indication of money laundering.

EC Directive, O.J. Eur. Comm. (No. L 166) 77 (1991), Article 6. *Accord, the Model Regulations Concerning Laundering Offenses Connected to Illicit Drug Trafficking and Related Offenses of the Organization of American States*, OEA/Ser. P. AG/Doc. 2916/92 rev. 1 (May 23, 1992), Article 13, section 2.[3]

D. Suspicious Transaction Reporting by Financial Institutions Other Than Banks

31 U.S.C. 5318(g) authorizes the Treasury to require the reporting of suspicious transactions by all financial institutions, and extends to financial institutions other than banks. FinCEN intends to extend the obligation to report suspicious transactions to such other institutions in the near future. However, this proposed rule applies only to reporting of suspicious transactions by banks and other depository institutions.

III. Specific Provisions

A. 103.11(qq) FinCEN

FinCEN is specifically defined for the first time in the Bank Secrecy Act regulations, because FinCEN is being designated by the Secretary of the Treasury as the central recipient of SARs filed pursuant to 31 U.S.C. 5318.

B. 103.11(r) Transaction

The definition of "transaction in currency" in the Bank Secrecy Act regulations has been changed to a definition of "transaction." The definition conforms to the definitions in 18 U.S.C. 1956 used when Congress criminalized money laundering in 1986.[4] This definition of transaction is broad enough to cover all activity that will be reported on an SAR.

Treasury does not believe that the change varies the substance of the requirement to report currency transactions under 31 CFR 103.22, other than in the case of deposits of cash in safe deposit boxes, and the change is not intended to make any other modifications in that requirement. Treasury would be interested in comments concerning the safe deposit box issue and other instances in which financial institution personnel believe that application of the new definition, required for implementation of the suspicious transaction reporting rule, would unintentionally alter the separate currency transaction reporting requirement.

C. 103.20 Determination by the Secretary

Section 103.21 is redesignated as section 103.20 in order to make room in Subpart B, "Reports Required To Be Made," for the suspicious transaction reporting requirement in this proposed rule.

D. 103.21 Reports of Suspicious Transactions

New section 103.21 contains the rules setting forth the obligation of banks to file reports of suspicious transactions. Paragraph (a) contains the general statement of the obligation to file, and a general definition of the term "suspicious transaction." The obligation extends only to transactions conducted or attempted by, at, through, or otherwise involving, the bank; however, it is important to recognize that transactions are reportable under this rule and 31 U.S.C. 5318(g) whether or not they involve currency.

The proposed rule designates three classes of transactions as requiring reporting. The first class, described in proposed paragraph (a)(2)(i), includes transaction involving funds derived from illegal activity or intended or conducted in order to hide or disguise funds or assets derived from illegal activity. The second class, described in proposed paragraph (a)(2)(ii), involves transactions designed to evade the requirements of the Bank Secrecy Act. The third class, described in proposed paragraph (a)(2)(iii), involves transactions that appear to have no business purpose or vary so substantially from normal commercial activities or activities appropriate for the particular customer or class of customer as to have no reasonable explanation.

Of course, determinations as to whether a report is required must be based on all the facts and circumstances relating to the transaction and bank customer in question. Different fact patterns will require different types of judgments. In some cases, the facts of the transaction may clearly indicate the need to report. For example, continued payments or withdrawals of currency in amounts each beneath the currency transaction reporting threshold applicable under 31 CFR 103.22, or multiple exchanges of small denominations of currency into large denominations of currency, can indicate that a customer is involved in suspicious activity. Similarly, the fact that a customer refuses to provide information necessary for the bank to make reports or keep records required by this Part or other regulations, provides information that a bank determines to be false, or seeks to change or cancel the transaction after such person is informed of reporting requirements relevant to the transaction or of the bank's intent to file reports with respect to the transaction, would all indicate that an SAR should be filed.

---

[3] The OAS reporting requirement is linked to the provision of the Model Regulations that institutions "shall pay special attention to all complex, unusual or large transactions, whether completed or not, and to all unusual patterns of transactions, and to insignificant but periodic transactions, which have no apparent economic or lawful purpose." OAS Model Regulation, Article 13, section 1.

[4] *See* Pub. L. 99–570, Title XIII, 1352(a), 100 Stat. 3207–18 (Oct. 27, 1986).

In other situations a more involved judgment may need to be made whether a transaction is suspicious within the meaning of the rule. Transactions that raise the need for such judgments may include, for example, (i) funds transfers, payments or withdrawals that are not commensurate with the stated business or other activity of the person conducting the transaction or on whose behalf the transaction is conducted; (ii) transmission or receipt of funds transfers without normal identifying information or in a manner that indicates an attempt to disguise or hide the country of origin or destination or the identity of the customer sending the funds or of the beneficiary to whom the funds are sent; or (iii) repeated use of an account as a temporary resting place for funds from multiple sources without a clear business purpose therefor. The judgments involved will also extent to whether the facts and circumstances and the institution's knowledge of its customer provide a reasonable explanation for the transaction that removes it from the suspicious category.

The means of commerce and the techniques of money launderers are continually evolving, and there is no way to provide an exhaustive list of suspicious transactions. For these reasons, Treasury ultimately must rely on creation of a working partnership that enables the financial community to apply its knowledge of both its customers and of the developments in financial commerce to identify and report suspicious activity. At the same time, Treasury intends to provide meaningful guidance to the banking community concerning the particular circumstances and types of behavior that Treasury believes indicate suspicious activity.

31 U.S.C. 5318(g)(1) authorizes Treasury to require suspicious transaction reporting not only by financial institutions but by "any director, officer, employee, or agent of any financial institution." This proposed rule addresses reporting by banks, but it is not intended to reduce the obligations of bank employees or agents, within the context of a bank's reporting and Bank Secrecy Act compliance obligations, but simply to avoid at this time creating an obligation on the part of bank employees and agents independent of those general obligations. It is anticipated that a forthcoming notice of proposed rulemaking on anti-money laundering compliance programs will contain additional guidance on this matter.

Paragraph (b) sets forth the filing procedures to be followed by banks making reports of suspicious transactions. Reports are to be made within 30 days after the bank becomes aware of the suspicious transaction by completing an SAR and filing it in a central location, to be determined by FinCEN. Supporting documentation is to be collected and maintained separately by the bank, and made available to law enforcement, as necessary. Special provision is made for situations requiring immediate attention, in which case banks are to telephone the appropriate law enforcement authority in addition to filing an SAR. These filing procedures represent a significant improvement over the procedures currently followed by banks filing criminal referral forms. There is no requirement to file multiple copies of forms with multiple agencies, and no requirement to file supporting documentation with the SAR itself.

Paragraph (c) continues in effect the longstanding exception from the obligation to file in the case of a robbery or burglary that is otherwise reported to appropriate law enforcement authorities. Treasury and the financial regulators recognize that bank robbery and burglary require the immediate attention of the appropriate police authorities, and are not the types of crimes about which this regulation is directly concerned.

Paragraph (d) states the obligation of filing banks to maintain copies of SARs and the original related documentation for a period of ten years from the date of filing. As indicated above, supporting documentation is to be made available to FinCEN and appropriate law enforcement authorities on request.

Paragraph (e) incorporates the terms of 31 U.S.C. 5318 (g)(2) and (g)(3). This paragraph thus specifically prohibits those filing SARs from making any disclosure, except to authorized law enforcement and regulatory agencies, about either the reports themselves, the information contained therein, or the supporting documentation. This paragraph thus also restates the broad protection from liability for making reports of suspicious transactions, and for failures to disclose the fact of such reporting, contained in the statute. The regulatory provisions do not extend the scope of either the statutory prohibition or the statutory protection; however, because Treasury recognizes the importance of these statutory provisions to the overall effort to encourage meaningful reports of suspicious transactions, they are described in the regulation in order to remind compliance officers and others of their existence.

Finally, paragraph (f) notes that compliance with the obligation to report suspicious transactions will be audited, and provides that failure to comply with the rule shall constitute a violation of the Bank Secrecy Act and the Bank Secrecy Act regulations, which may subject non-complying banks to enforcement action. The paragraph also notes that compliance with the obligation to report suspicious transactions will have no direct bearing on a bank's potential exposure under the criminal provisions of Title 18 of the U.S. Code. The "safe harbor" provisions of 31 U.S.C. 5318(g) do not protect against criminal prosecutions.

IV. Comments

FinCEN invites public comment on all aspects of this proposal. FinCEN is particularly interested in, and specifically requests that financial institutions comment on, the following issues.

1. Consolidating information reported on the existing criminal referral form (CRF) with that reported on suspicious currency transaction reports was done to eliminate confusion and avoid duplicate reporting. Currently, in the absence of specific guidelines, each financial institution has developed internal and specific thresholds and procedures for reporting different types of activity on each form. In this proposed rule, Treasury has attempted to describe instances where, and circumstances in which, a financial institution would determine a transaction to be suspicious and file a report. However, no regulation could possibly cover all instances of potential suspicious activity. Conversely, a regulation should not be crafted so broadly as to provide no parameters or guidelines to follow. Treasury needs to know if the terms set forth in this proposed regulation are clear, specific, and sufficient as a basis for financial institutions to determine when activity is suspicious. If not, Treasury requests specific, detailed suggestions for

substitute language that should be considered.

2. In addition, over 100 predicate offenses may serve as the basis for a criminal money laundering charge under 18 U.S.C. 1956. The instructions for the SAR, as well as the proposed notices issued by the regulatory agencies, provide specific thresholds for reporting particular types of violations. Treasury is interested in the industry's position as to whether similar types of thresholds should be imposed for reporting Bank Secrecy Act and money laundering violations.

3. Finally, Treasury understands that, after filing a report on a particular customer, a financial institution may be confronted with a decision as to whether to terminate its relationship with that customer. Treasury believes that unless instructed by an authorized official, this is a decision which must be made by the financial institution. However, Treasury is interested in working with the industry to develop procedures which could help frame such decisions.

The comment period for this rule is 30 days. Although the comment period is shorter than that which would normally be employed, many of the terms reflected in this rule are also contained in the rules already proposed by the financial regulators. FinCEN will have access to those comments, and it is believed that on that basis the short comment period is justified, in light of the desire of the agencies involved to commence the operation of the less burdensome single form reporting system on October 1, 1995.

V. Regulatory Flexibility Act

FinCEN certifies that this proposed regulation will not have a significant financial impact on a substantial number of small depository institutions.

VI. Paperwork Reduction Act

The collection of information contained in this proposed rule has been submitted to the Office of Management and Budget (OMB) for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments on the collection of information should be sent to OMB, Paperwork Reduction Project, Washington, DC 20503, with copies to FinCEN, Office of Financial Institutions Policy, 2070 Chain Bridge Road, Suite 200, Vienna, Virginia 22182.

VII. Executive Order 12866

The Department of the Treasury has determined that this proposed rule is not a significant regulatory action under Executive Order 12866.

VIII. Unfunded Mandates Act of 1995 Statement

Section 202 of the Unfunded Mandates Reform Act of 1995, Pub. L. 104–4 (Unfunded Mandates Act), March 22, 1995, requires that an agency prepare a budgetary impact statement before promulgating a rule that includes a federal mandate that may result in expenditure by state, local and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year. If a budgetary impact statement is required, section 202 of the Unfunded Mandates Act also requires an agency to identify and consider a reasonable number of regulatory alternatives before promulgating a rule. FinCEN has determined that it is not required to prepare a written statement under section 202 and has concluded that on balance this proposal provides the most cost-effective and least burdensome alternative to achieve the objectives of the rule.

List of Subjects in 31 CFR Part 103

Authority delegations (Government agencies), Banks and banking, Currency, Investigations, Law enforcement, Reporting and recordkeeping requirements.

Amendment

For the reasons set forth above in the preamble, 31 CFR Part 103 is proposed to be amended as set forth below:

PART 103—FINANCIAL RECORDKEEPING AND REPORTING OF CURRENCY AND FOREIGN TRANSACTIONS

1. The authority citation for Part 103 is revised to read as follows:

Authority: 12 U.S.C. 1829b and 1951–1959; 31 U.S.C. 5311–5330.

2. In § 103.11, paragraph (r) is revised and paragraph (qq) is added to read as follows:

§ 103.11 Meaning of terms.

* * * * *

(r) *Transaction.* Transaction means a purchase, sale, loan, pledge, gift, transfer, delivery or other disposition, and with respect to a financial institution includes a deposit, withdrawal, transfer between accounts, exchange of currency, loan, extension of credit, purchase or sale of any stock, bond, certificate of deposit, or other monetary instrument, use of a safe deposit box, or any other payment, transfer, or delivery by, through, or to a financial institution, by whatever means effected.

* * * * *

(qq) *FinCEN.* FinCEN means the Financial Crimes Enforcement Network, an office within the Office of the Under Secretary (Enforcement) of the Department of the Treasury.

3. Section 103.21 is redesignated as § 103.20.

4. New § 103.21 is added to read as follows:

§ 103.21 Reports of suspicious transactions.

(a) *General.* (1) Every bank shall file with the Treasury Department, as required by this § 103.21, a report of any suspicious transaction relevant to a possible violation of law or regulation.

(2) A transaction requires reporting under the terms of this section if it is conducted or attempted by, at, or through, or otherwise involves, the bank, and

(i) The bank knows, suspects, or has reason to suspect that the transaction involves funds derived from illegal activity or is intended or conducted in order to hide or disguise funds or assets derived from illegal activity (including, without limitation, the ownership, nature, source, location, or control of such funds or assets) as part of a plan to violate or evade any law or regulation or to avoid any transaction reporting requirement under federal law;

(ii) The bank knows, suspects, or has reason to suspect that the transaction is designed to evade any requirements of this Part or of any other regulations promulgated under the Bank Secrecy Act; or

(iii) The transaction or its details appear to have no business purpose, the transaction varies from the normal methods of financial commerce, or the transaction is not the sort in which the particular customer or class of customer would normally be expected to engage, and, in each case, the bank knows of no reasonable explanation for the transaction.

(b) *Filing procedures*—(1) *What to file.* A suspicious transaction shall be reported by completing, in accordance with the instructions, a Suspicious Activity Report ("SAR"), and collecting and maintaining supporting documentation related information, in accordance with this rule.

(2) *Where to file.* The SAR shall be filed in a central location, to be determined by FinCEN.

(3) *When to file.* A bank is required to file each SAR not later than 30 calendar days after the first date on which the bank becomes aware of the facts constituting the transaction to which the report relates. If no suspect is identified on the date of detection of the incident triggering the filing, a bank may delay

filing an SAR for an additional 30 calendar days, but in no case shall reporting be delayed more than 60 calendar days after the date of the transaction. In situations involving violations that require immediate attention, such as when a reportable violation is ongoing, the bank shall immediately notify by telephone the appropriate law enforcement authority in addition to filing an SAR.

(c) *Exception.* A bank is not required to file a suspicious transaction report for a robbery or burglary committed or attempted that is reported to appropriate law enforcement authorities.

(d) *Retention of records.* A bank shall maintain a copy of any SAR filed and the original of any related documentation for a period of ten years from the date of filing the SAR, unless the bank is informed by FinCEN in writing that the bank may discard the materials sooner. Supporting documentation shall be identified, segregated, and treated as filed with the SAR. A bank shall make all supporting documentation available to FinCEN and any appropriate law enforcement agencies upon request.

(e) *Confidentiality of reports; limitation of liability.* No financial institution, nor any director, officer, employee, or agent of any financial institution, who reports a suspicious transaction under this Part, may notify any person involved in the transaction that the transaction has been reported. Thus, any person subpoenaed or otherwise requested to disclose an SAR, the information contained in an SAR or any information contained in the documentation supporting an SAR, except where such disclosure is requested by a law enforcement agency, shall refuse to produce the SAR or such other information. *See* 31 U.S.C. 5318(g)(2). A bank, and any director, officer, employee, or agent of such bank, that make a report pursuant to this § 103.21 shall be protected from liability for any disclosure contained, for failure to disclosure the fact of such report, or both, to the extent provided by 31 U.S.C. section 5318(g)(3).

(f) *Compliance.* Compliance with these rules shall be audited by the Department of the Treasury or its delegees under the terms of the Bank Secrecy Act. Failure to satisfy the requirements of this rule shall be a violation of the reporting rules of the Bank Secrecy Act and of 31 CFR Part 103. Such failure may also violate provisions of Titles 12 and 15 of the Code of Federal Regulations. Whether or not a bank satisfies the requirements of this reporting rule has no direct bearing on the obligations or possible liabilities of such bank or its directors, officers, employees, or agents, under provisions of Title 18 of the United States Code.

Dated: August 30, 1995.

Stanley E. Morris,

Director, Financial Crimes Enforcement Network.

BILLING CODE 4820-03-P

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

Cape Cod National Seashore Off-Road Vehicle Use Negotiated Rulemaking Advisory Committee

AGENCY: National Park Service.

ACTION: Notice of meeting.

Notice is hereby given in accordance with the Federal Advisory Committee Act (5 U.S.C., Appendix), that a meeting of the Cape Cod National Seashore Off-Road Vehicle Use Negotiated Rulemaking Advisory Committee will be held on Thursday and Friday, September 14 and 15, 1995.

The Committee members will meet at 9 a.m. at the Sheraton Eastham, Route 6, Eastham, MA for the first of three, two-day meetings which will be held for the following reasons:

September 14, 1995—Thursday

1. Welcoming Remarks by National Park Service.
2. Discussion of Proposed Agenda.
3. Presentation by each member of their group's perspective.
4. Adoption of Organizational Protocols.
5. Public Participation Period.
6. Adjournment.

September 15, 1995—Friday

1. Data Presentation by NPS on Off-Road Vehicles.
2. Distribution of Proposed Draft Rule.
3. Review and Discussion of Draft Rule.
4. Public Participation Period.
5. Discussion of Agenda for Next Meeting.
6. Set Date for Third Set of two-day Sessions.
7. Adjournment.

The meeting is open to the public. It is expected that 75 persons will be able to attend the meeting in addition to the Committee members.

Due to an unintentional mis-routing of this notice while it was being processed within the National Park Service, the notice could not be published at least 15 days prior to the meeting dates. The National Park Service regrets this error, but is compelled to hold the meeting as scheduled because of the significant sacrifice re-scheduling would require of committee members who have adjusted their schedules to accommodate the proposed meeting dates, and the high level of anticipation by all parties who will be affected by the outcome of the committee's actions. Since the proposed meeting dates have received widespread publicity in area news media and among the parties most affected, the National Park Service believes that the public interest will not be adversely affected by the less-than-15-days advance notice in the **Federal Register**.

The Committee was established pursuant to the Negotiated Rulemaking Act of 1990 (5 U.S.C. 561–570). The purpose of the Committee is to advise the National Park Service with regard to proposed rulemaking governing off-road vehicle use at Cape Cod National Seashore.

Interested persons may make oral/written presentations to the Committee during the business meeting or file written statements. Such presentations may be made to the Committee during the Public Participation Period the day of the meeting, or in writing to the Park Superintendent at least seven days prior to the meeting. Further information concerning the meeting may be obtained from the Superintendent, Cape Cod National Seashore, South Wellfleet, MA 02663.

Bernard C. Fagan,

Acting Chief, Office of Policy, National Park Service.

BILLING CODE 4310-70-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 95–142; RM–8685]

Radio Broadcasting Services; Zapata, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition by Arturo Lopez requesting the allotment of Channel 228A to Zapata, Texas. Channel 228A can be allotted to Zapata, Texas, in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for Channel 228A at Zapata are 26–54–30 and 99–16–18. Mexican concurrence will be requested for this proposal.

DATES: Comments must be filed on or before October 23, 1995, and reply comments on or before November 7, 1995.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Arturo Lopez, 1401 West Main Street, Rio Grande City, Texas 78582 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Notice of Proposed Rule Making,* MM Docket No. 95–142, adopted August 23, 1995, and released August 31, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, ITS, Inc., (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

[MM Docket No. 95–141; RM–8642]

Radio Broadcasting Services; Frederiksted, VI

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Jose J. Arzuaga proposing the allotment of Channel 298B1 at Frederiksted, Virgin Islands, as the community's third local FM transmission service. An engineering analysis has determined that Channel 298B1 can be allotted to Frederiksted in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for Channel 298B1 at Frederiksted North Latitude 17–42–48 and West Longitude 64–53–00.

DATES: Comments must be filed on or before October 23, 1995 and reply comments on or before November 7, 1995.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: James L. Oyster, Esq., Route 1, Box 203A, Castleton, Virginia 22716 (Counsel for Petitioner).

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Notice of Proposed Rule Making,* MM Docket No. 95–141, adopted August 24, 1995, and released August 31, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex *parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

47 CFR Part 73

[MM Docket No. 93–48; DA 95–1870]

Children's Television

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: The Commission granted a request filed jointly by the National Broadcasting Company, Inc., CBS Inc. and Capital Cities/ABC, Inc., for a 30-day extension of time to file comments and reply comments in this proceeding. The initial deadline for filing comments was June 16, 1995, and the initial deadline for filing reply comments was July 17, 1995. By *Order* released June 1, 1995, the time for filing comments was extended to September 14, 1995, and the time for filing reply comments was extended to October 16, 1995. The Commission determined that an additional extension of time was warranted in order to facilitate the development of a full and complete record.

DATES: Comments are now due on October 16, 1995, and reply comments are now due on November 15, 1995.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Kim Matthews, Mass Media Bureau (202) 776–1653.

SUPPLEMENTARY INFORMATION:

Adopted: August 25, 1995.

Released: August 25, 1995.

By the Chief, Mass Media Bureau.

Comment Date: October 16, 1995.

Reply Comment Date: November 15, 1995.

1. On April 5, 1995, the Commission adopted a *Notice of Proposed Rule in Making* MM Docket 93–48 (60 FR 20586, April 26, 1995) seeking comment on proposals to amend the Commission's rules implementing the Children's Television Act of 1990. Comments on the *Notice* were initially due on June 16, 1995, and reply comments were initially due on July 17, 1995. By *Order* released June 1, 1995 (60 FR 30506, June 9, 1995), the time for filing comments in this proceeding was extended to September 14, 1995, and the time for filing reply comments was extended to October 16, 1995.

2. On August 24, 1995, the National Broadcasting Company, Inc., CBS Inc. and Capital Cities/ABC, Inc. ("Petitioners") filed a joint request for an additional extension of time to file comments and reply comments in this proceeding, until October 16, 1995, and

November 16, 1995, respectively. Petitioners argue that additional time is needed to review a study being prepared by the National Association of Broadcasters relevant to the issues raised by the Commission in the *Notice*.

3. As set forth in Section 1.46 of the Commission's Rules, 47 CFR 1.46, it is our policy that extensions of time for filing comments in rulemaking proceedings shall not be routinely granted. Moreover, a 90-day extension of time has already been granted in this proceeding. However, in view of the circumstances outlined by Petitioners, we believe that an additional 30-day extension of time to file comments and reply comments is warranted in order to facilitate the development of a full and complete record.

4. Accordingly, it is ordered that the Request for Extension of Time filed in MM Docket No. 93–48 by the National Broadcasting Company, Inc., CBS Inc., and Capital Cities/ABC, Inc. is Granted.

5. It is further ordered that the time for filing comments in this proceeding is extended to October 16, 1995, and the time for filing reply comments is extended to November 15, 1995.

6. This action is taken pursuant to authority found in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. §§ 154(i) and 303(r), and Sections 0.204(b), 0.283 and 1.45 of the Commission's Rules, 47 CFR 0.204(b), 0.283 and 1.45.

Federal Communications Commission.

Roy J. Stewart,

Chief, Mass Media Bureau.

Wireless Services; Private Land Mobile Radio

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission adopts a *Second Memorandum Opinion and Order and Third Notice of Proposed Rulemaking,* which proposes a new framework for the operation and licensing of the 220–222 MHz band (220 MHz service). (The summary of the *Second Memorandum Opinion and Order* portion of this decision may be found elsewhere in this edition of the **Federal Register**.) This action is taken as part of the Commission's continuing implementation of the new regulatory framework for mobile radio services enacted by Congress in Section 6002(b) the Omnibus Budget Reconciliation Act of 1993. The primary goal of this proceeding is to establish a flexible regulatory framework that will allow for more efficient licensing of the 220–222 MHz band, eliminate unnecessary regulatory burdens on both existing and future licensees, and enhance the competitive potential of the 220 MHz service in the mobile services marketplace.

DATES: Comments are due on or before September 27, 1995, and reply comments are due on or before October 12, 1995.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT:

Martin Liebman, Wireless Telecommunications Bureau (202) 418–1310, or Rhonda Lien, Wireless Telecommunications Bureau (202) 418–0620.

SUPPLEMENTARY INFORMATION: This is a synopsis of the *Third Notice of Proposed Rule Making* (Third NPRM) portion of the Commission's *Third Notice of Proposed Rulemaking and Second Memorandum Opinion and Order* in PR Docket No. 89–552, GN Docket No. 93–252, PP Docket No. 93–253; FCC 95–312, adopted July 28, 1995, and released August 28, 1995. The complete text of this decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC, and also may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Synopsis of Third Notice of Proposed Rulemaking Portion of Second Memorandum Opinion and Order and Third Notice of Proposed Rulemaking

1. The Commission, in this *Third NPRM,* proposes a new framework for the operation and licensing of the 220–222 MHz band (220 MHz service).[1] This action is taken as part of our continuing implementation of the new regulatory framework for mobile radio services enacted by Congress in Section 6002(b) of the Omnibus Budget Reconciliation Act of 1993 (Budget Act), which amended Sections 3(n) and 332 of the Communications Act of 1934.[2] The Commission began the implementation of the provisions of the Budget Act with the adoption of a Notice of Proposed Rule Making in GN Docket 93–252 (58 FR 53169, October 14, 1993. In that proceeding, the Commission adopted rules governing the commercial and private mobile radio services, including the 220 MHz service, consistent with the policy of regulatory parity as reflected in the Congressional revisions to Section 332 of the Act. The proceeding the Commission is initiating with this *Third NPRM* is an outgrowth of the CMRS *Third Report and Order* (59 FR 59945, November 21, 1994), which deferred a comprehensive examination of the 220 MHz service to a separate rulemaking proceeding.

2. The Commission's primary goal in this proceeding is to establish a flexible regulatory framework that will allow for more efficient licensing of the 220–222 MHz band, eliminate unnecessary regulatory burdens on both existing and future licenses, and enhance the competitive potential of the 220 MHz service in the mobile services marketplace. In addition, the Commission seeks to ensure that licenses are granted to those who value the spectrum most highly and will maximize its use to provide the best quality and variety of service to consumers. The Commission believes its proposals strike a fair balance between the interests of current licensees and licensees to be authorized under the new rules. The adoption of the rules set forth in this *Third NPRM* will enable the continued development of the 220 MHz radio service and the implementation of a variety of new communications services to meet the future needs of the American public.

Proposals Contained in the Third NPRM

3. The *Third NPRM* invites comment on a number of issues relevant to operation and licensing of the 220 MHz service. In the category of nationwide licensing, the Commission seeks comment on whether to resolve pending mutually exclusive, non-commercial, nationwide applications by lottery, comparative hearing, or to return the applications and adopt a new licensing scheme for the 30 channels associated with the applications. If the Commission returns the applications, it makes the following proposals for Phase II nationwide licensing of these channels: (1) To license the 30 channels on a nationwide basis to all applicants—*i.e.,* applicants that intend to use the channels to offer commercial services as well as applicants that intend to use the channels for their private internal use; and (2) To assign these channels, in the form of three 10-channel authorizations, through competitive bidding pursuant to our tentative conclusion that the principal use of the spectrum will be for the provision of for-profit, subscriber-based services.

---

[1] The Commission will refer herein to any licenses granted to this new framework as Phase II licenses. Licenses granted under the current rules are referred to herein as Phase 1 licenses.

[2] Omnibus Budget Reconciliation Act of 1993, Pub. L. No. 103–66, Title VI § 6002(b)(2)(A), 6002(b)(2)(B), 107 Stat. 312, 392 (1993).

4. Also, the *Third NPRM* makes the following proposals for Phase II, non-nationwide licensing of the 220 MHz band. It first proposes to assign 60 channels in the 172 geographic areas defined as Economic Areas by the Bureau of Economic Analysis, Department of Commerce ("EA licenses") and 65 channels in the geographic areas defined by five "220 MHz Regions" ("Regional licenses") in the following manner:

Non-Nationwide 220 MHz, Proposed Channel Allocation Plan

EA Block	Channels
Channels 61–70	10
Channels 71–80	10
Channels 91–100	10
Channels 101–110	10
Channels 121–125	5
Channels 126–130	5
Channels 131–135	5
Channels 136–140	5
Total	60
Regional Block	
Channels 171–180	10
Channels 186–200	15
Channels 1–10	10
Channels 11–20	10
Channels 31–50	20
Total	65

5. The *Third NPRM* also proposes: (1) To allow all applicants to apply for these channels—*i.e.,* applicants that intend to use the channels for private, internal use as well as applicants that intend to use the channels to offer commercial services; (2) To assign these channels through competitive bidding based on our tentative conclusion that the principal use of the spectrum will be for the provision of for-profit, subscriber-based services; (3) To permit EA and Regional licensees to operate stations anywhere within their geographic borders, provided that their transmissions do not exceed a predicted field strength of 38 dBuV/m at their border and they protect Phase I licensees in accordance with existing co-channel separation criteria; (4) To provide a 10-year license term for EA and Regional licensees and require EA and Regional licensees to meet five and ten-year construction benchmarks; (5) To eliminate existing channel use restrictions, *i.e.,* the "data-only" and "non-trunked" channel designations; (6) To continue to assign, on a single-station basis, 10 channels exclusively to applicants eligible in the Public Safety Radio Service (the "Public Safety Pool") and five channels exclusively to applicants eligible in the Emergency Medical Radio Service (the "EMRS Pool"); and (7) To continue to assign channels in the Public Safety and EMRS Pools on a first-come, first-served basis and resolve mutually exclusive applications by random selection procedures.

6. The *Third NPRM* next considers technical and operational matters and proposes modifications to the Commission's existing rules with regard to fixed operations, paging operations, and the use of 5 kHz-wide channels. Specifically, the Commission proposes to allow fixed and paging operations for all 220 MHz licensees without the requirement that such use be on an ancillary basis to land mobile operations, and to allow licensees, under certain conditions, to aggregate any and all of their authorized channels to operate on channels wider than 5 kHz.

7. The *Third NPRM* also proposes to adopt definitions for initial applications, amended applications, and applications to modify authorizations in the following manner: (1) To define initial applications for 220 MHz licenses as applications for the nationwide, EA, and Regional licenses to be assigned in Phase II; (2) To adopt the same procedures for amending applications and modifying authorizations for Phase II 220 MHz licenses that are established for other Part 90 CMRS services; (3) To require non-grandfathered CMRS 220 MHz licensees to obtain STAs under the same restrictions applicable to other non-grandfathered Part 90 CMRS licensees; and (4) To extend to all 220 MHz licensees the Part 22 renewal standards adopted in the CMRS *Third Report and Order* for part 90 CMRS services.

8. The *Third NPRM* also addresses a Petition for Rulemaking filed by Fairfield Industries, Inc. (Fairfield), and adopts proposals similar to those requested by Fairfield for secondary, fixed operation in the 220–222 MHz band.

9. Finally, the *Third NPRM* proposes competitive bidding procedures to resolve mutually exclusive initial applications filed in Phase II.

Administrative Matters

10. Pursuant to applicable procedures set forth in Sections 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before September 27, 1995, and reply comments on or before October 12, 1995. To file formally in this proceeding, you must file an original plus four copies of all comments, reply comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comments, you must file an original plus nine copies. You should send comments and reply comments to Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC 20554.

11. This is a non-restricted notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in the Commission Rules. *See generally* 47 CFR 1.1202, 1.1203, and 1.1206(a).

Initial Regulatory Flexibility Act Statement

I. Reason for Action

The action is taken to propose a new framework for the licensing and operation of the 220 MHz service, and as part of the Commission's continuing implementation of Congress revisions to Sections 3(n) and 332 of the Communications Act in the Omnibus Budget Reconciliation Act of 1993.

II. Objectives of this Action

The Commission's primary goal is to establish a flexible regulatory scheme that will allow for more efficient licensing, eliminate unnecessary regulatory burdens on both existing and future licensees, and enhance the competitive potential 220 MHz services in the mobile marketplace.

III. Legal Basis

The proposed action is authorized under Sections 4(i), 303(r), 309(j) and 332 of the Communications Act of 1934, as amended.

IV. Description, Potential Impact and Number of Small Entities Affected

There are approximately 3,800 non-nationwide licensees in the 220 MHz band. The potential impact of the proposals contained in this Notice on small business is hard to predict without the benefit of comment, and the actual impact will depend on the final action taken. The intention of this action is to provide licensees with more flexibility, with a minimum increased burden. Thus, the Commission, in drafting these proposals tried to balance the needs of all licensees and potential licensees. For example, to afford licensees increased flexibility to meet consumer demand and to increase their ability to compete with other CMRS licensees, the Commission has proposed that 220 MHz licensees be permitted to operate paging and fixed systems on a primary basis and to aggregate their 5 kHz channels to operate on channels of wider bandwidth.

V. Reporting, Recordkeeping and Other Compliance Requirements

The Commission is proposing to generally decrease the burden on licensees. For example, rather than being required to obtain separate authorization for each of their base stations, non-nationwide, Phase II licensees will be permitted to operate over Commission-defined geographic areas (EAs and 220 MHz Regions) and will be allowed to construct and operate base stations anywhere within their authorized area as long as signals from those stations do not exceed a prescribed level. On the other hand, Phase II licensees who desire to operate less than 120 kilometers from Phase I co-channel stations will be required to submit a technical analysis demonstrating at least 10 dB protection to the 38 dbuV/m contour of such licensees, and all Phase II licensees will be required to submit maps and other supporting documents to demonstrate compliance with interim and final construction benchmarks.

VI. Federal Rules which Overlap, Duplicate, or Conflict with these Proposals

None.

VII. Significant Alternatives

The Commission believes that the proposals contained in this decision represent the best balance of providing licensees with the most flexibility and the least regulatory burden possible, while ensuring that license are granted to those who value the spectrum most high and will maximize its use to provide the best quality and variety of service to consumers.

•12. As required by Section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the expected impact on small entities of the proposals suggested in this document. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments on the rest of this Further Notice, but they must have a separate and distinct heading designating them as responses to the Initial Regulatory Flexibility Analysis. The Secretary shall send a copy of this Further Notice of Proposed Rule Making, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act. Pub. L. No. 96–354, 94 Stat. 1164, 5 U.S.C. Section 601 *et seq.* (1981).

13. Authority for issuance of this *Second Memorandum Opinion and Order and Third Notice of Proposed Rulemaking* is contained in Sections 4(i), 303(r), 309(j), and 332 of the Communications Act of 1934, as amended; 47 U.S.C. 154(i), 303(r), 309(j), and 332.

Ordering Clause

14. Accordingly, IT IS ORDERED that the Petition for Rulemaking in RM–8506 filed by Fairfield Industries, Inc. IS GRANTED to the extent indicated herein.

[PR Docket No. 89–552, GN Docket No. 93–252; FCC 95–381]

Wireless Services; Private Land Mobile Radio Service

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission adopts a *Fouth Notice of Proposed Rulemaking* in this proceeding, seeking comment on proposed rules that will allow existing, *i.e.,* Phase I licensees in the 220 MHz service to seek minor modifications of their licenses to construct and operate base stations at currently unauthorized locations. This action is taken to enable Phase I 220 MHz licensees to provide service within the geographic area they could serve pursuant to their initial applications, while accommodating those licensees that need to relocate their base stations for technical or other reasons.

DATES: Comments are due on or before September 13, 1995, and reply comments are due on or before September 18, 1995.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Martin Liebman, Wireless Telecommunications Bureau (202) 418–1310.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Fourth Notice of Proposed Rule Making* in PR Docket No. 89–552, and GN Docket No. 93–252, FCC 95–381, adopted August 28, 1995, and released August 29, 1995. The complete text of this *Fourth Notice of Proposed Rule Making* is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington DC, and also may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington DC 20037.

Synopsis of Notice of Proposed Rule Making

1. In this *Fourth Notice of Proposed Rulemaking (220 MHz Fourth Notice),* the Commission seeks comment on proposed rules that will allow existing, *i.e.,* Phase I licensees in the 220 MHz service to seek minor modifications of their licenses to construct and operate base stations at currently unauthorized locations. The Commission proposes to define a minor modification for the 220 MHz service as any change in an existing licensee's authorized base station location such that, at the new station location, transmissions do not exceed a predicted field strength of 38 dBuV/m at the edge of the licensee's existing service area, and the Commission proposes to define the edge of a licensee's existing service area as the predicted 38 dBuV/m field strength contour resulting from transmissions from the licensee's currently authorized base station. The Commission's goal in proposing this licensing procedure is to enable Phase I 220 MHz licensees to provide service within the geographic area they could serve pursuant to their initial applications, while accommodating those licensees that need to relocate their base stations for technical or other reasons.

2. The Commission believes that most licensees will be able to locate alternative sites relatively close to their authorized site so that they will not be required to reduce their power or antenna height significantly. However, to enable 220 MHz licensees who desire to move greater distances from their authorized site to serve as much of their original area as possible, the Commission proposes to allow all licensees modifying their authorizations

to construct an unlimited number of additional, or "fill-in" base stations within their existing service area contour so long as the transmissions from these sites to not exceed the predicted field strength of 38 dBuV/m at the edge of their existing service area contour.

3. The Commission also proposes to allow those 220 MHz licensees that are situated in areas of the nation where signal levels could be affected by unusual terrain to move to alternate locations and operate at transmitter powers and antenna heights greater than would be allowed using Figure 10 of Section 73.699 of the Commission's Rules if they provide a technical showing, using established terrain models, to justify the use of higher powers and antenna heights.

4. The Commission modification proposal, if adopted, will permit 220 MHz licensees to obtain permanent authorization to operate at alternative locations. A number of 220 MHz licensees, however, have obtained Special Temporary Authority (STA) to allow them to operate stations temporarily at such locations. The Commission believes that those licensees who have obtained STAs and have constructed and are operating stations will be accommodated by its modification proposal. The Commission therefore proposes that licensees with STAs who seek permanent authorization at their STA site be required to comply with the Commission's modification proposal.

5. The Commission intends to adopt a Report and Order in this proceeding as soon as possible to set forth procedures for minor modification of 220 MHz licenses. Shortly thereafter, the Commission will open a filing window to allow applicants to file modification applications. Licensees will then obtain an authorization to construct a base station at their desired location and under their new operating parameters. The Commission proposes that this authorization, which replaces the licensees's existing authorization, will be the licensee's "service area authorization" and that thereafter the base station constructed under the service area authorization will be the licensee's "primary base station."

6. Although the Commission intends to grant applications for service area authorizations within a short time of their receipt, it is concerned that licensees obtaining such authorizations may not have sufficient time to construct their primary base stations by the December 31, 1995, construction and operation deadline. Therefore, for all licensees obtaining service area authorizations, the Commission will extend the deadline for the construction and operation of their primary base stations to a date 4 months after the grant of their service area authorization. Licensees not granted service area authorizations must still construct their currently authorized base stations and begin operation by December 31, 1995. Licensees obtaining service area authorizations may construct fill-in stations, but will be required to notify the Commission of their construction. The authority to operate fill-in stations will then be granted through minor modification of the licensee's service area authorization.

7. Finally, with the requirement, under our modification proposal, that the predicted field strength of transmissions from a licensee's primary base station not exceed 38 dBuV/m at the licensee's existing service area contour, the Commission is concerned that licensees obtaining service area authorizations could place into operation a primary base station of minimal power simply to meet their construction requirement. To prevent this from occurring, the Commission proposes to require licensees seeking service area authorizations to operate their primary base station at a power and antenna height that will result in the transmission of a predicted signal of 38 dBuV/m or more over at least 50 percent of the licensee's existing service area.

8. The Commission will require parties commenting on this proposal to file comments within 15 days of the release of this item and to file reply comments 5 days thereafter.

Administrative Matters

9. Pursuant to applicable procedures set forth in Sections 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before September 13, 1995, and reply comments on or before September 18, 1995. To file formally in this proceeding, you must file an original plus four copies of all comments, reply comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comments, you must file an original plus nine copies. You should send comments and reply comments to Office of the Secretary, Federal Communications Commission, Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the FCC Reference Center (Room 239), 1919 M Street, NW, Washington, DC 20554.

10. This is a non-restricted notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in the Commission Rules, *See generally* 47 CFR 1.1202, 1.1203, and 1,1206(a).

Initial Regulatory Flexibility Act Statement

I. Reason for Action

The action is taken to complete the implementation of the statutory and regulatory revisions applicable to the 220 MHz service by Congress in the Omnibus Budget Reconciliation Act of 1993 and by the Commission in several orders adopted in GN Docket No. 93–252 pertaining to a framework for the acceptance of initial or modification applications for the 220 MHz service.

II. Objectives of this Action

The Commission's primary goal is to establish a flexible regulatory scheme that will allow for more efficient licensing, eliminate unnecessary regulatory burdens on existing Phase I, non-nationwide licensees, and enhance the competitive potential of 220 MHz services in the mobile marketplace.

III. Legal Basis

The proposed action is authorized under Sections 4(i), 303(r), and 332 of the Communications Act of 1934, as amended.

IV. Description, Potential Impact and Number of Small Entities Affected

There are approximately 3,800 non-nationwide licensees authorized under Phase I licensing of the 220 MHz band. The potential impact of the proposals contained in this decision on small businesses is hard to predict without the benefit of comment, and the actual impact will depend on the final action taken. The intention of this action is to provide these Phase I non-nationwide licensees, which are authorized under site-specific licenses, with more flexibility with a minimum increased burden. The Commission, in drafting these proposals, has tried to balance the needs of all licensees and potential licensees. For example, to afford Phase I non-nationwide licensees increased flexibility to meet consumer demand and the ability to compete with future 220 MHz licensees and other CMRS licensees, licensees would be permitted to relocate a base station or construct fill-in stations anywhere within a service area to be defined by their existing 38 dBuV/m service contour, as long as the transmissions from the new sites do not extend beyond that contour.

As an example of proposed rules decreasing restrictions on these Phase I licensees, a licensee seeking to relocate within the newly defined service area would file a modification application to replace its existing site-specific authorization with a service area authorization that permits relocation on a permissive basis through minor modification of the service area authorization. Moreover, the existing deadline of December 31, 1995, imposed on Phase I licenses for the construction and operation of primary base stations will be extended to a date four months after the grant of the proposed service area authorization.

V. Reporting, Recordkeeping and Other Compliance Requirements

The Commission is proposing to generally decrease the burden on non-nationwide, Phase I licensees. A licensee would be able to replace its existing site-specific authority with an authorization that permits it to relocate authorized base stations or add fill-in base stations within an area to be defined by its existing 38 dBuV/m service contour through minor modification procedures. However, the licensee would be required to file a modification application during a filing window to be established upon the adoption of final rules in order to obtain the authorization to operate within the proposed service area. Also, the licensee would be required to notify the Commission of the construction of any fill-in stations.

VI. Federal Rules which Overlap, Duplicate, or Conflict with these Proposals

None.

VII. Significant Alternatives

The Commission believes that the modification licensing procedure proposed for non-nationwide Phase I licensees represents the best balance of providing them with the most flexibility and the least regulatory burden possible. It enables licensees to exchange their site-specific license for a broad, service-area license that permits them to move sites freely within the transmission area of the existing license through modification applications, while ensuring that transmissions do not extend to new geographic areas so as to require competing applications under initial application procedures.

11. As required by Section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the expected impact on small entities of the proposals suggested in this document. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments on the rest of this *Fourth Notice of Proposed Rulemaking*, but they must have a separate and distinct heading designating them as responses to the Initial Regulatory Flexibility Analysis. The Secretary shall send a copy of this *Fourth Notice of Proposed Rulemaking*, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act. Pub. L. No. 96–354, 94 Stat. 1164, 5 U.S.C. Section 601 *et seq.* (1981).

12. Authority for issuance of this *Fourth Notice of Proposed Rulemaking* is contained in Sections 4(i), 303r, and 332 of the Communications Act of 1934 as amended; 47 U.S.C. 154(i), 303(r), and 332.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; 12-Month Petition Finding to list Silene verecunda ssp. verecunda (Mission Dolores Campion)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of 12-month petition finding.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces a 12-month finding on a petition to list *Silene verecunda* ssp. *verecunda* (Mission Dolores Campion) pursuant to the Endangered Species Act of 1973, as amended (Act). After review of all available scientific and commercial data, the Service finds that listing this species is not warranted at this time. The known populations of *S. verecunda* ssp. *verecunda* are unlikely to be affected by toxic waste site studies and clean-up related to military base closure actions. The population status and vulnerability of *S. verecunda* ssp. *verecunda* to threats is unknown for the central part of its range including Montara Mountain in San Mateo County to Rancho del Oso in Santa Cruz County, California. The recent discovery of *S. verecunda* ssp. *verecunda* in chaparral and mixed evergreen plant communities indicates that this species may be more widely distributed and have broader habitat affinities than previously believed.

DATES: The finding announced in this document was made on July 24, 1995. Comments and materials regarding this petition finding may be submitted to the Field Supervisor at the address listed below until further notice.

ADDRESSES: Data, information, comments, or questions concerning this finding may be sent to the Field Supervisor, Sacramento Field Office, U.S. Fish and Wildlife Service, 2800 Cottage Way, Room E–1803, Sacramento, California 95825–1846. The petition finding, supporting data, comments, and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Kirsten Tarp, staff biologist, at the above address or telephone 916/979–2120.

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(B) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), requires that after receiving a petition that is found to present substantial information indicating that the petitioned action may be warranted, the Service make a finding within 12 months of the date of the receipt of the petition on whether the petitioned action is (a) not warranted, (b) warranted, or (c) warranted but precluded from immediate proposal by other pending proposals of higher priority. Such 12-month findings are to be published promptly in the **Federal Register**.

On May 29, 1991, the Service received a petition dated May 28, 1991, from Mr. Brian O'Neill, General Superintendent of the Golden Gate National Recreation Area (GGNRA), National Park Service, San Francisco, California, to emergency list five candidate plants including *Silene verecunda* ssp. *verecunda* (Mission Dolores Campion). The petition cited threats to this species that would result from military base closure activities on the Presidio in San Francisco, California. These activities included hazardous or toxic waste site studies and clean-up, and increased traffic and recreational activities. A 90-day finding was made by the Service that the petition presented substantial information indicating that the

requested action may be warranted. The 90-day finding was published in the **Federal Register** on August 19, 1992 (57 FR 37513). A status review was continued for this category 2 candidate species (58 FR 51186; September 30, 1993).

Silene verecunda ssp. *verecunda* is a perennial herb in the pink family (Caryophyllaceae) that grows from 10 to 70 centimeters (4 to 28 inches) tall. Each flower has five pink to rose colored notched petals, and the purplish sepals are united into a tube, making the flower look bell-shaped.

Silene verecunda ssp. *verecunda* previously was reported to occupy open grassy areas in sandy to rocky soils in coastal strand, coastal prairie, and coastal scrub plant communities ranging from San Francisco south to Santa Cruz County (Young 1979). Recently, *S. verecunda* ssp. *verecunda* has been reported to occur in chaparral and mixed evergreen forest plant communities (Skinner and Pavlik 1994; Lion Baumgartner, Thomas Reid Associates, *in litt.* 1994). Historical populations from Lake Merced and Mission Dolores in San Francisco have been extirpated due to commercial and residential development. Currently there are about 2,000 known individuals of *S. verecunda* ssp. *verecunda* found primarily on private or non-Federal land, including about 700 plants on San Bruno Mountain (Lion Baumgartner, *in litt.* 1994). Three populations, totaling seven hundred plants according to a 1993 census, occur on the Presidio in San Francisco. It is not known how much potential habitat; or numbers of individuals may occur from Montara Mountain in San Mateo County to Rancho Del Oso in Santa Cruz County.

The northern range of *Silene verecunda* ssp. *verecunda* overlaps a rapidly urbanizing portion of the San Francisco Bay area. Most of the habitat within the northern part of the range of *S. verecunda* ssp. *verecunda* has been disturbed or eliminated except for areas on San Bruno Mountain that are protected for the conservation of the endangered mission blue butterfly (*Icaricia icarioides missionensis*). Implementation of the San Bruno Mountain Habitat Conservation Plan (HCP) developed under sections 10(a)(1)(B) and 10(a)(2)(A) of the Act has conserved habitat for the butterfly, and indirectly benefits *S. verecunda* ssp. *verecunda* by maintaining the habitat in which both species occur. On federally owned land on the Presidio in San Francisco, increased human access and activities potentially threatened three populations of *S. verecunda* ssp. *verecunda*. One of these populations has been fenced to restrict access, and the other two populations are expected to be protected by fencing when ownership of the Presidio is transferred from the Department of Army to the National Park Service. Invasive non-native vegetation is encroaching on some populations of *S. verecunda* ssp. *verecunda*. On the Presidio, however, there are ongoing efforts to remove the invasive species. There is no quantitative trend data to assess the extent to which *S. verecunda* ssp. *verecunda* has or will be impacted by non-native plants. Therefore, such threat to this species is not known to be immediate or imminent. The known populations of *S. verecunda* ssp. *verecunda* that occur on the Presidio are unlikely to be affected by toxic waste site studies and clean-up. This species does not occur near the area where these activities most likely would occur (Peter Lacivita, U.S. Army Corps of Engineers, pers. comm. 1993). Neither disease, predation, or overutilization are known to be a threat to *S. verecunda* ssp. *verecunda*.

Stochastic (random) and natural events can cause population fluctuations or even population extirpations but are not usually a concern until the number of individuals or geographic distribution become vulnerably small. A combination of remnant small populations, a narrow range, and restricted habitat, could make all or a significant part of any population susceptible to destruction from stochastic natural events, such as flood, drought, disease, or other natural occurrences (Shaffer 1981, Primack 1993) such as genetics and reproductive success.

No demographic studies exist to indicate that the reproductive success of *Silene verecunda* ssp. *verecunda* is threatened, or is vulnerable to adverse impacts from random events. There is no evidence at this time to suggest that reproductive capacity is a factor posing a threat to the survival of the species. Low seed production in perennial plants is not necessarily a trait that makes a species vulnerable to extinction. Huenneke (1986) indicates that low genetic diversity in plants is rarely seen as a threat to their survival. Intrinsically, most rare plants are likely to have genetic systems enabling them to cope with the genetic consequences of rarity.

The population status of *S. verecunda* ssp. *verecunda* and its vulnerability to threats in the central part of its range (i.e., Montara Mountain in San Mateo County to Rancho del Oso in Santa Cruz County) are not known at this time. Moreover, the discovery of *S. verecunda* ssp. *verecunda* in chaparral and mixed evergreen plant communities is an indication that this taxon may be more widely distributed and have broader habitat affinities than previously believed. Chaparral covers an extensive portion of the Coast Ranges in the San Francisco Bay area. Consequently, the unknown overall status of the taxon makes any assumptions about vulnerability of *S. verecunda* ssp. *verecunda* to current threats unsupportable at this time.

The Service has reviewed the petition, other available literature and information, and consulted with biologists and researchers familiar with *Silene verecunda* ssp. *verecunda*. On the basis of the best scientific and commercial information available regarding *S. verecunda* ssp. *verecunda*, the Service finds that the petitioned action is not warranted at this time because there is insufficient information about the taxon's status and its vulnerability to threats. The Service will continue to maintain *S. verecunda* ssp. *verecunda* as a species of concern. The Service encourages all interested parties to investigate the population status of *S. verecunda* ssp. *verecunda* and its vulnerability to threats, with particular reference to the southern and central portions of its range and populations occurring in chaparral and mixed evergreen plant communities. If additional data [illegible] available in the future, the Service may reassess the listing priority for this species or the need for listing.

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; 90-Day Finding for a Petition to List the Mohave Ground Squirrel as Threatened

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of 90-day petition finding.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the 90-day finding on a petition to list the Mohave ground squirrel (*Spermophilus mohavensis*) under the Endangered Species Act (Act) of 1973, as amended. The Service finds that the petition did not present substantial information indicating that the petitioned action may be warranted.

DATES: The finding announced in this document was made on August 4, 1995. Comments and materials related to this petition finding may be submitted to the Field Supervisor at the address listed below.

ADDRESSES: Information, data, comments, or questions concerning the status of the petitioned species should be submitted to the Field Supervisor, Fish and Wildlife Service, Ventura Field Office, 2493 Portola Road, Suite B, Ventura, California 93003. The complete file for this finding is available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Kate Symonds at the Ventura Field Office (see **ADDRESSES** section) or at 805/644–1766.

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1533 *et seq.*) (Act), requires that the Service make a finding on whether a petition to list, delist, or reclassify a species presents substantial scientific or commercial information to indicate that the petitioned action may be warranted. This finding is to be based on all information available to the Service at the time the finding is made. To the maximum extent practicable, this finding is to be made within 90 days of the date the petition was received, and the finding is to be published promptly in the **Federal Register**. If the finding is that substantial information was presented, the Service also is required to commence a review of the status of the species.

On December 13, 1993, the Service received a petition dated December 6, 1993, from Dr. Glenn R. Stewart of California Polytechnic State University, Pomona, California, requesting the Service to list the Mohave ground squirrel (*Spermophilus mohavensis*) as a threatened species. The species is a category 2 candidate (November 15, 1994; 59 FR 58988), which was first included in this category on September 18, 1985. Category 2 includes taxa for which sufficient information on biological vulnerability and threats is not currently available indicating that listing as endangered or threatened is warranted.

The Mohave ground squirrel ranges throughout the northwest portion of the Mojave Desert of California. The species spends about 7 months a year, usually from August to February, estivating in burrows. Timing of estivation is presumably related to sufficient accumulation of fat reserves (Bartholomew and Hudson 1960, Ingles 1965, Tomich 1982). Entrance into estivation may begin from June to September. In years with abundant food supplies, adults may enter estivation in late June and juveniles may enter in late July. Adults are more likely than juveniles to enter estivation early because adults do not need to gain as much weight as juveniles to survive the long estivation underground (Gustafson 1993). Males tend to enter estivation earlier than females because they do not need to put energy into milk production and feeding of young before they store fat (Leitner and Leitner 1992). Mating occurs soon after emergence from estivation and a litter of 4–6 young are born after a gestation period of 28–30 days. Mohave ground squirrels are generally less active when air temperatures drop below 88 °F or exceed 98.1 °F (Bartholomew and Hudson 1960). The diet consists of seeds, flowers, forbs, shrubs, grasses, fungi, and arthropods, although the species has demonstrated flexibility in utilizing food items as annual availabilities change (Recht 1977, Leitner and Leitner 1992).

Mohave ground squirrels have been found in all vegetation associations and up to 5,600 feet in elevation within its 7,600 square mile range (Hoyt 1972, Gustafson 1993). Gustafson (1993) reported that Mohave ground squirrels have been found in Holland's (1986) communities of Mohave wash scrub, desert sink scrub, and desert greasewood scrub. Nonetheless, the species appears to prefer large alluvial-filled valleys and deep, fine-to-medium textured soils vegetated with creosote bush scrub, shadscale scrub, or alkali sink scrub wherever desert pavement is absent (Aardahl and Roush 1985). The Mohave ground squirrel rarely is found in mountainous or rocky terrain, or dry lake beds, although exceptions have been recorded (Zembal and Gall 1980, Wessman 1977).

Excluding mountainous or rocky areas, and dry lake beds, the Mohave ground squirrel habitat is distributed over an estimated 7,200 square miles (Gustafson 1993). This figure excludes those plant communities and soil types in which the species has never been found. Without precise habitat information, it is difficult to assess the severity of habitat loss. In addition, insufficient data are available on specific habitat requirements to precisely delineate the acreage of Mohave ground squirrel habitat. Specific information on habitat requirements would also facilitate the rating of areas based on habitat quality.

In making a finding as to whether a petition presents substantial commercial and scientific information to indicate the petitioned action may be warranted, the Service must consider whether the petition is accompanied by a detailed narrative justification [50 CFR § 424.14(b)(2)(ii)]. The regulations require the Service to "consider whether such petition * * * [p]rovides information regarding the status of the species over all or a significant portion of its range" [50 CFR § 424.14(b)(2)(iii)], including current distributional and threat information. Furthermore, the Service is required to "consider whether such petition * * * [i]s accompanied by appropriate supporting documentation in the form of bibliographic references, reprints of pertinent publications, copies of reports or letters from authorities, and maps" [50 CFR § 424.14(b)(2)(iv)].

In assessing the substantiality of this petition, the Service reviewed several published and unpublished studies, agency documents, literature syntheses, commercial data, and field sighting records. The Service also interviewed researchers and other persons familiar with the species' biology. In addition, the petitioner was contacted to provide additional supporting information, which he was unable to provide. On the basis of the best scientific and commercial information available, the Service finds that the petition did not provide reliable data, recent or otherwise, throughout the species' range regarding specific habitat requirements, and population abundance and trends. Moreover, the petition did not include any data linking some activities (e.g., rural development, off-road vehicle use, Fort Irwin training) with long-term absence of the ground squirrel or on the extent to which these activities may be degrading habitat. Also, the petitioner failed to provide convincing data that grazing by domestic sheep and cattle adversely affects the habitat of the Mohave ground squirrel. Finally, the petition did not include any information to assess the extent and configuration of habitat loss due to fragmentation to determine whether this threatens the species. Therefore, given the uncertainties associated with urban growth and other threats in the Mojave

Desert, and the lack of credible studies on the biological status of the species, the Service finds that the petition did not present substantial information indicating that the listing of the Mohave ground squirrel may be warranted. Given these data uncertainties, the Mohave ground squirrel will remain a species of concern to the Service.

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; 12-Month Finding for a Petition to List the Mono Lake Brine Shrimp as Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of 12-month petition finding.

SUMMARY: The Fish and Wildlife Service (Service) announces a 12-month finding for a petition to list the Mono Lake brine shrimp (*Artemia monica*) under the Endangered Species Act of 1973, as amended (Act). This aquatic crustacean occurs only in Mono Lake, Mono County, California. A recent decision by the California State Water Resources Control Board to revise the water rights of the City of Los Angeles in the Mono Basin has apparently removed the threat of habitat degradation to the Mono Lake brine shrimp. As a result of the protections offered by this decision, the Service finds that the Mono Lake brine shrimp does not meet the definition of an endangered or a threatened species at the present time.

DATES: The finding announced in this document was made on July 24, 1995. Comments from all interested parties will be accepted until further notice.

ADDRESSES: Data, information, comments, or questions concerning this petition should be sent to the U.S. Fish and Wildlife Service, Field Supervisor, Ventura Field Office, 2493 Portola Road, Suite B, Ventura, California 93003.

FOR FURTHER INFORMATION CONTACT: Cathy R. Brown (see **ADDRESSES** section) telephone 805–644–1766; facsimile 805/644–3958.

SUPPLEMENTARY INFORMATION:

Background

Section 4(b)(3)(B) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), requires that for any petition to revise the Lists of Endangered and Threatened Wildlife and Plants that contains substantial scientific and commercial information a finding be made within 12 months of the date of receipt of the petition on whether the petitioned action is: (a) not warranted, (b) warranted, or (c) warranted but precluded from immediate proposal by other pending proposals. Such 12-month findings are to be published promptly in the **Federal Register**.

In a petition dated June 16, 1987, and received by the Service on June 19, 1987, the Service was requested by Dr. Dennis D. Murphy, of the Center for Conservation Biology, Stanford University, to list the Mono Lake brine shrimp as an endangered species. The petition cited threats to this species that would result from increasing salinity caused by continued water diversions from the streams tributary to Mono Lake. The Service's 90-day finding, that substantial information existed indicating that the petitioned action may be warranted, was published in the **Federal Register** on August 19, 1988 (53 FR 31721). A status review was initiated at that time. A timely finding on the subject petition was precluded by higher priority listing actions until the present time.

The Mono Lake brine shrimp is a species of fairy shrimp found only in Mono Lake, Mono County, located east of the Sierra Nevada Mountain Range in northeastern California. It is a branchiopod crustacean in the order Anostraca whose members have stalked compound eyes. It is characterized by an elongated body trunk of 20 or more segments, and the absence of a carapace.

Mono Lake may be the second oldest continuously existing lake in North America with an estimated age ranging from 500,000 to one million years (Vorster 1985). It is a terminal lake, that is, a closed system with no outlet flows. Lake level is maintained by five principal inflowing streams that originate in the Sierra Nevada mountain range from meltwater of the previous winter's snowpack. When the net inflow is less than the net evaporation, salinity concentrations increase as the lake's surface elevation declines. Beginning in 1941, the City of Los Angeles Department of Water and Power (Los Angeles) diverted water from four of the five streams flowing into Mono Lake for its municipal and domestic use. The water exports have caused a decline of 14 meters (m) (45 feet (ft)) in lake surface elevation and a 100 percent increase in lake salinity (Dana and Lenz 1986). Mono Lake surface elevation was about 1,956 m (6,417 ft) above mean sea level and the water salinity was about 48 grams per liter (parts per thousand (ppt)) before water exports began in 1941 (Vorster 1985, Botkin *et al.* 1988). Currently, the lake surface elevation is about 1,943 m (6,375 ft) with a salinity of 100 ppt (M. Davis, Mono Lake Committee, pers. comm., 1994).

High salinities deleteriously affect Mono Lake brine shrimp reproduction. In addition, female age at reproduction increases significantly, and the number of ovoviviparous broods per year and brood size decrease significantly as salinity increases from 76 ppt to 118 ppt (Dana and Lenz 1986). Some of these negative effects on adult Mono Lake brine shrimp fecundity occur at present lake salinities. At the current salinity of about 100 ppt, about 50 percent of Mono Lake brine shrimp cysts do not hatch (Dana and Lenz 1986).

In September 1994, the California State Water Resources Control Board issued Water Rights Decision #1631, revising Los Angeles's water rights to provide greater protection to public trust values of Mono Lake. The State Board's decision establishes an average lake level of 1,948 m (6,392 ft), with an estimated salinity of 69 ppt. These conditions are expected to be beneficial to brine shrimp reproduction and should provide adequate protection for the long-term viability of the Mono Lake brine shrimp.

On the basis of the best available scientific and commercial information, the Service finds that listing the Mono Lake brine shrimp is not warranted because the taxon is not in danger of extinction or likely to become so in the foreseeable future. The Service will reclassify the Mono Lake brine shrimp as a category 3C candidate for listing and will continue to monitor its status. Category 3C candidates are those taxa that have proven to be more abundant or widespread than previously believed and/or those that are not subject to any identifiable threat. If information becomes available indicating that the

Mono Lake brine shrimp is threatened with extinction, the Service would reevaluate this decision.

BILLING CODE 4310–55–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 672 and 675

[I.D. 063095A]

Groundfish of the Gulf of Alaska; Groundfish Fishery of the Bering Sea and Aleutian Islands Area; Extension of Allocations to Inshore and Offshore Components

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of fishery management plan amendments; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) has submitted Amendment 38 to the Fishery Management Plan (FMP) for the Groundfish Fishery to the Bering Sea and Aleutian Islands Area and Amendment 40 of the FMP for Groundfish of the Gulf of Alaska. These amendments would extend through December 31, 1998, the authority to allocate pollock and Pacific cod for processing by the inshore and offshore components of the industry and continue the Western Alaska Community Development Quota (CDQ) program. This action is necessary to continue for an additional 3-year period the allocations of pollock and Pacific cod for processing by inshore and offshore components, as well as the CDQ program. The Council intends these amendments to promote management and conservation of groundfish, enhance stability in the fisheries, and further the goals and objectives contained in the FMPs that govern these fisheries. Comments are requested from the public. Copies of the proposed FMP amendments may be obtained from the Council (see **ADDRESSES**).

DATES: Comments on the proposed amendments must be submitted by October 30,1995.

ADDRESSES: Comments on the proposed FMP amendments must be submitted to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, 709 West 9th Street, Juneau, AK 99801, or P.O. Box 21668, Juneau, AK 99802–1668, Attention: Lori J. Gravel. Copies of the proposed amendments and the Environmental Assessment/Regulatory Impact Review/Initial Regulatory Flexibility Analysis prepared for the amendments may be obtained from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510.

FOR FURTHER INFORMATION CONTACT: Jay Ginter, 907–586–7228.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act) requires that each Regional Fishery Management Council submit any fishery management plan or plan amendment it prepares to NMFS for review and approval, disapproval, or partial disapproval. The Magnuson Act also requires that NMFS, upon reviewing the plan or amendment, immediately publish a notice that the plan or amendment is available for public review and comment. NMFS will consider the public comments received during the comment period in determining whether to approve the amendment.

Proposed Amendments 38 and 40 would extend through 1998 the provisions of Amendment 18 to the FMP for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area and Amendment 23 to the FMP for Groundfish of the Gulf of Alaska. Amendments 18 and 23 are scheduled to expire at the end of 1995. The Council voted unanimously at its June 1995 meeting to extend the provisions of the expiring Amendments 18 and 23 through December 31, 1998, under Amendments 38 and 40. The only significant change would be to move the western border of the Catcher Vessel Operational Area 30 minutes longitude to the east, from 168°00' to 167°30' W. long. The intent of the Council is to promote management and conservation of groundfish, enhance stability in the fisheries, and further the goals and objectives contained in the FMPs that govern these fisheries during the period of time the Council is developing its comprehensive plan for improving the Alaska groundfish and crab fisheries.

NMFS will consider the public comments received during the comment period in determining whether to approve the proposed amendments. The proposed regulations are scheduled to be published within 15 days of this document's publication.

Dated: August 30, 1995.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 95–067–1]

Receipt of Petition for Determination of Nonregulated Status for Genetically Engineered Corn

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has received a petition from the Northrup King Company seeking a determination of nonregulated status for a corn line designated as Bt11 that has been genetically engineered for insect resistance. The petition has been submitted in accordance with our regulations concerning the introduction of certain genetically engineered organisms and products. In accordance with those regulations, we are soliciting public comments on whether this corn line presents a plant pest risk.

DATES: Written comments must be received on or before November 6, 1995.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 95–067–1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 95–067–1. A copy of the petition and any comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing access to that room to inspect the petition or comments are asked to call in advance of visiting at (202) 690–2817.

FOR FURTHER INFORMATION CONTACT: Dr. Subhash Gupta, Biotechnologist, Biotechnology Permits, BBEP, APHIS, Suite 5B05, 4700 River Road Unit 147, Riverdale, MD 20737–1237; (301) 734–7612. To obtain a copy of the petition, contact Ms. Kay Peterson at (301) 734–7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests," regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered organisms and products are considered "regulated articles."

The regulations in § 340.6(a) provide that any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340. Paragraphs (b) and (c) of § 340.6 describe the form that a petition for a determination of nonregulated status must take and the information that must be included in the petition.

On July 14, 1995, APHIS received a petition (APHIS Petition No. 95–195–01p) from the Northrup King Company (Northrup King) of Golden Valley, MN, requesting a determination of nonregulated status under 7 CFR part 340 for an insect resistant corn line designated as Bt11. The Northrup King petition states that the subject corn line should not be regulated by APHIS because it does not present a plant pest risk.

As described in the petition, corn line Bt11 has been genetically engineered to contain the *cryIA(b)* gene from *Bacillus thuringiensis* subsp. *kurstaki* (Btk), which expresses a delta-endotoxin insecticidal protein known to be effective against certain lepidopteran insects, including European corn borer. Corn line Bt11 also contains the *pat* gene isolated from *Streptomyces viridochromogenes* that encodes a phosphinothricin-N-acetyl transferase (PAT) enzyme. When introduced into a plant cell, the PAT enzyme inactivates the herbicide glufosinate and is used in corn line Bt11 as a selective marker. Expression of the introduced genes is controlled by the 35S promoter derived from the plant pathogen cauliflower mosaic virus and a NOS terminator derived from the nopaline synthase gene of *Agrobacterium tumefaciens.*

Corn line Bt11 is currently considered a regulated article under the regulations in 7 CFR part 340 because it contains gene sequences derived from plant pathogenic sources. The subject corn line has been evaluated in field trials conducted since 1992 under permits or notifications issued by APHIS, and since 1993, field trials have also been conducted under an experimental use permit issued by the Environmental Protection Agency (EPA). In the process of reviewing the applications for field trials of the subject corn, APHIS determined that the vectors and other elements were disarmed and that the trials would not present a risk of plant pest introduction or dissemination.

In the Federal Plant Pest Act, as amended (7 U.S.C. 150aa *et seq.*), "plant pest" is defined as "any living stage of: Any insects, mites, nematodes, slugs, snails, protozoa, or other invertebrate animals, bacteria, fungi, other parasitic plants or reproductive parts thereof, viruses, or any organisms similar to or allied with any of the foregoing, or any infectious substances, which can directly or indirectly injure or cause disease or damage in any plants or parts thereof, or any processed, manufactured or other products of plants." APHIS views this definition very broadly. The definition covers direct or indirect injury, disease, or damage not just to agricultural crops, but also to plants in general, for example, native species, as well as to organisms that may be beneficial to plants, for example, honeybees, rhizobia, etc.

This genetically engineered corn line is also currently subject to regulation by other agencies. The EPA is responsible for the regulation of pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (7 U.S.C. 136 *et seq.*). FIFRA requires that all pesticides, including insecticides, be registered prior to distribution or sale, unless exempt by EPA regulation.

Under the Federal Food, Drug, and Cosmetic Act (FFDCA) (21 U.S.C. 301 *et seq.*), pesticides added to raw agricultural commodities generally are considered to be unsafe unless a tolerance or exemption from tolerance has been established. Foods containing unsafe pesticides are deemed to be adulterated. Residue tolerances for pesticides are established by EPA under the FFDCA; the Food and Drug Administration (FDA) enforces the tolerances set by EPA.

The FDA published a statement of policy on foods derived from new plant varieties in the **Federal Register** on May 29, 1992 (57 FR 22984–23005). The FDA statement of policy includes a discussion of the FDA's authority for ensuring food safety under the FFDCA, and provides guidance to industry on the scientific considerations associated with the development of foods derived from new plant varieties, including those plants developed through the techniques of genetic engineering.

In accordance with § 340.6(d) of the regulations, we are publishing this notice to inform the public that APHIS will accept written comments regarding the Petition for Determination of Nonregulated Status from any interested person for a period of 60 days from the date of this notice. The petition and any comments received are available for public review, and copies of the petition may be ordered (see the **ADDRESSES** section of this notice).

After the comment period closes, APHIS will review the data submitted by the petitioner, all written comments received during the comment period, and any other relevant information. Based on the available information, APHIS will furnish a response to the petitioner, either approving the petition in whole or in part, or denying the petition. APHIS will then publish a notice in the **Federal Register** announcing the regulatory status of Northrup King's corn line Bt11 and the availability of APHIS' written decision.

Authority: 7 U.S.C. 150aa–150jj, 151–167, and 1622n; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(c).

Done in Washington, DC, this 30th day of August 1995.

Terry L. Medley,

Acting Administrator, Animal and Plant Health Inspection Service.

Grain Inspection, Packers and Stockyards Administration

Proposed Posting of Stockyards

The Grain Inspection, Packers and Stockyards Administration, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in Section 302 of the Packers and Stockyards Act (7 U.S.C. 202), and should be made subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*).

AL–188—Centre Livestock Market, Inc. Centre, Alabama

GA–215—Calhoun Stockyard Highway 53, Inc. Calhoun, Georgia

MS–168—S & S Sales Mantachie, Mississippi

OR–126—Mike's Livestock Auction Eagle Point, Oregon

SC–152—L & H Auction Seneca, South Carolina

Pursuant to the authority under Section 302 of the Packers and Stockyards Act, notice is hereby given that it is proposed to designate the stockyards named above as posted stockyards subject to the provisions of said Act.

Any person who wishes to submit written data, views or arguments concerning the proposed designation may do so by filing them with the Director, Livestock Marketing Division, Grain Inspection, Packers and Stockyards Administration, Room 3408—South Building, U.S. Department of Agriculture, Washington, DC 20250 by September 14, 1995. All written submissions made pursuant to this notice will be made available for public inspection in the office of the Director of the Livestock Marketing Division during normal business hours.

Done at Washington, DC, this 30th day of August 1995.

Daniel L. Van Ackeren,

Director, Livestock Marketing Division.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Evaluation of National Estuarine Research Reserves

AGENCY: Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), DOC.

ACTION: Notice of intent to evaluate.

SUMMARY: The NOAA Office of Ocean and Coastal Resource Management (OCRM) announces its intent to evaluate the performance of Elkhorn Slough (CA), Hudson River (NY), ACE Basin (SC), and Tijuana River (CA) National Estuarine Research Reserve Programs.

These evaluations will be conducted pursuant to sections 312 and 315 of the Coastal Zone Management Act of 1972 (CZMA), as amended. The CZMA requires a continuing review of the performance of states with respect to Reserve management. Evaluation of National Estuarine Research Reserves requires findings concerning the extent to which a state has met the national objectives, adhered to its Reserve Management Plan approved by the Secretary of Commerce, and adhered to the terms of financial assistance awards funded under the CZMA. The evaluations will include a site visit, consideration of public comments, and consultations with interested Federal, State, and local agencies and members of the public. Public meetings are held as part of the site visits.

Notice is hereby given of the dates of the site visits for the listed evaluations, and the dates, local times, and locations of public meetings during the site visits.

The Elkhorn Slough National Estuarine Research Reserve, California site visit will be from November 13–17, 1995. A public meeting will be held on Wednesday, November 15, 1995, at 7:00 P.M., at the Elkhorn Slough Visitor Center, 1700 Elkhorn Road, Watsonville, CA 95076.

The Hudson River National Estuarine Research Reserve, New York site visit will be from November 13–17, 1995. A public meeting will be held on Thursday, November 16, 1995, at 7:00 P.M., at the New York State Department of Environmental Conservation Region 3 Office in New Paltz, NY.

The ACE Basin National Estuarine Research Reserve, South Carolina site visit will be from November 27 to December 1, 1995. A public meeting will be held on Thursday, November 30, 1995, at 7:00 P.M., at the Edisto Island Town Hall, 2414 Murray Street, Edisto Beach, SC.

The Tijuana River National Estuarine Research Reserve, California site visit will be from December 4–8, 1995. A public meeting will be held on Wednesday, December 6, 1995, at 7:00 P.M., at the Reserve Visitors Center, 301 Caspian Way, Imperial Beach, California.

The States will issue notice of the public meeting(s) in a local newspaper(s) at least 45 days prior to the public meeting(s), and will issue other timely notices as appropriate.

Copies of the State's most recent performance reports, as well as OCRM's notifications and supplemental request letters to the States, are available upon request from OCRM. Written comments from interested parties regarding these Programs are encouraged and will be accepted until 15 days after the public meeting. Please direct written comments to Vickie A. Allin, Chief, Policy Coordination Division, Office of Ocean and Coastal Resource Management, NOS/NOAA, 1305 East-West Highway, Silver Spring, Maryland 20910. When the evaluation is completed, OCRM will place a notice in the **Federal Register** announcing the availability of the Final Evaluation Findings.

FOR FURTHER INFORMATION CONTACT: Vickie A. Allin, Chief, Policy Coordination Division, Office of Ocean and Coastal Resource Management, NOS/NOAA, 1305 East-West Highway, Silver Spring, Maryland, 20910, (301) 713–3090, exit. 126.

Federal Domestic Assistance Catalog 11.419 Coastal Zone Management Program Administration

Dated: August 30, 1995.

W. Stanley Wilson,

Assistant Administrator for Ocean Services and Coastal Zone.

BILLING CODE 3510–08–M

[I.D. 082895C]

Mid-Atlantic Fishery Management Council; Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Mid-Atlantic Fishery Management Council and its Surf Clam and Ocean Quahog Committee, and Demersal Species Committee jointly with the Atlantic States Marine Fisheries Commission's (ASMFC) Summer Flounder Board will hold public meetings.

DATES: The meetings will be held on September 19–21, 1995.

ADDRESSES: The meetings will be held at the Radisson Hotel Philadelphia, 500 Stevens Drive, Lester, PA; telephone: 215–521–5900.

Council Address: Mid-Atlantic Fishery Management Council, 300 S. New Street, Dover, DE 19901.

FOR FURTHER INFORMATION CONTACT: David R. Keifer, Executive Director, Mid-Atlantic Fishery Management Council; telephone: 302–674–2331.

SUPPLEMENTARY INFORMATION: On September 19, the Surf Clam and Ocean Quahog Committee will meet from 10:00 a.m. until noon. The Demersal Species Committee will meet jointly with the ASMFC Summer Flounder Board from 1:00 until 5:00 p.m. On September 20, the Council will meet from 8:00 a.m. until 4:00 p.m. On September 21, the Council will meet from 8:00 a.m. until approximately noon.

The purpose of these meetings is to review the surf clam and ocean quahog overfishing definitions and confirm the 1996 quota recommendations, discuss 1996 summer flounder management, prepare comments on Amendment 7 to the New England Council's Multispecies Plan, take Council action on 1996 quota recommendations for Atlantic mackerel, squid, and butterfish, and consider other fishery management matters.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Joanna Davis at 302–674–2331 at least 5 days prior to the meeting dates.

Dated: August 30, 1995.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of scientific research permit no. 976 (P5H)

SUMMARY: Notice is hereby given that Dr. Donald B. Siniff, University of Minnesota, 1987 Upper Buford Circle, St. Paul, MN 55108 has been issued a permit to take Antarctic seals for purposes of scientific research.

ADDRESSES: The permit and related documents are available for review upon written request or by appointment, in the following office(s):

Permits Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910 (301/713–2289).

SUPPLEMENTARY INFORMATION: On June 21, 1995, notice was published in the **Federal Register** (60 FR 32304) that a request for a scientific research permit to take Weddell seals (*Leptonychotes weddelli*), crabeater seal (*Lobodon carcinophagus*), leopard seal (*Hydrurga leptonyx*), Ross seal (*Ommatophoca rossii*), southern elephant seal, (*Mirounga leonina*), and Antarctic fur seal (*Arctocephalus gazella*) had been submitted by the above-named individual. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

Dated: August 29, 1995.

Ann D. Terbush,

Chief, Permits and Documentation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–F

Membership of the National Oceanic and Atmospheric Administration Performance Review Board

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of Membership of NOAA Performance Review Board.

SUMMARY: In accordance with 5 U.S.C. 4314(c)(4), NOAA announces the appointment of persons to serve as members of the NOAA Performance Review Board (PRB). The NOAA PRB is responsible for reviewing performance appraisals and ratings of Senior Executive Service (SES) members and making written recommendations to the appointing authority on SES retention and compensation matters, including performance-based pay adjustments, awarding of bonuses and reviewing recommendations for potential Presidential Rank Award nominees. The appointment of these members to the NOAA PRB will be for periods of 24 months.

EFFECTIVE DATE: The effective date of service of appointees to the NOAA Performance Review Board is September 29, 1995.

FOR FURTHER INFORMATION CONTACT: Rodney E. Markham, Senior Executive Service Program Manager, Human Resources Management Office, Office of Administration, NOAA, 1315 East-West Highway, Silver Spring, Maryland 20910, (301) 713–0530 (ext. 195).

SUPPLEMENTARY INFORMATION: The names and position titles of the members of the NOAA PRB (*NOAA officials unless otherwise identified*) are set forth below:

Carol Beaver: Chief, Aeronautical Charting Division, National Ocean Service
Hilda Diaz-Soltero: Science and Research Director, Northwest Region, National Marine Fisheries Service
David Evans: Senior Scientist, National Ocean Service
Nancy Foster: Deputy Assistant Administrator, National Marine Fisheries Service
Susan B. Fruchter: Counselor to the Under Secretary for Oceans and Atmosphere
Lois J. Gajdys: Chief, Management and Budget, National Weather Service
Margaret F. Hayes: Assistant General Counsel for Fisheries, Office of General Counsel
Walter J. Hussey: Director, Office of Systems Development National Environmental Satellite, Data and Information Service
David Jefferson: Chief, Information Systems Engineering Division (National Institute of Standards and Technology)
Eugenia Kalnay: Chief, Development Division, National Weather Service
Richard Kayser: Chief, Thermophysics Division, Chemical Science and Technology Laboratory (National Institute of Standards and Technology)
Katharine W. Kimball: Deputy Assistant Secretary, Office of the Assistant Secretary
Martha R. Lumpkin: Director, Central Center, Office of Administration
Ronald D. McPherson: Director, National Centers for Environmental Prediction, National Weather Service
George P. Murphy: Chief, Automation Division, National Weather Service
Ned A. Ostenso: Assistant Administrator, Office of Oceanic and Atmospheric Research
James L. Rassmussen: Director, Environmental Research Laboratories, Office of Oceanic and Atmospheric Research
P. Krishna Rao: Director, Office of Research and Applications, National Environmental Satellite, Data and Information Service
Kelly C. Sandy: Director, Western Center, Office of Administration
Alan R. Thomas: Deputy Assistant Administrator, Office of Oceanic and Atmospheric Research
Michael F. Tillman: Science and Research Director, Southwest Region, National Marine Fisheries Service
Usha S. Varanasi: Science and Research Director, Northwest Region, National Marine Fisheries Service
John Williams: Director, Office of Technology Commercialization (National Institute of Standards and Technology)
Gregory W. Withee: Deputy Assistant Administrator, National Environmental Satellite, Data and Information Service
Helen M. Wood: Director, Office of Satellite Data Processing and Distribution, National Environmental Satellite, Data and Information Service
Sally J. Yozell: Director, Office of Legislative Affairs
Susan F. Zevin: Deputy Assistant Administrator for Operations, National Weather Service

Dated: August 31, 1995.

Diana H. Josephson,

Deputy Under Secretary.

[I.D. 081895C]

North Pacific Fishery Management Council; Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of meetings.

SUMMARY: The North Pacific Fishery Management Council (Council) and its advisory bodies will meet the week of September 25, 1995.

DATES: The meetings are scheduled as follows:

1. Advisory Panel (AP)—September 25 to September 29, 1995, 8:00 a.m. to 5:00 p.m.
2. Scientific and Statistical Committee (SSC)—September 25 to September 28, 1995, 8:00 a.m. to 5:00 p.m.
3. Council—September 27, 1995, 8:00 a.m., and expected to continue through October 2, 1995.

ADDRESSES: The AP and SSC will meet at the Quality Inn, 17001 Pacific Highway South, Seattle, WA. The Council will meet at the Radisson Hotel, adjacent to the Quality Inn.

Council address: North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510.

FOR FURTHER INFORMATION CONTACT: North Pacific Fishery Management Council; telephone: 907–271–2809.

SUPPLEMENTARY INFORMATION: The agenda for the Council meeting will include the following subjects:

1. Oath of office to new Council appointees and election of Chairman and Vice Chairman of the Council.
2. Reports on domestic fisheries by the Alaska Department of Fish and Game and NMFS, enforcement reports from NMFS and the U.S. Coast Guard, report on international fishery issues, and a report on the status of Steller sea lions.
3. Status report on the Sablefish and Halibut Individual Fishing Quota (IFQ) program and review of several proposed changes to the plan.
4. Observer Oversight Committee report and review of observer program fee concerns, including staff report on proposals to address Council concerns.
5. Review of discussion papers on full utilization, improved retention and harvest priority, individual bycatch quotas, and rock sole seasonal apportionment.
6. Review of the License Limitation System to clarify issues and report on the status of proposed regulations, review of a work plan for a Bering Sea/Aleutian Islands (BSAI) pollock IFQ system, and report on the status of the moratorium on groundfish and crab fisheries.
7. Review of Council operations, including annual cycle for amendment proposals.
8. Review of pollock Community Development Quota (CDQ) applications for 1996–98, receipt of a status report from the State of Alaska on adding Akutan to the CDQ eligibility list, and consider establishing a CDQ Implementation Committee.
9. Review of status of stocks for crab fisheries and set time for a joint meeting of the Council and Alaska Board of Fisheries.
10. Status report on Amendment 1 to the Scallop Fishery Management Plan; possible emergency action to open federal waters in early 1996.
11. Review and approval of initial Gulf of Alaska and Bering Sea/Aleutian Islands (BSAI) stock assessment and fishery evaluation reports for 1996, and approval of initial 1996 groundfish and bycatch specifications for public review, including vessel incentive program rate standards and discard mortality rates for halibut.
12. Initial review of amendments for grid sorting of halibut; revisions to the Pacific ocean perch rebuilding plan, overfishing definitions and crab protection closure areas; a forage fish amendment, rock sole seasonal apportionments, and inseason flexibility to move crab prohibited species catch between BSAI Zones 1 and 2; and reauthorization of BSAI cod allocation by gear type.
13. Review of proposals received for amendments to the groundfish fishery management plans. Other groundfish issues to be discussed, time permitting, include: A report on a trawl mesh experiment, a NMFS report on frameworking inseason micro-management measures, and review of a draft proposed rule to require scale weight measurements of catch in the pollock fishery.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Helen Allen, 907–271–2809, at least 5 working days prior to the meeting date.

Dated: August 30, 1995.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's Northern Habitat Panel will hold a public meeting.

DATES: The meeting will be held on September 14, beginning at 10:00 a.m.

ADDRESSES: The meeting will be held at the Natural Resource Building, 1111 Washington Street, SE, Room 571, Olympia, WA.

Council address: Pacific Fishery Management Council, 2130 SW Fifth Avenue, Suite 224, Portland, OR 97201.

FOR FURTHER INFORMATION CONTACT: John Coon, Fishery Management Coordinator (Salmon); telephone: (503) 326–6352.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to discuss and act on regional habitat issues which merit consideration at this time.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Amanda Bennett at (503) 326–6352 at least 5 days prior to the meeting date.

Dated: August 30, 1995.

BILLING CODE 3510–22–F

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Availability of Funds for Governor's Innovative Programs, National Nonprofit Demonstration Programs, and Disability Demonstration Programs

AGENCY: Corporation for National and Community Service.

ACTION: Notice of availability of funds.

SUMMARY: The Corporation for National and Community Service (the Corporation) announces the availability of up to $3,000,000 for Governor's Innovative Programs and National Nonprofit Demonstration Programs. The Corporation also announces the availability of up to $2,000,000 for AmeriCorps* Disability Demonstration Programs. This program should demonstrate ways to recruit and integrate individuals with disabilities in all aspects of AmeriCorps* programs. Under the National Nonprofit and Disability Demonstration Programs, organizations and qualified agencies can apply for grants to operate AmeriCorps* programs. Governors may apply for grants to operate AmeriCorps* or other innovative programs that engage Americans in community service to meet critical needs. The Corporation expects to make up to 20 grants. The grant size will vary by circumstance, program scope, and need. The Corporation does not anticipate making operating grants in excess of $300,000. This program is subject to the availability of funds.

DATES: Application materials will be available beginning on September 6, 1995. Deadline for submission of applications for the Governor's Demonstration Programs is November 7, 1995. Deadline for submission of applications for National Nonprofit Demonstration Programs is October 24, 1995. Deadline for the Disability Demonstration Programs is October 31, 1995. Applications for all three programs must be received at the Corporation by 3:30 p.m. Eastern Time, on the specified due date indicated for each program.

ADDRESSES: Applications must be submitted to: Corporation for National Service, 1201 New York Avenue NW, Washington, DC. 20525, Attention: Margaret Rosenberry. Applications may not be submitted by facsimile. This notice may be requested in an alternative format for the visually impaired by calling 202–606–5000, ext. 260.

FOR FURTHER INFORMATION CONTACT: To obtain application materials, contact the Corporation in writing or via facsimile at (202) 565–2786, Attention: Margaret Rosenberry. For further information, contact Margaret Rosenberry, Director of Planning and Program Development, at (202) 606–5000, ext. 154.

SUPPLEMENTARY INFORMATION:

Background

The Corporation is a federal government corporation that engages Americans of all ages and backgrounds in community-based service. Through their service, participants have direct and demonstrable impact on the nation's education, public safety, human, and environmental needs. In doing so, the Corporation fosters civic responsibility, strengthens the ties that bind us together as a people, and provides educational opportunity for those who make a substantial commitment to service. Pursuant to the National and Community Service Act of 1990, as amended, the Corporation "may undertake activities to * * * support innovative and model programs." 42 U.S.C. Sec. 12653(b).

Through these programs, the Corporation hopes to learn how it can provide more flexibility in program models and requirements without compromising program quality and without losing our emphasis on "getting things done," strengthening communities, and developing participants. In general, the Corporation is accepting applications from national nonprofits, governors and state commissions, AmeriCorps* programs, and organizations working with persons with disabilities. The programs funded under these grants should encourage innovation, expand the universe of service models, and support service programs in a variety of settings.

Period of Support

Grants are made on an annual basis. Grantees may apply for second year support under AmeriCorps* or Subtitle H if funding is available. Renewal funding is not guaranteed and will be based on quality, successful performance, and availability of funds.

Eligible Applicants

For the Governor's Innovative Programs, the state commission on national service will serve as the legal applicant, and the governor may designate other state and/or local agencies or offices as partners in the effort. Although the commission serves as the grantee, the programs may not be operated by the commission itself. Instead, the programs must be operated by appropriate state or local government agencies, and nonprofit organizations, institutions of higher education, or Indian tribes. A letter from the governor which demonstrates support for the program both financially and programmatically is required for this application.

For National Nonprofit Demonstration Programs, only national nonprofit organizations that represent networks of youth or senior citizen-serving organizations, or those that promote and provide technical assistance to volunteer programs and networks are eligible to apply. The national nonprofit organization may apply to operate a demonstration in one, two or three sites. The term "national nonprofit" means any nonprofit organization whose mission, membership, activities, or constituencies are national in scope.

Existing AmeriCorps* State grantees funded, in part or in whole, as a competitive program (rather than with funds solely from the state formula) and their operating or project sites, state commissions, AmeriCorps* National grantees and their operating or project sites, Learn & Serve America Demonstration Programs that have AmeriCorps* Members, and organizations that work with the disability community and can provide technical assistance to AmeriCorps* programs, are eligible to apply for the Disability Demonstration Programs. If an applicant is working with existing AmeriCorps* program(s), a letter from the program(s) which demonstrates support and participation is required. Those AmeriCorps* State grantees that do not know whether they are competitive or formula programs should contact their state commission. The ineligibility of AmeriCorps* State grantees funded from the state formula to apply for Disability Demonstration Programs is pursuant to 42 U.S.C. § 12581(d)(5)(B).

Program Preferences and Priorities

The Corporation is seeking demonstration programs that enhance existing programming at the state and local level, and will provide new knowledge about effective service programming and its impact on schools, communities, Members/participants and institutions. Therefore, particular emphasis will be placed on programs

that can do one or more of the following:

1. Demonstrate new ways to link private businesses, foundations, and the public sector in joint service initiatives;
2. Enhance existing efforts and forge new partnerships with volunteer and community service programs;
3. Involve AmeriCorps* in recruiting, training, and supervising volunteers who receive no stipends;
4. Demonstrate ways to recruit and include persons with disabilities in all aspects of participation as AmeriCorps* Members;
5. Join youth and adults over age 55 to serve their communities together;
6. Operate in rural areas; and/or
7. Involve school-age youth in summer and school-year service-learning activities.

The specific priorities differ for each of the three Demonstration Program categories. The Corporation encourages applicants to develop focused programs and not to design programs to meet multiple priorities. Those applying for funds under the National Nonprofit Demonstration Program must meet community needs in the following areas:

1. Public Safety—especially violence against women and community policing;
2. Early Childhood Development—especially in health, school readiness, child care, parenting and needs of children ages 0–6;
3. Teen Pregnancy Prevention; or
4. After-school and Summer Childcare.

Under Governor's Innovative Programs, applicants may choose to meet needs identified by the governor or by the state commission on national and community service. Disability Demonstration Programs must meet the priorities established by the AmeriCorps* programs with which they will work and may add independent living to service activities.

Match Requirements

There are three basic requirements concerning program funding for all Demonstration Programs.

1. The Corporation share of the total cost of the program may not exceed 80%. The applicant may choose in which specific areas of the budget the 20% match will be made.
2. Each grantee must provide for its share of the cost of carrying out a funded program through a payment in non-federal cash and in-kind, and may provide for such share through state and local sources. At least 10% of the match must be cash.
3. The recipient of a grant may speed no more than 5% of the total grant funds on administrative costs. Additional administrative costs may be covered in the match.

Overview of Application Requirements

Application requirements will be set forth in detail in the application materials. Generally, all programs must comply with all applicable OMB circulars for grant management and with federal laws and regulations, including the supplementation, nonduplication and nondisplacement provisions set forth in 45 CFR 2506.2. Nonprofit organizations must comply with the independent audit requirements of OMB Circular A–133. The Corporation will provide copies of OMB circulars to applicants that do not have access to such materials.

Each applicant must submit one original and six (6) copies of the application package. The application must include all the forms and components listed in the instructions for the application. Applications must not exceed the page limitations specified for each section. Only 10 pages of appendices will be accepted (this includes annual reports, letters of support, and any supplementary material not specifically requested in the application.) Applications must be received at the Corporation by the relevant deadline date. Facsimiles will not be accepted.

Application Review

The Corporation is looking for high quality programs that are innovative and have the potential to be replicated. Applications are evaluated through a multi-stage process that includes reviews by peers and the Corporation staff. Decisions on semi-finalists will be made by the Corporation leadership, and semi-finalists may be asked to supply additional information and an implementation plan before final decisions are made. In addition, the Corporation may bring semi-finalists in for interviews. During the peer review process, the applications will be evaluated on the criteria listed below:

(1) Program Concept and Design (40%)
(2) Organizational Capacity (30%)
(3) Innovation and Ability to Advance the Field (20%)
(4) Cost-Effectiveness (10%).

In addition to the priorities set by the Corporation, the Corporation staff will, during the staff review process, also take into consideration diversity of geographic distribution and program model diversity in making its funding recommendations.

Dated: September 1, 1995.

Terry Russell,

General Counsel, Corporation for National and Community Service.

BILLING CODE 6050–28–M

DEPARTMENT OF DEFENSE

Office of the Secretary of Defense

Meeting of the DOD Advisory Group on Electron Devices

AGENCY: Department of Defense, Advisory Group on Electron Devices.

ACTION: Notice.

SUMMARY: Working Group A (Microwave Devices) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATES: The meeting will be held at 0900, Monday, 11 September 1995.

ADDRESSES: The meeting will be held at Palisades Institute for Research Services, Inc., 1745 Jefferson Davis Highway, Crystal Square Four, suite 500, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Walter Gelnovatch, AGED Secretariat, 1745 Jefferson Davis Highway, Crystal Square Four, suite 500, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide advice to the Under Secretary of Defense for Acquisition and Technology, to the Director of Defense Research and Engineering (DDR&E), and through the DDR&E to the Director, Advanced Research Projects Agency (ARPA) and the Military Departments in planning and managing an effective and economical research and development program in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. This microwave device area includes programs on developments and research related to microwave tubes, solid state microwave devices, electronic warfare devices, millimeter wave devices, and passive devices. The review will include details of classified defense programs throughout.

In accordance with Section 10(d) of Pub. L. 92–463, as amended, (5 U.S.C. App. II § 10(d) (1988)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. § 552(c)(1) (1988), and that accordingly, this meeting will be closed to the public.

Dated: August 31, 1995.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

National Security Education Board Meeting

AGENCY: Office of the Assistant Secretary of Defense, Strategy and Requirements.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Public Law 92–463, notice is hereby given of a forthcoming meeting of the National Security Education Board. The purpose of the meeting is to review and make recommendations to the Secretary of Defense concerning requirements established by the David L. Boren National Security Education Act, Title VII of Public Law 102–183, as amended.

DATE: October 30, 1995.

ADDRESS: The Crystal City Marriott Hotel, 1999 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: Mr. Edmond J. Collier, Deputy Director for External Affairs, National Security Education Program, 1101 Wilson Boulevard, suite 1210, Rosslyn, Virginia 22209–2248; (703) 696–1991. Electronic mail address: collier@nsep.policy.osd.mil

SUPPLEMENTARY INFORMATION: The Board meeting is open to the public.

Dated: August 31, 1995.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000-04-M

Defense Advisory Committee on Women in the Services (DACOWITS)

ACTION: Notice of conference.

SUMMARY: Pursuant to Public Law 92–463, as amended, notice is hereby given on a forthcoming meeting of the Defense Advisory Committee on Women in the Services (DACOWITS). The purpose of DACOWITS is to advise the Secretary of Defense on matters relating to women in the Services. The Committee meets semiannually.

DATES: October 12–15 (summarized agenda follows).

ADDRESS: Crowne Plaza Hotel, 100 North First Street, Phoenix, AZ 85004, (602) 257–1525.

AGENDA: Sessions will be conducted daily and will be open to the public. The agenda will include the following:

Wednesday, October 11, 1995

Conference registration (Conference Participants)
Meeting for Military Representatives
Meeting for Liaison Officers and DACOWITS Staff
Executive Committee Meeting
Plenary Session/Social (Paid Registered Conference Participants only)

Thursday, October 12, 1995

Continental Breakfast (Paid Registered Conference Participants only)
Opening Ceremony/General Business Session (Open to Public)
Lunch (current DACOWITS members, Military Representatives, Liaison Officers and staff)
Field Trip/Installation Visit (current DACOWITS members and Senior Military Representatives only)

Friday, October 13, 1995

Continental Breakfast (Paid Registered Conference Participants only)
Subcommittee sessions (Open to Public)
Lunch (Paid Registered Conference Participants only)
Subcommittee sessions Wrap-up (Open to Public)
OSD Reception and Dinner (By Invitation only)

Saturday, October 14, 1995

Sub-Committee Members Breakfast (current DACOWITS members and Military Representatives)
Sub-Committee Brief (current DACOWITS members and Military Representatives)
Lunch (Paid Registered Conference Participants only)
Executive Committee Mark Up

Sunday, October 15, 1995

Executive Committee Breakfast
Continental Breakfast (Paid Registered Conference Participants only)
Final Committee Meeting/Military Representatives review
Closing Session (Open to Public)

FOR FURTHER INFORMATION CONTACT: Lieutenant Colonel Patricia F. Kersey, USAF or LCDR Tala J. Welch, USN DACOWITS and Military Women Matters, OASD (Force Management Policy), 4000 Defense Pentagon, room 3D769, Washington, DC 20301–4000; Telephone (703) 697–2122.

SUPPLEMENTARY INFORMATION: The following rules and regulations will govern the participation by members of the public at the conference:

(1) Members of the public will not be permitted to attend the OSD Reception and Dinner and Field Trip.

(2) The Opening Session/business session, all subcommittee sessions and the closing session will be open to the public.

(3) Interested persons may submit a written statement for consideration by the Committee and/or make an oral presentation of such during the conference.

(4) Persons desiring to make an oral presentation or submit a written statement to the Committee must notify the point of contact listed above no later than October 6.

(5) Length and number of oral presentations to be made will depend on the number of requests received from members of the public.

(6) Oral presentations by members of the public will be permitted only on Sunday, October 15, 1995, before the full Committee.

(7) Each person desiring to make an oral presentation must provide the DACOWITS office 1 copy of the presentation by October 10 and make 175 copies of any material that is intended for distribution at the conference.

(8) Persons submitting a written statement for inclusion in the minutes of the conference must submit to the DACOWITS staff one copy by the close of the conference.

(9) Other new items from members of the public may be presented in writing to any DACOWITS and Military Women Matters to consider.

(10) Members of the public will not be permitted to enter oral discussion conducted by the Committee members at any of the sessions; however, they will be permitted to reply to questions directed to them by the members of the Committee.

(11) Members of the public will be permitted to ask questions to the scheduled speakers if recognized by the Chair and if time allows after the official participants have asked questions and/or made comments.

(12) Non-social agenda events that are not open to the public are for administrative matters unrelated to substantive advice provided to the Department of Defense and do not involve DACOWITS deliberations or decision-making issues before the committee.

Dated: September 1, 1995.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 95–22178 Filed 9–6–95; 8:45 am]

BILLING CODE 5000-04-M

Department of the Army

Corps of Engineers; Patents Available for Licensing

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice.

SUMMARY: The Department of the Army, U.S. Army Corps of Engineers, is extending the deadline for proposals for licensing (U.S. and foreign patents pending) technology concerning a concrete armor unit for protecting coastal structures and shoreline embankments from erosion caused by waves and currents. The availability of this technology for licensing was initially announced in the **Federal Register** on May 11, 1995 (Volume 60, No. 91, Page 25209). The deadline for proposals is being extended to allow interested parties more time to prepare proposals for an exclusive or partially exclusive license.

DATES: Proposals for an exclusive or partially exclusive license must be submitted by November 8, 1995.

FOR FURTHER INFORMATION CONTACT: Mr. Philip Stewart, ATTN: CEWES–FV–T, (601) 634–4113, FAX (601) 634–4180, Internet stewarp@exl.wes.army.mil, or, for technical information, Mr. C.E. Chatham, ATTN: CEWES–CW, (601) 634–2460, FAX (601) 634–3433, Internet chatham@coafsl.wes.army.mil. U.S. Army Waterways Experiment Station, 3909 Halls Ferry Road, Vicksburg, MS 39180–6199. Interested parties are also invited to visit the Waterways Experiment Station to observe this technology.

SUPPLEMENTARY INFORMATION: The initial announcement of the availability of this technology for licensing (**Federal Register** of May 11, 1995 (Volume 60, No. 91, Page 25209)) contains a detailed description of this technology and a listing of the criteria which will be used in evaluating proposals.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

[FR Doc. 95–22101 Filed 9–6–95; 8:45 am]

BILLING CODE 3710-08-M

THRIFT DEPOSITOR PROTECTION OVERSIGHT BOARD

Affordable Housing Advisory Board Meeting

AGENCY: Thrift Depositor Protection Oversight Board.

ACTION: Notice of meeting.

SUMMARY: In accordance with section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App., announcement is hereby published for a meeting of the Affordable Housing Advisory Board. The meeting is open to the public.

DATES: The Affordable Housing Advisory Board will hold its meeting on September 20, 1995, in Chicago, Illinois from 9 a.m. to noon and 1 to 4 p.m.

ADDRESSES: The meeting will be held at the Federal Deposit Insurance Corporation, 500 West Monroe Street, Chicago, Illinois.

FOR FURTHER INFORMATION CONTACT:

Jill Nevius, Committee Management Officer, Thrift Depositor Protection Oversight Board, 808 17th Street, N.W., Washington, D.C. 20232, 202/416–2626.

SUPPLEMENTARY INFORMATION: Section 14(b) of the Resolution Trust Corporation Completion Act, Public Law No. 103–204, established the Affordable Housing Advisory Board to advise the Thrift Depositor Protection Oversight Board (Oversight Board) and the Board of Directors of the Federal Deposit Insurance Corporation (FDIC) on policies and programs related to the provision of affordable housing. The Board consists of the Secretary of Housing and Urban Development (HUD) or delegate; the Chairperson of the Board of Directors of the FDIC, or delegate; the Chairperson of the Oversight Board, or delegate; four persons appointed by the Secretary of HUD who represent the interests of individuals and organizations involved in using the affordable housing programs, and two former members of the National Housing Advisory Board. The Board's charter was issued March 9, 1994.

Agendas

A detailed agenda will be available at the meeting. Topics to be addressed include: the merger of the RTC and FDIC affordable housing programs, financing strategies and resources, selection of affordable housing assets, expansion of the Housing Opportunity Hotline and participation of community and nonprofit organizations in the affordable housing program. The Board's chair or its Designated Federal Officer may authorize a member or members of the public to address the Board during the public forum portion of the meeting. After all reports are given and comments are received from members of the public in attendance, the Board will develop its own recommendations.

Statements

Interested persons may submit, in writing, data, information or views on the issues pending before the Affordable Housing Advisory Board prior to or at the September 20 meeting. Seating is available on a first-come first-served basis for each session of the meeting.

Dated: September 1, 1995.

Jill Nevius,

Committee Management Officer.

[FR Doc. 95–22198 Filed 9–6–95; 8:45 am]

BILLING CODE 2221–01–M

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Hearings

AGENCY: National Assessment Governing Board; Education.

ACTION: Notice of hearings.

SUMMARY: The National Assessment Governing Board (NAGB), U.S. Department of Education, is announcing three public hearings. These hearings will be conducted as part of the Council of Chief State School Officers' contract with NAGB for the purpose of developing an assessment framework and specifications for the National Assessment of Educational Progress (NAEP) in Civics. Public and private parties and organizations with an interest in civics education and assessment are invited to present written and oral testimony to the Council.

Each hearing will focus on the first draft of a framework for the national assessment of civics education for NAEP which will be given to a national sample of students in grades 4, 8, and 12. The results of the hearings are particularly important because they will provide broad public input in developing the civics education assessment framework to be used in the planned national NAEP examination. This assessment will measure American students' progress in civics education. These hearings are being conducted pursuant to Public Law 103–382 which states, "The Board shall develop assessment objectives and specifications through a national consensus approach which includes the active participation of teachers, curriculum specialists, local school administrators, parents, and concerned members of the general public."

DATES: The dates of the three public hearings have been set as follows:

- October 25, 1995 in Washington, DC.
- November 10, 1995 in Chicago, Illinois.
- November 16, 1995 in Seattle, Washington.

The first hearing is scheduled from 10:00 to 2:00 pm and will be conducted in the Hall of States in the National Guard Memorial Building in Washington, DC. The second hearing will be held in conjunction with the National Council for the Social Studies Annual Convention in Chicago, Illinois from 9:30 am to 11:30 am in the Acapulco Room of the Hyatt Regency Hotel. The third and final hearing will be held in cooperation with the meeting of the National Assessment Governing Board from 2:30 pm to 5:00 pm in the Congress Room of the Four Seasons Hotel in Seattle, Washington. Persons desiring to present oral statements at any of these hearings shall submit a notice of intent to appear, postmarked no fewer than ten days (10) prior to the scheduled meeting date. The scheduling of oral presentations cannot be guaranteed for notices of intent received less than 10 days prior to the hearing.

Notices of Intent to present oral statements shall be mailed to: Council of Chief State School Officers, One Massachusetts Avenue NW., Suite 700, Washington, DC 20001–1431, Attn: Tiffanie Lee—Public Hearings.

Individuals are encouraged to request a copy of the draft framework, prepared by the NAEP Civics Education Consensus Project committees and staff. This document, which represents the project's first attempt at outlining the NAEP civics education assessment, will serve as the springboard for public comment and review. Requests for the draft framework may be made to Tiffanie Lee at the Council (address above), by phone to 202/336–7076, or fax to 202/789–0596.

LOCATIONS: For detailed information on the exact locations of all public hearings, please contact Council offices at (202) 336–7076.

WRITTEN STATEMENTS: Written statements may be submitted for the public record in lieu of oral testimony up to 30 days after each hearing. These statements should be sent directly to the Council (see aforementioned address) in the following format:

I. Issues and Questions Addressed

Testimony should respond to the content and layout of the draft civics education assessment framework, and the following questions:

1. Does the civics assessment framework combine feasibility and vision?

2. Does the framework contain appropriate expectations for students in grades 4, 8, and 12?

3. Is the design of NAEP civics education assessment appropriate for a large-scale national assessment?

4. Will this framework be useful to policymakers, educators, legislators, school board members and the public?

II. Summary

Briefly summarize the major points and recommendations presented in the testimony.

III. Discussion

The narrative should provide information, points of view and recommendations that will enable the Council to consider all factors relevant to the question(s) the testimony addresses. Respondents are encouraged to limit this section of their written statements to five (5) pages. The discussions may be appended with documents of any length providing further explanation. Written statements presented at each hearing will be accepted and incorporated into the public record. All written statements should follow the above format, as much as it is possible.

HEARINGS OBJECTIVES AND PROCEDURES: The Council seeks participation in the hearings from a broad spectrum of individuals and organizations in the sharing of opinions and recommendations regarding civics education proficiencies, knowledge, and those skills and strategies to be assessed at grade levels 4, 8, and 12. The list of speakers shall, on the one hand, provide a wide range of viewpoints and interests, but also be organized to respect the time constraints of the hearing schedule.

The goal of the hearings is to provide a medium for maximum input and guidance from teachers, curriculum specialists, policymakers, business and government representatives, civic and professional organizations, and concerned members of the general public. Following a brief introduction to the project by the Council of Chief State School Officers, the majority of each session will be devoted to presentations by scheduled speakers.

As listed in the DATES section above, speakers wishing to present statements shall file notices of intent. To assist the Council in appropriately scheduling speakers, the written notice of intent to present oral testimony should include the following information: (1) name, address and telephone number of each person to appear; (2) affiliation (in any); (3) a brief statement of the issues and/or concerns that will be addressed; and (4) whether a written statement will be submitted for the record.

Individuals who do not register in advance will be permitted to register and speak at the meeting in order of registration, if time permits. Speakers should plan to limit their total remarks to no more than five (5) minutes. While it is anticipated that all persons will have an opportunity to speak, time limits may not allow this to occur. The Council will make the final determination on selection and scheduling of speakers.

All written statements presented at the hearings will be accepted and incorporated into the public record. Written statements submitted in lieu of oral testimony should be received no later than 30 days after each hearing in order to be included in the public record. However, while written statements received after this date will be accepted, inclusion in the public record cannot be guaranteed.

A staff member from the Council of Chief State School Officers will preside at each of the hearings. The proceedings will be audio taped. The hearings can also be signed for the hearing-impaired, upon advance request.

ADDITIONAL INFORMATION: Additional information is available from the Council offices for anyone wishing to obtain more specifics on the assessment project. A draft assessment framework document will be made available to interested parties prior to the hearings in October and November. Individuals desiring additional information on a specific hearing should contact Council offices at (202) 336–7076.

STEPS AFTER HEARING: The Council will review and analyze all comments and opinions received in response to this announcement. A report of the outcomes of these hearings will be made available to the public upon request after January 1996.

The results of this public testimony, along with the Council's civics education consensus committee work, will be used to formulate recommendations for the NAEP Civics Education Assessment for the National Assessment Governing Board. The Board, charged with developing the assessment framework and specifications, will take final action on the Council's recommendations in the spring of 1996.

A record of all Council proceedings will be kept at the Council of Chief State School Officers until March 1996, at which time all records will be transferred to the National Assessment Governing Board, and will be available for public inspection.

Dated: August 31, 1995.

Roy Truby,

Executive Director, National Assessment Governing Board.

[FR Doc. 95–22189 Filed 9–6–95; 8:45 am]

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Morgantown Energy Technology Center; Rapid Commercialization Initiative Announcement

AGENCY: Department of Energy (DOE), Morgantown Energy Technology Center.

ACTION: Rapid Commercialization Initiative.

SUMMARY: The Rapid Commercialization Initiative (RCI) Announcement is being issued by the U. S. Department of Commerce, U. S. Department of Defense, Environmental Protection Agency, and the U. S. Department of Energy. The RCI is a component of the Administration's efforts to build cooperative interactions between the private sector, states, and federal agencies to advance a national environmental technology strategy and bring environmental technologies to market more rapidly and efficiently. The primary mission of the RCI is to identify and reduce the barriers that impede market entry of the four categories of environmental technologies—avoidance, monitoring and assessment, control, and remediation and restoration technologies—by facilitating and accelerating commercialization.

FOR FURTHER INFORMATION CONTACT: RCI Project Team, U.S. Department of Energy, Morgantown Energy Technology Center, P.O. Box 880, Morgantown, West Virginia 26507–0880, Telefax: (304) 285–4683.

SUPPLEMENTARY INFORMATION: RCI has two short-term goals. The first goal of RCI is to provide services to companies to address the three key barriers targeted in the Announcement: (1) Assistance in finding appropriate sites for demonstration/testing of near commercial environmental technologies; (2) assistance in verification of the performance and the cost of performance of RCI technologies; and (3) assistance in facilitating and expediting the issuance of permits. Proposers may request assistance in any one, two, or all three of the RCI services. Industry is invited and encouraged to propose innovative approaches that streamline activity, process, or reporting; save time; improve quality or safety; reduce cost; or eliminate duplication or overlap, to address any or all of the enumerated RCI services.

The second goal of RCI is to identify other important barriers, such as unpredictable commercialization pathways, improving market data, and streamlining regulations and processes to meet government mission program requirements. This information will be used for future consideration and planning relative to the long term goal of RCI to reduce these other barriers. Companies interested in applying for RCI assistance should request a copy of the Announcement which contains specific proposal preparation instructions. Proposal due date is September 28, 1995. Only written requests for the Announcement will be honored. Requests should be sent to the RCI Project Team, at telefax number (304) 285–4683. Letters requesting the solicitation should be addressed to the attention of the RCI Project Team, at the letterhead address and may reference number 95–32247.

Randolph L. Kesling,

Acting Director, Acquisition and Assistance Division, Morgantown Energy Technology Center.

[FR Doc. 95–22216 Filed 9–6–95; 8:45 am]

BILLING CODE 6450–01–P

Office of Energy Efficiency and Renewable Energy

Alternative-Fuel Automotive Technician Training; Voluntary Certification Program

AGENCY: Department of Energy.

ACTION: Notice of TeleVideo Conference.

SUMMARY: The purpose of this notice is to facilitate participation by interested members of the public in a TeleVideo conference, co-presented by the U.S. Department of Energy (DOE), which will focus on the voluntary national certification program for private-sector alternative fuel vehicle training programs for automotive technicians.

DATES: The TeleVideo conference is scheduled for satellite broadcast on September 14, 1995 from 1:00 p.m. to 3:00 p.m. (Eastern Time).

ADDRESSES: The public can participate in the TeleVideo conference and obtain information on how to arrange a video conference receive site by calling Steve Husty, West Virginia University Network Coordinator at (304) 293–2867 ext. 424. On the day of the conference, questions may be called in to 1–800–265–6104 or FAXed to (304) 293–7541. Registration is free.

Satellite Information: Telestar 302, Transponder: 10V, Channel: 19 (Downlink frequency: 4080 MHz), Trouble number: 1–800–809–5465, Information: Jack Johns, (304) 293–4221.

FOR FURTHER INFORMATION CONTACT: Instructions on how to apply for certification of alternative fuel technician training programs may be obtained from the National Automotive Technician Education Foundation (NATEF) by calling (703) 713–0100, after September 14, 1995. For general information on alternative fuels, contact the DOE National Alternative Fuels Hotline, 1–800–423–1DOE.

SUPPLEMENTARY INFORMATION: There is a national shortage of qualified technicians to service alternative fuel vehicles. This has spurred the need for high-quality technical training programs with uniform national standards. According to the Bureau of Labor Statistics, jobs for automotive technicians will increase 37% from 1990 to 2005. In order to alleviate the shortage, and pursuant to section 411 of the Energy Policy Act of 1992 (Pub. L. 102–486), DOE entered into a cost shared cooperative agreement with the National Automotive Technician Education Foundation to develop training program standards and implement a certification process for a voluntary national program. This program is referred to as the Certification of Higher-learning in Alternative Fuels Program (CHAMP). An explanation of the certification process, including how to obtain a certification, will take place during a TeleVideo conference, "Alternative Fuel Vehicle Training: A Look At What's Coming Down The Road", scheduled for satellite broadcast Thursday, September 14, 1995, from 1:00 p.m. to 3:00 p.m. (Eastern Time). It is presented by West Virginia University (WVU), the National Automotive Technician Education Foundation (NATEF), and DOE.

The broadcast will be interactive featuring a panel of leading alternative fuels industry and training experts. On the day of the conference, the toll-free number for questions by all participants nationwide for on-the-air responses by the panelists will be 1–800–265–6104.

Issued in Washington, DC, on September 6, 1995.

Brian Castelli,

Acting Assistant Secretary For Energy Efficiency and Renewable Energy.

[FR Doc. 95–22218 Filed 9–6–95; 8:45 am]

BILLING CODE 6450–01–P

Federal Energy Regulatory Commission

[Docket No. EG95–81–000, et al.]

LG&E Power Operating Services, Inc., et al. Electric Rate and Corporate Regulation Filings

August 31, 1995.

Take notice that the following filings have been made with the Commission:

1. LG&E Power Operating Services Inc.

[Docket No. EG95–81–000]

On August 18, 1995, LG&E Power Operating Services Inc. ("LPOS"), a California corporation with its principal place of business at 12500 Fair Lakes Circle, Suite 350, Fairfax, Virginia 22033–3822, filed with the Federal Energy Regulatory Commission an application for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's Regulations.

LPOS intends to provide operating services for electrical generating facilities that are eligible facilities. Each of the eligible facilities that LPOS will operate are qualifying facilities with the exception of one pulverized coal-fired cogeneration facility with a maximum net power production capacity of between approximately 165 MW (summer) and 167 MW (winter). All of the facilities' electric power net of the facilities' operating electric power will be purchased at wholesale by public utilities.

Comment date: September 18, 1995, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

2. Hudson Falls, LLC

[Docket No. EG95–85–000]

Hudson Falls, LLC ("HFLLC") (c/o Jonathan W. Gottlieb, Reid & Priest LLP, 701 Pennsylvania Avenue, N.W., Suite 800, Washington, D.C. 20004) filed with the Federal Energy Regulatory Commission an application on August 21, 1995 for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's Regulations.

HFLLC is a limited liability company organized and in good standing under the laws of the state of New York which will own an interest in a hydroelectric generating facility located on the Hudson River in Saratoga and Washington Counties, New York. The New York Public Service Commission has determined that the facility will comply with the criteria set forth in Section 365.3(b) of the Commission's Regulations.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

3. Adirondack Operating Services, LLC

[Docket No. EG95–86–000]

Adirondack Operating Services, LLC ("AOS") (c/o Jonathan W. Gottlieb, Reid & Priest LLP, 701 Pennsylvania Avenue, N.W., Suite 800, Washington, D.C. 20004) filed with the Federal Energy Regulatory Commission an application on August 22, 1995, for determination of exempt wholesale generator status pursuant to Part 365 of the Commission's Regulations.

AOS is a limited liability company organized and in good standing under the laws of the state of New York which will provide operation and maintenance services to a hydroelectric generating facility located on the Hudson River in Saratoga and Washington Counties, New York as well as other eligible facilities. The New York Public Service Commission has determined that the facility will comply with the criteria set forth in Section 365.3(b) of the Commission's Regulations.

Comment date: September 22, 1995, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

4. Portland General Electric Company

[Docket No. ES95–39–000]

Take notice that on August 25, 1995, Portland General Electric Company filed an application under § 204 of the Federal Power Act seeking authorization to issue short-term debt securities, from time to time, aggregating not in excess of $200 million principal amount outstanding at any one time, during the period from November 1, 1995 through October 31, 1998, with final maturities not later than October 31, 1999.

Comment date: September 25, 1995, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22229 Filed 9–6–95; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. CP95–668–000]

CNG Transmission Corporation and Texas Eastern Transmission Corporation; Intent to Prepare an Environmental Assessment for the Proposed South Oakford Project and Request for Comments on Environmental Issues

August 31, 1995.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the construction and operation of the facilities proposed in the South Oakford Project.[1] This EA will be used by the Commission in its decision-making process to determine whether an environmental impact statement is necessary and whether to approve the project.

Summary of the Proposed Project

CNG Transmission Corporation (CNG) and Texas Eastern Transmission Corporation (Texas Eastern) want to abandon by removal their Jeannette Compressor Station, to add compression at their South Oakford Compressor Station, to construct storage pipelines, and to install related facilities at the South Oakford Gate and the Earhart Gate, all in Westmoreland County, Pennsylvania. CNG and Texas Eastern request authorization to abandon:

- All buildings, parking lots, drive ways, equipment, piping, and 7,980 horsepower (hp) of compression at the Jeanette Compressor Station;
- A pig receiver near the Jeannette Compressor station;
- 75 feet of Line JP–40 within the Earhart Gate; and
- A 20-inch mainline gate setting for Line JP–250 at the Earhart Gate.

CNG and Texas Eastern request authorization to construct and operate:

- 10,000 hp of electric motor-driven compression at the South Oakford Compressor Station;
- A pig receiver and barrel dip at the Earhart Gate;
- 3,158 feet of 30-inch-diameter storage suction pipeline (Line JP–296) between the South Oakford Compressor Station and the South Oakford Gate;
- 3,158 feet of 20-inch-diameter storage discharge pipeline (Line JP–297) between the South Oakford Compressor Station and the South Oakford Gate; and
- Facilities to interconnect new Lines JP–296 and JP–297 to existing Lines JP–250 and JP–40, respectively, at the South Oakford Gate.

A nonjurisdictional West Penn Power owned and operated substation (100 feet by 100 feet) would be constructed at the South Oakford Compressor Station.

CNG and Texas Eastern want to construct the proposed facilities between May and November 1996. Removal of the abandoned facilities at the Jeannette Compressor Station would begin in the spring of 1997.

The general location of the project facilities is shown in appendix 1.[2]

Land Requirements for Construction

Construction of the proposed facilities would disturb about 10 acres of land, all of which is on existing right-of-way or on property owned by CNG and Texas Eastern. Construction of the pipelines would be entirely within existing rights-of-way, but would disturb about 6.5 acres. All land disturbance at the South Oakford and Earhart Gates, about 1 acre total, would be within the existing gate sites and pipeline rights-of-way. The new West Penn Power substation would be enclosed within the South Oakford Compressor Station by moving the existing fence to surround the new substation. This would add about 2.5 acres to the existing 5-acre fenced site.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. We call this "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils
- Water resources, fisheries, and wetlands
- Vegetation and wildlife
- Endangered and threatened species
- Public safety
- Land use
- Cultural resources
- Air quality and noise
- Hazardous waste

We will also evaluate possible alternative to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process; the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we recommend that the Commission approve or not approve the project.

Currently Identified Environmental Issues

We have already identified one issue that we think deserves attention based on a preliminary review of the proposed facilities and the environmental information provided by CNG and Texas Eastern: The addition of compression at the South Oakford Compressor Station may increase noise levels at nearby residences.

Keep in mind that this is a preliminary issue. Issues may be added, subtracted, or changed based on your comments and our analysis.

Also, we have made a preliminary decision to not address the impacts of the nonjurisdictional facilities off the South Oakford Compressor Station site. We will briefly describe their location and status in the EA.

Public Participation

You can make a difference by sending a letter addressing your specific comments or concerns about the project. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative locations), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please follow the instructions below to ensure that your comments are received and properly recorded:

---

[1] CNG Transmission Corporation and Texas Eastern Transmission Corporation's application was filed with the Commission under Section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.

[2] The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available from the Commission's Public Reference and Files Maintenance Branch, room 3104, 941 North Capitol Street NE., Washington, DC 20426, or call (202) 208–1371. Copies of the appendices were sent to all those receiving this notice in the mail.

- Address your letter to: Lois Cashell, Secretary, Federal Energy Regulatory Commission, 825 North Capitol St. NE., Washington, DC 20426;
- Reference Docket No. CP95–668–000;
- Send a *copy* of your letter to: Ms. Jennifer Goggin, EA Project Manager, Federal Energy Regulatory Commission, 825 North Capitol St. NE., room 7312, Washington, DC 20426; and
- Mail your comments so that they will be received in Washington, DC on or before September 28, 1995.

If you wish to receive a copy of the EA, you should request one from Ms. Goggin at the above address.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding or become an "intervenor". Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide copies of its fillings to all other parties. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see appendix 2).

The date for filing timely motions to intervene as stated in the Notice of Application issued on August 15, 1995, in this proceeding is September 5, 1995. Parties seeking to file late interventions must show good cause, as required by section 385.214(b)(3), why this time limitation should be waived. Environmental issues have been viewed as good cause for late intervention. You do not need intervenor status to have your scoping comments considered.

Additional information about the proposed project is available from Ms. Jennifer Goggin, EA Project Manager, at (202) 208–2226.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22115 Filed 9–6–95; 8:45 am]

BILLING CODE 6717-01-M

[Project Nos. 11550–000, et al.]

Hydroelectric Applications Walter Musa, Jr., et al.; Notice of Applications

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1a. *Type of Application:* Preliminary Permit.

b. *Project No.:* 11550–000.

c. *Date filed:* July 3, 1995.

d. *Applicant:* Walter Musa, Jr.

e. *Name of Project:* Fly Creek.

f. *Location:* On Fly and Canyon Creeks, in Clark County Washington. Township 5N, Range 4E, Sections 4, 5, 9, 10.

g. *Filed Pursuant to:* Federal Power Act 16 USC §§ 791(a)–825(r).

h. *Applicant Contact:* Mr. Albert Liou, Harza Engineering, Inc., 2353 130th Avenue N.E., Suite 200, P.O. Box C–96900, Bellevue, WA 98005, (206) 882–2455.

i. *FERC Contact:* Michael Spencer at (202) 219–2846.

j. *Comment Date:* November 2, 1995.

k. *Description of Project:* The proposed project would consist of: (1) a 12-foot-high dam on Fly Creek; (2) a 17,000-foot-long, 4.5-foot-diameter penstock; (4) a powerhouse containing one generating unit with a capacity of 7,050 kW and an average annual generation of 25.9 GWh and discharging into Canyon Creek; and (5) a 1.5-mile-long transmission line.

No new access road will be needed to conduct the studies. The applicant estimates that the cost of the studies to be conducted under the preliminary permit would be $350,000.

l. *Purpose of Project:* Project power would be sold.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

2a. *Type of Application:* New License.

b. *Project No.:* 2438–007.

c. *Date Filed:* November 5, 1993.

d. *Applicant:* Seneca Falls Power Corporation.

e. *Name of Project:* Waterloo and Seneca Falls Project.

f. *Location:* On the Seneca River in Seneca, Yates, Schuyler, and Ontario Counties, New York.

g. *Filed pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Patrick Oot, President, Seneca Falls Power Corporation, 4450 Swissvale Drive, Manlius, NY 13902–5224, (315) 637–4761.

i. *FERC Contact:* Thomas Dean (202) 219–2778.

j. *Deadline Date:* See standard paragraph D10.

k. *Status of Environmental Analysis:* This application has been accepted for filing and is ready for environmental analysis at this time.

l. *Description of Project:* The existing Waterloo and Seneca Falls Project consists of two developments that are 4.2 miles apart: the Waterloo Development and the Seneca Falls Development.

Waterloo Development

The Waterloo Development consists of: (1) a 16.5-foot-high, 306-foot-long dam (including the lock structure); (2) an impoundment with a surface area of 43,200 acres (including Seneca Lake) with a proposed usable storage capacity of 4,300 acre-feet and normal water surface elevations of 446.0 feet BCD (summer) and 445.0 feet BCD (winter); (3) an intake structure; (4) a powerhouse, which has three Francis turbines rated at 2,220 horsepower (hp) with a total hydraulic capacity of 1,650 cubic feet per second (cfs) connected directly to three generators with a total proposed generating capacity of 1.780 megawatts (MW); (5) a tailrace; (6) a 20-foot-long, 34.5 kV transmission line; and (7) appurtenant facilities.

Seneca Falls Development

The Seneca Falls Development consists of: (1) a 68-foot-high, 286-foot-long dam (including the lock structure and powerhouse intake structure); (2) an impoundment with a surface area of 135 acres with a proposed usable storage capacity of 65 acre-feet and normal water elevation of 430.5 feet BCD; (3) an intake structure that is integral with the dam; (4) a powerhouse, which has four Francis turbines that would be rated at 10,600 hp when refurbished with a total proposed hydraulic capacity of 2,480 cfs connected directly to four generators (one currently inoperable) with a total proposed generating capacity of 8.5 MW; (5) a tailrace; (6) a 300-foot-long, 34.5 kV transmission line; and (7) appurtenant facilities.

m. *Purpose of Project:* Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraph(s): A4 and D10.

o. *Available Location of Application:* A copy of the application, as amended and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street, N.E., Room 3104, Washington, D.C., 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Seneca Falls Power Corporation, 4450 Swissvale Drive, Manlius, NY 13104, or by calling Tod Nash at (315) 346–6232.

3a. *Types of Applications:* Transfer of Licenses. Partial Transfer of License.

b. *Project Numbers:* P–2019 and P–2699.

c. *Applicants:* Pacific Gas and Electric Company, Calaveras County Water District, Northern California Power Agency.

d. *Name of Projects:* Utica and Angels.

e. *Locations:* Utica: On the North Fork Stanislaus River, Silver Creek, and Beaver Creek in Calaveras and Tuolumne Counties, California. Angels: On Angels Creek in Calaveras County, California.

f. *Pursuant to:* Federal Power Act, 16 U.S.C. §§ 791(a)–825(r).

g. *Applicant Contacts:* Ms. Annette Faraglia, Attorney, Law Department, Pacific Gas and Electric Company, 77 Beale Street, Room 3051, San Francisco, CA 94120–7442, (415) 973–7145; Mr. Steve Felte, General Manager, Calaveras County Water District, P.O. Box 846, San Andreas, CA 95249, (209) 754–3543, Mr. Hari Modi, Manager, Hydroelectric Project Development, Regulatory Compliance and Licensing, Northern California Power Agency, 180 Cirby Way, Roseville, CA 95678, (916) 781–3636.

h. *FERC Contact:* Dean C. Wight, (202) 219–2675.

i. *Comment Date:* October 16, 1995.

j. *Description of Proposed Actions:*

(1) Pacific Gas and Electric Company (PG&E) and Calaveras County Water District (CCWD) propose to transfer the licenses for both projects from PG&E to CCWD.

(2) CCWD and Northern California Power Agency (NCPA) propose to transfer a portion of the Utica license (P–2109) from CCWD to NCPA. The portion to be transferred consists of the Utica, Union, and Alpine Reservoirs and associated water rights.

k. *Related Actions:* NCPA has pending applications for new licenses in competition with PG&E's pending applications for relicense of both projects. See docket numbers P–2019–017 and P–11477–000 (Utica); P–2699–001 and P–11452–000 (Angels).

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

4a. *Type of Application:* Amendment of License for Non-project Use of Project Lands.

b. *Project No:* 1951–036.

c. *Date Filed:* August 11, 1995.

d. *Applicant:* Georgia Power Company.

e. *Name of Project:* Sinclair Project.

f. *Location:* Baldwin and Putnam Counties, Georgia.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a) 825(r).

h. *Applicant Contact:* Mr. Larry Wall, Georgia Power Company, P.O. Box 4545, Atlanta, GA 30302, (404) 526–2054.

i. *FERC Contact:* Heather Campbell, (202) 219–3097.

j. *Comment Date:* October 16, 1995.

k. *Description of Project:* Georgia Power Company proposes to grant a permit to a developer and adjacent property owner for the purpose of dredging within project waters to increase navigability in the area of the property. A channel would be dredged in Lake Sinclair in order to allow small boat traffic to the future development of the Edgewater Point Estates Subdivision. The subdivision is located on the east shore of Lake Sinclair.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

5a. *Type of Application:* New License for Minor Project.

b. *Project No.:* 1517–008.

c. *Date filed:* June 19, 1995.

d. *Applicant:* Monroe City Corporation.

e. *Name of Project:* Upper Monroe Hydroelectric Project.

f. *Location:* Partially within Fishlake National Forest, on Shingle Creek, Serviceberry Creek, and the First Lefthand Fork of the Monroe Creek, near the town of Monroe City, in Sevier County, Utah.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. § 791(a) - 825(r).

h. *Applicant Contact:* John Spendlove, Jones & DeMille Engineering, 45 East 500 North, Richfield, Utah 84701, (801) 896–8266.

i. *FERC Contact:* Mr. Michael Strzelecki, (202) 219–2827.

j. *Deadline for interventions and protests:* November 13, 1995.

k. *Status of Environmental Analysis:* This application is not ready for environmental analysis at this time—see attached paragraph E1.

l. *Description of Project:* The run-of-river project as licensed consists of: (1) a small diversion structure on each of the following three streams—First Lefthand Fork, Shingle Creek, and Serviceberry Creek; (2) an 11,200-foot-long penstock leading from the diversion structure on First Lefthand Fork to a powerhouse; (3) a 3,300-foot-long penstock leading from the diversion structure on Shingle Creek to a point on the First Lefthand Fork penstock 7,400 feet upstream from the powerhouse; (4) a 12,900-foot-long penstock leading from the diversion structure on Serviceberry Creek to a point on the First Lefthand Fork penstock 15 feet upstream from the powerhouse; (5) the powerhouse containing one generating unit with an installed capacity of 250 Kw; (6) a 1.65-mile-long transmission line; (7) a tailrace returning water to Monroe Creek; and (8) appurtenant facilities.

No new construction is planned.

m. This notice also consists of the following standard paragraphs: B1 and E1.

n. *Available Locations of Application:* A copy of the application, as amended and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 941 North Capitol Street NE., room 3104, Washington, DC. 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at the offices of Jones & DeMille Engineering (see address above).

Standard Paragraphs

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. Under the Commission's regulations, any competing development application must be filed in response to and in compliance with public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

B1. Protests or Motions to Intervene—Anyone may submit a protest or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, 385.211, and 385.214. In determining the appropriate action to take, the Commission will consider all protests filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any protests or motions to intervene must be received on or before the specified deadline date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC. 20426. An additional copy must be sent to Director, Division of Project Review, Federal Energy Regulatory Commission, Room 1027, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D10. Filing and Service of Responsive Documents—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to section 4.34(b) of the regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice (October 24, 1995 for Project No. 2438–007). All reply comments must be filed with the Commission within 105 days from the date of this notice (December 8, 1995 for Project No. 2438–007).

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS", "REPLY COMMENTS", "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The . Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 1027, at the above address. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

E1. Filing and Service of Responsive Documents—The application is not ready for environmental analysis at this time; therefore, the Commission is not now requesting comments, recommendations, terms and conditions, or prescriptions.

When the application is ready for environmental analysis, the Commission will issue a public notice requesting comments, recommendations, terms and conditions, or prescriptions.

All filings must (1) bear in all capital letters the title "PROTEST" or "MOTION TO INTERVENE;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005.

Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, Room 1027, at the above address. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application.

Dated: August 31, 1995, Washington, DC.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22114 Filed 9–6–95; 8:45 am]

BILLING CODE 6717–01–P

[Docket No. TM96–1–118–000]

Arkansas Western Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

August 31, 1995.

Take notice that on August 28, 1995, Arkansas Western Pipeline Company (AWP) tendered for filing to become part of its FERC Gas Tariff First Revised Volume No. 1, First Revised Sheet No. 4, with a proposed effective date of October 1, 1995.

AWP states that the purpose of this filing is to implement for the first time an ACA charge in its rates. Specifically, AWP proposes to charge the FERC approved surcharge of $.0023 per Dth effective October 1, 1995 in accordance with Section 11 of the General Terms and Conditions of AWP's FERC Gas Tariff.

Any person desiring to be heard or protest the subject filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions and protests should be filed on or before September 8, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22116 Filed 9–6–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TM96–1–88–000]

Black Marlin Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

August 31, 1995.

Take notice that on August 29, 1995, Black Marlin Pipeline Company (Black Marlin) tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheet to be effective October 1, 1995:

Sixth Revised Sheet No. 4

Black Marlin states that the above-referenced tariff sheet is being filed pursuant to Section 18 of the General Terms and Conditions of Black Marlin's tariff to reflect the decrease of the ACA charge to 0.22¢/MMBtu based on the Commission's Annual Charge Billing for Fiscal Year 1995.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 in accordance with Sections 385.211 and 385.214 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 8, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 95–22118 Filed 9–6–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TA94–1–23–007]

Eastern Shore Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

August 31, 1995.

Take notice that on August 29, 1995, Eastern Shore Natural Gas Company (Eastern Shore) tendered for filing certain revised tariff sheets included in Appendix A attached to the filing. Such revised tariff sheets bear various proposed effective dates as indicated thereon.

Eastern Shore states the instant filing is being submitted to comply with the Commission's order issued August 17, 1995 in Docket Nos. TA94–1–23–003, et al. The Commission's order approved Eastern Shore's Offer of Settlement (Settlement) as filed on June 19, 1995, pursuant to Rule 602 of the Commission's Rules of Practice and Procedure. More specifically, the filing is submitted in accordance with Articles I, II, and III of the Settlement.

Article I provides that, within fifteen days after the Commission approves the Settlement, Eastern Shore shall file revised Purchased Gas Adjustment (PGA) and Transportation Cost Adjustment (TCA) tariff sheets providing for: (1) The use of the unit-of-sales method to compute its (a) current demand and commodity adjustments, and (b) monthly deferred demand and commodity costs, and (2) the allocation of the demand costs to its firm sales customers based on a jurisdictional demand allocation factor calculated by dividing total jurisdictional customers' contract demands by the total of all customers' contract demands (i.e. jurisdictional and non-jurisdictional). These revised tariff sheets shall be made effective June 1, 1994.

Article II of the Settlement provides that Eastern Shore shall make cash refunds to its jurisdictional sales customers based on the changes in the PGA method described above. Refunds shall be computed from June 1, 1994 through June 30, 1995. Such period coincides with the end of the twelve-month deferral period which ends four months prior to the November 1, 1995 effective date of Eastern Shore's forthcoming annual PGA filing. Accordingly, Eastern Shore's Account No. 191 demand and commodity deferral balances shall be zeroed out as of June 30, 1995, thus eliminating the need for Eastern Shore to file for recovery of such balances in its annual PGA to be filed on or about September 1, 1995.

Article III provides that Eastern Shore shall file revised rate tariff sheets to be effective July 1, 1995. Such revised tariff sheets reflect a reduction of $0.9317 per Dt in Eastern Shore's jurisdictional contract demand sales rates. This reduction is accomplished by restating Eastern Shore's Base Tariff Rates to reflect an equivalent decrease. In addition, the restated Base Tariff Rates reflect Eastern Shore's cumulative PGA and TCA adjustments as filed in Docket No. TQ95–3–23–000. Such filing, accepted by the Commission on May 22, 1995, to be effective May 31, 1995, was

Eastern Shore's most recently approved filing prior to July 1, 1995.

Eastern Shore further states it is also filing revised rate tariff sheets necessary to reflect the implementation of the Settlement on its various filings made subsequent to July 1, 1995. Such filings include (1) Docket No. TF95–5–23–000, an interim PGA approved to be effective July 1, 1995; (2) Docket No. TQ95–4–23–000, a quarterly PGA filing approved to be effective August 1, 1995; (3) Docket No. TF95–6–23–000, an interim PGA filing approved to be effective August 1, 1995; and (4) Docket No. TM95–11–23–000, a tracking filing approved to be effective September 1, 1995.

Eastern Shore states it is currently in the process of finalizing its refund calculations and intends to make such refunds at its earliest opportunity, but in no event later than September 15, 1995. As directed by the Commission, Eastern Shore will file a refund report within thirty days of the refund distribution.

ESNG states that copies of the filing have been served upon its jurisdictional sales customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 and Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR Section 385.211 and Section 385.214). All such motions or protests should be filed on or before September 8, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP95–708–000]

El Paso Natural Gas Company; Notice of Application

August 31, 1995.

Take notice that on August 24, 1995, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978 filed an application pursuant to Section 7(b) of the Natural Gas Act for an order granting permission and approval to abandon a certification exchange service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

El Paso states that it seeks to abandon an exchange service authorized by an order issued February 13, 1978, as amended, in Docket Nos. CP77–604 and CP77–658. It is stated that such exchange service was provided in accordance with the provisions of a Gas Exchange Agreement dated February 3, 1977 (Exchange Agreement), as amended, between El Paso and Transwestern Pipeline Company (Transwestern). El Paso states that the Exchange Agreement comprises rate schedule X–12 of El Paso's FERC Gas Tariff, Third Revised Volume No. 2 and rate schedule X–1 to Transwestern's FERC Gas Tariff, Original Volume No. 2. El Paso states that it does not propose to abandon any facilities as a result of the proposed abandonment of exchange service.

El Paso states that by order issued July 27, 1995, at Docket No. CP95–70–000, et al., Transwestern has received permission and approval to abandon the exchange service.

It is asserted that the proposed abandonment is permitted by the present and future public convenience and necessity because the proposed abandonment will not result in or cause any interruption, reduction, or termination of firm natural gas service presently rendered by El Paso to any of its respective customers.

Upon receipt of the requested abandonment authorization, El Paso states that it will tender, pursuant to Part 154 of the Commission's Regulations, the appropriate filing to reflect the cancellation of rate schedule X–12 to El Paso's FERC Gas Tariff, Third Revised Volume No. 2. As required by ordering paragraph (B) of the Commission's July 27, 1995 order at Transwestern's Docket No. CP95–70–000, et al., Transwestern, on August 11, 1995 made a tariff filing in compliance with the abandonment authorization to cancel its rate schedule X–1.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 21, 1995, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for El Paso to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP95–423–000]

Florida Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

August 31, 1995.

Take notice that on August 29, 1995, Florida Gas Transmission Company (FGT), tendered for filing to become part of its FERC Gas Tariff, Third Revision Volume No. 1, the following tariff sheets:

Second Revised Sheet No. 32
Original Sheet No. 32A

On December 30, 1994, FGT filed a Section 4 rate case filing (Rate Case) in Docket No. RP95–103–000, which, among other things, reflected revised service levels under Rate Schedules SFTS and NNTS, and certain tariff changes related to Rate Schedule NNTS. Subsequently, on March 23, 1995, the parties to the Rate Case proceeding agreed to an Interim Stipulation and Agreement (Interim S&A). Among other things, the Interim S&A provided that the revised service levels under Rate Schedules SFTS and NNTS and tariff changes related to Rate Schedule NNTS would become effective October 1, 1995.

In the instant filing, FGT is making tariff revisions to Rate Schedule NNTS as required by the Interim S&A. These revisions provide FGT's customers with increased flexibility for No-Notice Service. All of the proposed revisions relate to Rate Schedule NNTS customers' ability to request changes to NNTS service levels. Specifically, Section 3.A. of Rate Schedule NNTS is being revised to provide: (i) That, with respect to the initial three-year election option, FGT is not obligated to accept reductions to NNTS service quantities which would reduce the aggregate level of NNTS service quantities by more than 50 percent; and (ii) that shippers may also request changes to their NNTS service quantities annually, provided that FGT is not obligated to accept reductions, pursuant to the annual election option, to NNTS service quantities which would reduce the aggregate level of NNTS service subscribed. The tariff sheets filed herein are identical to Pro Forma Tariff Sheet Nos. 32 and 32A included in the Stipulation and Agreement filed August 24, 1995 ("August 24 S&A") in Docket No. RP95–103.

The revised service levels under Rate Schedules SFTS and NNTS will become effective October 1, 1995. However, these changes do not require tariff revisions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Sections 385.211 and 385.214 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before September 8, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TM96–1–113–000]

Gasdel Pipeline System, Inc.; Notice of Change in Annual Charge Adjustment

August 31, 1995.

Take notice that on August 29, 1995, Gasdel Pipeline System, Inc. (Gasdel) tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1–A, Third Revised Sheet No. 5.

Gasdel states that the purpose of this filing is to revise its Annual Charge Adjustment surcharge in order to recover the Commission's annual charges for the 1995 fiscal year. Gasdel requests that the Commission allow the tariff sheet to become effective October 1, 1995.

Gasdel states that copies of the filing have been mailed to all jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211 and 385.214). Such motions or protests should be filed on or before September 8, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person desiring to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. GT95–53–000]

Panhandle Eastern Pipe Line Company; Notice of Refund Report

August 31, 1995.

Take notice that on August 29, 1995, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing a Refund Report pursuant to the Commission's May 3, 1995, Order Granting Clarification (May 3, 1995 Order) issued in Docket No. RP95–124–001.

Panhandle states that it has returned through billing adjustments on certain customers' transportation invoices mailed July 12, 1995, $154,447.63, representing that portion of the Gas Research Institute surcharge associated with discounted capacity release transactions. Panhandle has included Appendix A to the filing which shows the amount refunded to each affected customer.

Panhandle states that copies of this filing have been served on all affected customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest this filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before September 8, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. TM96–1–80–000]

Tarpon Transmission Company; Notice of Change in Annual Charge Adjustment

August 31, 1995.

Take notice that on August 29, 1995, Tarpon Transmission Company (Tarpon) tendered for filing and acceptance the following tariff sheets to be a part of its FERC Gas Tariff, Original Volume No. 1:

Thirteenth Revised Sheet No. 2A
Third Revised Sheet No. 2E
Sixth Revised Sheet No. 86A
Eighth Revised Sheet No. 96A

Tarpon states that the purpose of this filing is to revise its Annual Charge Adjustment surcharge in order to recover the Commission's annual charges for the 1995 fiscal year. Tarpon requests that the Commission allow the tariff sheets to become effective October 1, 1995.

Tarpon states that copies of the filing have been mailed to its customers and interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211 and 385.214). Such motions or protests should be filed on or before September 8, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person desiring to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. GT95–54–000]

Trunkline Gas Company; Notice of Refund Report

August 31, 1995.

Take notice that on August 29, 1995, Trunkline Gas Company (Trunkline) filed its report on refunds pursuant to the Commission's May 3, 1995, Order Granting Clarification issued in Gas Research Institute, 71 FERC ¶61,131 (1995).

Trunkline states that it has refunded through billing adjustments on certain customers' transportation invoices mailed July 10, 1995, in compliance with the Commission's May 3, 1995, Order in Docket No. RP95–124–001 related to the treatment of the Gas Research Institute (GRI) surcharge on discounted capacity release transactions during the period January 1, 1995 through May 31, 1995.

Trunkline states that copies of this filing have been served on all affected customers, applicable state regulatory agencies and GRI.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure 18 CFR385.211, 385.214. All such motions or protests should be filed on or before September 8, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPP–66216; FRL 4974–6]

Notice of Receipt of Requests to Voluntarily Cancel Certain Pesticide Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, EPA is issuing a notice of receipt of requests by registrants to voluntarily cancel certain pesticide registrations.

DATES: Unless a request is withdrawn by December 6, 1995, orders will be issued cancelling all of these registrations.

FOR FURTHER INFORMATION CONTACT: By mail: James A. Hollins, Office of Pesticide Programs (7502C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location for commercial courier delivery and telephone number: Room 216, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703) 305–5761; e-mail: hollins.james@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

Section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, provides that a pesticide registrant may, at any time, request that any of its pesticide registrations be cancelled. The Act further provides that EPA must publish a notice of receipt of any such request in the **Federal Register** before acting on the request.

II. Intent to Cancel

This Notice announces receipt by the Agency of requests to cancel some 37 pesticide products registered under section 3 or 24(c) of FIFRA. These registrations are listed in sequence by registration number (or company number and 24(c) number) in the following Table 1.

TABLE 1. — Registrations With Pending Requests for Cancellation

Registration No.	Product Name	Chemical Name
000224–00029	Phillips Fuel Additive 55 MB-E	2-Methoxyethanol
000241–ID–985–0010	Cygon 400 Systemic Insecticide	*O,O*-Dimethyl *S*-((methylcarbamoyl)methyl)phosphorodithioate
000352–00447	Dupont Benlate 50 DF Fungicide	Methyl 1-(butylcarbamoyl)-2-benzimidazolecarbamate
000352–00534	Du Pont Accent Herbicide	2-(((((4,6-Dimethoxy-2-pyrimidinyl)amino)carbonyl)amino)sulfonyl)-*N,N*-dimethyl-
000432–00741	Goldcrest Dulak II	*O,O*-Diethyl *O*-(3,5,6-trichloro-2-pyridyl)phosphorothioate 2,2-Dichlorovinyl dimethyl phosphate Xylene range aromatic solvent
000499–00068	Whitmire Fleas-Off for Dogs	Butoxypolypropylene glycol (Butylcarbityl) (6-propylpiperonyl) ether 80% and related compounds 20% Pyrethrins Rotenone
000499–00153	Whitmire PT 515 Wasp-Freeze	Pine oil Pyrethrins Rotenone Cube Resins other than rotenone
000876–00280	Velsicol Technical Chlordane	Octachloro-4,7-methanotetrahydroindane
000876–00288	Technical Heptachlor (Export)	1,4,5,6,7,8,8-Heptachlorotetrahydro-4,7-methanoindene
001021–01157	Pyrocide Intermediate 7029	*N*-Octyl bicycloheptene dicarboximide (Butylcarbityl) (6-propylpiperonyl) ether 80% and related compounds 20% Pyrethrins 2,2-Dichlorovinyl dimethyl phosphate
001021–01365	Pyrocide Fogging Concentrate 7257	*N*-Octyl bicycloheptene dicarboximide (Butylcarbityl) (6-propylpiperonyl) ether 80% and related compounds 20% Pyrethrins 2,2-Dichlorovinyl dimethyl phosphate
001769–00152	Mint Aire Aerosol	1,2-Propanediol Triethylene glycol
001769–00241	National Chemsearch Sana-Cool	Hexahydro-1,3,5-tris(2-hydroxyethyl)-*s*-triazine
001769–00344	Fen-Two	(1-Cyclohexene-1,2-dicarboximido)methyl 2,2-dimethyl-3-(2-methylpropenyl)cycloprop 4-Chloro-alpha-(1-methylethyl)benzeneacetic acid, cyano(3-phenoxyphenyl)methyl
004822–00124	Johnson Yard Master Foam Lawn Weed Killer	Monoethanolamine 3,6-dichloro-*o*-anisate Diethanolamine (2,4-dichlorophenoxy)acetate
005197–00040	Viro-Phene	Isopropanol 4-tert-Amylphenol *o*-Phenylphenol 1,2-Propanediol
005481–00126	Durham Malathion Sulfur Dust 4–25	*O,O*-Dimethyl phosphorodithioate of diethylmercaptosuccinate Sulfur
005481–00245	Royal Brand Flea Dusting Powder	*O,O*-Dimethyl phosphorodithioate of diethylmercaptosuccinate
005481–00247	4% Malathion Dust with Sulphur	*O,O*-Dimethyl phosphorodithioate of diethylmercaptosuccinate Sulfur
005481–00257	5% Malathion Dust	*O,O*-Dimethyl phosphorodithioate of diethylmercaptosuccinate
005481–00258	Royal Brand 4% Malathion Dust	*O,O*-Dimethyl phosphorodithioate of diethylmercaptosuccinate
005481–00269	Royal Brand Stored Grain Dust M-1	*O,O*-Dimethyl phosphorodithioate of diethylmercaptosuccinate
005481–00274	Malathion 25% Wettable Powder	*O,O*-Dimethyl phosphorodithioate of diethylmercaptosuccinate
005481–00298	Royal Brand Malathion 25 Dust Base	*O,O*-Dimethyl phosphorodithioate of diethylmercaptosuccinate
007969–00042	Basagran Manufacturers Concentrate	3-Isopropyl-1*H*-2,1,3-benzothiadiazin-4(3*H*)-one-2,2-dioxide, sodium salt
007969–00054	Laddok Herbicide	2-Chloro-4-(ethylamino)-6-(isopropylamino)-*s*-triazine 3-Isopropyl-1*H*-2,1,3-benzothiadiazin-4(3*H*)-one-2,2-dioxide, sodium salt
007969–00103	Prompt Herbicide	2-Chloro-4-(ethylamino)-6-(isopropylamino)-*s*-triazine 3-Isopropyl-1*H*-2,1,3-benzothiadiazin-4(3*H*)-one-2,2-dioxide, sodium salt
009403–00010	Alken V-7	Potassium *N*-methyldithiocarbamate Disodium cyanodithioimidocarbonate
010370–00045	Ford's Durs-Vap Insecticide Concentrate	*O,O*-Diethyl *O*-(3,5,6-trichloro-2-pyridyl)phosphorothioate 2,2-Dichlorovinyl dimethyl phosphate
010370–00151	Ford's Dursban-DDVP 2.5 E.C.	*O,O*-Diethyl *O*-(3,5,6-trichloro-2-pyridyl)phosphorothioate 2,2-Dichlorovinyl dimethyl phosphate
010370–00164	Dursban-DDVP 1.25 E.C.	*O,O*-Diethyl *O*-(3,5,6-trichloro-2-pyridyl)phosphorothioate 2,2-Dichlorovinyl dimethyl phosphate
010370–00258	Crown Malvex Dry Fly Bait	2,2-Dichlorovinyl dimethyl phosphate
033649–00001	Dianon	*O,O*-Diethyl *O*-(2-isopropyl-6-methyl-4-pyrimidinyl)phosphorothioate
034704–00636	Dichlobenil 50W	2,6-Dichlorobenzonitrile
034704–00637	Dichlobenil 10-G Aquatic Weed Killer	2,6-Dichlorobenzonitrile
053254–00004	Oxidan DCN/W Co-Blend	Sodium dichloroisocyanurate dihydrate
055947–00143	Barricade 65WG Herbicide In Water Soluble Packs	2,4-Dinitro-*N*3,*N*3-dipropyl-6-(trifluoromethyl)-1,3-benzenediamine (Note: *N*3 = *N*)

TABLE 1. — Registrations With Pending Requests for Cancellation—Continued

Unless a request is withdrawn by the registrant within 90 days of publication of this notice, orders will be issued cancelling all of these registrations. Users of these pesticides or anyone else desiring the retention of a registration should contact the applicable registrant directly during this 90-day period. Two of the registrations for which voluntary cancellation has been requested *000876–0280, Technical Chlordane; 000876–00288, Technical Heptachlor* are registrations granted by EPA to Velsicol Chemical Corporation in 1978 for "export-only"; these particular registrations have never authorized sale or use in the United States. EPA does not believe that "export-only" registrations are appropriate under FIFRA, and intends to grant Velsicol's request for voluntary cancellation of these registrations thirty (30) days after publication of this notice. After the registrations are cancelled, EPA will permit continued exports of chlordane and heptachlor only if such exports are consistent with all the requirements of section 17 of FIFRA, including the labeling and purchaser-acknowledgement provisions of section 17(a). The following Table 2 includes the names and addresses of record for all registrants of the products in Table 1, in sequence by EPA Company Number.

TABLE 2. — REGISTRANTS REQUESTING VOLUNTARY CANCELLATION

EPA Company No.	Company Name and Address
000224	Phillips 66 Co., 699 Adams Building, Bartlesville, OK 74004.
000241	American Cyanamid Co., Agri Research Div - U.S. Regulatory Affairs, Box 400, Princeton, NJ 08543.
000352	E. I. Du Pont De Nemours & Co., Inc., Barley Mill Plaza, Walker's Mill, Wilmington, DE 19880.
000432	Agrevo Environmental Health, 95 Chestnut Ridge Rd., Montvale, NJ 07645.
000499	Whitmire Research Laboratories, Inc., 3568 Tree Ct., Industrial Blvd., St Louis, MO 63122.
000876	Velsicol Chemical Corp., 10400 W. Higgins Rd., Suite 600, Rosemont, IL 60018.
001021	Mclaughlin Gormley King Co., 8810 Tenth Ave., North Minneapolis, MN 55427.
001769	NCH Corp., 2727 Chemsearch Blvd., Irving, TX 75062.

034704	Platta Chemical Co., Inc., c/o William M. Mahlburg, Box 667, Greeley, CO 80632.
053254	3V Inc., P. O. Drawer Y, Georgetown, SC 29442.
055947	Sandoz Agro Inc., 1300 E. Touhy Ave., Des Plaines, IL 60018.

III. Loss of Active Ingredients

Unless the requests for cancellation are withdrawn, one pesticide active ingredient will no longer appear in any registered products. Those who are concerned about the potential loss of this active ingredient for pesticidal use are encouraged to work directly with the registrant to explore the possibility of their withdrawing the request for cancellation. The active ingredient is listed in the following Table 3, with the EPA Company and CAS Number.

TABLE 3. — ACTIVE INGREDIENTS WHICH WOULD DISAPPEAR AS A RESULT OF REGISTRANTS' REQUESTS TO CANCEL

Cas No.	Chemical Name	EPA Company No.
53404–28–7	Dicamba, monoethanolamine salt	004822

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A. Hollins, at the address given above, postmarked before December 6, 1995. This written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1-year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in **Federal Register** No. 123, Vol. 56, dated June 26, 1991. Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the

hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

Control Techniques Guideline Document; Wood Furniture Finishing and Cleaning Operations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Release of draft control techniques guideline (CTG) document for public review.

SUMMARY: A draft CTG document for control of volatile organic compound (VOC) emissions from wood furniture finishing and cleaning operations is available for public review and comment. This information document has been prepared to assist States in analyzing and determining reasonably available control technology (RACT) for stationary sources of VOC emissions located within ozone national ambient air quality standard nonattainment areas. The draft document recommends RACT for industries included in, but not limited to, nine Standard Industrial Classification (SIC) codes: Wood Kitchen Cabinets (SIC 2434), Wood Household Furniture, except upholstered (SIC 2511), Wood Household Furniture, upholstered (SIC 2512), Wood Television, Radio, Phonograph, and Sewing Machine Cabinets (SIC 2517), Household Furniture Not Classified Elsewhere (SIC 2519), Wood Office Furniture (SIC 2521), Public Building and Related Furniture (SIC 2531), Wood Office and Store Fixtures (SIC 2541), and Furniture and Fixtures Not Elsewhere Classified (SIC 2599).

DATES: Comments must be received on or before November 6, 1995.

ADDRESSES: *Comments.* Comments should be submitted (in duplicate and on computer disk, if possible) to Mr. Paul Almodóvar, (919) 541–0283, Coatings and Consumer Products Group, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Control Techniques Guideline. Copies of the draft CTG may be obtained from the U.S. EPA Library (MD–35), Research Triangle Park, North Carolina 27711, telephone number (919) 541–2777.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Almodóvar, (919) 541–0283, Coatings and Consumer Products Group, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION: The docket is available for public inspection at the Office of Air Quality Planning and Standards, Research Triangle Park, North Carolina, which is listed in the **ADDRESSES** section of this notice. The draft control technique guidelines document is also available on the Technology Transfer Network (TTN), on the EPA's electronic bulletin boards. This bulletin board provides information and technology exchange in various areas of air pollution control. The service is free, except for the cost of a telephone call. Dial (919) 541–5742 for up to a 14,400 bps modem. If more information on TTN is needed call the HELP line at (919) 541–5384.

I. Introduction

A. Background

Under the Clean Air Act (CAA), as amended in 1990, State implementation plans (SIP's) for ozone nonattainment areas must be revised to require RACT for control of VOC emissions from sources for which the EPA has already published a CTG or for which it will publish a CTG between the date the Amendments were enacted and the date an area achieves attainment status (CAA 182(b)(2)). The EPA has defined RACT as "the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering the technological and economic feasibility" (44 FR 53761, September 17, 1979).

The CTG's review current knowledge and data concerning the technology and costs of various emissions control techniques. The CTG's are intended to provide State and local air pollution authorities with an information base for proceeding with their own analyses of RACT to meet statutory requirements.

Each CTG contains a "presumptive norm" for RACT for a specific source category, based on the EPA's evaluation of the capabilities and problems general to the category. Where applicable, the EPA recommends that States adopt requirements consistent with the presumptive norm. However, the presumptive norm is only a recommendation. States may choose to develop their own RACT requirements on a case-by-case basis, considering the emission reductions needed to obtain achievement of the national ambient air quality standards and the economic and technical circumstances of the individual source.

This CTG addresses RACT for control of VOC emissions from wood furniture finishing and cleaning operations. The VOC emissions from wood furniture finishing, cleaning, and washoff operations are addressed. Many of the steps in these operations involve the use of organic solvents and are sources of VOC emissions. The sources, mechanisms, and control of these VOC emissions are described in the CTG.

The determination of presumptive RACT for the wood furniture industry was negotiated under the Federal Advisory Committee Act with members of industry, environmental groups, States, and local agencies. The regulatory negotiation was conducted in conjunction with the negotiation for the proposed national emission standards for hazardous air pollutants (NESHAP) for the wood furniture industry developed under Section 112(d) of the Act. This combined effort ensured that both sets of requirements are consistent and coordinated. The wood furniture industry NESHAP was proposed on December 6, 1994 (59 FR 62652), and is court ordered to be promulgated by November 15, 1995.

B. Solicitation of Comments

The EPA requests comments from the public on all aspects of the draft CTG, including the recommendations for RACT and the estimated cost of control.

II. Summary of Impacts

The EPA estimates that State and local regulations developed pursuant to this draft CTG would affect about 970 facilities and reduce VOC emissions by about 20,400 tons per year at a cost of about $20,200,000. Further information on costs and controls is presented in the draft CTG document.

III. Administrative Requirements

A. Executive Order 12866

Under Executive Order 12866 [58 FR 51735 (October 4, 1993)], the Agency must determine whether the regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

It has been determined that this draft CTG document is not a "significant regulatory action" under the terms of Executive Order 12866 and is therefore not subject to OMB review. This CTG document is not a "rulemaking," rather it provides information to States to aid them in developing rules.

Approval of Categorical Sulfide Pretreatment Waiver for Uber Tanning Co. Discharging to City of Owatonna Subject to Pretreatment Standards Under 40 CFR Part 425

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The City of Owatonna (hereinafter referred to as "Owatonna"), Minnesota operates a publicly owned treatment works (POTW) which accepts wastewater from Uber Tanning Company, which is subject to pretreatment standards at 40 CFR part 425. Pursuant to 40 CFR 425.04(c), Owatonna certified to the U.S. Environmental Protection Agency (U.S. EPA) on June 28, 1995, that discharge of sulfide from the tannery would not interfere with the operation of the POTW. Pursuant to 40 CFR 425.04(c) Owatonna provided documentation to the U.S. EPA on August 14, 1995, of notice that presents the findings supporting this determination published in the local newspaper with the largest circulation and notice of opportunity for public hearing.

Pursuant to 40 CFR 425.04(c) and in consideration of the information provided by Owatonna, I hereby, waive the sulfide pretreatment standards at 40 CFR part 425 for Uber Tanning Company in Owatonna, Minnesota.

DATES: This action is effective as of September 7, 1995.

FOR FURTHER INFORMATION CONTACT: Morris Beaton, Permits Section, Water Quality Branch, U.S. EPA, Region 5, at (312) 353–0850.

Jo Lynn Traub,

Director, Water Division.

FEDERAL RESERVE SYSTEM

CNB Bancorp, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than September 29, 1995.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. CNB Bancorp, Inc., Woodsfield, Ohio; to become a bank holding company by acquiring 100 percent of the voting shares of The Citizens National Bank of Woodsfield, Woodsfield, Ohio.

2. F&A Financial Company, Kittanning, Pennsylvania; to acquire up to 95.9 percent of the voting shares of Snyder Holding Company, Kittanning, Pennsylvania, and thereby indirectly acquire The Farmers National Bank of Kittanning, Kittanning, Pennsylvania.

B. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. Home Savings Bank Employee Stock Ownership Plan, Meridian, Mississippi; to become a bank holding company by acquiring 35.81 percent of the voting shares of Home Savings Bank, SSB, Meridian, Mississippi.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Harrell Bancshares, Inc., Camden, Arkansas; to become a bank holding company by acquiring 100 percent of the voting shares of First Bank of South Arkansas, Junction City, Arkansas, and Calhoun County Bank, Hampton, Arkansas.

D. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Mille Lacs Bancorporation, Inc., Onamia, Minnesota; to become a bank holding company by acquiring 100 percent of the voting shares of Mille Lacs Bancshares, Inc., Onamia, Minnesota, and thereby indirectly acquire First State Bank of Onamia, Onamia, Minnesota.

E. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Aspen Bancshares, Inc., Aspen, Colorado; to acquire 100 percent of the voting shares of Val Cor Bancorporation, Inc., Cortez, Colorado, and thereby indirectly acquire Valley National Bank, Cortez, Colorado.

2. First National Bancshares, Inc. ESOP and 401(k) Trusts, Goodland, Kansas; to become a bank holding company by acquiring 35 percent of the voting shares of First National Bancshares, Inc., Goodland, Kansas, and thereby acquire First National Bank, Goodland, Kansas.

Board of Governors of the Federal Reserve System, August 31, 1995.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–F

First Midwest Bancorp, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 20, 1995.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First Midwest Bancorp, Inc., Naperville, Illinois; to acquire 100 percent of the voting shares of CF Bancorp, Inc., Davenport, Iowa a savings and loan holding company, and thereby indirectly acquire Citizens Federal Savings Bank, F.S.B., Davenport, Iowa (Citizens), and thereby engage in owning, controlling, or operating a savings association, pursuant to § 225.25(b)(9) of the Board's Regulation Y. Citizens may convert to a national bank upon consummation of the proposal. Applicant also has applied to acquire Citizens Service Corporation, Davenport, Iowa, and thereby engage in making, acquiring, or servicing loans, pursuant to § 225.25(b)(1) of the Board's Regulation Y; Citizens Federal Insurance Agency, Davenport, Iowa, and thereby engage in providing securities brokerage services, pursuant to § 225.25(b)(15) of the Board's Regulation Y and the sale of credit insurance on consumer loans, pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, August 31, 1995.

William W. Wiles,

Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Agency Information Collection Under OMB Review; Proposed Information Collection Submitted for Public Comment and Recommendations

In compliance with the requirements of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Administration for Children and Families (ACF) is publishing the following summary(ies). To request copies of the proposed collection of information write The Administration for Children and Families, Office of Information Systems, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Proposed Project(s):

Title: Family Preservation and Family Services (FP/FS) Support Act.

OMB No.: New.

Description: Participants in the implementation of the Family Preservation and Family Support Services Program will provide information for reauthorization of Title IV–B, subpart 2 of the Social Security Act and provide feedback to ACF necessary to determine the need for future policy guidance and refine the nature and scope of technical assistance.

Respondents: State, Local and Tribal government.

Title	No. of respondents	No. of responses per respondents	Average burden per response	Burden
Traditional Child Welfare Staff	40	1	2.00	19.90
FP/FS Coordinator	10	1	1.00	10.00
FP/FS Stakeholders	80	1	8.00	80.00
Family Preservation Staff	10	1	0.75	7.50
Family Support Staff	10	1	1.00	10.00
Estimated Total Annual Burden Hours:				127.5

Dated: August 30, 1995.

BILLING CODE 4184-01-M

[Program Announcement No. 93612–961]

Administration for Native Americans; Availability of Financial Assistance

AGENCY: Administration for Native Americans (ANA), Administration for Children and Families, (ACF).

ACTION: Announcement of availability of competitive financial assistance for projects in competitive areas administered by the Administration for Native Americans for American Indians, Native Hawaiian, Alaska Natives and Native American Pacific Islanders.

SUMMARY: The Administration for Native Americans (ANA) announces the anticipated availability of fiscal year 1996 funds in four competitive areas:

(1) Governance and social and economic development;

(2) Governance and social and economic development for Alaska Native entities;

(3) Environmental regulatory enhancement; and

(4) Native American languages preservation and enhancement.

Financial assistance provided by ANA in support of projects in these four areas is intended to promote the goal of self-sufficiency for Native Americans.

APPLICATION KIT: Application kits, containing the necessary forms and instructions to apply for a grant under this program announcement, may be obtained from: Department of Health and Human Services, Administration for Children and Families, Administration for Native Americans, Room 348F, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201–0001, Attention: 93612–961, Telephone: (202) 690–7776.

SUPPLEMENTARY INFORMATION:

Introduction and Purpose

The purpose of this program announcement is to announce the anticipated availability of fiscal year 1996 funds, authorized under the Native American Programs Act (Act), as amended, to promote the goal of social and economic self-sufficiency for American Indians, Alaska Natives, Native Hawaiians, and Native American Pacific Islanders in four competitive areas.

In order to streamline the application process for eligible applicants under four competitive areas, ANA is issuing a single program announcement for fiscal year 1996 funds. Therefore, information regarding ANA's mission, policy, goals, application requirements, review criteria and closing dates for each competitive area is included in this comprehensive announcement.

In previous years, the Administration for Native Americans promoted the goal of self-sufficiency in Native American communities primarily through Social and Economic Development Strategies (SEDS) projects. Amendments to the Native American Programs Act have expanded ANA's granting authority to establish two additional programs for 1) environmental regulatory enhancement, and 2) Native American languages preservation and enhancement.

Funding authorization is provided under sections [803(a), 803(d) and 803C of the Native American Programs Act of 1974, as amended (Pub. L. 93–644, 88 Stat. 2324, 42 U.S.C. 2991b).]

The Indian Environmental Regulatory Enhancement Act of 1990 (Pub. L. *101–408*) authorizes financial assistance for projects to address environmental regulatory concerns (Section 803(d) of the Native American Programs Act of 1974, as amended).

The Native American Languages Act of 1992 (Pub. L. *102–524*) authorizes financial assistance for projects to promote the survival and continuing vitality of Native American languages (Section 803C of the Native American Programs Act of 1974, as amended).

This program announcement is being issued in anticipation of the appropriation of funds for fiscal year 1996 and the availability of funds for the four competitive areas is contingent upon sufficient final appropriations. Proposed projects will be reviewed on a competitive basis against the specific evaluation criteria presented under each competitive area in this announcement.

Eligible applicants may compete for and receive a grant award in each of the three competitive areas (An Alaska Native entity may not submit an application under both Competitive Areas 1 and 2 for the same closing date.) However, ANA continues its policy that an applicant may only submit one application per competitive area.

This program announcement consists of three parts.

Part I ANA Policy and Goals

Provides general information about ANA's policies and goals for the four competitive areas.

Part II ANA Competitive Areas

Describes the four competitive areas under which ANA is requesting applications:

- Governance, Social and Economic Development (SEDS);
- Governance, Social and Economic Development (SEDS) for Alaska Native entities;
- Environmental Regulatory Enhancement; and
- Native American Languages Preservation and Enhancement.

Each competitive area includes the following sections which provide area-specific information to be used to develop an application for ANA funds:

A Purpose and Availability of Funds;
B Background;
C Proposed Projects to be Funded;
D Eligible Applicants;
E Grantee Share of the Project;
F Review Criteria;
G Application Due Date(s); and
H Contacts to Obtain Further Information

Part III General Application Information and Guidance

Provides important information and guidance that applies to all four competitive areas and that must be taken into account in developing an application for any of the four areas.

Part I—ANA Policy and Goals

The mission of the Administration for Native Americans (ANA) is to promote the goal of social and economic self-sufficiency for American Indians, Alaska Natives, Native Hawaiians, and other Native American Pacific Islanders.

The Administration for Native Americans believes that a Native American community is self-sufficient when it can generate and control the resources necessary to meet its social and economic goals, and the needs of its members.

The Administration for Native Americans also believes that the responsibility for achieving self-sufficiency resides with the governing bodies of Indian tribes, Alaska Native villages, and in the leadership of Native American groups. A community's progress toward self-sufficiency is based on its efforts to plan, organize, and direct resources in a comprehensive manner which is consistent with its established long-range goals.

The Administration for Native Americans' policy is based on three interrelated goals:

1. *Governance:* To assist tribal and Alaska Native village governments, Native American institutions, and local leadership to exercise local control and decision-making over their resources.

2. *Economic Development:* To foster the development of stable, diversified local economies and economic activities which will provide jobs and promote economic well-being.

3. *Social Development:* To support local access to, control of, and coordination of services and programs which safeguard the health, well-being and culture of people, provide support services and training so people can work, and which are essential to a thriving and self-sufficient community.

The Administration for Native Americans assists eligible applicants for the four competitive areas to undertake one to three year development projects that are part of long-range comprehensive plans to move toward governance, social, and/or economic self-sufficiency.

For each type of project, applicants must describe a concrete locally-determined strategy to carry out a proposed project with fundable objectives and activities.

Local long-range planning must consider the maximum use of all available resources, how the resources will be directed to development opportunities, and present a strategy for overcoming the local issues that hinder movement toward self-sufficiency in the community.

Under each competitive area, ANA will only accept one application which serves or impacts a reservation, Tribe, or Native American community.

An application from a federally recognized Tribe, Alaska Native Village or Native American organization must be from the governing body of the Tribe or organization. ANA will not accept applications from tribal components which are tribally-authorized divisions of a larger tribe, unless the application includes a Tribal resolution which clearly demonstrates the Tribe's support of the project and the Tribe's understanding that the other applicant's project supplants the Tribe's authority to submit an application under that specific competitive area for the duration of the approved grant period.

Note: If a Tribe or Alaska Native village chooses not to submit an application under a specific competitive area, it may support another applicant's project (e.g., a tribal organization) which serves or impacts the reservation. In this case, the applicant must include a Tribal resolution which clearly demonstrates the Tribe's support of the project and the Tribe's understanding that the other applicant's project supplants the Tribe's authority to submit an application under that specific competitive area for the duration of the approved grant period.

Part II—ANA Competitive Areas

The four competitive areas under this Part describe ANA's funding authorities, priorities, special initiatives, requirements, and review criteria. However, most of the requirements are standard for all applications to be submitted under this program announcement. The standard requirements necessary for each application, as well as standard ANA program guidance and technical guidance are described in Part III of this announcement.

An applicant may submit a separate application under any of the competitive areas described in this Part, as long as the applicant meets the eligibility requirements that are listed separately under each area. Applications for SEDS grants from Alaska Native entities may be submitted under either Competitive Area 1 or Competitive Area 2. An Alaska Native entity may not submit an application under both Competitive Areas 1 and 2 for the same closing date.

ANA Competitive Area 1. Social and Economic Development Strategies (SEDS) Projects

A. Purpose and Availability of Funds

The purpose of this competitive area is to announce the anticipated availability of fiscal year 1996 financial assistance to promote the goal of social and economic self-sufficiency for American Indians, Alaska Natives, Native Hawaiians, and Native American Pacific Islanders through locally developed social and economic development strategies (SEDS).

Approximately $14 million of financial assistance is anticipated to be available under this priority area for governance, social and economic development projects. In fiscal year 1996, ANA anticipates awarding approximately 120 competitive grants ranging from $30,000 to $1,000,000 under this competitive area.

B. Background

To achieve its goals, ANA supports tribal and village governments, and Native American organizations, in their efforts to develop and implement community-based, long-term governance, social and economic development strategies (SEDS). These strategies must promote the goal of self-sufficiency in local communities.

The SEDS approach is based on ANA's program goals and incorporates two fundamental principles:

1. The local community and its leadership are responsible for determining goals, setting priorities, and planning and implementing programs aimed at achieving those goals. The local community is in the best position to apply its own cultural, political, and socio-economic values to its long-term strategies and programs.

2. Governance and social and economic development are interrelated. In order to move toward self-sufficiency, development in one area should be balanced with development in the others. Consequently, comprehensive development strategies should address all aspects of the governmental, economic, and social infrastructures needed to promote self-sufficient communities.

ANA's SEDS policy is based on the use of the following definitions:

- "Governmental infrastructure" includes the constitutional, legal, and administrative development requisite for independent governance.
- "Economic infrastructure" includes the physical, commercial, industrial and/or agricultural components necessary for a functioning local economy which supports the life-style embraced by the Native American community.
- "Social infrastructure" includes those components through which health, economic well-being and culture are maintained within the community and that support governance and economic goals.

These definitions should be kept in mind as a local social and economic development strategy is developed as part of a grant application.

A community's movement toward self-sufficiency could be jeopardized if a careful balance between governmental, economic and social development is not maintained. For example, expansion of social services, without providing opportunities for employment and economic development, could lead to dependency on social services.

Conversely, inadequate support services and training could seriously impede productivity and local economic development. Additionally, the necessary infrastructures must be developed or expanded at the community level to support social and economic development and growth. In designing their social and economic development strategies, ANA encourages an applicant to use or leverage all available human, natural, financial, and physical resources.

In discussing their community-based, long-range goals, and the objectives for the proposed projects, ANA recommends that non-Federally recognized and off-reservation groups include a description of what constitutes their specific community.

ANA encourages the development and maintenance of comprehensive strategic plans which are an integral part of attaining and supporting the balance necessary for successful activities that lead to self-sufficiency.

C. Proposed Projects to be Funded

This section provides descriptions of activities which are consistent with the SEDS philosophy. Proposed activities should be tailored to reflect the governance, social and economic development needs of the local community and should be consistent and supportive of the proposed project objectives.

The types of projects which ANA may fund include, but are not limited to, the following:

Governance

- Improvements in the governmental, judicial and/or administrative infrastructures of tribal and village governments (such as strengthening or streamlining management procedures or the development of tribal court systems);
- Increasing the ability of tribes, villages, and Native American groups and organizations to plan, develop, and administer a comprehensive program to support community social and economic self-sufficiency (including strategic planning);
- Increasing awareness of and exercising the legal rights and benefits to which Native Americans are entitled, either by virtue of treaties, the Federal trust relationship, legislative authority, executive orders, administrative and court decisions, or as citizens of a particular state, territory, or of the United States.
- Status clarification activities for Native groups seeking Federal or State tribal recognition, such as performing research or any other function necessary to submit a petition for Federal acknowledgement or in response to any obvious deficiencies cited by the Bureau

of Acknowledgement and Research (BAR), Department of Interior, in a petition from a Native group seeking Federal recognition; and
- Development of and/or amendments to tribal constitutions, court procedures and functions, by-laws or codes, and council or executive branch duties and functions.

Economic Development

- Development of a community economic infrastructure that will result in businesses, jobs, and an economic support structure.
- Establishment or expansion of businesses and jobs in areas such as tourism, specialty agriculture, light and/or heavy manufacturing, construction, housing and fisheries or aquaculture;
- Stabilizing and diversifying a Native community's economic base through business development ventures;
- Creation of microenterprises or private sector development;
- Establishment or expansion of businesses and jobs that utilize Indian tax incentives passed in the Omnibus Budget Reconciliation Act of 1993; and

Social Development

- Enhancing tribal capabilities to design or administer programs aimed at strengthening the social environment desired by the local community;
- Developing local and intertribal models related to comprehensive planning and delivery of services;
- Developing programs or activities to preserve and enhance tribal heritage and culture; and
- Establishing programs which involve extended families or tribal societies in activities that strengthen cultural identity and promote community development or self-esteem.

D. Eligible Applicants

Current ANA SEDS grantees whose project period terminates in fiscal year 1996 (October 1, 1995-September 30, 1996) are eligible to apply for a grant award under this program announcement. (The Project Period is noted in Block 9 of the "Financial Assistance Award" document).

Additionally, provided they are not current ANA SEDS grantees, the following organizations are eligible to apply under this competitive area:

- Federally recognized Indian Tribes;
- Consortia of Indian Tribes;
- Incorporated non-Federally recognized Tribes;
- Incorporated nonprofit multi-purpose community-based Indian organizations;
- Urban Indian Centers;
- National or regional incorporated nonprofit Native American organizations with Native American community-specific objectives;
- Alaska Native villages as defined in the Alaska Native Claims Settlement Act (ANCSA) and/or nonprofit village consortia;
- Incorporated nonprofit Alaska Native multi-purpose community-based organizations;
- Nonprofit Alaska Native Regional Corporations/Associations in Alaska with village specific projects;
- Nonprofit Native organizations in Alaska with village specific projects;
- Public and nonprofit private agencies serving Native Hawaiians;
- Public and nonprofit private agencies serving native peoples from Guam, American Samoa, Palau, or the Commonwealth of the Northern Mariana Islands. (The populations served may be located on these islands or in the United States); and
- Tribally Controlled Community Colleges, Tribally Controlled Post-Secondary Vocational Institutions, and colleges and universities located in Hawaii, Guam, American Samoa, Palau, or the Commonwealth of the Northern Mariana Islands which serve Native American Pacific Islanders.

Proof of an applicant's nonprofit status, such as an IRS determination of nonprofit status under IRS Code 501(c)(3), must be included in the application.

If the applicant, other than a tribe or an Alaska Native Village government, is proposing a project benefiting Native Americans or Native Alaskans, or both, it must provide assurance that its duly elected or appointed board of directors is representative of the community to be served. An organization can conclusively establish that it meets this requirement through a signed statement or resolution stating that its duly elected or appointed board of directors are either Native Americans or Native Alaskans or a copy of the organizational charter or by-laws that clearly states that the organization has a board drawn from members of those groups.

Note: Under each competitive area, ANA will only accept one application which serves or impacts a reservation, Tribe, or Native American community. If a Tribe or Alaska Native village chooses not to submit an application under a specific competitive area, it may support another applicant's project (e.g., a tribal organization) which serves or impacts the reservation.

In this case, the applicant must include a Tribal resolution which clearly demonstrates the Tribe's support of the project and the Tribe's understanding that the other applicant's project supplants the Tribe's authority to submit an application under that specific competitive area for the duration of the approved grant period.

E. Grantee Share of the Project

Grantees must provide at least 20 percent of the total approved cost of the project. (The total approved cost of the project is the sum of the ACF share and the non-Federal share.) The non-Federal share may be met by cash or in-kind contributions; although applicants are encouraged to meet their match requirements through cash contributions. Therefore, a project requesting $300,000 in Federal funds must include a match of at least $75,000 (20% total project cost).

As per 45 CFR Part 74.2, In-Kind contributions is defined as "the value of non-cash contributions provided by non-Federal third parties. Third party-in kind contributions may be in the form of real property, equipment, supplies and other expendable property, and the value of goods and services directly benefiting and specifically identifiable to the project or program."

In addition it may include other Federal funding sources where its legislation or regulations authorizes using specific types of funds for a match and provided the source relates to the ANA project, as follows:

- Indian Child Welfare funds, through the Department of Interior;
- Indian Self-Determination and Education Assistance funds, through the Department of Interior and the Department of Health and Human Services; and
- Community Development Block Grant funds, through the Department of Housing and Urban Development.

An itemized budget detailing the applicant's non-Federal share, and its source, must be included in an application.

If an applicant plans to charge indirect costs in its ANA application, a current copy of its Indirect Cost Agreement must be included in the application.

A request for a waiver of the non-Federal share requirement may be submitted in accordance with 45 CFR 1336.50(b)(3) of the Native American Program Regulations.

Note: Applications originating from American Samoa, Guam, Palau, or the Commonwealth of the Northern Mariana Islands are covered under Section 501(d) of Public Law 95–134, as amended (48 U.S.C. 1469a) under which HHS waives any requirement for local matching funds under $200,000 (including in-kind contributions).

F. Review Criteria

A proposed project should reflect the purposes of ANA's SEDS policy and program goals (described in the Background section of this competitive area), include a social and economic development strategy which reflects the needs and specific circumstances of the local community, and address the specific developmental steps that the tribe or Native American community is undertaking toward self-sufficiency.

The evaluation criteria are closely related to each other and are considered as a whole in judging the overall quality of an application. Points are awarded only to applications which are responsive to this competitive area and these criteria. Proposed projects will be reviewed on a competitive basis using the following evaluation criteria:

(1) Long-Range Goals and Available Resources. (15 Points)

(a) The application describes the long-range goals and strategy, including:

- How specific social, governance and economic long-range community goals relate to the proposed project and strategy;
- How the community intends to achieve these goals;
- The relationship between the long-range goals and the applicant's comprehensive community social and economic development plan. (Inclusion of the community's entire development plan is not necessary); and
- A clearly delineated social and economic development strategy (SEDS).

The application documents the type of involvement and support of the community in the planning process and implementation of the proposed project. A Tribe may meet this requirement by submitting a resolution stating that community involvement has occurred in the project planning. All other eligible applicants may meet this requirement by providing documentation of community support/involvement. The type of community you serve will determine the type of documentation necessary.

For example, a tribal organization may submit resolutions supporting the project proposal from each of its members tribes, as well as a resolution from the applicant organization. Other examples of documentation include: community surveys; minutes of community meetings; questionnaires; tribal presentations; and/or discussion/position papers.

Applications from National Indian and Native organizations must clearly demonstrate a need for the project, explain how the project was originated, state who the intended beneficiaries will be, and describe how the recipients will actually benefit from the project. National Indian and Native organizations should define their membership and describe how the organization operates.

(b) Available resources (other than ANA and the non-Federal share) which will assist, and be coordinated with the project are described. These resources should be documented by letters or documents of commitment of resources, not merely letters of support.

- "Letters of support" merely express another organization's endorsement of a proposed project. Support letters are not binding commitment letters or do not factually establish the authenticity of other resources.
- "Letters and other documents of commitment" are binding when they specifically state the nature, the amount, and conditions under which another agency or organization will support a project funded with ANA funds.

For example, a letter from another Federal agency or foundation pledging a commitment of $200,000 in construction funding to complement proposed ANA funded pre-construction activity is evidence of a firm funding commitment. These resources may be human, natural or financial, and may include other Federal and non-Federal resources. (Applicant states that additional funding will be sought from other specific sources are not considered a binding commitment of outside resources.)

Note: Applicants from the Native American Pacific Islands are not required to provide a 20% match for the non-Federal share if it is under $200,000 and may not have points reduced for this policy. They are, however, expected to coordinate non-ANA resources for the proposed project, as are all ANA applicants.

(2) Organizational Capabilities and Qualifications. (10 Points)

(a) The management and administrative structure of the applicant is explained. Evidence of the applicant's ability to manage a project of the proposed scope is demonstrated. The application clearly shows the successful management of projects of similar scope by the organization, and/or by the individuals designated to manage the project.

(b) Position descriptions and/or resumes of key personnel, including those of consultants, are presented. The position descriptions and/or resumes relate specifically to the staff proposed in the Approach Page and in the proposed Budget of the application. Position descriptions very clearly describe each position and its duties and clearly relate to the personnel staffing required to achieve the project objectives. Resumes demonstrate that the proposed staff are qualified to carry out the project activities. Either the position descriptions or the resumes contain the qualifications and/or specialized skills necessary for overall quality management of the project. Resumes must be included if individuals have been identified for positions in the application.

Note: Applicants are strongly encouraged to give preference to Native Americans in hiring staff and subcontracting services under an approved ANA grant.

(3) Project Objectives, Approach and Activities. (45 Points)

The application proposes specific project Objective Work Plans with activities related to each specific objective.

The Objective Work Plan(s) in the application includes project objectives and activities for each budget period proposed and demonstrates that each of the objectives and its activities:

- Is measurable and/or quantifiable in terms of results or outcomes;
- Supports the community's social and economic development strategy;
- Clearly relates to the community's long-range goals;
- Can be accomplished with the available or expected resources during the proposed project period;
- Indicates when the objective, and major activities under each objective, will be accomplished;
- Specifies who will conduct the activities under each objective; and
- Supports a project that will be completed, self-sustaining, or financed by other than ANA funds at the end of the project period.

(4) Results or Benefits Expected. (20 Points)

Completion of the proposed objectives will result in specific, measurable results. The application shows how the expected results will help the community meet its long-range goals. The specific information provided in the narrative and objective work plans on expected results or benefits for each objective is the standard upon which its achievement can be evaluated at the end of each budget year.

(5) Budget. (10 Points)

A detailed and fully explained budget is provided for each budget period requested which:

- Justifies each line item, with a well-written justification, in the budget categories in Section B of the Budget Information of the application, including the applicant's non-Federal share and its source;
- Includes and justifies sufficient cost and other necessary details to facilitate the determination of cost allowability and the relevance of these costs to the proposed project; and
- Requests funds which are appropriate and necessary for the scope of the proposed project.

For business development projects, the proposal demonstrates that the expected return on the funds used to develop the project provides a reasonable operating income and return within a future specified time frame.

Note: Applicants from the Native American Pacific Islands are exempt from the $200,000 non-Federal share requirement.

G. Application Due Date

The closing dates for submission of applications under this competitive area are: October 20, 1995, February 9, 1996, and May 17, 1996.

Sharon McCully (202) 690–5780, Department of Health and Human Services, Administration for Children and Families, Administration for Native Americans, 200 Independence Avenue, S.W., Room 348–F, Washington, D.C. 20201–0001

Competitive Area 2. Alaska-Specific Social and Economic Development Strategies (SEDS) Projects

A. Purpose and Availability of Funds

The purpose of this competitive area is to announce the anticipated availability of fiscal year 1996 funds for Alaska Native social and economic development projects. Approximately $1.5 million of financial assistance is anticipated to be available under this competitive area for Alaska Native governance, social and economic development projects.

ANA plans to award approximately 15–18 grants under this competitive area. For individual village projects, the funding level for a budget period of 12 months will be up to $100,000; for regional nonprofit and village consortia, the funding level for a budget period of 12 months will be up to $150,000, commensurate with approved multi-village objectives.

B. Background

Based on the three ANA goals described in Part I, ANA implemented a special Alaska social and economic development initiative in fiscal year 1984. This special effort was designed to provide financial assistance at the village level or for village-specific projects aimed at improving a village's governance capabilities and for social and economic development.

This competitive area continues to implement this special initiative. ANA believes both the nonprofit and for-profit corporations in Alaska can play an important supportive role in assisting individual villages to develop and implement their own locally determined strategies which capitalize on opportunities afforded to Alaska Natives under the Alaska Native Claims Settlement Act (ANCSA), Public Law 92–203.

The Administration for Native Americans does not fund objectives or activities for the core administration of an organization. However, ANA will consider funding core administrative capacity building projects at the village government level if the village does not have governing systems in place.

C. Proposed Projects to be Funded

Examples of the types of projects that ANA may fund include, but are not limited to, projects that will:

Governance

- Initiate demonstration programs at the regional level to allow Native people to become involved in developing strategies to maintain and develop their economic subsistence base;
- Assist villages in developing land use capabilities and skills in the areas of land and natural resource management and protection, resource assessment and conducting environmental impact studies;
- Assist village consortia in the development of tribal constitutions, ordinances, codes and tribal court systems;
- Develop agreements between the State and villages that transfer programs jurisdictions, and /or control to Native entities;
- Strengthen village government control of land management, including land protection, through coordination of land use planning with village corporations and cities, if appropriate;
- Assist in status clarification activities;
- Initiate village level mergers between village councils, village corporations and others to coordinate programs and services which safeguard the health, well being and culture of a community and its people;
- Strengthen local governance capabilities through the development of village consortia and regional IRAs (Indian Reorganization Act councils organized under the Indian Reorganization Act, 25 U.S.C. 473a);
- Assist villages in preparing and coordinating plans for the development and/or improvement of water and sewer systems within the village boundaries;
- Assist villages in establishing initiatives through which youth may participate in the governance of the community and be trained to assume leadership roles in village governments; and
- Consider strategies and plans to protect against, monitor, and assist when catastrophic events occur, such as oil spills or earthquakes.

Economic Development

- Assist villages in developing businesses and industries which: 1) use local materials; 2) create jobs for Alaska Natives; 3) are capable of high productivity at a small scale of operation; and 4) complement traditional and necessary seasonal activities;
- Substantially increase and strengthen efforts to establish and improve the village and regional infrastructure and the capabilities to develop and manage resources in a highly competitive cash-economy system;
- Assist villages, or consortia of villages, in developing subsistence compatible industries that will retain local dollars in villages;
- Assist in the establishment or expansion of new native owned businesses; and
- Assist villages in labor export; i.e., people leaving the local communities for seasonal work and returning to their communities.

Social Development

- Assist in developing training and education programs for local jobs in education, government, and health-related fields; and work with these agencies to encourage job replacement of non-Natives by trained Natives;
- Develop local models related to comprehensive planning and delivery of social services;
- Develop new service programs, initially established with ANA funds, which will be funded for continued operation (after the ANA grant terminates) by local communities or the private sector;
- Develop or coordinate with State-funded projects, activities designed to decrease the incidence of child abuse and neglect, fetal alcohol syndrome, and/or suicides;
- Assist in obtaining licenses to provide housing or related services from State or local governments; and
- Develop businesses to provide relief for caretakers needing respite from human service-related care work.

D. Eligible Applicants

Current ANA SEDS grantees in Alaska whose project period terminates in fiscal year 1996 (October 1, 1995—

September 30, 1996) are eligible to apply for a grant award under this program announcement. (The Project Period is noted in Block 9 of the "Financial Assistance Award" document.)

Additionally, provided they are not current ANA SEDS grantees, the following organizations are eligible to apply under this competitive area:

- Federally recognized Indian Tribes in Alaska;
- Alaska Native villages as defined in the Alaska Native Claims Settlement Act (ANCSA) and/or nonprofit village consortia;
- Incorporated nonprofit Alaska Native multi-purpose community-based organizations;
- Nonprofit Alaska Native Regional Corporations/Associations in Alaska with village specific projects; and
- Nonprofit Native organizations in Alaska with village specific projects.

Proof of an applicant's nonprofit status, such as an IRS determination of nonprofit status under IRS Code 501(c)(3), must be included in the application.
